the boom and panic with a gain. The iron and steel business is too important to be managed in this way, and this is clearly understood by those who control the larger interests. The business of the country owes this class much, for their conservative action in the past and are hopeful on that account for the future that we may have some years of continued prosperity. What the country needs is not a speculative condition, but a legitimate business, and the large corporations realizing this, is our promise for the future. THE LOCKWOOD-TAYLOR HARDWARE CO.

THE OUTLOOK IN CLEVELAND.

Even the near approach of December and January, the season of the year when the Hardware trade is dullest, the prominent Hardware concerns here have experienced no decrease in business. The probable reason for this is that buyers in expectation of an advance in prices have hastened to make purchases fully three months earlier than they regularly do. This is true in all branches of the trade and the demand for screen doors, wire nails and other things which have never been great at this time of the year, has assumed surprising proportions. The retail dealers as well as the wholesale men report a big season, with the volume of business larger than ever. The fact that this has been Presidential year has had no effect on the Cleveland Hardwaremen. The Columbian Hardware Co. has moved all of its local offices to Chicago and will only operate its foundry in Cleveland. This action caused the discharge of about ten clerks, the rest of the office force being taken to Chicago. The Cleveland Hardware Co., with offices and factory at 1300 Lake Street, reports a busy season and general prosperity. The Cleveland Hardware Co. is having hard work to fill all of their orders, which were unexpected at this time of the year. Mr. Lockwood, of the Lockwood-Taylor Hardware Co., has just returned from the Convention at Atlantic City, and is ready to get back to work with renewed vigor. Mr. Lockwood is full of enthusiasm over the big increase in the Hardware business this year, and his plant certainly looked as if it were pressed to its fullest capacity. The Bingham Hardware Co. is steadily enlarging its wholesale trade and is holding its own in the retail trade. Mr. McIntosh, of the McIntosh-Huntington Co., said that the business of his company has never been better than at the present time. The Taylor Boggis Co. also announces a big season in all departments.

THE INTERSTATE PRESS ASSOCIATION.

THE PITTSBURGH TRADE.

Pittsburgh and vicinity is suffering from lack of rain. The rivers are so low as to be useless for boating except in the pools of our incomplete slack water system. At this season of the year the great need of carrying through to completion the improvement of the Ohio River is most obvious and the matter is again being pressed upon the attention of the Congressional Committee having it in charge. The coke interests are also suffering for lack of water, as they require large quantities in quenching the fires, and some plants have been compelled to suspend operations for this reason. Another effort is to be made by our Congressmen to get the government to take up the building of a canal connecting Lake Erie and the Ohio River near Pittsburgh. This is an old project which has been allowed to lie dormant for several years, but Mr. Dalzell will try to revive it at the coming session of Congress. The Holiday season is upon us again and the retail stores are making a grand display. Our working population are pretty well employed, but it has been only recently that this is the case, so that the holiday purchases are not likely to be as large as those of several years past. The improved condition among merchants continues and every one confidently expects a big year in 1905. LOGAN-GREGG HARDWARE CO.

THE CINCINNATI TRADE.

As the time approaches for the wind-up of the year's business, the results are generally forecasted among the Hardware Jobbers as showing but little profit on increased volume of business done. The expected further increase in the price of wire and nails precludes any orders being taken except for immediate consumption. That a large consumption of wire and steel goods will be met in 1905 seems to be a well-founded expectation, and that it will show itself as a commercial year and not a year for large crops is also predicted. The planters and farmers had not only larger crops, but better prices were obtained than for several years past, and from weather conditions at present and for several months previously existing, are expecting and fully prepared to meet a poor year for them in 1905. The young wheat, already damaged by a drought not experienced in half a century, its growth being stunted and meeting with the present sleety Winter weather, the poor crop is already assured. The South is holding pig iron at 50 cents higher in price than the Cincinnati

NICHOLSON FILE COMPANY
GENERAL OFFICES: PROVIDENCE, R. I., U. S. A.

MANUFACTURERS OF
FILES AND RASPS
NICHOLSON, KEARNEY & FOOT, ARCADE, AMERICAN, GREAT WESTERN, McCLELLAN, EAGLE, J. B. SMITH, "X. F.", GOLD MEDAL.

market, claiming they will not sell for less than $14.00, seeming to feel assured of the future requirements of the Steel Corporation. Mr. Berger, of the Krause Hardware Co., says the tone of the market is a strong and healthy one, and while he is not over sanguine about the showing for the profit side of business for 1904, the year of 1905 bids fair to materially make up any deficit in profits 1904 may show.

THE CHICAGO TRADE.

Since our last communication we have been very busy taking our annual inventory, which we have now got through with in good shape; we have cleaned up our office and store space and are making most active preparations for the Winter and Spring trade. Our salesmen were never more enthusiastic and we never had so many future orders at this season of the year since we have been in business. The late advances made in Pig Iron, Steel Billets, Nails, Wire, Sheet Steel, Galvanized Iron and other goods have had a tendency to make both jobbers and retailers as well very anxious to have all the orders taken as possible at present low prices, which are still prevailing on most articles in the Hardware line. Personally we have every reason for believing that our company will have the largest trade next year that we have ever enjoyed and we have bought a great many goods, as we have every confidence in the worth of goods at present prices. Our new partner, Robert C. Bialy, is very much enthused over prospective business and is fast making friends among our Western acquaintances. WELLS & NELLEGAR CO.

THE SAGINAW TRADE.

The Fall trade in the Saginaw Valley has not been up to the usual volume, but since election business has improved somewhat. The firmer tone of iron and steel has given courage to manufacturers to run their plants longer hours. Sugar factories are busy converting beets into sugar, and as price is higher than a year ago, the profits will be much better. The collar factory, tool factory, rule factory, piano factory and others are running on fair orders. The thermometer has dropped below freezing and seasonable goods are therefore in great demand. We look for a fair business for 1905. MORLEY BROTHERS.

THE MINNEAPOLIS TRADE.

Business is good with us and we think it is generally so. There certainly is an excellent outlook for the coming year for the Northwest, and we believe for the country at large. We are glad to see prices stiffen up a little and believe there will be further advances on a great many of the goods that are being sold at exceptionally low prices. We think the building operations for 1904 will show up very favorable with any year we have had, and believe the prospects for next year are better, as there is already considerable large work being considered. Minneapolis is growing and the business of Minneapolis is growing. Reports of the bank clearances, December 1st, are way beyond that of any year. Among the retail Hardware trade we think, generally speaking, the price arrangement is working very nicely, as we hear very little complaint and generally there is not much difficulty in straightening matters up when dealers' attention is called to the matter. W. K. MORRISON & CO. (Incorporated.)

THE ST. PAUL TRADE.

Conditions in our territory are good in all sections, where crops were fair, but in those where the crop was poor the trade conditions are very bad. We are glad to see an upward movement in goods. It has a stimulating effect on trade, everybody feels that advances are justified by the enormous business in sight, and are willing to pay advanced prices, believing the general prosperity means higher prices—surely the prospects for 1905 are good, and we expect them to materialize. Every one will have work and all will be happy.

We are pleased that the market is looking upward; with the advances which have been made on Tin Plate, Nails, Wire and Sheets, it certainly ought to prove to the trade that the demand is exceeding the supply. If rumor is to be credited, then the consumption during the first half of 1905 will be the greatest in the history of the country, as the writer has just returned from the East, where he received a strong impression that higher prices will surely prevail and the man who buys now will be a sure winner.

In our territory everything looks quite favorable to a good year in 1905. HACKETT, WALTHER, GATES HARDWARE CO.

THE DAVENPORT TRADE.

If good roads, fine weather, abundant crops, high prices, plenty of money, and perfect confidence are all that is necessary to make business prosperous, there can be no doubt as to the present and immediate future of the favorable Hardware conditions in this vicinity. SICKELS, PRESTON & NUTTING CO.

THE SAN FRANCISCO TRADE.

The usual early Winter lull is now due in California, but it has not yet arrived, and may not. From all along the city's retail Harware line, now that eleven months of the year's business is in sight, trade expansion is the dealers' verdict. Like as was found the report at S. J. Dean's Hardware Store, so at all the other stores the expression was to the effect that the current year's business has either been as good as was the banner year of 1903, or better, and all seemed agreeably expecting early advances in prices and counting not only on another year of splendid trade, but four years more.

STANLEY RULE & LEVEL CO.

Improved Carpenters' Tools.
SOLD BY ALL HARDWARE DEALERS.

Digitized by Google

In the four-year-old Star Hardware Co.'s store last evening, December 2d, Manager H. P. McPherson said: "Our business rounded out satisfactorily the first year, and the second showed a very material gain; the third was an improvement on the second of within a fraction of 20 per cent, and now, with the returns of the good month of December of our fourth year yet to some in, we are already ahead of our third year fully 25 per cent."

At the twelve-years-old Hardware, Tools and Stove house of John P. Brownlee expansion in all lines carried is distinctly visible. This store's business has steadily progressed from its inception, the year now in it last month's inning being already well ahead of the best of its preceding years. It is located in the St. Nicolas, one of the city's large, first-class hotels, and has two principal street entrances, extending from Market Street to Hayes. Mr. Brownlee remarked last evening along a line the HARDWARE correspondent has been hearing discussed in trade circles considerably of late. It related to furniture and carpet dealers, the larger houses that have recently added stoves to their stocks in trade, selling on the dollar monthly instalment plan, a first payment of one dollar being accepted.

For fifteen years B. A. Slocum, of Chicago, hustled about among retail Hardware dealers throughout several of the Western States east of the Rockies as traveling salesman for the Norris & Loring Hardware Co., of Cedar Rapids, Iowa. A little while ago this gentleman arrived in San Fransisco with his wife, having left his home in the big Windy City for the betterment of her health, and it will undoubtedly be pleasing news to his many friends in the trade beyond the mountains to learn, not only that the wife's health is improving, but also that within the last fortnight Mr. Slocum has found an agreeable business connection with the progressive South Side Hardware house of Bennett Bros., No. 35 Sixth Street. In response to a question regarding his impression of San Francisco, Mr. Slocum said he liked San Francisco, but from reading customs reports and bank clearings of the country's large cities he had thought, before coming and seeing, he would find 'Frisco a bigger city than it is. To which I replied:

"'Tis not Frisco's stature that makes her great,
But the greatness of her name."

INDUSTRIAL PRESS ASSOCIATION.

THE GRAPHITE TRADE.

So far as the graphite business is concerned, like most other industries, it has fallen below the output of 1903. The shrinkage in business has been due, very largely, to conditions that we are all familiar with and which affect many lines of business that run side by side. For instance, the tie-up in the building trades lessened the demand for graphite paint for steel structural work and affected foundries, which, in turn, ordered fewer crucibles and foundry facings than they otherwise would if they had had their usual demand for brass and iron goods. While we cannot say that similar conditions will not prevail during 1905, we certainly have no fear, and we look forward to the continuation of good business.

JOSEPH DIXON CRUCIBLE CO.

RECENT TRADE PUBLICATIONS.

THE AMERICAN LAVA CO., Chattanooga, Tenn., have sent us a treatise published by them in pamphlet book form on "Lava for Mechanical and Electrical Purposes." This lava, used universally in the manufacture of gas tips, and extensively in the electrical arts, is not a natural product of volcanic origin. The material is baked at a temperature of about 2,000 degrees, and is unaffected by any subsequent temperature short of that heat. It fuses with difficulty under a strong blast flame, and, they claim, has no superior in withstanding the electric arc. It is only dissolved by hydrochloric acid and is not affected at all by other acids or by alkali. From the information gained by the careful perusal of the above mentioned book, it is evident that there are many opportunities for the use of Lava outside of electric insulation. It being acid proof, and they claim, superior to porcelain and glass in heat-resisting qualities as well as in strength, and being turned cheaply in moderate quantities, without the cost of dies or molds, it is for many purposes the most practicable of the materials possessing any of the above qualities, while no other material now in use cobmines them all. As compared with wood, horn, fibre and compositions of rubber, etc., it is frequently cheaper, and they claim, always better. As compared with mica, lava lends itself to a large variety of shapes in which mica cannot be employed. The American Lava Co. state they will gladly send a copy of their book upon request.

CONVENTION IMPRESSIONS.

We have received the following letters:

C. A. WHITWAM.

(President Canadian Wholesale Hardware Association.)

In reply to your valued letter of the 26th ult., would say that I should judge that the recent association meeting, held at Atlantic City on the 16th, 17th and 18th ult., was a grand success. Firstly, as regards the large attendance, coming as they did from all parts of the United States, from Atlantic to Pacific; secondly, as to the free and animated discussions of the various subjects brought up for consideration, and, thirdly, the harmony, united action and confidence which is sure to follow such a representative meeting.

One or two questions especially were worthy of notice. One was the "Special Brand" and another the "Mode of Distribution." The former question, "The Special Brand," had its supporters as well as those who were opposed, and certainly strong arguments were advanced from each quarter, which were worthy of much thought and later action. In discussing the latter question it would appear to the writer that the greater weight of argument, both among manufacturers and jobbers, was in favor of manufacturers selling to the jobber, and the jobber in turn confining himself to the retail man. From the manufacturers present we learned that the percentage of the volume of their business as done with catalogue houses was indeed very small, and many were ready to drop distribution in that direction altogether, which must have been very gratifying to the jobbers and retailers present.

The several meetings, both the business during the day and the social in the evenings, were full of profit and pleasure, and well repaid those who attended for their time, trouble and expense.

As one of the Canadian delegates, I would say that our thanks are especially due to President Bigelow, Secretary Fernley and the other members for their courteous attention to us.

J. HARDY.

(Secretary-Treasurer of the Canadian Wholesale Hardware Association.)

Replying to yours of the 26th inst. as to my impressions of the recent convention of the National Hardware Association of the United States at Atlantic City, I beg to say that I think the association during the last year has mde considerable advance in its business.

I was greatly impressed with the discussion of catalogue houses. We are not troubled to any great extent with this difficulty in our country, and on the few occasions where difficulties have arisen we have endeavored to have them straightened out by a conference between the catalogue houses and the representatives of the manufacturers and jobbers. In the United States the catalogue houses have made such great advances and have become so large that the proposition of inducing them to obtain an adequate profit is a very large and comprehensive one, but I have no doubt by exercise of tact and discretion on both sides the matter can yet be settled.

The discussion as to trade marks and special brands was of considerable interest to me, as it has never been discussed in our association. There is considerable to be said on both sides, and the members of the Canadian Wholesale Association with whom I have discussed the matter seem to be in favor of the continuation of the trade marks and special brands as being a protection to the jobbers.

I think the object of the association in holding annual conventions is a very good one as it enables both manufacturers and jobbers to get into close conection with one and other and discuss trade matters on a little different basis from that on which they are usually discussed when the traveling representatives of the manufacturer is only present.

The representatives of the Canadian Wholesale Hardware Association look upon the conventions as great educators and I think they would be very sorry to not be able to attend same.

M. L. COREY.

(Secretary National Retail Hardware Dealers' Association.)

It was certainly a great meeting and one result I believe will be to promote more extended harmony between the several classes of trade and each will extend more charity when disposed to complain about individual transactions that may appear to encroach upon the others, I also believe that the catalogue house question is better understood, and that manufacturers realize that there is as much danger in the success of this system for them in the future as there is for us now under present conditions.

CHARLES D. CLARK.

(Clark, Quien & Morse, Peoria, Ill.)

Two things impressed me at the Atlantic City convent First, the apparent desire on the part of the manufacturer t adjust his methods of doing business that it would accomm his customer, the jobber, and the determination on the part o jobber to protect the retailer in a reasonable profit on his s also that the retailers, who are so ably represented by their mittee, were willing to allow the jobber a fair margin as lor he continued to confine his sales to their legitimate channel, to distribute his goods through the retailer, recognizing the that the jobber could easily extend his trade to large purch among the consumers. The desire seemed to be to get toge harmonize all interests and make the business of the manufa er, jobber and retailer a profitable one to all. Second, the an on the part of buyers to get their orders entered on all le lines at once, before the advance in price which all felt was to come, and there was an immense tonnage booked in a very way during the convention, and everyone believes that 1905 be a good year for the Hardware business.

T. G. WALTHER.

(Of Hackett, Walther, Gates Hardware Co.)

ST. PAUL, MINN., Dec. 3, 19

GENTLEMEN—Since returning from the meeting of the Nat Hardware Jobbers held at Atlantic City in November, I have thinking whether your readers would be interested in some observations at that meeting.

There was a goodly number of people present—about hundred—made up of Hardware jobbers, manufacturers and representatives. They all had a good time, renewing acquaint and making new ones, but throughout the days at every me of both the manufacturers and jobbers, where there was bu being done, the effort was to do good to all in the trade. quetions were: How can we be benefited, also, how can we our customers? This holds good by the manufacturer and j both.

Of course, the course is right, as every concern gets it blood (money) from and through his customer. The resul already apparent, due to the work of the Executive Committ both bodies, but will become more so as time goes on. Ma the most prominent manufacturers have agreed that the method to dispose of their goods is from manufacturer to j from jobber to retailer, and from retailer to consumer, a the effort made is toward that end.

As a jobber I can say that we must and do protect our and we will use our best effort to see that the retail trade i tected to all reasonable extents. The representatives of t tail association, Mr. Bogardus and Mr. Grove, expressed selves that they were well pleased and that the meeting s to have been called to help the retailer. The Jobbers' Assoc is the retailers' best friend and I hope that all retailers w consider it.

THE PERFECTION RADIATOR.

The Perfection Radiator, manufactured by Levi Hey & Rochester, N. Y., is designed upon scientific principles, com controlling and utilizing the waste heat bound to arise from or furnace. By the arrangement of its tubes, every parti heat is brought in contact with its radiating surface, com breaking up the current of hot air found in the center smoke pipe, and while it does not alter the draft of the ch to any marked degree, it establishes a circulation, drawi cold air towards it from all parts of the room, and contri greatly to the warmth and comfort of the space it is desi heat. No special style of stove is required to use in conn with this Radiator, nor is any great amount of skill necess install them; simply remove a section of stove pipe, pla Radiator in its stead, and enjoy the results. An adjoin upper room may be thoroughly heated by running th through the wall or ceiling, attaching the radiator and th turning the pipe to chimney. A furnace may be made to de its work, as the great loss of heat in the smoke pipe can be by running the pipe up through the house, connecting with a ator in the room above. The "Perfection" line is made i a variety of styles and sizes and at such a wide range of p to bring it within the range of all.

"Dad," said little Reginald, "what is a bucket shop "A bucket shop, my son," said the father, feelingly, "a shop is a modern cooperage establishment to which a man a barrel and brings back the bunghole."—*Town Topics.*

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Allegan, Mich.—I. A. Brown has leased the Dryden building and will engage in the Hardware business under the style of the Allegan Hardware Supply Company. Mr. Brown has been at the head of the Hardware department of the Grange store for the past seven years.

Brier Hill, N. Y.—W. R. Allen has opened up a full stock of shelf Hardware. He has recently thoroughly renovated his store to conform to the needs of the Hardware business.

Buffalo, N. Y.—Standard Hardware Lumber Co. has been incorporated; capital, $100,000. Incorporators and directors for the first year: K. F. Kremheder, A. W. Kremheder, William F. Wendt, Buffalo, N. Y.

Camden, N. J.—B. Gilpin Smith Company has been incorporated. Agent in charge, William D. Lippincott; capital stock, $50,000. Incorporators, B. Gilpin Smith, Bernard G. Waring and William Waring. The company is to deal in lumber of every kind, Hardware, lime, hair, cement, plaster, brick, stone, tile, slate, etc., and will be located at 33 North Second Street.

Castile, N. Y.—A new Hardware store under the firm name of The Grieve Hardware Co. will open the first of January. The firm is composed of George A. Grieve, George A. Grieve, Jr., and W. I. Green of Pike, the latter having been conducting a plumbing, steam and hot water heating and general repair business here for the past year.

Flint, Mich.—A new Hardware store to be known as Gundry & Perry has been opened in this place.

Milwaukee, Wis.—The Weinsheimer Hardware Co. has been incorporated. Capital stock $15,000; incorporators, Adolph Weinsheimer, Robert Freihube and Edwin Kraws.

Nashville, Tenn.—The Sapp Hardware and Furniture Company, of Lauderdale County has been incorporated, capitalized at $7,000, incorporated by C. J. Sapp, W. B. Sapp, J. W. Sanford, H. D. Colls and W. G. Lynn.

New York, N. Y.—Jacob, McInerney Company of New York City has been incorporated (Hardware). Capital, $25,000, and directors: A. N. Jacob, Charles Wellbrock and Martin McInerney, of New York City.

New York, N. Y.—The R. W. Jameison Company has been incorporated to deal in Hardware; capital, $5,000. Incorporators: Charles Angell, C. W. Jamieson, Belle B. Jamieson, New York.

Nicholson, Pa.—The Hardware firm of Ed Ace has been changed to that of Ace & Terry.

Oaklandon, Ind.—J. C. McConnell has purchased a Hardware store in the place.

Scranton, Pa.—M. J. Eagan has opened up business in his new Hardware store on Main Street.

Winnipeg, Manitoba.—Hyman Miller, Frederick William Morse, Frank Morton Morse, Alfred Reed, Hugh Amos Robson, all of Winnipeg, have been incorporated under the Dominion Incorporation act, as the "Miller, Morse Hardware Company." The capital of the company will be $1,000,000 and the new organization will go into effect on January 1, 1905. The magnificent warehouse just completed on McDermot and Adelaide is one evidence of the remarkable growth of this firm since its inception in 1882 by Hyman Miller, F. W. Morse and F. Morton Morse, who continue as principals in the new company.

Changes.

Indianola, Ills.—J. H. Kerns, who bought the Mike Fisher Hardware stock recently, is moving it to his store at Ridgefarm. It is reported that Mr. Fisher will engage in the business at the old stand.

Lebo, Kansas.—N. M. Jasper has traded his farm for an interest in a Hardware store here.

Macon, Ga.—William B. Birch has purchased a half-interest in the Hardware business formerly conducted by Etheridge & Baker, and latterly by C. H. Cubbedge, as representative of the interest that succeeded. The new firm will be composed of Messrs. Cubbedge and Birch, with the former in active charge. Mr. Cubbedge is known throughout the state as one of the most experienced men in the Hardware business.

Menominee, Mich.—The Menominee Hardware Company have almost completed the repairs upon their warehouse which was badly damaged by fire some time ago.

Osceola, Neb.—The firm of W. H. Myers and Co. have disposed of their Hardware stock listed at $10,000 to Dorsey Bros., Thayer, Neb.

West Warren, Mass.—John E. Walsh has sold his Hardware and stove store and plumbing business in Marcy's block on Main Street to Joseph D. Vigneaux of West Warren and John F. O'Leary of Warren. The new firm will be known as Vigneaux & O'Leary, continuing the business at the present location.

Springfield, Mass.—O. C. Alderman, of the Hardware firm of Alderman & Carlisle, will manage the store which the firm purchased here some time ago, and which will be conducted in connection with the business at North Adams.

Ashland, Ky.—The Ashland Hardware Company is gradually extending its business. The capital stock has just recently been increased from $10,000 to $30,000, and one additional traveling salesman placed on the road.

Bangor, Me.—On November 14, the new retail Hardware store of Rice & Miller, at 30 Broad Street, was opened. This store is an exact counterpart in size and shape to the old Rice & Miller store at 28 Broad Street; the latter will now be devoted exclusively to the extensive wholesale business of the firm. They are not only extensive wholesale and retail dealers in Hardware of all kinds, but also in paints and oils, glass, glazed windows, doors, mantels, tile, rifles, shotguns and ammunition, bicycles, builders', lumbermen's and railway supplies, lubricating oils, powder, dynamite, and all goods such as one would naturally look for in an up-to-date Hardware store.

Chardon, Ohio.—L. L. Fletcher, a well known dry goods merchant of Chardon, today bought out the Hardware firm of Kelley Bros. This firm is the oldest in Chardon, having been in business here for nearly fifty years. Charles Kelley, a partner died recently. It is understood that Fletcher will convert his purchase into a department store which will be the largest in the county.

Heno, Ohio.—Alonzo Stump sold his implement store to George W. Velte who will continue the business in the same place.

Ionia, Mich.—Charles A. Ireland has bought Robert O. Toan's interest in the Hardware and stove firm of Toan & Ireland and will continue the business under his own name.

Oriskany Falls, N. Y.—Frank Lawless has retired from the Hardware business which he has conducted for the past season, and it is now under the management of Charles W. Doyle as agent for James Lawless.

Oshkosh, Wis.—C. D. Brown of 49 Elm Street has resigned his position as traveling representative for the Simmons Hardware Company of St. Louis and has entered the firm of the Hay Hardware Company and will act as manager of the concern's establishment at 75 Main Street. The Company will soon insrease its stock just twice the amount carried at the present time.

Peoria, Ill.—After fifty-two years of continuous and uninterrupted success the veteran stove and Hardware firm of Henry Sandmeyer & Company is about to dissolve and will be known no more. All the goods that were saved from the recent fire are now being sold for what they will bring and the old firm of over half a century's existence will be dissolved. The stove and Hardware business will be abandoned and out of the ashes will arise its survivor, known as the Dickson Heating, Plumbing and Ventilating Company, with W. D. Dickson and H. Sandmeyer, Jr., as its controlling spirits.

Portland, Mo.—Mrs. John P. Fogg offers the Hardware business of her late husband for sale.

Toledo, Ohio.—Lyttle & Weeman, the wholesale saddlery Hardware firm on Superior Street are making preparations to move to their new location at 236-238 Cherry Street, near Summit. The firm will be in their new quarters about the first of the year.

Uniontown, Pa.—The Hardware store of Arthur L. Miller, West Main Street, was sold at bankrupt sale by the receiver in bankruptcy on Wednesday, November 16.

Waupaca, Wis.—F. L. Parish has purchased a one-half interest in the Pope Bros. Hardware store, and the firm will hereafter be known as the Pope Hardware Company. The new firm will make many changes and carry an increased stock of everything in its line.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Beaver Dam, Wis.—The Beaver Dam Manufacturing Co. has been incorporated. Capital stock, $25,000. Incorporators: Charles Kalkhurst, R. N. Nelson, Charles Beichl, Richard Beichl, Edward Beichl and Otto Beichl. The company will deal in implements.

Brook Haven, N. Y.—The Rex Stove Polish Co. has been incorporated. Capital, $25,000. Directors: J. R. M. Walsh, J. S. Harden, New York, and J. A. Metcalfe, Sewaren, N. J.

Chicago, Ill.—Novelty Shear Company has been incorporated; capital, $2,500; incorporators, Harold F. White, Don E. Harris, William C. McHenry.

Chicago, Ill.—Nye Toole and Machine Works has been incorporated; capital, $25,000; manufacturing machinery; incorporators, P. G. Nye, Henry Jansen, F. J. Kinselman.

Detroit, Mich.—Sherman R. Miller and George H. Paine, of Detroit, and Joseph Stubbers, of Cincinnati, Ohio, have incorporated as the Incandescent Light & Stove Company. Capital stock is $600,000. The company will conduct its principal operations in Cincinnati, and will have its principal office in Detroit.

Detroit, Mich.—The Tilden Saw Co. has been incorporated, the new firm taking over the business, etc., of Tilden Bros. & Noble, 191 Twenty-third Street. Capital stock is $60,000, all paid in. The stockholders are: George M. and William E. Tilden and George H. Crandell.

Elizabeth, N. J.—The Singer Sewing Machine Co. has been incorporated. The capital stock is $1,000,000. The incorporators are Douglas Alexander and Thomas E. Hardenburgh, of New York, and Charles H. Coleman, of Englewood. The new company, it is believed, is to be a distributing agent for the Singer Manufacturing Co.

Jersey City, N. J.—Taylor Compound Nut Lock Company has been incorporated. Office, 76 Montgomery Street; agent in charge, Charles Hardenberg; capital stock, $150,000; incorporators, J. C. Taylor, W. B. Taylor, C. B. Taylor, all of Dallas, Texas. The company is to manufacture and deal in the Taylor compound nut lock.

Jersey City, N. J.—The Braun Automatic Scale and Machine Co. has been incorporated. Capital, $150,000. Incorporators: Marie A. Braun, Frederick W. Thompson, C. W. Spear, Gustav Dietrich, William F. Braun.

Lansing, Mich.—The Lansing Manufacturing Co. has been incorporated with $50,000 capital stock, and will be organized at once. A. A. Wilbur, A. L. Harlow and A. C. Davis compose the company, which has already engaged in the manufacture of agricultural implements. The capital is $50,000.

Mauch Chunk, Pa.—The Crescent Stove and Manufacturing Company has been incorporated with a capital stock of $10,000. Incorporators, Dr. C. H. Bower, Arthur Teets and others.

Milwaukee, Wis.—Articles of incorporation of the Steitz Implement Company; purpose to manufacture, produce and prepare farming tools, etc.; incorporators are James A. Sheriffs, Leo. Torbe and H. Farnham; capital stock, $50,000.

Minneapolis, Minn.—The Bing Burner Co. has been incorporated to engage in the manufacture of lamp burners. Capital stock, $50,000. Incorporators: Edward W. Bingenheimer, Katherine S. Bingenheimer, Arthur E. Holbrook and William F. Truen.

Montreal, Can.—The International Bolt Company (Limited), has been incorporated with a capital of $100,000.

Nashville, Tenn.—The Hertzell Handle Co. has been incorporated. Capitalized at $5,000. Incorporators: F. Turner, T. McCullough, R. L. Leuther, Thomas Scanlon and Charles Gates.

Nashville, Tenn.—The Roy Lock Co. has been incorporated by Edward H. Roy, Julius C. Lusky, E. C. Kleeman, David Lowenheim and T. M. Steger. The capital stock is $20,000. The company will manufacture and deal in locks and was organized for the purpose of putting on the market a lock recently patented by Mr. Roy.

New York, N. Y.—The firm of M. J. Rubin has been incorporated. Objects, manufacture razor strops; capital, $1,000. Incorporators and directors for the first year: A. L. Silberstein, M. J. Rubin, S. C. Levy, New York City.

New York, N. Y.—The Manhattan Smokeless Furnace Co. has been incorporated. Capital, $150,000, and directors, W. H. Smith, R. M. Bickerstaff and R. C. Kraft, of New York City.

New York, N. Y.—The Pearson Foldables Co. has been incorporated (housefurnishing goods). Capital, $30,000. Directors: A. P. Perkins, F. A. Tolhurst and G. C. Hemenway, New York.

New York, N. Y.—The Standard Pulley Manufacturing Co. has been incorporated. Capital, $100,000. Directors: Reginald Hawley, Maurice Lachman and L. S. Lachman, of New York City.

Peoria, Ills.—Peoria Drill and Seeder Company has been incorporated. Capital, $125,000; manufacturing agricultural implements; incorporators, S. D. Wead, G. T. Page, A. F. Johnson.

Pittsburgh, Pa.—The Home Laundry Washing Machine Co. has been incorporated. Capital stock, $5,000.

Springfield, Mass.—The Buckland Manufacturing Company has been incorporated with a capital of $6,000 for the purpose of conducting the manufacture of tools, implements and machinery. The officers of the new corporation are: President, Henry A. Downey, West Springfield; treasurer, Leon B. Roberts, Springfield; secretary, A. E. Snow, Springfield.

Troy, N. Y.—The Jackson-Van Horne Manufacturing Co. has been incorporated by E. A. Jackson, William Van Horne, A. F. Broomhall, F. E. Scobey, Anna H. Jackson and Thomas B. Kyle. They will make weather strips. Capital stock, $30,000.

Vandergrift, Pa.—The Gerner Freezer Manufacturing Company has been incorporated to acquire patents on the Gerner continuous freezer and to manufacture and sell the same. The incorporators are H. J. Gerner, Olio Bown, E. W. Phillips, all of Vandergrift, Pa. The capital stock is $50,000.

Webster City, Ia.—A new manufacturing company has been organized and will manufacture a combination hatchet and tool to be sold to farmers. Incorporators, G. A. Smith, W. J. Zitterell, N. P. Hyatt, F. A. Edwards and H. R. Dodge, all of Webster City.

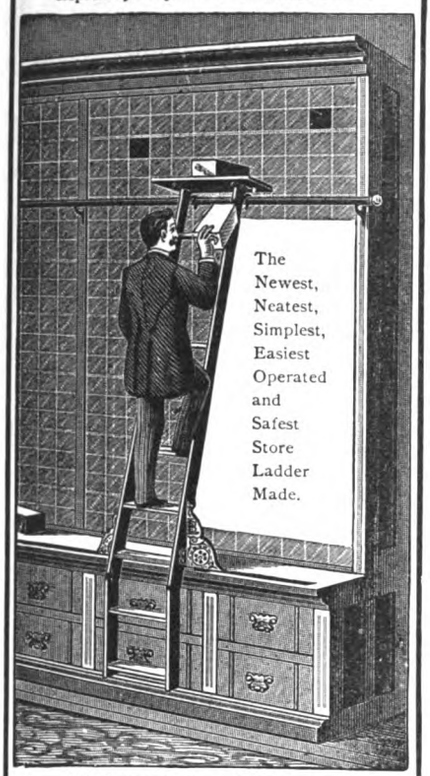
Changes.

Bridgeport, Conn.—The new factory for the Bridgeport Hardware Co., on Iranistan Avenue is practically completed and the machinery will be installed at once.

Buffalo, N. Y.—The Qilliam Hjorth Co., manufacturers of wrenches and Hardware specialties, has decided to erect a large new factory on Crescent Street.

Erie, Pa.—The Odin Stove Co. is starting work on the new plant on Twelfth Street, between Chestnut and Myrtle Streets. The building will cost about $10,000, and will be brick, two stories in height, and 50x125 feet.

Jersey City, N. J.—The Brock Wrench Manufacturing Co. has changed its office from this city to Garwood, N. J.



La Crosse, Wis.—The Dunston Ratchet Wrench Co., a firm which was established here about a year ago and which has steadily grown until its business has reached large proportions, has moved to Decatur, Ill.

Montreal, Canada.— As a direct result of the anti-dumping clauses of the tariff introduced by Hon. Mr. Fielding last session the American Axe and Tool Co. have announced that they will establish a large plant in Canada. Up to the present time the company have had their principal Canadian sales office in this city. They have been doing a large business throughout Canada, and it is to retain the Canadian market that the company will have an entirely Canadian branch. The Canadian representative of the company stated they had been looking for a suitable place to build a factory, and indications pointed to a choice between Hamilton and Toronto.

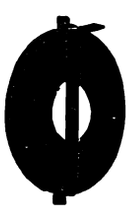
Sargent's Gem Food Chopper



ssold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Ansonia, Conn.—The Independent German Rifle Co. has been incorporated. The capital is $3.000. John W. Schumacher, Henry A. Jordan and Charles Pickhadt, all of Ansonia, are the incorporators.

Camden, N. J.—The Consolidated Sporting Goods Co. has been incorporated. Capital stock, $100,000; objects, to manufacture and sell athletic goods. Incorporators: Joseph F. Cotter, W. F. Eidell and Frank R. Hansell.

Chicago, Ill.—The Chicago Auto Manufacturing Co. is a new concern located at 4230 State Street. H. M. Burnell is sales agent.

Decatur, Ill.—Tenney & Sikking has been incorporated; capital, $25.000; dealers in bicycles and farm implements. Incorporators: W. A. Sikking, Myrtle B. Knight, F. M. Tenney.

Detroit, Mich.—H. Scherer & Co., makers of automobile bodies etc., have incorporated under a new style and are confining the business entirely to the automobile trade. The new company is called the Motor Car Supply Co., and the office is at 1256 Jefferson Avenue. They are putting up a large building, 80x1.000 feet, and will make wood and metal bodies, tops, eye protectors, lap robes and clothing.

Kalamazoo, Mich.—The Michigan Automobile Co., Ltd., will be incorporated and the old "limited" organization given up. Fifty thousand dollars is being added to the capital.

Leominster, Mass.—L. F. Burke, of Newburyport, has opened a bicycle and phonograph store at 43 Monument Square.

Madison, Wis.—The Madison Boat Co. has been incorporated with capital stock of $5,000. Incorporators: C. W. Bacon, L. W. Burch and C. H. Tenney.

Milwaukee, Wis.—The Milwaukee Motor and Manufacturing Co., 128-132 Ferry Street, has been reincorporated as the Milwaukee Motor Co. Capital, $25 000. The incorporators are F. L. Ford, Edward Warner and A. W. Warner.

Trenton, N. J.—With a capital of $125,000, the Eagle Rubber Cement Co. has been incorporated by Adolph Biller, Emil Biller and Nevin J. Loos. In addition to making and selling rubber cements, the concern will deal in bicycle materials.

Changes.

Akron, Ohio.—The Century Cycle Co. and the firm of Joseph & Gumbert have consolidated.

Anderson, Ind.—John D. Clark has purchased the interest of E. A. Beach in the firm of Clark & Beach, 1404 Meridian Street.

Buffalo, N. Y.—The Buffalo Motor Car Co. Main street, has gone out of business.

Chicago, Ill.—The Brown & Sharpe Manufacturing Co. have moved from 23 S. Canal Street to 16 S. Clinton Street.

Chicago, Ill.—The Cullman Wheel Co. moved from 521-525 Larabee Street to 1020 Dunning Street.

Chicago, Ill.—The Dow Portable Electric Co. have moved their branch in this city from 19 La Salle Street to 1339 Michigan avenue.

Cortland, N. Y.—The City Cycle Co. has rented the Cob Block, in Railroad Street, and will occupy the same about the first of the year.

Denver, Colo.—The Consolidated Supply Co.. has moved to 1562 Broadway.

Detroit, Mich.—The Detroit Auto Vehicle Co. have absorbed the Detroit Novelty Machine Works.

Detroit, Mich.—The Wheeler Manufacturing Co. have sold their saddle business to the Wolverine Leather Specialty Co., a new concern, which was recently organized. The Wolverine people will continue the manufacture of the saddle under the name Wheeler.

Frankton, Ind.—L. H. Mortsolf has been bought out by the Clinton Cycle Co.

Monroe, Mich.—The firm of Keegan & Keegan, dealers in bicycles, sporting goods, etc., has been dissolved by mutual consent, Frank Keegan continuing the business.

New Orleans, La.—A. G. Spalding & Bro., of Chicago, the largest sporting goods firm in the world, has taken a five-year lease on the building, 140 Carondelet, between Canal and Common, and will use it as their base of supplies for their Louisiana, Mississippi and Texas trade, and possibly for their Cuban and Central American business. A new front will be put on the building, which will be refitted up and elaborately furnished for a sporting goods house.

New York, N. Y.—The agency for Pierce bicycles in both New York and Brooklyn has been placed with John Wanamaker.

Oneida, N. Y.—The Oneida Rubber Tire Works have been absorbed by the Coles Machine Co.

Philadelphia, Pa.—The Supplee Hardware Co., Fifth and Market Streets, are about to add a line of automobile sundries to their sporting goods and bicycle department and will be pleased to receive quotations from manufacturers.

Reading, Pa.—Hubs, handlebars and seat posts will be included in the manufactures of the Reading Standard Cycle Manufacturing Co., Reading, Pa., and will be offered to the trade generally next season. The decision to market hubs follows the purchase of the entire hub business of Bardons & Oliver, which had long been conducted at Cleveland, Ohio, under the style the Cleveland Hub Co. The purchase includes all of the tools and machinery, and all parts of hubs on hand; also that portion that the Cleveland Hub Co. devoted to hubs for sulkies.

San Francisco, Cal.—The Mobile Carriage Co. has purchased the business of the Automobile Transit Co.

Scranton, Pa.—E. C. Bechtold sold out to Charles C. Garrison.

Springfield, Mass.—The Hendee Manufacturing Co. have secured the sole United States agency for Brooks motor cycle saddles, made in England. They have been supplying Brooks saddles with the "Indian" motor cycles which they make, during the past season, with perfectly gratifying results. All styles of Brooks saddles are handled now and sold to the trade generally.

St. Louis, Mo.—The A. L. Dyke Motor Supply Co., 311 Pine Street, have changed their style to The Original Automobile Supply Co.

Washington, D. C.—Howard A. Rhine & Co. has been absorbed by E. P. Hazleton, who is the leading dealer remaining in the capital.

Wichita, Kan.—Schollenberger Bros., 211 S. Main Street, sold entire bicycle business to E. E. Campbell, who will continue business for six months as the Schollenberger Co., at the end of which time Mr. Campbell will change the style to that of his own name. Schollenberger Bros. will continue to conduct the automobile business under the name of Wichita Automobile Co

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

BISSELL'S AWARDS...

TO THE TRADE:

As up to this point we have said nothing about the award that has been granted us at the Louisiana Purchase Exposition, and lest you might think that in the general distribution of awards that was made at the World's Fair we were completely overlooked, we beg to say that we have secured a Grand Prize, but have withheld publication of it, as in all propriety every exhibitor should, until he received official notification of the award.

The facts are, while we have taken a Grand Prize at the Louisiana Purchase Exposition, no official announcement of awards has as yet been made; no medals nor texts of awards have been given out by the Exposition management, so that anything published at this time purporting to show or convey to the trade reproductions of the medals granted exhibitors, or giving the text of the awards, enumerating the points of superiority upon which the award had been granted, etc., has absolutely no foundation in fact. From a letter received Nov. 30th from the Chief of the Manufacturers' Building, World's Fair, St. Louis, and who is a member of the Superior Jury of Awards, we quote the following: "I beg to advise that no design for the Awards Medal has yet been completed, and it would therefore be impossible for any one connected with the Exposition to furnish you or any one else even with an idea of what they will look like, for the design now being worked on may or may not be acceptable to the Exposition Company."

We have taken too many awards in the past to be thrown into a paroxysm by a thing of this kind, more especially as we do not look upon the taking of an award as an overshadowing achievement in business. What we *do* feel proud of, is to manufacture a line of carpet sweepers that are so perfect in construction, so efficient, and so appropriate for the purpose for which they are intended. as to win the approval of the general public, and which more fully attests the real merit of a commodity than any award possibly can.

"Cyco" Bearings insure positive rotation of the brush.

While the Bissell sweeper has taken the highest award in every exposition wherever it has been exhibited (including the Louisiana Purchase Exposition), we regard all this as minor compared with what our goods have achieved in satisfying the general public, in commanding the sweeper trade of the world, in establishing a record for the Bissell as the only carpet sweeper ever placed upon the market under a sound, sincere system of fixed retail prices that guarantee to the dealer a good profit.

The Bissell sweeper is preeminently the sweeper of quality and saleability on the market to-day, and has taken the highest awards in the following notable Expositions:

American Institute Exposition—1884-85-86-87-88-89-90-92.
Massachusetts Mechanics Charitable Association—1887-1892
Anglo-Danish Exposition, London—1888

THE ONLY CLEANABLE REFRIGERATOR

SEE HOW IT'S MADE ?

THE "GURNEY"

The "Gurney" can be kept absolutely pure and clean because of its Removable Galvanized Ice Compartment.

The "Gurney" is packed with MINERAL WOOL and constructed in the best possible manner, and will show, by actual test, the lowest average temperature with the least consumption of ice.

The "Gurney" is leader in style and finish, and first class in every particular.

MADE WITH ZINC OR ENAMEL LINING

COLD FACTS

THAT MAKE WARM TRADE

A Refrigerator is no longer considered a luxury but a necessity.

A good Refrigerator is a source of economy, a poor one an extravagance.

The best is the cheapest; you can't afford to sell a poor Refrigerator.

A poor Refrigerator consumes ice but does not refrigerate.

A poor Refrigerator is a delusion and a snare with nothing to recommend it but price.

The price is soon forgotten, the quality never.

A poor Refrigerator cheats both the dealer and his customer.

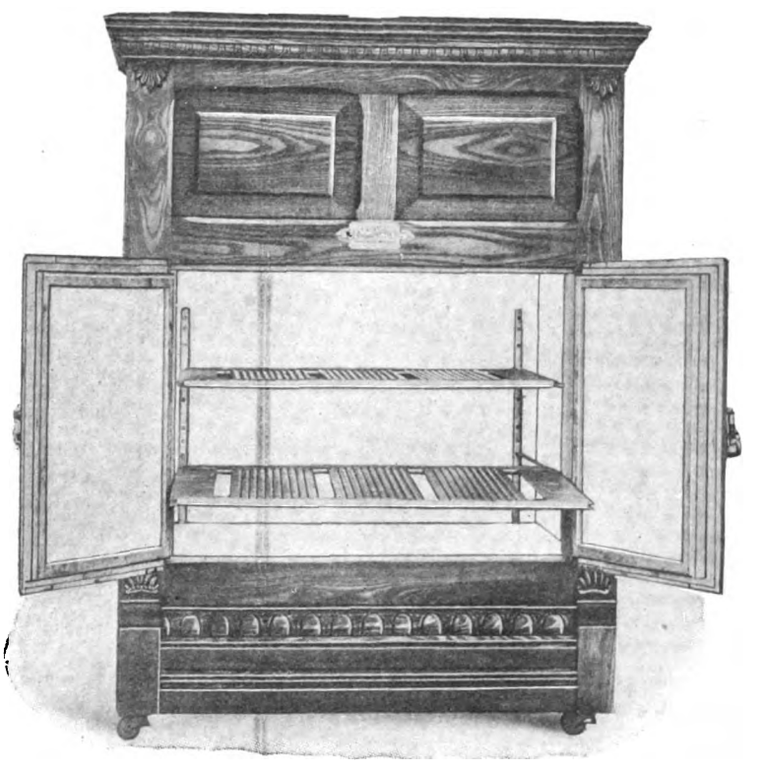
A low priced piece of furniture may answer the purpose for which it was made as well as more costly.

This is not true of Refrigerators.

In buying a Refrigerator the first cost is not the last cost.

A Refrigerator to be satisfactory must be so constructed as to be economical in the use of ice and in the preservation of food.

A profitable and satisfactory refrigerator trade can be built up only by handling high grade honest goods.



The "Gurney" is the best.

The La Belle is the highest grade refrigerator of its class.

The Gurney Patent Chinaline Refrigerator is the height of refrigerator perfection.

The Gurney Refrigerator Co. leads the world in the manufacture of Refrigerators because the "Gurney is the Best."

The Gurney is sold on the exclusive agency plan. One dealer every town.

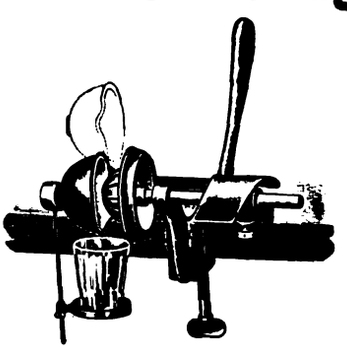
Our Trade Mark Protects You

The "Perfect Handle" Screw Driver

There is no Screw Driver on the market so well made, or so well adapted for general use as the "Perfect Handle."

Note the one piece drop forging—the style of handle—the beauty of design—the solidity.

Our unqualified guarantee is back of each of them. Let's give you further particulars.



THE H. D. SMITH & CO.
Plantsville, Conn.

Our Catalogue is "Our Drummer."

It lists the largest line of general merchandise in the world, and is of special interest to hardware dealers. Its prices cannot be duplicated by any other house. It is free to any hardware merchant. Ask for catalogue CC461. : : : : :

BUTLER BROTHERS,
New York. Chicago. St Louis.

While Looking About

for a Lemon Squeezer, compactly put together, working rapidly and thoroughly—unbreakable—Look at

"The Leader"

Has no loose parts—always ready to squeeze.

Two styles—nickel-plated and japanned.

MENTION "HARDWARE"

THE LEADER MFG. CO., Hartford, Conn.

A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.

J. W. WHITE.
General Industrial Agent,
Seaboard Air Line Railway,
Portsmouth, Virginia.
We have a good location for your plant.

HURWOOD BRAD AWLS

Are of the lasting kind. One piece of best quality crucible steel extending from point to head and a rivet through ferrule, wood and steel, have given our Brad Awls the name and fame of outlasting six of any other kind made.

Built for business they are business builders.

* *

Our catalog tells an interesting tale about Hurwood Tools. You ought to have a copy for reference. Shall we send it?

Rural Mail Boxes

THE HESSLER

BEST KNOWN. BEST MADE.

Most durable as well as the cheapest fully approved Rural Mail Box on the market. Do not be deceived by manufacturers who claim to have a Box similar in appearance to the "Hessler." Just compare the Boxes and convince yourself. The Hessler Box is storm and dust proof, has the only signal that will not get out of order. It costs you no more than the cheaper made boxes. Write for full description and prices.

MEASURING TAPES.

We beg to announce that our line of Measuring Tapes has been made complete by the addition of

"Favorite" Cotton Line Tapes (Ass skin)

"Tip Top" low-priced Steel and Linen Pocket Tapes.

Our assortment of Tapes should now meet every demand as it comprises a greater variety than any other maker's. Each grade represents the highest standard of its kind.

We are the Largest Manufacturers in the World of all kinds of : : **FORKS, HOES, HOOKS, RAKES and HAND AGRICULTURAL TOOLS.**

Our Standard Brands are:

ASHTABULA, OTSEGO, UTICA, GENEVA, BOLLES, ELY, WITHINGTON & COOLEY, HARRIMAN, BATCHELLER, FORT MADISON, PHILADELPHIA, COLUMBUS.

The above brands always denote the highest point of excellence in quality that can be produced with the best of material and men who have had a life-long training in the work, and they are only used on our high grade goods. There is none better—few, if any, as good. When you buy any of the above brands you always know that you are getting quality. *Write us for onr new Catalog "C."*

AMERICAN FORK & HOE COMPANY, Cleveland, Ohio.

You Will Find

LEHMAN CARRIAGE HEATERS and Coal contain Best Material and Workmanship.

They are wanted by Horsemen, Farmers, Physicians and all who have use for a Vehicle Heater.

250,000 LEHMAN HEATERS are in use.

They burn LEHMAN Coal (which gives no smoke or smell) at a cost of 1-2 cent per hour, and it is guaranteed to be the BEST fuel made. **The Lehman Heater and Coal is the old reliable, having been on the market TWENTY YEARS.**

Beware of imitations. Our new booklet contains special news of importance to Dealers.

Send for it, mentioning this paper.

NEW

PUTNAM

Horseshoe Nails.

IN view of the fact that there is room at the top, and a good demand for a high class Horseshoe Nail, we wish to bring it to the attention of the trade that we are making but *one grade* of Horseshoe Nail (THE NEW PUTNAM,) which is first-class in every respect, and superior to any that have ever been previously offered, and that we are, therefore, *maintaining prices*, and that our machines make no seconds or inferior nails with which to flood the market and create unsatisfactory and unprofitable conditions; nor have we an overstock to dump to add to the demoralization.

In this relation, it should be borne in mind that the difference in price between our nails, and that of the very cheapest now sold, amounts to only 1½c. *per horse.*

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

HARDWARE

The Goulds Triplex Boiler Feed Pump, operated by a 40-horse power Electric Motor, located in the boiler house of Machinery Hall at the World's Fair, St. Louis, has been purchased by the Lewis & Clarke Exposition Co. to be used for the same purpose at their Exposition to be held at Portland, Ore., next year. The Goulds Manufacturing Co., of Seneca Falls, N. Y., was awarded a Gold Medal for this pump, which supplied feed water for boilers of 4,000 H.P. in the boiler house that furnished the power for Machinery Hall. The Goulds Manufacturing Co. was also awarded three other Gold Medals, one for their exhibit in Machinery Hall of Power Pumps and one each for their exhibit of Hand Pumps, and Sprayers and Spray Fittings in Horticultural Hall.

✤

The Century Cash Register Co., Ltd., of Detroit, Mich., announce that all suits for infringement entered against them by the National Cash Register Co. have been withdrawn.

✤

The Pope Bicycle Daily Memorandum Calendar for 1905 contains a memorandum leaf for every day in the year and 365 original sayings in favor of good roads, good health, outdoor exercise, and that great vehicle of health-giving, the modern bicycle, by our most eminent living men of marked accomplishment. These sentiments, gathered from the minds of people whose thoughts represent the highest type of evolution, urge us to partake of the open air life that only the bicycle can give, with full freedom from care and from crowds. The calendar is free at Pope Manufacturing Co.'s stores or any of our readers can obtain it by sending five two-cent stamps to Pope Manufacturing Co., Hartford, Conn., or 143 Seigel Street, Chicago, Ill.

✤

The Black Satin Polish Co., manufacturers of Black Satin Stove Polish, are now making arrangements to advertise their product locally, placing the name of the local dealer at the bottom of each advertisement. Progressive dealers who are taking advantage of this opportunity, are getting some good advertising for a rapidly selling article.

✤

The Hamden Manufacturing Co., Hamden, Conn., have advised us that designing to handle all their goods direct from factory from the present time, they have severed the relations formerly existing with the J. C. McCarty Co., as selling agents for their line.

✤

The Spencer Wire Co., Worcester, Mass., has established a department for the manufacture of music wire, tempered steel card wire and all kinds of similar high-grade wires which the company has never before attempted to make. The department will occupy a new building already completed, 50 by 125 feet, and three stories. It contains an oil plant for tempering, installed by Gilbert & Barker, Springfield, Mass.

✤

The Voorhees Rubber Manufacturing Co., manufacturers of high-grade mechanical rubber goods, hose, belting, packing, valves, tubing, mats, mattings, etc., also of the celebrated "Nubian" packing and gaskets, of 18-40 Bostwick Avenue, Jersey City, N. J., have been awarded the gold medal for mechanical rubber goods and the highest award for rubber belting at the Louisiana Purchase Exposition, 1904.

✤

A. Treadway & Sons Hardware Co., of Dubuque, Iowa, announce that they are buying out the business of the Schreiber, Conchar & Westphal Co., and that the transfer will be made about January 1st. It is stated that the latter concern will retire from the jobbing Hardware business, this department being taken over entirely by Treadway & Sons, who will carry a general line of Shelf and Heavy Hardware, Tools of all kinds, House Furnishing Goods, Agricultural Tools, Sporting Goods, etc. This concern was established in 1853 under the name of Andrew & Treadway. In 1889 Mr. Andrew sold out his interests and the company became incorporated under the present name. They will occupy the buildings now used by the Schreiber, Conchar & Westphal Co. in addition to their present quarters, giving them double their present floor space.

CATALOGUES WANTED.

Albert Rothermel is about to open a Hardware store at 686-688 East 149th Street, New York City, and desires catalogues of everything in Hardware. The location of the new store is the business center of the Bronx, and consequently Mr. Rothermel starts in business with excellent chances of success.

L. & I. J. WHITE COMPANY.

The L. & I. J. White Company, of Buffalo, N. Y., manufacturers of Edge Tools and Machine Knives are erecting a large addition to their forge department 135x80 feet in size and will equip same with the most modern appliances for tool forging, etc. In addition to the Forge Department extension, the company has also added quite largely to its machinery equipment both in the Iron Machine and Wood Machine Departments during the past few months and additional track and switch facilities have been provided in connection with the new building. This addition is necessary on account of the rapid increase in the company's business, both domestic and foreign. New Agencies in South American countries—Equador, Chili, Peru and Argentine Republic—have recently been established, as well as in British Guiana, West Indies and Porto Rico. The company also enjoys constantly growing trade in South Africa and Australia.

A CALENDAR WORTH HAVING.

Harrington and Richardson Arms Co., Worcester, Mass., sent us one of their extremely handsome and artistic calendars for the coming year, showing a very good looking young lady, with pronounced outdoor tendencies, radiant with health, holding her Favorite rifle and caressing her handsome dog who occupies the center of the picture. The calendar is a very attractive one and should be in the hands of all our readers. The Harrington & Richardson Co. state if any of our readers desire a copy, they will be pleased to mail one without charge—while the supply lasts—if they will mention HARDWARE in their application.

SOUTHWESTERN HARDWARE AND IMPLEMENT ASSOCIATION.

The Southwestern Hardware and Implement Association will hold their annual convention in Kansas City on January 17th to 19th next. A large number of dealers in Kansas, Missouri and Oklahoma are expected to attend this convention, and take an active part in its proceedings.

A VALUABLE SPECIAL NUMBER.

The *Affarsvarlden*, published at Stockholm, Sweden, have issued, under date of November 25th, a special number of about 300 pages, profusely illustrated, the graphic contents of which fulfils the title of the paper, as they give a wide number of the Industries of Sweden, which are referred to extensively, accompanied by characteristic engravings which assist in a more general way to convey the requisite information. Many portraits of the leaders among the manufacturers are shown, and enable the reader to pick the "Captains of Industry" in every branch of manufacture to which attention is called. Statistics are given of a number of Sweden's important industries, views of the largely endowed plants, from cellulose to wood pulp, and from machinery to shipbuilding. This is a Special Number of profound interest and reflects great credit upon the publishers.

A NOVEL CALENDAR.

The American Sheet & Tin Plate Co., Pittsburgh, Pa., have issued a very novel and characteristic calendar which they denominate as their "M. F. Roofing Tin Calendar." With a red background, they have a roofer represented in his working garb, holding up his cap and looking as though he were enjoying the quality of tin he was using, and of which he is saying "M. F. Roofing Tin, every time, all the time, for all time." The calendar is contained in a booklet, the monthly leaf of which is kept open in a novel way that must be seen to be appreciated. The company say they have a large number of these printed and shall be pleased to send one to any person who will plainly write his name, business and address on a postal card and mail the same to the advertising department of the company. They prefer receiving postal cards as they greatly facilitate the handling of the many requests they will undoubtedly receive. Send for one.

JOHN S. LENG'S SON & CO.

Owing to their inability to renew the lease of their present quarters at No. 93 Reade Street, John S. Leng's Son & Co., the well known New York jobbers of Bicycle Sundries, will remove to No. 33 Murray Street, corner of Church Street, where they will have entrances on both streets. There will be enough room at the new location so that the Steel Tubing business can be conducted there, which is now located at No. 4 Fletcher Street where the firm has been in business for forty-two years. They hope to be in the new store before January 1st.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review

The approach of the first of January forms a natural period in which to make changes in prices, and many manufacturers have their Price Lists in hand for revision. The leading goods, about which they are the most solicitous, have already been handled with an upward tendency in price. A number of minor changes have been made and the trade is already prepared for the most noted, a reluctance to advance too promptly in the present condition of the market being a marked characteristic. Manufacturers are satisfied for the present to call in their special quotations on some lines of goods which were made a month ago, indicating a stiffening of prices, not alarming enough to stop orders but assuring a firmer market.

The advance of another dollar a ton to which the Nail and Wire markets have been subjected, was taken by the trade to mean they would gradually advance the rate to the price that obtained before the decline, and orders are going forward with that idea in view. Each successive change in price is not of a startling character and continued buying is a natural result. With the prospect ahead of continued prosperity, the merchants are giving close attention to plans upon which they intend to make minor changes, adding to the scope of the business, extending its lines and frequently showing a succession of new plans that will be heard from later.

It is considered wisdom of the highest kind not to overbuy, no matter what the temptation is; the better way is to keep the regular stock well assorted, and there are certain lines, such as Steel Goods, Shovels and Spades, Ice Cream Freezers, Lawn Mowers and Screen Doors and Windows, that deserve to be looked after closely. Trade cannot be confined to single lines of endeavor, but must be made to embrace everything analogous to the business, out of the sale of which a profit is to be expected. To the above lines attention should be directed and orders should be given early enough to ensure prompt delivery in the Spring as they are wanted.

Great preparations have been made by the trade to catch the Christmas shopper. Never was the assortment of goods so elaborate nor the detailed display so significant of what can be found in a Hardware stock important enough and useful enough to make an attractive bid for fitness and value. From Safety Razors to Tool Chests; from Carpet Sweepers to Chafing Dishes, everything that the imagination can suggest to add to the happiness of mortal existence will be found in a Hardware store, and money will be well expended on the articles of utility and luxury there displayed without a single regret at making a purposeless purchase.

The slump in the price of cotton occasioned by the phenomenal crop will be the worst feature which the Southern Trade will have to contend with this year. They could not expect to produce the largest crop possible and sell it for the top price. An increased acreage was planted, and the size of the crop was speculated on in advance, with dire results. When they settle down to ascertain results, they will find the price an average with those large crop years formerly known. Many of the planters disposed of their cotton in anticipation, and they were wise in their day and generation. It will certainly have a depressing effect on the Spring trade if it affects collections. Let us hope those wise men who make a study of conditions will yet see a ray of hope in the reaction that is bound to come.

THE FOREIGN COMMERCE OF THE UNITED STATES.

The total foreign commerce of the United States in the year about ending seems likely to exceed that of any preceding year. The total exports will probably fall slightly below those of last year and of the years 1900 and 1901, but as the total imports will materially exceed those of any preceding calendar year, the grand total of imports and exports combined will probably be the largest in the history of our commerce.

The statement of the November commerce and of the eleven months ending with November, just issued by the Department of Commerce and Labor, through its Bureau of Statistics, shows imports for the eleven months ending with November, 1904, amounting to 939 million dollars, against 918 millions in the corresponding months of 1903, 875 millions in the corresponding period of 1902, 800 millions in the corresponding period of 1901, and 760 millions in the corresponding period of 1900. Thus the imports for the full year seem likely to exceed those of any preceding calendar year, and for the first time in the history of calendar years imports will exceed one billion dollars in value. The total value of merchandise imported in the calendar year 1903 was 995 million dollars; in 1902, 969 millions; in 1901, 880 millions; in 1900, 829 millions; in 1899, 799 millions, and in 1898, 635 millions.

While the import record seems likely to exceed that of any earlier calendar year, the total of exports for the eleven months ending with November, 1904, is about 5 million dollars below the figures for the corresponding month of 1903, and 23 millions below those of the corresponding period of 1901. This slight reduction in exports is of course due to the great falling off in exports of breadstuffs, which amounted in the eleven months ending with November, 1904, to only 82 million dollars, against 176 millions in the corresponding months of 1903, and 252 millions in the corresponding months of 1901.

The fact that the grand total of exports falls but 5 million dollars below that of the corresponding months of last year, in spite of the loss of 94 million dollars in exports of breadstuffs, indicates a very large increase along other lines. The completed figures of the Bureau of Statistics indicate that this increase occurs chiefly in raw cotton and manufactures, cotton exports for the eleven months being about 14 million dollars in excess of the corresponding months of last year, while the ten months' figures of manufacturers already available show a gain of 64 millions over the exports for the corresponding period of last year.

Digitized by Google

The figures of imports and exports for the single month of November also present an unusual record. The total imports of the month amount to 95 million dollars, against 77 millions in November, 1903, 85 millions in November, 1902, 72 millions in November, 1901, and 65 millions in November, 1900, the total for November, 1904, being thus larger than in any preceding November. On the export side the total for November is 157 million dollars, against 160 millions in November, 1903, 125 millions in November, 1902, 136 millions in November, 1901, and 136¾ millions in November, 1900, the total for November, 1904, being thus larger than that of any preceding November except that of the year 1903.

The following table shows the total imports and total exports in the month of November in each year from 1898 to 1904:

NOVEMBER.	IMPORTS. *Dollars.*	EXPORTS. *Dollars.*
1898	52,096,828	129,797,965
1899	70,098,931	123,755,911
1900	65,354,040	136,702,324
1901	72,566,307	136,455,639
1902	85,386,170	125,200,618
1903	77,061,806	160,455,590
1904	95,157,656	157,679,570

The following table shows the total imports and total exports of the United States in the eleven months ending with November in each year from 1898 to 1904:

ELEVEN MONTHS ENDING WITH NOVEMBER.	IMPORTS. *Dollars.*	EXPORTS. *Dollars.*
1898	579,825,309	1,117,695,672
1899	728,233,567	1,152,199,938
1900	760,452,507	1,332,056,242
1901	800,490,639	1,328,434,321
1902	874,959,883	1,212,693,530
1903	917,782,381	1,310,120,326
1904	939,347,370	1,305,738,374

"Another mineral which has come into notice within the last few years in consequence of its industrial applications is monazite, from which are obtained the rare metals, thorium, lanthanum and didymium, used in the manufacture of mantles for gas lighting. Monazite is found in the form of small crystals, mixed with sand in the beds of streams, where a certain class of granite rocks have disintegrated, and both in Europe and America it seems to be confined to those regions which have escaped glacial action.

"Something of a sensation was created in England a year or so ago by the widespread sickness which apparently resulted from drinking cheap beer. It was believed that the trouble came from the use by the brewers of glucose from which the sulphuric acid had not been altogether eliminated. The acid, in turn, was suspected of being tainted with arsenic, a common impurity in that article when manufactured out of Spanish pyrites. Since the first sensation over the trouble subsided, the theory has been advanced that it was selenium and not arsenic which poisoned the beer. That substance is also present in Spanish pyrites, and has been recently found in some of the products of British breweries. Thus another comparatively unknown metal has been brought to public attention. Selenium is not only very rare, but thus far has found little use in the arts. One of its qualities, the variability of its electric conductivity under the influence of light, has been turned to account by many inventors who were trying to transmit pictures by telegraph. Selenium costs about $13 a pound just now, and is, therefore, more valuable than silver.

"In the whole catalogue of 'chemicals, minerals and rare elements,' perhaps no name is more puzzling to the uninitiated than 'infusorial earth.' Still, if he knows much about dynamite, he is aware that this is the stuff employed as an absorbent to hold the nitroglycerine of that famous explosive. It was Nobel, the great Swedish engineer, who founded a number of attractive prizes to encourage scientific progress, who first discovered the trick by which nitroglycerine could be safely handled. Infusorial earth is composed of the silicious shells of minute vegetable organisms, diatoms which reveal wonderfully complicated and beautiful structures under the microscope."

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Libel.

QUESTION: A newspaper published concerning a man called to attend as a juror at a trial and challenged by counsel: "Expelled juror is a Rogue's Gallery man. Former juror No. 3 was once wanted by police for forgery. Sensation stirs the Court." Has he a cause of action against the newspaper?

REPLY: It is held that any publication concerning a man, the tendency of which is to charge him with the commission of a crime or to hold him up to public shame, contempt or ridicule or exclude him from the society of his fellows, is an actionable libel. Assuming that these statements are false, we think they furnish the basis for a cause of action. While it is undoubtedly true that a newspaper will not be liable for the publication of a true report of a judicial proceeding, unless the publication was maliciously made, we do not think that these statements could be regarded as in any sense a report of a judicial proceeding. We therefore should advise suit.

Conduct of Business Under Assumed Name.

QUESTION: I have recently purchased a business which was for years conducted under the name of "A, B & Company." I desire to continue to conduct this business under the same name without associating anybody with me as partner. Is there any objection to my doing so?

REPLY: In the absence of a statute there would be no objection to your continuing the business under the old firm name. The statute of this State provides, however: "Any person or persons shall hereafter carry on or conduct or transact business in this State under any assumed name or any designation, name or style, corporate or otherwise, other than the real name or names of the individual or individuals conducting or transacting such business, unless such person or persons shall file in the office of the Clerk of the county or counties in which such person or persons conducting or transacting or intending to conduct or transact such business, a certificate setting forth the name under which such business is or is to be conducted or transacted and the true or real full name or names of the person or persons conducting or transacting the same with the post office address or addresses of said person or persons." Any person who carries on a business in this State in any other than his own name, and fails to comply with the provisions of this Statute, is guilty of a misdemeanor.

QUESTION: I sold a man a mowing machine for $45. I took his order on a regular form furnished by the International Harvester Co., which states that I was to ship him a 6 ft. Verticle Mower and upon receipt of same he was to pay me $45 or give me his note. The time for payment had passed and I wrote him that we wanted a settlement and after awhile he gave me his note due in sixty days. I placed this in the bank for collection and yesterday the sheriff levied on his goods and sold the Mower I sold him—the man that I sold the mower to—at the time of signing order, stated that he owned sixty-six acres of ground and a house total value $3,900. Shortly after the sheriff had levied on the goods his wife came to me and said that her husband didn't know that she had come to see me, but she wanted to tell me that the sheriff had levied on the goods and she didn't think there would be enough to settle the judgment, as she owned the furniture and wanted me to try to reclaim the mower and wanted to know who the mower belonged to and I told her that the mower belonged to her husband, that is, he had given me his note in settlement of same. She said that we could not collect anything from him after the sale. Kindly advise what course I can pursue.

REPLY: We have no doubt that this was an absolute sale and that the title to the Mowing Machine vested in the buyer. If the mowing machine did not belong to you but did belong to the man to whom you sold it, it follows that his creditors would have a right to attach or levy upon the machine for his debts. There is only one possible ground on which you have any chance of getting back the mowing machine in this case. You state that the buyer represented to you at the time of signing the order that he owned sixty-six acres of ground and a house valued at $3,900. If those representations were false and were made for the purpose of inducing you to sell the machine, they constituted a fraud on the part of the buyer and entitled you to rescind the sale on learning of the fraud by notifying the buyer and tendering back the note received. But this right of rescision cannot be exercised as against a bona fide purchaser for value. If the mower has been sold on execution to a purchaser in good faith and for value, your right to rescind and recover the same is absolutely lost. If, however, the mower is still in the hands of the sheriff you can rescind and recover it by notifying the sheriff, provided the levy was made in the collection of a debt contracted prior to the sale of the mowing machine. (Kitchen vs. McCloskey, 150 Pa. 376). But if the machine was levied upon by a creditor, who became such subsequent to its sale by you, you cannot rescind the sale or contend as against the sheriff that it is your property. (Schwartz vs. McCloskey, 156 Pa. 256).

THE CHILD—That policeman reminds me of papa.
NURSE—How so?
THE CHILD—He winks at you just like papa does.

TALKS WITH RETAILERS

By AMOS

HARDWARE RESOLUTIONS.

Good resolutions for 1905 are now in order. Thousands of people are making up their minds that on Sunday, January first, they will "Turn over a new leaf," start in with a clean sheet, and do better during the year. I wonder how many Hardwaremen are engaged doing this. I don't mean to suggest that the present policy of Hardware dealers is all wrong, nothing of the kind; but I do believe that there is room for some improvement, and I wish to submit in the following a set of resolutions that might well be adopted by many Hardwaremen. The general run of New Year's resolutions are to the effect that certain habits are to be set aside and be indulged in no more. I shall take the opposite course and suggest that certain new habits be formed. I suggest that during 1905, the Hardware Dealer "Get The Habit" of:—

(1)—Keeping a full stock of those articles demanded by his trade and such new things as can be sold in his vicinity. The Dealer can't expect to prevent his neighbors buying goods of a Mail Order House, if they fail to find the goods wanted at his store.

(2)—Keeping up to date in stock and business methods by reading Trade Journals, not only the editorial pages, but the advertisements as well.

(3)—Making collections promptly and discounting bills. No dealer's customers will think any more of him for letting their accounts run, without protest, for an unreasonable length of time, and the Dealer who pays promptly not only saves money by so doing, but besides receives better attention from Jobber and Manufacturer.

(4)—Making the interior of the store attractive—a comparatively easy matter with a stock of modern Hardware—but it takes persistence, push and perspiration.

(5)—Keeping the store windows clean and full of attractive displays, changed at frequent intervals.

(6)—Getting a hustle on every day in the week in the endeavor to bring down to a mighty small minimum the business of Mail Order Houses in the Dealer's vicinity.

(7)—Advertising regularly, persistently and intelligently, in local papers, by circulars, painted signs or any one or all of the many methods. This means some expense, and plenty of hard work, but it should be remembered that the Catalogue House would be an absolute impossibility without advertising.

(8)—Using plain talk in writing advertisements; the same kind that is used over the counter; the kind that is understood by the Dealer's customers; this means truth as well as distinctness.

(9)—Changing advertisements in local papers; it don't cost the Dealer any more to have a new ad in every issue of the different papers used, except for the time required in writing, and in the average stock of Hardware there is sufficient material for a dozen new ads for every day in the year.

(10)—Co-operating with fellow-dealers in all movements for the good of the trade. The old saying, "In union there is strength," applies most forcibly to the Hardware trade just now. Individual effort is absolutely necessary, but without united effort, little of real good can be gained for the trade as a whole. The State and National Associations are in a position to accomplish great good and they should receive the full support of every Hardware Dealer.

(11)—Sending to HARDWARE photographs of attractive windows or interiors, clippings of advertisements or samples of circular matter, experiences in store management, Catalogue House Competition or the particulars concerning any method of doing business, the knowledge of which will be of assistance to brother Hardwaremen. Don't call this "giving away business secrets," for every dollar lost by giving ammunition to competitors will be made up many times over by the good contributed to the trade at large.

(12)—Doing unto brother Hardwaremen as you would have them do to you.

* * *

The John E. Bassett & Co., of "Ye Olde Hardeware Store," New Haven, sent out to their Trade at the opening of the Holiday Season, a handsomely printed booklet, of which the following is the introduction:

> In this very practical age of ours there is little room for myths among grown-ups. Even our ideals do not roost very high above its level. And the practical people of this practical age, losing their own myths, are taking away the children's, so that even the belief in good old Santa Claus is leading a precarious existence.
>
> Ar'n't we too practical about it all and isn't it this practical standpoint that is making the twenty-fifth day of December the annual "swapping day" instead of the day of gift giving? Ar'n't we also losing the pleasure of giving as we lose sight of the sentiment that should prompt it?
>
> Let us bring ourselves back to the Santa Claus idea and get a new hold on the spirit of giving that is typified by the old gentleman with the reindeer, while we act as his assistants in the distribution of gifts. You owe it to the children at least to back up the old fellow.
>
> We want to tell you in the following pages of the many things we have that will help you to carry out the idea.

Following this, seven pages are devoted to Christmas Hints, all written in an exceedingly smooth "talky" style, and on the last page is given a list of prices of special interest to Christmas shoppers.

AFTER THE HOLIDAYS.

The man who knows how and when to advertise, who knows what to say and how to say it, will be one of those who are successful in handling a business campaign.

After the holidays there is sure to come a short period of depression in trade. Business almost stops in some lines, especially in smaller places. The supply of ready money has been greatly lessened by Holiday buying, but the people will soon have more. People must still eat, and drink, and purchase the necessaries of life. People will still look with longing eyes upon the luxuries of life. People still read advertising, and look in the windows. Therefore, merchants should still keep the advertising mill grinding away at about the usual speed. Don't discontinue the advertising in January, February and March. It's the man who hammers away with a new, interesting story every day and every week who is the one to win the business in the end.

The average business man in the small town is backward about spending money for advertising in the dull months of the year. He waits until business prospects are better in the hope that he may reap a larger return for his investment in publicity. If he advertises at all he will often neglect his space, expecting the people to continue their interest in his store when he has not enough interest in it himself to call their attention to the special values he has given some thought to preparing for them. When he expects a busy season he takes a large space to try and overcome the effect of his apathy during what he termed a dull season. This sort of advertising is quite as expensive as if the merchant kept at it day after day or week after week. Let the merchant change his advertisement each issue; say something bright which will interest those in the town, get his store talked about and make it headquarters for those seeking values, just the same in January and February as in the holiday season, when he was looking for the great event of Christmas.

The live City department store knows

NO DULL SEASONS,

no dull days, in fact. Of course, there are certain days or certain months when trade is somewhat lighter, but by the persistent use of large advertising space the up-to-date "big store" makes almost every day a busy one. Time was when these stores had dull days, but some live merchant with plenty of nerve made up his mind that when trade was dull, was the time to hustle harder for it—a very simple idea—but he carried it out and the other fellows followed suit, with the result already mentioned.

The Hardware store is filled with good things to advertise and the live, brainy Dealer can find just as good ad-writing material in the first three months of the year as during the other nine.

We reproduce herewith five advertisements of the Pierce Hardware Co., of Taunton, Mass., and it is doubtful if the most severe critic of Retail advertising could honestly offer a serious objection to any one of them. Each ad treats of either one subject alone or a series of closely connected subjects. Prices are given throughout and enough of the right Kind of "talk" to put the reader in an inquiring frame of mind. Perhaps one of the best features of these advertisements is the fact that in each case the space used depends upon the amount of matter in each ad. In other words, the ad is written first and the printer given instructions to set it up in a certain style, without limiting him to any particular space. The "Cider Press" ad occupies ten inches, double column; the "Kitchen" ad, nine and a half inches, double column; the smaller ads, six inches, single column each. In writing us, at our request, concerning their advertising, the Pierce Hardware Co. says:

Digitized by Google

"The spaces used are surrounded by reading matter, which is very important, as it gives the ad more prominence. We try to adhere strictly to seasonable goods, but in the off seasons usually push some specialty that can be advertised at most any time of the year.

"In constructing an ad it is drawn out as near as possible to the way in which the writer wishes it to appear in print."

Cider Presses

The season is far enough advanced now for you to be thinking of making cider. If your old press is worn out or if you are going to start in this season it will be worth your while to look at our stock of presses.

PRICES $9.50, $15.00.

WINE PRESSES
$4.50, $5.50.

Baskets

We have baskets for all purposes. They are hand made and are very strong. Some with covers and others without.

COVERED BASKETS
15c. 17c. 20c.

1 BUSHEL BASKETS
25c. 30c.

Fruit Pickers

For hand picked fruit a wire fruit picker is a very convenient article, as one can pick the fruit while standing on the ground

25c. EACH.

The Pierce Hardware Co.

LABOR SAVING DEVISES FOR THE KITCHEN

THE THREE MINUTE BREAD MIXER

A MOST USEFUL ARTICLE FOR THE KITCHEN that will thoroughly mix and kneed BREAD IN THREE MINUTES without putting hands to THE DOUGH. PRICE, $2.25.

APPLE PARERS that pare, core and slice apples 85c

APPLE PARERS that pare apples ..... 67¢ This machine is made extra heavy

PARING KNIVES
We have two grades of paring knives. The Prices are
10¢ and 15¢

THE PIERCE HARDWARE CO.

WHIPS.

IT HARDLY seems possible to say anything about whips, but if your horse is getting lazy and the usual cluck will not urge him on, then you need a whip to wake him up a little.

We have just received a new lot of about 500 whips. The kind that last, and they can be seen in our store. They are selling from 15c. up.

A Waterproof Whip, 15c

Better Quality Whips, 30c to 50c

Raw Hide Whips, 50c to $1.25

THE PIERCE HARDWARE CO.

MAIL ORDER BUSINESS IN AFRICA.

That the Catalogue House is not strictly an American institution is made evident by the following article, which appeared in a recent issue of the "South African Gazette." This article should furnish food for thought for those in the Trade, especially in view of the postal legislation, proposed by that organization of alleged philanthropists, known as the Postal Progress League. The article reads as follows:

Half an eye gives proof enough that in South Africa the "mail-order" business is extending. Local papers all give prominence to flaring offers made by professing manufacturers in Great Britain to the actual consumers in the Colonies. Suits, dresses, cycles, and what not are pushed before the eyes of potential buyers every week, and always at prices made to appear desperately low. Much as the "experts," "specialists," and other magicians in this line of trade are disliked by honest shopkeepers at Home, they are probably liked less still by storekeepers oversea. The competition is, of course, scarcely an equal one, for the advertiser escapes the local taxation, the righ rate of interest, the heavy rent, and the risks of deterioration and of bad debts that accompany ordinary retailing. In such goods as drapery, the advertiser is able to place upon the knees of purchasing women a wider selection of stuffs than the average up-country storekeeper is able to do during most seasons.

THE PENNY POST.

There is much more to aid competition of this kind. The penny post makes the distribution of catalogues a quite inexpensive proceeding. For no more than a shilling per pound gross the parcels department of the Post Office carries the goods through to their ultimate destination. The duty payable is the net charge made by the Customs authorities, with the trifling fee of sixpence per parcel as an extra payment for clearance. Even the advertising, which forms the major item in the expense accounts of the interlopers, costs them less relatively than does the advertising of local firms. The assistants employed by many "mail-order" firms are mere boys and girls, paid badly during their nonage, and destined to be dismissed on arrival at the maturity of one and twenty. Well may the invaders' goods look cheap when the value of money in England and in South Africa is compared, and when all these accessory advantages are reckoned in. Against the "mail-order" traders is the disadvantage that purchasers must first pay and then wait for a couple of months for the coming of the parcel. Efforts have been made to remove this handicap by the introduction of proposals for a cash-on-delivery post, which, however, does not appear to be imminent.

THE STOREKEEPERS' REMEDIES.

The storekeeper, of course, is not without his remedies. He has his own persuasion to rely on, his knowledge of his clients, his stock, and his proximity. It were foolish to underrate these auxiliaries, for, in the hands of able dealers, they may be made to compensate for much else. Yet there is no denying that between the storekeeper's idea of fair profit upon his modest turnover, and the limits at which some "mail-order" retailers will work, a great gulf yawns. At a company meeting in England some years ago, a light was thrown upon the internal economy of a cash trade done through the post. The clear profits of the business in point amount only to a mere one per cent upon the turnover. The trade is so large, and returns are so quick, that a handsome dividend upon capital is earned at this small margin. Expenses of one kind and another absorb the rest of the difference between buying and selling prices. No emphasis is needed to make plain the fact that hard work must be applied to combat such competition. More advertising is done by the exponents of postal shopping than appears in the newspapers. A connection once formed is never allowed to fall from want of application. For years after the first purchase, catalogues and samples are showered periodically upon the person who was once a customer. Although, to simplify matters, the foregoing has stated views as they appear to the retailer, it is obvious that the interests of the legitimate wholesale trade, and of the greater manufacturers, are identical with his. It is to the general benefit that the storekeeper should flourish, and to any help that his suppliers can render in his conflict with the irresponsible advertiser the old-fashioned retailer is well entitled.

AMOS.

IT PAYS TO MAKE CONCESSIONS.

It does not pay to be "small" in business. Many a merchant has lost a dollar by haggling over half a cent. It pays sometimes to let a customer have his own way, but it never pays to argue about it. When a merchant is asked to make a small discount he should decide at once whether it is advisable to grant the request. If he thinks it best to stick to his price he should decline courteously but firmly to make the reduction, and should avoid a prolonged discussion of the subject. If he decides to allow the discount he should do so in a manner that will not spoil the effect of the concession. He should not try to convey the impression that he is bestowing charity, or act as if he believed his generosity would land him in the poorhouse.

When it is possible, it is undoubtedly best to make the prices right at the start, and then stick to them. Then, if it be found that any line will not sell at the prices fixed, it should be reduced to all alike. But most retail merchants find it extremely difficult

Digitized by Google

to adhere to any hard and fast rules. The laws of the Medes and Persians would not be well adapted to modern merchandising. A refusal to make a small reduction may cause the loss of a profitable customer. The big department stores can afford to have one price and stick to it. In fact, their business could not be conducted on any other principle. But to the average retailer, especially to the one doing business in a small town, where he knows every one and every one knows him, the case is entirely different. Such a merchant is pretty sure to find a rigid adherence to the one-price rule a very expensive luxury.

What has been said here refers chiefly to what might be called compulsory concessions—to compliance with requests or demands for discounts and reductions. This serves a purpose in retaining customers, but it can never be entirely satisfactory to the merchant. It is a method of doing business that requires the exercise of much tact and judgment, and is, to state the fact plainly, a premium on kicking. The customer who gets the discount feels under no obligation, for he knows he would have received none if he had not demanded it. Customers who pay the regular prices without protest are unfairly treated, and if they learn that others are paying less, have good cause to be dissatisfied. By giving concessions to prevent the loss of customers the merchant may bring about the result he fears.—The Keystone.

THE DRUMMER.

The man who drums for your trade says the *Glovers' Review*, is as much a part of mercantile life as the goods he sells. You may be tried and harrassed by a few of the tribe, but the rank and file are nearer to being your friends than you many times think. We make a plea here for the drummer, and for your best treatment of him.

In the first place, treat him well and try not to waste his time. His days are all busy and he has no hours to waste. You need him as much as he needs you, and his friendship is worth as much to you as yours is to him.

He frequently sleeps in bad beds, eats bad food, loses rest, but he comes up smiling and pleasant with it all. He wants to show you his line, and he not only hopes but expects to sell you something. He is three days behind schedule, and the house has been hurrying him up, but he doesn't tell you of it, nor does he ask you to fall over yourself in getting ready to look through the samples. He is steeped in patience and battered by rebukes; he is never certain and never feels safe; he hopes, but he never knows; yet, when he enters your presence there is not a sign of ruffle in his manner and no trace of impatience or fear. He puts confidence into your soul by the way he fairly breathes confidence concerning the goods he wants to show. He can inspire you and your clerks, even though you feel compelled to pass him along. You are glad to see him whether you want to admit it or not.

No obligations hold you toward buying from him, but the plain obligation of one man toward another should induce you to treat him with every consideration that can assist him. Out of plain gentlemanliness, do not hold him all day and send him away without looking through his trunks or buying a cent's worth, when you know in the morning that you cannot place an order. Tell him frankly the situation if you cannot immediately accommodate him, and let him stay on his own responsibility if he waits for you.

Put yourself in the drummer's place and do the best you can and by him. Apply the golden rule. He is sensible and reciprocative. If he happens to be otherwise you may rest assured he will not trouble you many times, for his career will be short.

THE NATIONAL'S AWARDS.

Elsewhere in this issue we reproduce the Official Award Ribbon issued to the National Sweeper Company on National Roller Bearing Carpet Sweepers, issued by the Authority of the Louisiana Purchase Exposition and signed by David R. Francis, President, F. I. Skiff, Director of Exhibits and Milan H. Hulbert, Chief of Department of Manufacturers, covering the Grand Prize and Two Gold Medals awarded to the National Sweeper Company on their popular line of Sweepers, together with an announcement to the trade which will prove of much interest to all those at all interested in Carpet Sweepers.

We are requested by the National Sweeper Company to state in our columns that in response to the announcement recently made to the trade in regard to the Awards granted by the St. Louis World's Fair, that they are receiving a great number of letters of congratulations, many of them expressed in a most substantial manner by means of orders and the company wishes to extend through these columns its sincere gratitude for the more than evident good feeling on the part of the trade. There has also been a great many requests for reproductions in various ways of the Medals illustrated, some in the form of ribbons, some in the form of banners and even in the form of posters for bill board work when these Medals are definitely decided upon by the Exposition Authorities. Exhibitors in general who were honored with the distinction of Medals being unable to obtain any idea of what the designs would be, had to resort to their imaginations in preparing their announcements and printed matter, as to the designs of the Medals and it is stated on good authority that those produced by the National Sweeper Company were the most attractive of any designs submitted, indeed they were a happy hit in many ways and some of the ideas utilized in the production of these Medals may be incorporated in the designs of the Medal, which will ultimately be made by the Exposition Authorities.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED DECEMBER 6, 1904.

374,170. METALLIC TREE BOX. W. F. Benedict, New York, N. Y.
374,171. BRUSH OR MOP HOLDER. M. Bourke, Youngstown, Ohio.
374,187. ADJUSTABLE SCREEN DOOR. W. Hughes, Minerva, Ohio.
374,245. DOOR CHECK. G. Geer, Peterborough, N. H.
374,252. NAIL SET. R. H. Hunter, Poughkeepsie, N. Y.
374,256. SASH HOLDER. F. H. Jury, New York, N. Y.
374,262. WEATHER STRIP. I. Martin, Vowinckel, Pa.
374,270. COFFEE OR TEA POT AND URN. L. J. Richards, Philadelphia, Pa.
374,332. PUMP. R. H. Aldrich, Seneca Falls, N. Y.
374,358. SCISSORS OR SHEARS. C. Hamann, Reinbeck, Prussia, Germany.
374, 376. PORTABLE CLOTHES REEL. F. Slooter and A. F. Slooter Holland, Mich.
374,483. AX. C. Maloney, Lower Lake, Cal.

PATENTS ISSUED DECEMBER 6, 1904.

776,540. CAN OPENER. G. C. Parish, Kingston, N. Y.
776,602. HACKSAW. W. E. Lawrence, Brooklyn, N. Y.
776,645. SHAVING CUP. W. E. Cooper, Ithaca, N. Y.
776,734. AX. C. E. Fuller, Maple City, Kan.
776,828. PRUNING IMPLEMENT. J. Earnhart, Santa Paula, Cal.
776,896. SOAP HOLDER FOR SHAVING CUPS. S. Ehman, Philadelphia, Pa.
776,981. COMBINED MOP AND WRINGER. T. G. Amsden, Buffalo, N. Y.
777,026. MAIL BOX. W. G. Jones and R. M. George, Chattanooga, Tenn.

PATENTS EXPIRED DECEMBER 13, 1904.

374,592. SEAL LOCK. C. S. Gilman, Denver, Colo.
374,603. COFFEE POT. W. A. Krag, Indianapolis, Ind.
374,650. WIRE SPLICER. W. F. Batters, Click, Texas.
374,656. DOOR HANGER. J. Christmann, Milwaukee, Wis.
374,737. FISHING REEL. A. Geils, New York, N. Y.
374,769. SAFETY RAZOR. S. A. Aloe, St. Louis, Mo.
374,867. SASH HOLDER. M. V. B. Evans, Circleville, Ohio.

PATENTS ISSUED DECEMBER 13, 1904.

777,099. ADJUSTABLE SASH FASTENER AND TIGHTENER. N. S. Hillyard, St. Joseph, Mo.
777,135. BARN DOOR BOLT AND LOCK. O. G. Parsons, Edina, Mo.
777,140. CORD ATTACHMENT FOR WINDOW SHADES. A. H. Redheffer, St. Louis, Mo.
777,165. LEVEL. P. M. Walsh, New York, N. Y.
777,193. DOOR OPENER OR CLOSER. W. A. Fagan, San Francisco, Cal.
777,210. NAIL EXTRACTOR. G. Hovenden and H. A. Hovenden, Peoria, Ill.
777,332. SLIDING DOOR FASTENER. P. J. Casserly, Elyria, Ohio.
777,358. POCKET KNIFE. W. Weck, Solingen, Germany.
777,393. DOOR CHECK AND CLOSER. J. Bardsley, Montclair, N. J.
777,412. WIRE WORKING IMPLEMENT. J. Hamel and A. Hardy, Quebec, Canada.
777,483. KNIFE SHARPENER. P. J. Neerup, Chicago, Ill.

BEING IN SIGHT.

They say that if a man would make a success of his business he must attend to it. They say that people who come to a store to trade like to see the proprietor. Of course, there is a certain period at which a growing business arrives when it becomes appropriate and perhaps necessary for the proprietor to keep himself shut up a good deal in a closed cage, called a private office. The majority of stores don't arrive at this period. We would like to say for the benefit of the unthinking that though they may devote pretty nearly all the hours and half-hours every day to store work, shut up in that private office, unless their office is open to the gaze of the public, the public don't know that the proprietor is there, and most of them will think that he isn't. The result will be that the man will get credit for neglecting his business, and the business will suffer some of the natural results of such neglect. Don't do too much work in the private office unless you are sure that your business has arrived at the private-office period.—*Profit.*

ENAMETILE.

The New York Metal Ceiling Co., manufacturers of plain and decorative ceilings, 537-541 West Twenty-fourth Street. New York City, are the manufacturers of a comparatively new product, Enameled Metal Tiling, which has met with great favor under the name of "Enametile." This is a highly enameled, embossed, flexible metal covering for ceilings, walls and wainscotings. It is made of a flexible, non-corrodible white metal, rolled out into thin plates, size 18x24 inches, and enameled and embossed. It is made in a great variety of designs and colors. It is finished to represent the finest ceramic tiling and is used as a substitute for same. It is applied with a specially prepared cement directly to the finished plastered walls. It may be washed and kept clean with soap and luke-warm water, the plates are bedded in cement, the joints are flushed out and made level, leaving no lurking place for vermin, dirt or germs. One square foot of ceramic tiling weighs about five pounds, the same area of Enametile weighs about six ounces; the difference in weight especially commends Enametile for use on ceilings, where because of its weight and danger of becoming detached, the ordinary tiling is out of the question. Enametile may be readily cut with a pair of shears and can be bent around any square or curved corner without breaking the enameling. Ordinary ceramic tile cost from two to three times the price of Enametile, while the finest colored varieties cost from four to six times more than Enametile of equally fine design and coloring. Enametile has been found to give perfect satisfaction in Bath-Rooms, Halls, Vestibules, etc., as well as in Hospitals, Stores and Public Buildings. Designs suitable for all places can always be furnished by the Manufacturers.

NEW LINE OF MANUFACTURE.

The M. S. Benedict Mfg. Co., of East Syracuse, is about to take on a new branch of Silverware manufacture and will build a large addition to its present plant to accommodate it. The company is to manufacture flatware, (knives, forks and spoons). Harry L. Benedict of the company said recently that he was preparing plans for the new building, which will be erected on property adjoining the present large plant. A house on the property is being moved to make way for it. Mr. Benedict said the plans were not yet sufficiently developed to be announced in detail, but he admitted that it is the purpose of the company to manufacture flat as well as hollow silverware hereafter. This will also make it necessary to add to the number of employees.

IMPROVEMENTS IN WIRE GLASS MANUFACTURE.

New machinery for the manufacture of wire glass has made it possible now to make large sheets, whereas in the past it has been impracticable to manufacture this glass only in small size to have it absolutely satisfactory. The largest size manufactured under the improved method is 60x140 inches, which is a big pane of glass.

The wire used is the common mesh wire, the meshes being about an inch in diameter. This wire is laid on one of the large tables upon which the molten fluid is poured over it. A heavy roller is rolled over the table, and the glass is worked into the proper thickness. At the same operation the wire is worked into the glass, and when the process is completed, the wire has become evenly imbedded in the glass. When this glass is finished it is possible for a 200-pound man to walk on a piece three-eighths of an inch thick without breaking it, and a stone thrown from a distance of ten feet will not break it. This glass is specially adapted for skylights.

By another process it is possible to manufacture large sheets of prismatic glass, both plain and wired. The old method for the manufacture of prismatic glass was to apply the mould over the whole surface at once after the roller had been applied and the glass was the proper thickness. It was practically impossible to cast a large pane of glass in this manner, for by the time the mould would be applied the end of the glass that was rolled first would be cooled and the prisms would be uneven. By the new process, a machine containing several moulds has been constructed. These separate moulds are about three inches wide, and when the roll is passed over the glass, these moulds are impressed on the glass immediately after the roller has passed a point sufficient to admit lowering the section. By this means the mould is applied to the glass at once, and there is no danger of the glass cooling to such an extent as to affect the application of the die. The prisms can be set at any desired angle, to suit individual requirements, and the prismatic glass can be furnished in the same sizes as any other style that is manufactured.—*Paint, Oil and Drug Review.*

THE VIRGINIA IMPLEMENT CO.

It is reported that the new store of the Virginia Implement Co., of South Boston, Va., is one of the best equipped heavy Hardware and implement houses in that city. This firm will carry a complete line of farm implements, buggies, wagons, threshing machines and heavy Hardware, and will do a jobbing business as well. E. M. Penick, of this concern, in a recent letter, says: "Talk about Catalogue House competition; we received a fright a few days ago, when one of our customers told us that he had been buying barb wire at sixty cents a bundle. For a short time there were all sorts of rumors, some alleging the failure of the Steel Trust, others a fight with the Independents, until on investigation, we discovered that a young colored boy was responsible. he having robbed a large storage house, and in broad daylight was peddling the wire from a wagon. The whole transaction was being carried on in daylight, and the young negro had gotten away with about 5,000 pounds of wire before he was discovered. Mr. Penick adds, the Grand Jury settled his case, and the price of wire has gone where it should be.

COMPETITION IN THE CUTLERY TRADE.

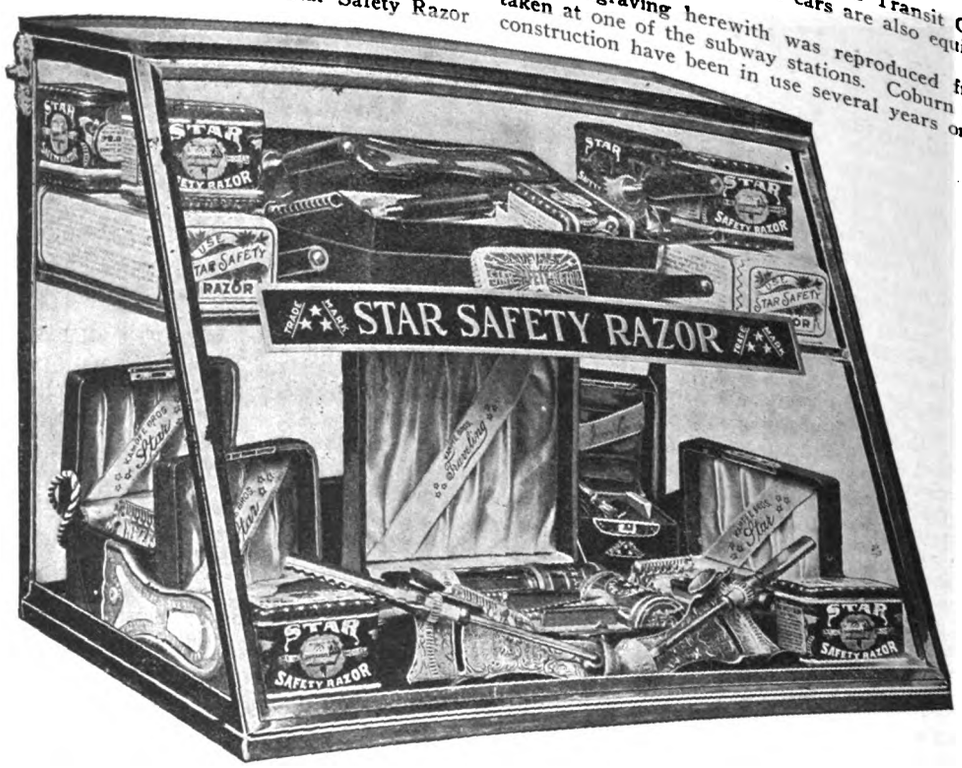
From the annual report issued by the Solingen Chamber of Commerce it appears that the German cutlery trade is being hard hit by competition. On the one side manufacturers in Solingen are being undersold by Thuringian makers, who purchase their supplies of half-finished material in Solingen, and are enabled by the lower wages which they pay to supply the finished goods more cheaply than it is possible for Solingen to do. On the other hand, Sweden is flooding the German market with carving and kitchen knives, and has already seriously injured the Solingen trade in these articles. The Chamber of Commerce complains that the difficulty of placing Solingen cutlery abroad increases steadily. The development of foreign competition is also assisted by the practice, which German firms have adopted, of supplying foreign manufacturers with unfinished blades. This has been felt during the past year, particularly in the scissors trade, in which increasingly large quantities of unfinished goods are sent abroad to compete with them. The business in pocketknives has been good, however, and large quantities have been exported.

IRON MONGER.

A HANDSOME HANGER.

The J. Stevens Arms and Tool Co., Chicopee Falls, Mass., have gone to a considerable outlay that will be appreciated by their friends in the trade, in getting out the handsome and attractive aluminum signs of which we give illustrations. The Stevens

Hanger is in three colors, ornamented with a most artistic frame of the same metal, and illustrates their Favorite No. 17 Rifle and No. 370 Shot Gun. They have been sent broadcast and the trade already regard it as an artistic and beautiful creation that will



greatly assist in placing their goods before the trade. The J. Stevens Arms and Tool Co. announce they will be glad to furnish this Hanger gratuitously to any one in the trade who has not as yet received it, and to those parties who are not associated with the trade it will be sent upon receipt of 15 cents in stamps.

"We prefer our pessimists young and tender, like asparagus. Ten years older and what a bore even Hamlet might have been!"

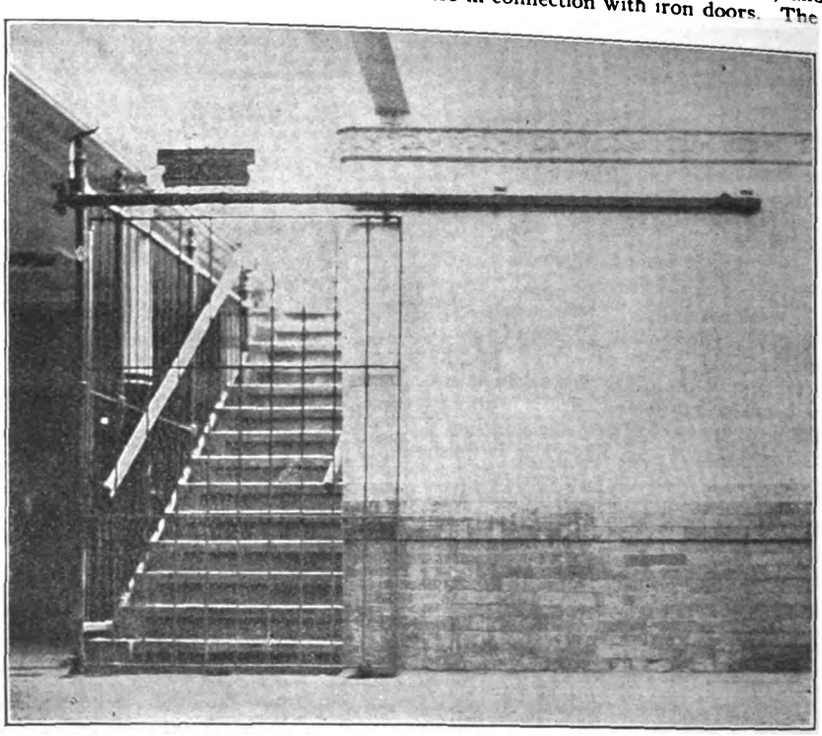
KAMPFE BROTHERS SHOW CASE DISPLAY.

Kampfe Brothers, 8-12 Reade Street, New York, have ready a new display case which they will furnish free when the following assortment is ordered of Star Safety Razors and supplies: Six No. 1 Star Safety Razors, complete; three No. 2 Star Safety Razor Blades; two No. 3 Stropping Machines; two No. 25 Star Strop-pers; two No. 26B Diagonal Strops; one No. 4 Jewel Case, one Blade; one No. 5 Star Case, two blades; one No. 6 Star Case, three blades; one No. 7 Star Case, four blades; one No. 9 Traveling Case, two blades; one No. 24 Combination Outfit. The case is given free in this manner to provide a convenient and full assortment of their most salable lines, and enables the dealer to quadruple his sales of these attractive and profitable supplies, which can thus be furnished in a judicious and carefully selected stock without much expense. The case which is illustrated above is 14 inches long, 10 inches deep and 10¾ inches high at the back.



COBURN DOOR HANGERS.

The Coburn Trolley Track Manufacturing Co., Henry B. Newhall, Agent, 9 Murray Street, New York, manufacturers of elevator, house and pier door hangers, announce that their elevator door hangers have been installed on all of the sliding gates in the subways of the Interborough Rapid Transit Co., of New York, and the sliding doors in the cars are also equipped with Coburn hangers.

The engraving herewith was reproduced from a photograph taken at one of the subway stations. Coburn hangers of similar construction have been in use several years on the sliding gates of the Brooklyn Bridge terminal and the platform gates at the Grand Central Station.

The hangers are roller bearing, and of simple construction, so that they cannot get out of order, and are made especially for use in connection with iron doors. The hangers may be varied to suit special requirements. The construction of the track and hangers is such that wear and friction is reduced to a minimum so that the doors can be moved easily even after long service. An order has just been booked for one hundred and seventy-six sets of "Go-Easy" hangers for use in a large hotel now building, notwithstanding the fact that this style of hanger is somewhat more expensive than the ordinary hanger. These hangers were adopted after an investigation of the various hangers on the market.

The Coburn Trolley Track Manufacturing Co. are sending out a four-page circular descriptive of their hangers, which those interested can obtain for the asking.

RECENT TRADE PUBLICATIONS.

THE COLUMBUS HANDLE & TOOL CO., Columbus, Ind., are the authors of a very handsome and attractive catalogue, covering the season of 1904-1905, including their line of logging tools, ice tools, Linemen's tools, farming tool handles, etc. This is a revised and fully illustrated edition and will be found convenient and useful in making up orders. Since issuing their last catalogue they have largely increased their line as well as their facilities for turning out goods, having completed a branch factory at Madison, Ind., which doubles their output of handles. A specialty made by this company is a Steel Peavy, made with the socket and point all in one piece. It is light, handy and strong, and, as they say, a nice clean tool all through, and is made from high-grade steel only. The clip which holds the hook is riveted and brazed to the socket, so the clip, socket and point are practically one piece. This, they claim, makes the strongest and lightest tool on the market, and the advantages over the old style peavy are many. The handles are from selected hickory or maple and are finished with linseed oil. The socket and hook, and, in fact, all the iron work. has a high polish—in short, they guarantee this to be the "slickest article" on the market. All of their products are well described and finely illustrated in their catalogue, which may be had upon application.

THE GRISWOLD MANUFACTURING CO., Erie Pa., in their General Catalogue No. 40, certainly present a very fine specimen of the possibilities of the printer. The book is finely printed on excellent heavy coated paper, and is illustrated throughout. To make it more attractive, the divisions of the Catalogue are printed in large, clear-face type, with black and bright red lettering, which greatly adds to its appearance. The catalogue includes their line of Extra Finished "Erie" Ware, American Dampers and Waffle Irons and Housefurnishing goods. They also issue catalogues having reference to Gas Ranges, Hot Plates and Gas Heating Stoves, of which they manufacture a most complete line, which they will be glad to send to interested parties. Catalogue No. 40 supersedes all former catalogues and price lists. Their new "Tempered Surface" finish, which they use on their "Erie" cast aluminum ware, is obtained by a special alloy of the metal by which they are able, by a secret process, to harden the surface of the utensil, which, they state, will withstand the wear and tear cooking utensils are subjected to, vastly better than any Aluminum ware on the market. The process gives a hard, smooth, satin finish to the utensil. The New York representative of the above concern is the New York Stamping Co., 227 Water Street.

THE SHELBY SPRING HINGE CO., Shelby, Ohio, are placing in the hands of their customers their catalogue No. 11 of Hardware specialties and the Shelby Chief double-acting Floor Hinges. Included among the specialties are drawer pulls, push plates, sash lifts, cupboard turns and catches, sash locks, screen door hinges, paper holders, etc., etc. They claim particular attention for the "Shelby Chief" floor hinge as being superior to all others on the market. With it, it is not necessary to cut a hole in the floor where dampness causes it to rust. The hinge is first applied to the door, which is then carried to the upright position and its opposite edge placed to a center of the jamb or opposite door, thus getting the alignment before the base plate is secured to the floor. The tension of the spring is regulated at any time after the door has been hung, thus enabling one to adjust the swing of the door as desired. The hinge is neat and durable and guaranteed in every way. Other of their special goods include the Shelby sash lock, made entirely of wrought metal, and, they claim, is the strongest, most durable burglar-proof sash lock now on the market. It adjusts the sash perfectly and allows no vibration. Their "Buckeye" screen-door hinge is built for simplicity, for which it will be appreciated. The metal used in the Buckeye is wrought steel, neatly embossed, thus presenting an attractive appearance. Write for a copy of their No. 11 catalogue.

A. PETERS & BROTHER, Beaver Falls, Pa., are distributing an envelope size pamphlet catalogue, which they call "The Seductive Charm." It includes the "E-Z-Bite," "Fisherman's Luck," "Angler," and "Tandem" Spinners, also a line of the Twentieth Century West Lock, Peerless and Perfection Faucets. Their manufacturing plant has been in operation for several years and they state, is growing steadily. The high-grade machinery used and the great number of skilled workmen employed enable them to turn out large quantities of artificial bait and wooden faucets. They state they have every reason to believe that their goods are superior in quality, style, finish and durability, and they are in a position to fill orders promptly. For particulars secure a copy of "The Seductive Charm."

PARKER WIRE GOODS CO., Worcester, Mass., have recently sent us a copy of their catalogue No. 2, embracing General and Special Wire Hardware of their manufacture. The above firm straighten wire and cut it to lengths, thread and bend it to special shapes to order. The book is well arranged, is of large size and contains 122 pages, including a handy index. It includes numberless goods which come under the above heading, each illustrated, described and accompanied by list price. It also contains a table of sizes, weights and lengths of iron and steel wire, Washburn and Moen gauge, giving the diameter in inches, pounds per foot, pounds per mile, feet per pound and feet per 2,000 pounds. Altogether it is a catalogue very desirable for a dealer interested in this class of goods, and will be sent upon request.

THE KERR BROTHERS MFG. CO., Hicksville, Ohio, manufacturers of agricultural tool handles and specialties, have issued their 1904-1905 catalogue, exploiting their products. The Western Agents for the above concern are Wm. Pickett Son & Company, 52-54 Lake Street, Chicago, who carry in stock at all times a complete line of their goods. The Kerr Company maintain a general sales office in Toledo, Ohio, and also give careful attention to the manufacture of handles for export, and they state it is their aim to maintain the high standard of excellence which their goods have attained in the past, and by fair and courteous treatment, merit a continuance of the patronage which they now enjoy. They will be pleased to quote prices on application, also to forward one of their very useful catalogues, which is gotten up in pamphlet form, and contains 15 pages, with descriptions, illustrations and list prices.

THE CANTON STEEL CEILING CO., 157 West 23rd Street, New York City, are distributing their catalogue "G" to the trade. It is devoted exclusively to Ornamental Steel Ceilings and Side Walls, and with their extended line it gives the buyer a larger variety of designs from which to select than they have ever presented. With years of experience and larger and better facilities than ever before, they state it as their firm belief that they have attained the highest degree of perfection both in construction and architectural beauty. Steel ceiling and side wall as a modern substitute for wood and plaster have the advantages of durability; fire, water and dust proof; sanitary qualities, architectural beauty, etc. The patterns shown in their book are new and original, and admit of a high degree of ornamentation. Their plates are resheared on all sides after stamped, thus will line perfectly straight and regular and make it immaterial which way the plates are lapped. Their catalogue is large and beautifully illustrated and may be had for the asking. Owing to their rapidly increasing South American trade, the Canton Steel Roofing Co. have also printed the above catalogue in Spanish.

JOSEPH DIXON CRUCIBLE CO., Jersey City, N. J., have issued a new catalogue describing the many famous graphite lubricants manufactured by them. The introduction deals in a general way with the growth of the graphite industry, the theory of graphite lubrication, the special advantages of flake graphite in contrast to amorphous graphite and the practical relation of graphite to the theory of lubrication. They state : "It is a fact worthy of greatest emphasis that bearings absolutely cannot 'seize' or cut whenever an infinitely thin film of flake graphite coats the friction surfaces. If Dixon's Flake Graphite could do nothing else for the operator of machinery its importance in averting troubles and shut-downs and perhaps disasters, due to the seizure of bearings, cannot be over-estimated." The book further describes the various lubricating graphites and graphite lubricants of the Dixon Company, including their general uses and the retail prices of the different sized packages. Copies of this interesting catalogue will be freely sent upon request to the Joseph Dixon Crucible Co., Jersey City, N. J. Size of catalogue is 5½x8½ inches, 28 pages, illustrated, cover in two colors.

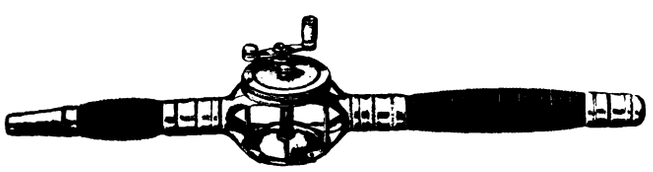
BERGER PAIL EARS AND BOILER HANDLES.

Berger Bros. Co., Philadelphia, Pa., has recently placed on the market the trimmings shown herewith. The pail ear is stamped from wrought iron, and the sizes and thickness correspond to the malleable ears made by the company, the No. 3 in malleable being No. 30 in wrought, etc. The sizes made at present are Nos.

WROUGHT IRON PAIL EAR.

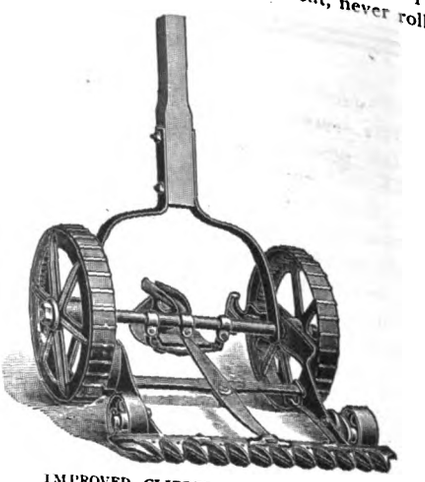
30, 40, 50, 60 and 70. They are furnished in gross boxes or in bulk to suit purchasers. In the next illustration is shown a wash boiler handle, larger and stronger than former sizes made. The



KEYSTONE BOILER HANDLE, NO. 3.

sides are stamped from heavy steel, well tinned, and designed to be perfectly rigid under any strain to which they are liable to be subjected. Samples of either of these articles will be mailed by the manufacturer without charge.

COMBINATION REEL AND HANDLE.

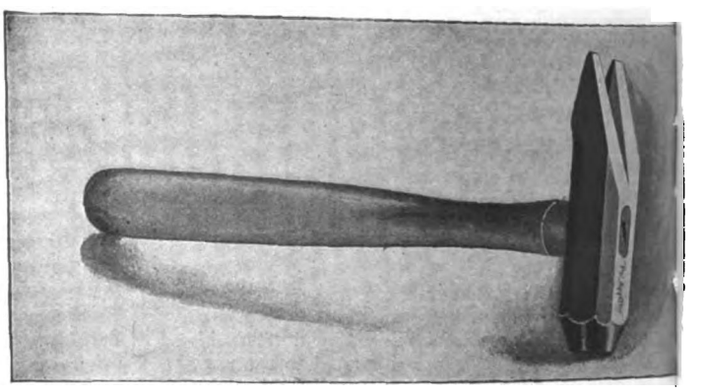


The Horton Manufacturing Company, Bristol, Conn., are placing upon the market the Combination Reel and Handle which we illustrate below, which is destined to be a popular addition to their line of Sporting Goods, from the fact that it has many advantages over the ordinary reel which will readily be appreciated. As will be noted in the illustration, the reel is on a line

with the center of the handle, thus equally dividing the weight, and producing a perfect balance, because it will not turn in the hand. Then again a most perfect action of the reel is afforded as it does not turn to the under side of the rod; it hangs naturally, the spool being easily controlled by the thumb. The reel is all metal with polished steel pivots and bearings, finished in very heavy nickel plate. It has a quadruple action with click and drag, also screw off oil caps and Ivory balance handle. The spool is very free running, holding 80 to 100 yards of line.

IMPROVED CLIPPER LAWN MOWER.

Clipper Lawn Mower Co., Dixon, Ill., are the manufacturers of the Improved Lawn Mower shown in the accompanying illustration. The height of the grass is immaterial to the Clipper, as it only requires the same power to cut grass two feet high as it would to cut two inches, and it cuts more closely in the mowing of irregular surfaces and spaces, such as between posts of fences, walks, and shrubbery. The Clipper Mower is not analogous to other lawn mowers, inasmuch as it does not roll down the grass preparatory to cutting it, the fingerbars and fingers thereon of the mower, as it progresses, gather in the grass with a degree of uniformity in nearly an upright position, and the vibration or reciprocating motion of the knives shears off the grass evenly. It is claimed by the manufacturers that there is no use for the sickle or shears where the Clipper is used. The cut shows a perspective view of the Clipper Mower. In the first place, it is observed that the cutter bar is directly in front of the wheels. The wheels travel over the ground where the grass is cut, never rolling down



IMPROVED CLIPPER LAWN MOWER.

the standing grass with the wheels, as other lawn mowers do. The small gauge wheels at the side are to guage the height you wish to cut the grass. The knives can be sharpened in the machine with a small file or whetstone, or can be taken out and ground; but they must never be sharpened anywhere except on the beveled side of the knives. It is stated that this mower has a cutting capacity of 55 inches to one revolution of the driving wheels. The manufacturers claim the use of the mower will keep the weeds cut so that they will not go to seed, thus killing them, and also that the grass can be cut without breaking the small feeders of the roots, resulting in the grass becoming thick. The mowers are made in 12, 15, 18 and 21 inch sizes.

THE "DATE STAPLE PULLER."

Royce & Date, Willimantic, Conn., are placing on the market this unique tool designed specially for drawing wire staple from fence posts. We give an illustration showing how well it it adapted for a chisel, hammer, nail and staple puller. It is described as made of the best tool steel, carefully tempered to different degrees of hardness, according to the character of service required

THE "DATE STAPLE PULLER."

of poll and claw, the former being the tougher and more elastic for hammering, while the sharp inner edges of the claw are harder and better qualified for retaining an edge that will easily grip and withdraw staples, headless nails, etc. The size now made and ready for delivery weighs one pound, complete; is 10½ inches long to end of handle, with hammer head 4½ inches long by about 1 inch square, the four corners of which are beveled and poll rounded. The handle is made of best second growth hickory. The shape of the head is such as to afford good claw gripping qualities, and powerful drawing leverage, and the manufacturers call attention to the fact that the claw will take hold of any part of a nail, either cut or wire, to which it is applied, and not simply under the head, as is usually the case. When pulling fence staples, nails, etc., a blow of a hammer or mallet on the poll can be given, if necessary to facilitate getting a tenacious grip on an otherwise inaccessible nail.

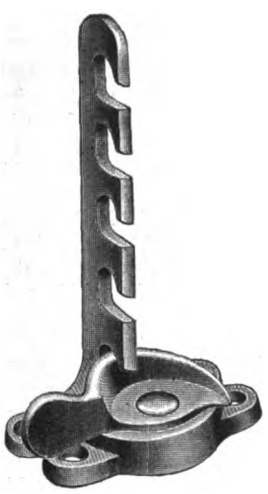
A NEW REVOLVER GRIP.

We illustrate herewith a device, entirely new, which is being placed on the market by the Iver Johnson's Arms & Cycle Works, Fitchburg, Mass. On the ordinary revolver it has always been necessary to make a long handle in order that a firm, strong grip can be obtained. With the Iver Johnson's "Revolver Grip," which can be attached at the option of the user, the necessity of

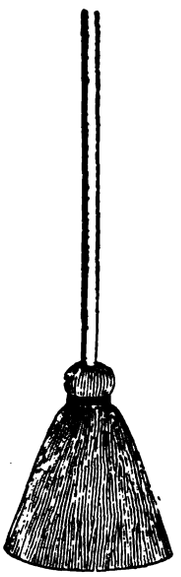


IVER JOHNSON REVOLVER GRIP.

making the handle of extra length is done away with. It is obvious that this device will prove particularly acceptable to the target shooters, or to those who use revolvers for defense. The grip is attached to the revolver by three small screws, and, being specially fitted, is, when attached, as solid and firm as if the grip were part of the frame itself. It will be furnished at a small additional cost on the regular Iver Johnson's Automatic, and I. J. "1900" double action revolvers, but will only be sold as an integral part of same.

VENTILATING SASH LOCK.

The H. B. Ives Co., New Haven, Conn., John H. Graham & Co., 113 Chambers Street, New York, Selling Agents, are the manufacturers of a new Ventilating Sash Lock, an illustration of which we give herewith. This invention, which was patented by C. W. Robison, consists in a new form of striker constructed in a manner to apply in use to the Crescent Sash Fastener manufactured

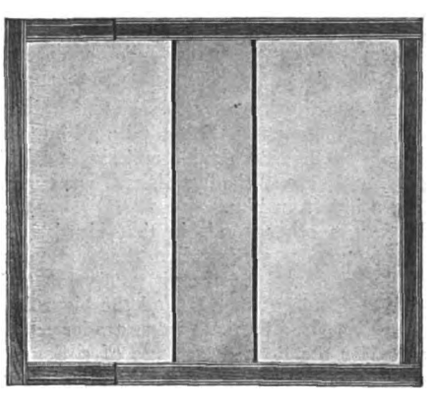


VENTILATING SASH LOCK.

by them. It has a series of locking recesses, the use of which provides the necessary ventilation. H. B. Ives Co., who are well known as the manufacturers of new devices of window fastenings, is a guarantee of the meritorious features of this latest device, which is commended to the trade, its popularity invariably following its introduction. Catalogues giving full descriptions may be had by addressing the manufacturer.

THE EAGLE FLOOR MOPS.

The Eagle Cooperage Works, Circleville, Ohio, are now manufacturing and distributing through the Hardware trade, the improved Mop shown in the accompanying illustration, for which they claim uncontested superiority. They make these Mops with machines operated by power, whereas the ordinary cotton floor mop as now universally understood, is made by hand. By operating their machines, purposely constructed from original designs, with power transmitted by engine, it enables them to



THE EAGLE FLOOR MOPS.

set a tension on the twine binding cotton to the handle, that will prevent Mop heads from pulling off the handle, as is too often the case with those loosely made by hand. They also have a new method of supplying the cotton to handles, that makes up a neat and strong mop that will be a surprise to the dealer. These mops are made in the different grades and weight demanded by the trade, all of which are guaranteed by the company.

THE "AIR LINE" ADJUSTABLE WINDOW SCREEN.

A. J. Phillips Co., Fenton, Mich., are placing upon the market the new adjustable Screen called the "Air Line," which we illustrate below and which has selling merits that will make it popular, among which are the following: The wire edges of the cloth are inserted in the wood; there are no adjusting devices in the faces of the frames, but the adjusting features are out of sight,

THE "AIR LINE" ADJUSTABLE WINDOW SCREEN.

that is, the sliding caps which connect the frames are practically concealed in the upper and lower rails. The screen is very strong, the corner joints being both glued and nailed. The four sliding caps are each four inches long, which gives sixteen inches of sliding clasp or grip of one frame upon the other. It is made of selected beech wood, oiled, and sufficient allowances have been made for the effect of damp weather. Furnished in black or green cloth, one dozen in a crate.

HIS SUSPICIONS AROUSED.

BURNS—So your new play was performed last night? Was there a call for the author?

PLOTTER—There was no general demand for his appearance, but I heard one or two men say they'd like to see the man who wrote it. I didn't like the way they said it and got out of the house as soon as I could.—*Boston Transcript.*

AN OLD-TIME AUCTION OF OLD-TIME GOODS.

If there live to-day any of the men who attended the sale by auction of Hardware, on Wednesday, June 21, 1826, at 9 and 3 o'clock, at the store at the corner of Union and Ann Streets, in Boston, they can, no doubt, embellish this tale and make it highly interesting to the curious, though busy Hardware man of to-day. The sale was by order of H. H. Huggeford, deputy sheriff, and the auctioneers were Whitewell, Bond & Co. "Terms liberal and made known at the sale" were the announced conditions of the auction, according to its catalague, and the blunt announcement, "by order of H. H. Huggeford, sheriff," leads only to the sad conclusion that the owners of the Hardware were unable to pay one hundred cents on the dollar.

But since the harsh Sheriff Huggeford, the coaxin gand tempting Whitewall, Bond & Co., auctioneers, and those who attended this most important sale have passed to the land where all Hardware is of gold and diamonds, there remains to tell its story only a time-worn ragged edge catalogue in the archives of the Essex Institute, in Salem, Mass.

This catalogue was brought home from Boston by one of those shrewd Yankee traders of old Salem, who made fortunes by exchanging Medford rum and Yankee nicknacks for teas, spices, ivory, skins and other riches of the simple native of the Far East to whom a bank was a dream, and a business college as unknown as are the inhabitants of Mars. The Yankee trader was looking for bargains when he went to the auction, and he brought home a number of novelties which he shipped to Africa and the South Sea Islands on his next ship out. He had no use for the nails, hinges, planes, gimlets, squares and other common tools that were offered by the glib-tongued auctioneers, but some of the novelties caught his eye, and, incidentally, made a hole in his purse.

The first lots offered, including four dozen wrought Japan latches, 7,500 gun flints, 100 three-bolt mortise locks with "one key short," failed to interest the Yankee trader, but when four pairs of shiny brass scales, some tinned iron tea and tablespoons and some shiny cloak pins and wormwood knobs were offered, he at once began to bid, for here were some shiny and novel implements that would catch the eye of a number of his prospective customers in faraway islands.

The Yankee merchant again lost interest in the sale, as various commonplace articles, on which the Hardware men bid in lively fashion went over the counter. He had no use for hinges and padlocks, razors, Ritter or Pomeroy razor strops, steel spring snuffers, polished tobacco boxes and paste jiggers, but when the auctioneer cried out "Here's a lot of Spy compasses," he quickly pushed to the front and began to buy. From the stock he took both Spy and Cooper compasses, steel top thimbles, some plate escutcheons, and a generous supply of tinned and iron Jews' harps. He was tempted to buy a lot of tooth brushes, which were included in the Hardware stock, but a druggist quickly overbid him, and he gathered up his nicknacks and was satisfied for the time being, but he reckoned that they would be worth many pounds of ivory, on the West coast of Africa.

Again the sale lost interest for the trader, and the Hardwaremen gathered up amazing bargains, big lots of knives, snuff and shaving boxes, hair, mane and pocket combs, all bunched together, mouse traps, molasses faucets, double and single ash doors, large iron oven doors, and seven "chafing dishes" went over the board without getting a bid from him.

He had his eye on other goods in that Hardware stock, and his voice and purse were ready when the auctioneer began on the buttons. These were not strange goods for the Hardware man, for they were made of metals, and the big shiny brass coat buttons were much desired by the Yankee traders, for they would make ornaments for the limited costume of a South Sea Island monarch for which that sovereign would almost sell his kingdom, and that these worthies did actually sell their gods is proven to-day by the splendid collection of heathen dieties in the museum of the old shipmaster of Salem.

Big brass coat buttons, smaller vest buttons, gilt ball buttons, hardwood dead eye buttons, sleeve buttons, cloak clasp, strings of beads, paper looking-glasses and bed cord and clothes lines and other strange articles were rapidly disposed of by the auctioneers and the Yankee trader got his full share.

Then he found a comfortable seat upon a big packing case, and watched the sale go on. Much was curious to him, as it is to the eye of to-day, and, being a much traveled man, he reflected on the mutations of trade, and the ignorance of one man concerning the bread and life of another.

One handsome powder chest, with a brass lock, a Sykes Patented Shot Belt, a patented fireproof copper powder flask, a horn powder flask, and other implements of warfare and the chase went by him with little attention. He was safe himself on land, and his ships had good cannon, left over from the War of 1812, and his men were skilled with the cutlass. Two patented fire pumps caught his eye, but some flat pieces, sets, inlets, plated ornaments and plated spurs were given the contempt that a sailor man usually accords the horseman.

Three reams of glass paper aroused a little curiousity in the Yankee, and he listened as the auctioneer rattled off a strange sounding list of goods for the kitchen.

"Brass kettles, as shiny as gold, an eight-gallon English kettle, big enough for mince meat for the year, thirty-five fine American pots, seven large baking pans, four basins, English spiders, fine gridirons, though some are damaged, eight pairs of three pence dogs, some skillets, an iron mortar, a pair of two pence dogs, several fine high pans, also some fry pans, basins with ears, a few assorted dogs and more basins with ears and feet."

"Humph," muttered the Yankee, "the mistress should be around to pick up these bargains."

"One King's patented coffee mill, and one Post coffee mill," shouted the auctioneer. "Thunderation," exclaimed the Yankee, "That Battle Creek fellow is beginning to shout early about his goods."

Then the auctioneer brought up a line of fine Quaker shoe brushes, some Hindostan oil stones, some patented shoe punches, and several gross of Day & Martin's, Warren's and Jarvis blackings, as well as Gould's sponge blacking in glass bottles, 300 shoe bills, fifty bright shoe hammers, and many pounds of shoe tacks and nails.

"Thank the Lord," exclaimed the trader fervently, "I'm glad I took to the sea and not the store. There's enough geegaws and gimcracks in this stock of Hardware to sink a ship, even with the best captain on the deck. And some of it doesn't belong there any more than the captain's compass belongs in the cook's galley. No wonder that Hardware dealer failed, carrying a deckload like that, as well as his valuable goods below."

And so saying, the Yankee folded up his catalogue, and departed for his home, where he carefully filed the document among his papers, and it remained for many long years and was only dug out by his heirs and deposited with the Essex Institute for the benefit of the present and future generations. F. A. G.

PUTNAM NAIL CO.

The striking advertisement of the Putnam Nail Co., which appears in this issue, presents to our readers, and especially to those in the Horseshoeing line, the product of a factory which has long been familiar to them. The word Putnam has been a household word in this and many foreign countries for over fifty years. It has always stood for integrity, uprightness and fair dealing. The statements in this advertisement will, therefore, have an added force, not only to the older generation, who have long used the Putnam Nail, but to the younger generation. Forty years of successful business tells the story. This New nail is doubtless all they claim for it, and we bespeak for it as large, if not greater, sale, than the Old Putnam Hot Forged Nail ever attained.

NO MORE TRADING STAMPS.

A few weeks ago, the Merchants' Association of Ft. Wayne, Indiana, agreed among themselves to discontinue the giving away of trading stamps, and put an announcement in the daily papers, stating that after December 1st, they would not give out any more stamps, and that as far as they were concerned, this would end the trading stamp business in Ft. Wayne.

The people who had been gathering up these stamps, must have misunderstood the notice, and thought the stamp companies were going to leave the city at once, for within a day or two after the discontinue notice appeared in the papers, the stamp stores presented an appearance of a bank upon which a run had been started. Crowds of people flocked to the stamp stores, to redeem their stamps, and so many came that the stamp stores were obliged to lock their doors at times and admit only a few people. Ft. Wayne has been over run with the different trading stamp companies, until they have become a nuisance.

At last the merchants, says the "Ad. World," have come to the wise conclusion to discontinue the giving away of trading stamps. Here is a lesson for the merchants of other towns to profit by, and when the solicitors of the different stamp companies come among you, turn them down, and turn them down hard. If you want to give the people of your community a present of some article of value, as an inducement for them to trade with you, then buy your own premiums, and give a coupon to correspond with the amount of each sale, which is redeemable only at your store. This method will cost the merchant less and he will get better results from an advertising standpoint, than he could receive by giving away trading stamps issued by any company. The trading stamp scheme was gotten up for the benefit and profit of the trading stamp companies only, and the merchant who has to encounter this trading stamp nuisance, would better have the moral courage to fight these companies, in the only successful way that they can be combatted, and that is to give away his own premiums.

EARLY HISTORY OF THE MANUFACTURE OF CUTLERY.

Our term cutlery is derived through the process of phonetic change which characterizes the passage of Latin to English, from the Latin word culter, meaning a small knife, as distinguished from a sword. One of the earliest necessities of mankind must have been to shape some tool into a cutting edge. Before the discovery of the art of working metals, men used bone, hard woods and stone. The Egyptians had the art of tempering copper to a hard, cutting edge, and from them many of the nations of antiquity derived the process, which is now practically lost.

The art of making steel was, however, known to the natives of India before the time of Alexander the Great, and from the steel of that country the famous Damascus blades were tempered in the city of that name. Singularly enough, some of the uncivilized races, as those in Borneo, have great skill in tempering their weapons, though, as a rule, they have a rude method, which has probably been handed down from a very early age.

One of the chief characteristics of civilization, however, is that the industry and invention of the people who have arrived at such a condition of social advance, are chiefly devoted to the production of tools and utensils for domestic and industrial use, rather than for use as weapons of war. Judged by this standard we can compare the progress of our own times with that even of Greece and Rome, and, without vanity, we can congratulate ourselves upon that comparison. The Grecians and Romans forged and tempered swords, which performed their bloody work only too completely; but they still ate with their fingers, and the cleanly decency of knives and forks was unknown even to their kings, statesmen or philosophers.

Up to within quite a recent date, the chief supply of cutlery for the civilized world was manufactured in England. At a very early period this art was practised there, and Sheffield, which is still the chief seat of the knife industry, was celebrated for the same article as the time of Chaucer, father of English poetical literature.

Though knives were made in England at an early date, yet they were not a regular piece of table furniture, and the fingers were still the chief implements used in eating. In the time of James I, Coryatt, the traveler, in his account of a tour through Europe, mentions forks as recently introduced into Italy, and speaks of them as a "curious custom."

The manufacture of cutlery is by no means a long established industry in this country, 1830 being about the time it first become worthy of attention here. Owing to the improved methods and machinery which our manufacturers have introduced, the progress of this business in the United States has been marvelous. Twenty-five years ago the leading manufactory of cutlery in this country was the Russell Manufacturing Co., at Greenfield, Mass. The business was commenced about 1832 by John Russell upon a very small scale, and the attempt to introduce "American cutlery" was at first a failure. The goods produced did not pay the cost of manufacture, and the lack of skilled workmen was a great drawback. Although the first year's business was most discouraging, Mr. Russell persevered in the attempt, despite the many obstacles, not the least of which was a foolish prejudice against American cutlery. Although his products were actually as good as those imported from Sheffield, they could not seem to gain much headway against the foreign article. At first the capital to carry on the business was small, and all the operations were performed by hand, the only machinery being the emery wheels and grindstones. The handles were made by hand, and the blades forged by the same tedious and expensive method.

At this time the market was entirely under the control of the Sheffield manufacturers, who, though they employed more hand than machine labor, were able, by reason of a long established business, to force out any competition from American manufacturers. The first improvement came in the form of a trip hammer for forging the blades, and it was purely an American invention. This was really the first step in the direction of success by our manufacturers.

The next improvement was in the form of a bolster maker. A bolster is that part of the blade which abuts upon the handle and supports it; hence the term bolster. This, too, was an American product, and still further enabled our manufacturers to compete with English cutlery.

Matthew Chapman, in 1862, devised a method of preparing wooden handles for cutlery that marked an important epoch in the industry in this country. The process consisted chiefly in subjecting the handles, hot with oil, to a machine pressure. This opened up the possibility of utilizing oak, maple and other woods, which were of necessity excluded by the old method of handle making. Perhaps the most important impovement came in the form of an invention for making the blade, bolster and handle all of steel, and forged from one solid piece. Mr. Chapman was the father of this invention also. Then, by rapid stages, came the various improvements that have brought cutlery up to the place it now occupies.

Before an ordinary table knife leaves the factory it passes through sixteen different and distinct stages. From cutting the steel to packing the knife there is involved a great deal of detail, but owing to the existing methods of production the work is done with surprising rapidity and perfection. It may seem surprising that cutlery requires so much handling in the process of manufacture, but when it is known that in former years a common penknife passed through a hundred hands before it was ready for the salesroom, one will be apt to admit that modern methods have about reached the last point where rapidity in manufacture is consistent with good workmanship. But the future holds much in store for the inventive genius.

The day will undoubtedly come when machines will relieve many of the human hands now engaged in passing cutlery through the various stages of its manufacture. Then, perhaps, we can expect to see records of production broken at every turn, and, working on the plan of the new basket-making device, we may see a complicated machine, operated by a little girl, turning out knives and forks by the dozen. And if the imagination be not too wearied, we can picture the cutlery being caught up by an automatic separator, sorted, packed in boxes and passed to one side, where a movable platform on an endless chain will convey them to a storeroom. After looking at the latest improved cylinder press, one's confidence in the possibilities of the future becomes unlimited.—*House Furnisher*

KEEP UP TO TIME.

The following article, which will be of special interest to retailers appears in a recent issue of "Profit."

Are you moving in accordance with the times? Does your store present an up-to-date appearance? If not, this is a personal talk.

Seek to lead, not to follow. Don't let your excuse for having something antiquated be that "Jones has it." Formulate ideas that others will envy. Don't copy those of a moss-back. He may be a man of letters, but his methods are those of the past. Advancement is looked for, and the man of the period sought after.

Read the advertisements of others. Notice what your neighbor says of his goods, and how he says it. Then model your own ads a little differently and make them distinctive of you and your store. If they're not a success solicit the aid of one you and your lend your ears to the experience of your fellow-men, raze old fogy traditions, eschew ancient methods whose death-knell has long since been tolled, and wake up to the times.

Read your trade journals. Question the drummer before he departs. He's just the one to give you some happy suggestion or bit of timely news. Ask him what Smith is doing in Brownville, and what Brown is doing in Smithville. Build on the ideas of others. Pay your respects to your contemporary on the corner below. Don't just borrow his goods.

Leave the store for an hour to-day, and each day hereafter. Take a turn about town, go through the shops, peer into the windows, see what is going on around you, and keep conversant with the progress of the times.

Have system in all things. From the store-room over head to the cellar under foot. A place for everything and everything in its place. Put style and life into your window displays. Make radical changes in their get-up. Don't be loth to part with the old schemes when they become old and time-worn. Give your fixtures a periodical coat of varnish. Sweep the cobwebs from the lofty corners. Down with the spiders, and out with the flies. Make your store look cheerful. Keep up with the times.

The counter may hide your shoes, but it doesn't screen your linen. So if you rob Peter, pay Paul; keep a polish on your linen and a smile upon your face. Don't let petty trials be pictured there. Keep all the common wants, and never be "just out" of any of them.

Don't cover your floor space with boxes of merchandise and various impediments to comfort. That's not indicative of an up-to-date store. Let there be an open passage. Give your patrons freedom of movement and yourself a chance to clean the floor daily.

Be liberal with your clerk. When he forwards a suggestion listen. Don't taboo it as unworthy a trial. It may seem a little mythical, but let him see you appreciate his care. Encourage him to take an interest in the store. If he wants to try an experiment, help him. Assist him to build a mite to the advancement of the times.

JAP-A-LAC

"WEARS LIKE IRON"

THE Hardware dealer, who is willing to take his share of the profits accruing from JAP-A-LAC sales, is sure to become an enthusiast on this new wood finish.

We advertise it in the principal magazines and periodicals, and spend immense sums of money in explaining its merits to the millions of readers.

JAP-A-LAC is the quickest selling commodity of its kind in the market.

JAP-A-LAC does not scratch white or show heel marks.

JAP-A-LAC may be used for all kinds of interior finishing, furniture, iron work, doors, etc.

There is nothing just as good. Why not stock what people call for?

Write for special proposition to dealers and full information.

ART BY MACHINERY.

Labor-saving machinery at various times within the last decade has apparently reached its full fruition, but from time to time new devices have come upon the market, and the persons who keep posted regarding the development in this field of inventive genius in America have long since ceased to be astonished by new machines that can do more and better work than can be done by artisans equipped with their old-fashioned tools. While it is not saying too much to call some of the products of American labor-saving machines pieces of artistic value, it is quite true that American inventors have not yet undertaken to replace the sculptor and the scenic artist with machines, except so far as lithographing and other printing processes are concerned. Some American color printers have produced prints on paper that for blending of colors and real artistic merit would deceive any but the most experienced art students and critics. Some of the work which appears in high-class American magazines is puzzling as to its source and means of production, even to experts who are not acquainted with the process used. Oil and water-color paintings are reproduced with an exactness and perfection that can only cause wonder. If anything, in the magazine to which we particularly refer, the prints seem to be better than the originals. In this line there does not seem to be any possibility of improvement. Hundreds of thousands of copies of an artist's creations can be printed in the same time it takes him to make a picture, each copy as good, if not slightly better.

The newest thing in art labor-saving machines is a machine that does the work of the sculptor, instead of that of the painter, and it seems strangely at variance with the eternal fitness of earthly affairs that the inventor should be of the race of Italy, where Art is first and Machinery last. It is not surprising that American inventors have not entered the lists in this direction. No doubt some of them have thought about some machine of the sort, but the American inventors who have been successful are intensely practical men, and they would rather produce something that would contribute to the advancement of trade and commerce than use their time in devising means to carve statues mechanically. Mechanics and the arts, the practical and the impractical, the worker and the dreamer, have all come closer together within the last few years, and some of the present-day necessities are the result—things that would have been considered luxuries not so many years ago.

The American newspaper of to-day, for instance, would have been impossible fifteen years ago. Typesetting machines, each one of which does the work that required the fingers of four or five compositors, have made possible larger and better newspapers. When typesetting machines were introduced the printers scoffed at the dreamer who thought he could make metal do the work that nearly everybody else believed to be impossible. The dreamer was not of the same sort of dreamers as the men who doubted and discredited him. The use of electricity for power and other purposes in the great American newspaper offices has reached very close to its full measure. The only thing that machinery cannot do is to supply the executive power to direct it. Many men are still required to get into print a large daily paper, but their movements all depend upon the will of a central authority—a man who may sit at his desk and with a word or two change the whole current of the work of the office. Half a dozen telephones are ready to echo the word or two, batteries of typesetting machines are ready to set the type, big presses in the basement start or stop as he directs—artists hasten to reduce photographs of events that have happened within the half hour into plates that can be printed an hour later. On an afternoon paper, where time is precious and the count is by seconds, not minutes, the bent and trend of mind of every one from the managing editor down to the boy who handles papers for delivery in the basement, is to save time. Their ideas run to practical inventions, rather than to artistic effects, and even the artists have to sacrifice art for quickness at times. The man who quietly directs all of these forces often suggests improvements to his assistants that are of value. Sometimes such suggestions have resulted in valuable patents, but the man who did the work has always been the beneficiary. The trend there, as elsewhere, runs more toward practical utility than toward art.—*American Exporter.*

REVIEW OF THE MARKETS.

WIRE NAILS.—An advance of five cents per 100 pounds was made by the American Steel & Wire Co. in the price of Wire Nails, and other wire products on December 8th, taking effect from that date. For definite quantities only contracts will be entered for delivery within sixty days. The demand is not affected by the advance, but continues good even at the slight advance which the trade generally expected would be of greater moment, especially as some of the large independent mills were accepting orders based on the price of $1.75 to which they advanced, consequently the market is quite firm at the advance. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent for cash in 10 days:

Carload lots	$1.75
Less than Carload lots	1.80

New York.—The fine weather of the past week has been conducive to a good demand for small lots from stores, the advance not affecting it, being quite generally charged by local jobbers. Quotations are as follows:

Single carloads	$1.94
Small lots from stores	2.00

CUT NAILS.—As the order went forth from the Cut Nail Association that any advance on Wire Nails would be met by Cut Nails, that of December 8th was met by an advance of five cents per 100 pounds. Demand has been an active one, for an advance had long been anticipated. Quotations are as follows: Carload lots, $1.75. Less than Carload lots to Jobbers, $1.80, and to retailers, $1.90 f.o.b. Pittsburgh. Iron Nails for delivery at Pittsburgh, Buffalo and all points west of these cities, 10 cents advance per keg on Steel Nails.

New York.—An advance of five cents per 100 pounds by the Cut Nail Association on December 8th, which is quite generally being charged by Jobbers. Demand is a satisfactory one. Quotations are as follows: Carloads on dock, $1.89; less than carloads, on dock, $1.94; small lots from store, $2.00.

BARB WIRE.—On December 8th, and going into effect at once, the American Steel & Wire Co. advanced the price of Barb Wire five cents per 100 pounds. The Jobbers had been giving large orders to the mills for some time in anticipation of the advance. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.90	$2.20
Retailers, carload lots	1.95	2.25
Retailers, less than carload lots	2.05	2.35

COPPER RIVETS AND BURRS.—The advancing quotations on Ingot Copper is having its effect upon Copper Rivets and Burrs, which are quoted at still higher prices. The goods may be quoted in a general way at a discount of 50 and 10 to 60 per cent, the latter figure being the price for large lots.

PUMP CHAIN.—As a result of the increased cost of Wire and Spelter, the manufacturers of Pump Chain have made an advance in their prices, the regular quotation on barrel lots being 5¼ cents per pound, which is an advance of 1 cent per pound on the price in ton lots.

COTTON SASH CORD.—Some of the manufacturers have adopted a new base price on Cotton Sash Cord of 22 cents per pound for Nos. 8 to 12, with an advance per pound of ½ cent for No. 7 and 1½ cents for No. 6.

REGISTERS.—The manufacturers of Registers are announcing higher prices and the market is represented in a general way by the following discounts:

Japanned, Bronzed and Electroplated	70 and 10 to 75%
White Porcelain Enameled	60%
Solid Brass and Bronze Metal	50%

Beyond these prices discounts are given for quantities.

CORDAGE.—The following Manufacturers' prices represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12¼ to 12½
No. 2 Manila	10¼ to 11¼
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼ to 8½

Less ¼ cent to the large trade.

BINDER TWINE.—The International Harvester Co. of America has announced prices on its Binder Twine for the season of 1905, which are as follows:

	Per lb.
Sisal	9½c
Standard	9½c
Standard Manila (550 feet)	10½c
Manila (600 feet)	11½c
Pure Manila (650 feet)	12½c

Five-ton lots, ⅛ cent less; carload lots, ¼ cent less. Chicago delivery, usual terms of payment. Kansas City, Omaha, Council Bluffs and Minneapolis, ¼ cent added. Prices not guaranteed. Allowing for freight, New York prices would be ¼ cent lower than the above. Prices for 1904 were not announced until April 15, while those for 1903 were not issued until March 30. Prices for the last two years were guaranteed, but for the coming year no guarantee will be given.

LINSEED OIL.—On December 19 the following quotations were announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....44 cents per gallon.
In lots of 5 barrels or more.....43 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon.

THE ST. PAUL TRADE.

Conditions continue good, with a feeling of strength in the market and energy in the mind of dealers and consumers. At this time our sales in Holiday goods are enormous, showing that our trade have money to invest in this class of goods. We carry a long line and try to interest our dealers in it. The Hardware store of to-day should carry a good line of desirable holiday goods on which a profit can be made and is an attractive feature, as it attracts customers to his store. Put them in the show window and mark net prices in plain figures on them. Then they will sell themselves and other goods, too.

HACKETT, WALTHER, GATES HARDWARE CO.

THE DAVENPORT TRADE.

Trade is slowly but surely improving, the sales record of each day shows an increase, compared with the sales of corresponding dates of a year ago. Prices are firmer, and the many advances are well maintained. There is a shortage in the skate crop, and great difficulty is experienced in getting some other lines of goods promptly. This is notably true of ammunition. The weather has been well nigh perfect, the cold weather has appeared so gradually that we have hardly realized just when the change from Autumn to Winter occurred. The streets are gay with Christmas shoppers, who seem happy and merry.

SICKELS, PRESTON & NUTTING CO.

THE MINNEAPOLIS TRADE.

We are all exceedingly busy attending to Holiday business, really too busy to give you much of a letter this time. It has been quite noticeable this year that the holiday trade has commenced earlier than ever before; people seem to have plenty of money and using it quite freely. Business generally in Minneapolis and Northwest has been exceedingly good this past year, not quite up to the mark the first six months, but good since then. This is quite true in the Hardware line, building operations have been very extensive and there is excellent prospect for the future. Architects inform us that they have more business in sight than ever before at this time of year. We don't mean by this that there is any suspicion of "a boom," but simply that matters are in a healthy condition. Next week and thereafter we will all be busy on inventory. Will be glad when it is completed. We have no doubt that it will show up all right with Hardware merchants in this city, as the agreed prices have been very well maintained and all lines have been on fairly profitable basis. We wish to correct the "Yellow Journal's" report that all the retail portion of Minneapolis was wiped out by fire a few days ago. It was bad enough

Digitized by Google

as it was, but there were three business concerns only that were burned out, one other across the street damaged somewhat by fire and water, and unfortunately two lives lost. But this does not represent the whole retail district of Minneapolis by any means. There are still a few of us left. W. K. MORRISON.

THE ALBANY TRADE.

Merry Christmas to all' Any other greeting, even from a commercial paper, would be improper at this season. Undoubtedly, the majority of readers can say this with a good deal of feeling as it is quite likely that all have enjoyed an excellent trade on the holiday line now identified with the Hardware business. Where all the pocket knives, scissors, carvers, razors, etc. go each year is a puzzle but the output seems to be increasing and new goods that are coming out in this line are eagerly picked up by the buyer who endeavors to secure the latest of everything that he buys. The other lines which sell so readily at this time of the year have fared as favorably as cutlery and the early snow and cold weather have made a success of seasoned goods already, many stocks no doubt being badly broken and requiring sorting up. The year goes out with a firm market and promises of steady if not higher prices and everyone feeling hopeful for a continuance of the prosperity with which our country has been blessed for so long a time. We indulge in the hope of many others, no doubt, that some of the leading goods will be worth more in the Spring than at the present time. Have no doubt all will be busy for quite a period after inventory in seeing how many goods they can contract for, covering their wants for as long a period in advance as the liberal manufacturers will consider selling. In this section there will be a large need for tools and supplies in the contractor's line as New York State is to be the center of the greatest undertaking in engineering and canal building that we have been favored with in many years. The Hardwareman will get his share of the benefits as well as the laborer and the contractor so that it does not appear to be a very "ill wind" that became a law and causes the expenditure in the canal interest in our Empire State. Extending our congratulations to this paper for its growing influence and for the benefits that all receive in the perusal of its pages, we withdraw until the New Year breaks in with its changes and hopes.

ALBANY HARDWARE & IRON CO.

THE COLUMBUS TRADE.

We have had unusual weather for the past two months or more. Scarcely any rain, wells and small streams dry, and for the past two weeks genuine Winter, with the ground covered with snow. The prospects for a great deal of inconvenience confront farmers, but the days have been ideal. While the weather has been below freezing point, the air is dry and bracing, and it has not been uncomfortable for most outdoor work.

The demand for builders' Hardware has kept up well, and stoves, skates, blankets, robes, axes, crosscut saws and other Winter goods have been in good demand. The advance in iron has been an incentive for dealers placing orders freely, believing that with stiff advances in raw material, finished goods must be higher. We believe there is a tendency to overdo matters in this respect. While some few lines are too low at the old cost of iron, most goods are high enough; but advances seem to be infectious when once started, regardless of the big profit some lines already pay. The International Harvester Co. has changed its policy of withholding prices until April, as they have done for the past two seasons. Last year, their representatives said the little fellows on the outside did not cut any figure, as they only sold about five per cent of the twine, anyway, but it seems the little fellow made it too warm for them to continue their policy. Well, if the little fellows do not sell much, it will not hurt them to meet the big fellows' prices. If the International can furnish the hide, the little fellows no doubt are willing to furnish the tail, and the farmer will reap the benefit. We hope all our friends will have their stockings filled to overflowing with profits from the past year's business, and wish one and all a Merry Christmas and a prosperous New Year. THE SMITH BROS. HDWE. CO.

J. H. Smith.

THE CLEVELAND TRADE.

Christmas changes the conditions of trade more than any other event in the year. And it is welcome because it develops all that is best in human nature and is the most potent influence in sweetening human lives. The economic loss, as large as it may seem, is more than repaid by the good will it creates. In no other way has Jesus impressed humanity so deeply and permanently. The unchurched masses are unconscious worshipers of His memory. In proportion to their ability the poor surpass the wealthy, in their contributions to make it a perpetual memorial. The "Peace on Earth and Good Will Among Men" that made up the angelic song at His birth was a precursor of the Christmas family around the yule log and tree that brings joy to young and old in all civilized lands. Who can doubt the divinity of a life that left such an influence in human hearts. Every load of Christmas trees, every store where presents are sold, every home full of expectations, and every heart impressed by the preparations are monuments to the divinity of such a life. It makes us forget the question, "Is life worth living?" by the joy it brings, and is a constant reminder that the best things of life are not the products of chance.

Advances are making good the declines that came in 1903, but are not excessive and it is hoped that they will not be. Prices that pay manufacturers a fair profit and not an excessive one are far better for all parties and a tariff adjusted to prevent higher prices than this would be a benefit to all. What capital and labor needs for their prosperity is a steady business affording a fair wage base and a reasonable profit for the capital invested, making manufacturing a safe investment instead of a speculating one. If prices get too high they are sure to be followed by the opposite and these extremes create disaster both to labor and capital. The element of speculation in business is a foe to permanent prosperity and if tariff legislation could prevent these extreme prices it would add an element of safety to business. Unscrupulous men will fight vigorously to retain any advantage that tariff gives them, but what is right for the consumer and for the community should be adopted. The opportunity that invites avarice, should be modified by legislation. There is always danger in attempting to interfere by arbitrary law with the natural and self enacting law of production and distribution, but as our tariff does that the rights of the consumer should be protected.

The difference in the price of Steel Rails changed in one year from $37 to $17 per ton and only for the good sense of some of the leading manufacturers such a change in price would have continued, but in an effort to prevent this, price of rails was kept for many months below the price of billets. The parties furnishing billets were not controlled by the same wise management or our partial crisis might have been avoided. No one familiar with the fact can doubt that our prosperity was prolonged by the conservative action of the leading manufacturers. That such a complete revolution as has been made in the price of Steel Rails shows conclusively that it could be made in other articles. An advance of 100 per cent. in the price of Pig Iron has not been unusual and mills that paid 100 per cent. profit were often found in a year or two in the bankrupt court, in fact this was the normal condition seriously effecting all other kinds of business. The present is an opportune time to call attention to such wild fluctuation as the sudden recent demand for Pig Iron may easily be quenched by an unwise increase of the price, and it would be a matter of safety if the duty permitted importation so as to forbid further advance. Consumers are equal as contributors to prosperity with makers, and both need such protection.

The uncertainty in the Iron and Steel trade has been a menace to all other industries and the most potent factor in causing period panics has been immense fluctuations from great prosperity to extreme depression carrying every thing with it. Stocks carried necessary to accommodate the public are decreased 50 per cent. in value, injuring credit, and creating bankruptcy. The argument that tariff increases wages has little application to raw materials such as pig iron and steel unless it is the wages of machinery, not men.

When the price of raw material is so high as to cut off consumption, labor suffers, and legislation to prevent that will be a benefit. Having stated the possible danger, I am more pleased to turn to the promises. Faith in the country was never more complete. Hope is everywhere prevalent. The financial condition is pre-eminently good. Faults in municipal government are being sought out. Bribery is being punished, and bosses disowned. The intuitive moral sense is revising theology, and confidence in republican government has been greatly strengthened by the result by our national election. We have a great country; a great president; and a great people.

The President's recommendation to give Railroad Commissioners power to fix the rate of freight where complaint is made, subject to the review of the courts, is not radical. What is needed is some plan for immediate action. This is necessary to prevent public indignation where a wrong is being perpetrated. The complaint against railroad management is, that with attorneys employed by the year, the individual stands little chance of getting justice. The cruelest competition is differential in freights, and unless some means to stop this is found the public control of transportation will be demanded. The power to impoverish or enrich individuals or communities, secured to the railroad, has been a disgrace to legislation and now the evil is so patent that some relief is necessary.

THE PHILADELPHIA TRADE.

The end of the year brings us once more to the season of hard work and light trade, although this year trade is holding on remarkably well, and sales for December are likely to greatly exceed those of the same month for several years past. It is most gratifying to see the way in which goods are being ordered for immediate consumption, and, one or two articles only excepted, there seems to be no demand in a speculative way, and everything bought, so far as we can see, is gonig into normal consumption. This is always a healthy sign, and, in view of the firm and advancing markets, it seems to possess unusual significance.

Salesmen are now coming in to have their samples overhauled and their prices re-arranged for next year, but revisions in price are apt to be decidedly upward, as manufacturers are announcing increased prices daily, especially on the staple lines, which are everywhere admitted as being sold far below profitable prices, and advances are inevitable.

Stock taking is now the order of the day, and this means to a large jobbing house an immense amount of work, which, of course, does not show on the sales-book. We are very much inclined to doubt if heavy stocks will be found in the hands of most dealers. On the contrary, we are of the opinion that in the majority of lines stocks have been very much depleted by the steady and good business of the past few months, and from all we can see there should be a good buying movement after the first of the year.

The hard Winter has had its effect, not only in increasing the sale of seasonable goods, but in leaving the trade with empty shelves and larger bank accounts, all of which tends to more liberal buying to replenish stocks.

The salesmen coming in are almost unanimous in reporting good prospects in their several fields, and the year 1905 seems to start with promise. BIDDLE HARDWARE CO.

RECENT TRADE PUBLICATIONS.

THE L. S. STARRETT CO., Athol, Mass., have sent us a copy of a Supplement to their Catalogue No. 17, just off the press, which will be found of real value in the hands of those interested in fine tools. This concern are prepared to furnish to dealers, without charge, electrotypes of any tool shown in their catalogue No. 17, or in the above supplement, either regular size or reduced to 1½ inches the longer way, as per samples which they show in the supplement. Included in this little book are their patent protractor, key seat clamp, tap wrench, double-lip countersink, new Universal surface gauge, new desk rule, cut-nipper, pocket screwdrivers, Jewelers' screwdrivers, Opticians' screw holder and driver, steel metal wire gauge, pin vises, American and United States Standard wire gauge, new micrometers and cases for same, height gauge attachment, etc. This supplement has not as yet been sent to the trade generally, but may be obtained upon request.

THE NEWHALL CHAIN FORGE & IRON CO., 9-15 Murray Street, New York, have recently gotten out a new catalogue, which is their No. 185, having reference to their forgings and castings. Some points of superiority claimed by them for their Warwick chain are: "They will outpull and outwear other makes. The stock is rolled at their own mill especially for the purpose. The stock is harder, resists friction longer, and at the same time has as great a tensile strength as the softest iron rolled. Ten feet of chain is cut out somewhere in the chain, put on the testing machine and broken. This broken sample is sent to the customer, together with the breaking strain and elongation, and the chain shipped is guaranteed to run up to sample." Many other excellent arguments are also given. The book contains a table showing approximately pitch, dimensions, weights, tests, breaking strains and safe working loads of steam shovel, dredge and hoisting chains; a table of dimensions of shackles; table of weights of round rolled iron, also square rolled iron and flat iron per lineal foot; also a few abstracts from Government proposals. Several pages are also devoted to sectional drawings of machine railway, wild cat, barge, anchor davits, chocks and cleats, mooring posts and towing bitts, etc., etc. The book is one such as would appeal to one interested in this line of goods, giving as it does, such general information. Send for a copy.

THE WINSTED EDGE TOOL WORKS, Winsted, Conn., have issued an extremely high-grade catalogue, on which they state they have spared no expense to make it the most complete and attractive catalogue of the kind ever presented to the trade. The above firm are manufacturers of chisels, gouges and drawing knives, of which they give handsome illustrations in their book. They state: "It is well known among the Hardware trade that our Mr. George Jessup has made a life study of hardening and tempering steel, and has most successfully devised methods whereby the standard of T. H. Witherby chisels, drawing knives and gouges is superior to all others. The cutting qualities are acknowledged to be unequalled; and we, therefore, take pleasure in recommending our goods to all interested in carpenters' tools, knowing they will experience the usual satisfaction." They also state that they will take pleasure in mailing their catalogue to any Hardware dealer who has not received a copy.

OUR NEW ORLEANS LETTER.

(Special Correspondence.)

NEW ORLEANS, LA., Dec. 17, 1904.

Constantly quickening markets for the heavier grades of iron and a long continued up-lift in the prices of practically all manufactured iron and steel goods, kept steady time throughout the section tributary to New Orleans, with a splendid run of trade running ahead of the records for last year—until ten days ago. Then the tremendous loss of purchasing power suffered throughout the South, and particularly through the States surrounding New Orleans, began to tell on the Hardware and implement trade, and for almost a fortnight, and particularly during the last week, the business, while still excellent, has been running even with, and not ahead, of the record made during December of 1903.

Immediately following the issuance of the Department of Agriculture's estimate, placing the yield of cotton for the year at 12,162,000 bales, thereby causing a loss in values estimated to mean a decrease of at least $35,000,000 to the South, the Hardware merchants of New Orleans contended that this loss, if as great as was claimed, would not materially affect the Hardware business, for the alleged reason that the loss would come from what would have been surplus profits, of which the country invests only a small proportion in Hardware and iron goods. The history of the past week has disproved these claims, and has shown conclusively that part at least of the unprecedented business of the thirty days precedent to the issuance of the bureau report was coming from that fund commonly denominated cash surplus. In fact, it would seem that that fund was responsible for the entire percentage of increase of the 1904 trade during December, over the 1903 trade during the same month of the year before.

In view of these facts, the Hardware merchants are wondering whether, during the stress of the Winter, their business for 1904 may not go even a trifle below the record established for 1903 during the same period of the year.

Thus look the markets through Louisiana, Mississippi, Eastern Texas, Southern Arkansas and Southwestern Alabama, from a general survey.

MATTERS OF INTEREST.

Until this unexpected dropping off in the trade, the wholesale merchants of New Orleans were deeply interested in a number of semi-official events that had occurred during late November and early December. These events have largely centered about the Panama Canal, and the possible trade that is supposedly to be developed for New Orleans thereon and there around. These events terminated with the return to New Orleans three days ago of Secretary Fred. Muller, of the New Orleans Board of Trade, and of James W. Porch, who is vice-president of the Board of Trade, chairman of its Standing Committee on the Mississippi and Orient Steamship Co., and also president of the Panama Commercial League, and local manager of the Lukens' Iron Works. These gentlemen have been on a sort of commercial embassy to the Spanish-American countries about the Isthmus and have returned with a voluminous report that is to be made public Wednesday next. It is said to contain some rather startling and sensational comments and disclosures on the exact reasons why New Orleans business men in particular, and American business men generally, have not been successful in many lines, in competing with the German and other European competition in Spanish America. William P. Hepburn, chairman of the House Committee on Interstate and Foreign Commerce, who returned from Panama to Washington via New Orleans, practically prepared the Orleanians for this, by some very frank statements of his own. This, however, was somewhat compensated for by the announcement made by Assistant Secretary of the Navy Darling, when passing through here some days ago, that the United States would soon be not only repairing, docking and cleaning, but also manufacturing ships in New Orleans. This, added to the semi-official announcement from Secretary Taft that the bulk of the government trade to the Isthmus would pass through New Orleans, has served well to please the New Orleanians looking in that direction.

Yet all these matters have been of general and current interest, concerning chiefly the ship chandlery firms, such as Woodward-Wight & Co., and the big exporters, like A. Baldwin & Co., and some of the agencies, Fairbanks, Deere Plow Co., etc. What the regular jobbers of the section have been paying their attention to has been the Hardware situation through the cotton belt, whereon depends the purchasing power of four-fifths of the territory into which New Orleans trades. They want to know just how much Hardware business will be stricken from the prospective by the loss suffered in the South through that slump in cotton

LOSS IN PURCHASING POWER.

To properly appreciate the situation now existent through the immediate Lower Middle South, one must be conversant with the history of events immediately prior to the fateful bureau report on December 4.

Throughout the Winter of 1903, and into the Spring of 1904, the planters throughout the section on which New Orleans depends were getting an average of 12.42 cents per pound for their cotton—and for the total crop of 10,000,000 and some odd thousand bales, they obtained a gross total price of $613,797,339—a crop surpassing in value any ever raised by the South.

To the present time approximately 9,000,000 bales had already been sold—sold or otherwise realized on. Prices current for this 9,000,000 have ranged from 11 cents earlier in the season to 9 cents not long prior to the bureau report, thence down to 8 cents immediately prior to that report—with an average price of about 9½ cents. Thus it would be seen that on the first 9,000,000 bales of the current crop, the South has lost approximately $100,000,000, most of this falling on the States nearer New Orleans.

Now, when the planters in 1903 had sold 9,000,000 they only had 1,000,000 bales remaining, while now there remain 3,000,000 to be sold. On 1,000,000 bales of this there will be a loss of $25 per bale on what would have been its value one year ago, or $25,000,000 to be added to the other loss of $100,000,000. However, from this loss of $125,000,000 there is to be deducted the additional money to be obtained from the 2,000,000 the planters have this year that they did not have last year. At a liberal estimate of $30 per bale on the plantation, this is $60,000,000 to be deducted from the $125,000,000, leaving a net, inside loss to the people of the South of at least $65,000,000. Most of this loss falls in the lower middle States, where the late cotton is concentrated, and New Orleans is dependent on that very section.

THE EFFECT.

Now, the effect of this depreciation has begun to be felt in peculiar ways. Two lines there are which are holding up the average of business just now to that of last season—implements and builders' bulk goods, such as nails, sheet metal roofing, bars, etc., hinges, and such other material as is called for by necessity. Were it not for these, the total of the Hardware trade would now be running ten per cent less than in 1903, whereas, a fortnight ago, it was running nearly ten per cent ahead. As it is, it is running even.

The implement sales are helped out by the exceptionally large crop made in the sugar section, the largest in twenty years, with the best prices in ten. The people are buying all manner of implements and are supplying the deficiencies created by years of hard times. Feed stuff machinery, new land plows, improved implements, are all going well into the sugar country; while even the cotton planters have not diminished their purchases. Mill supplies have also been selling well to the sugar section, for the sugar houses have been running overtime, with extra crews, and not a mill in the region but what needed repairs. The purchasing power of the sugar belt is millions more than it was last year. The heavier goods are going out now, the lighter and more urgent demands having been supplied earlier in the season.

Mill supplies have continued to go well into the cotton belt, for the demand depends on the size of the crop, and the business the gins have had to do, rather than with the ability of the planters to purchase. There has not been an idle gin anywhere in the cotton belt, and the ginners' reports of the United States Census Bureau show an increase of five per cent in the ginneries reporting.

LOCAL TRADE.

Local trade has been exceptionally good during the Fall, and has shown no diminution since the slump in cotton—being dependent on an entirely different set of economic conditions. As a direct result of this, there has been organized in New Orleans another Hardware establishment, termed the United Hardware Co., Ltd., with a number of the more prominent business men of the city as stockholders, and with several of the best-known Hardware experts in direct control. The store will make a specialty of builders' supplies and building Hardware, and will do both wholesale and retail trade.

About the best trade thus far in the Winter has been household goods, although builders' Hardware has held up remarkably well, chiefly because of the mild Fall and the postponement until Autumn of many building contracts that were held up during the Spring by reason of the building trades strikes.

The announcement that New Orleans would soon see ships manufactured here has given impetus to the interest felt in ship chandlery, and the statement that the shipyard of Woodward-Wight & Co. would be complete in time for business next Spring has created some little stir.

Exports during the Winter have been good, increasingly so now that the harbor is full of ships to carry grain to Europe, and looking for high-class freight to top off with.

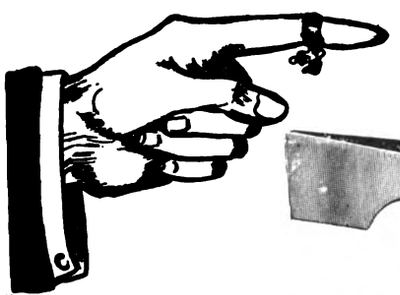
WORLD'S PRODUCTION OF IRON IN 1903.

(From United States Consul Bartleman, Seville, Spain.)

Messrs. James Watson & Co., Glasgow, have just published statistics on the production of raw iron during 1903, from which the following figures have been extracted:



The production, which in 1901 was 39,940,000 tons, increased to 43,480,000 tons in 1902 and reached 45,480,000 tons in 1903. The United States stands at the head with a production of 18,010,000 tons against 17,820,000 in 1902 and 15,800,000 in 1901. Germany wrested the second place from Great Britain in 1903, its production being 10,090,000 tons against 8,400,000 in 1902 and 7,790,000 in 1901. Great Britain occupies the third place with an output of 8,810,000 tons against 8,520,000 in 1902 and 7,850,000 in 1901. The output in France, which in 1903 amounted to 2,830,000 tons, has increased by 400,421 tons as compared with 1902 and by 427,428 tons as compared with the production of 1901. Belgium produced 1,300,000 tons in 1903, an increase of 196,301 tons over 1902 and 533,701 tons over 1901. Spain's production amounted to 380,284 tons.

The output has decreased in the following countries: Russia, 2,400,000 tons, or 118,404 tons less than in 1902 and 382,065 tons less than in 1901; Austria-Hungary, 1,320,000 tons, or 108,814 tons and 82,165 tons less than in 1902 and 1901, respectively; Sweden, 489,700 tons, a decrease of 34,300 and 23,600 tons from the amounts produced in 1902 and 1901, respectively.

WHAT IS THE MOST EFFECTIVE WAY TO ADVERTISE THE HARDWARE BUSINESS?

By J. A. PEEBLES.

What is the most effective way to advertise the Hardware business? My idea would be by judicious advertising, in conjunction with good show windows, an attractive store and an obliging Hardwareman with obliging clerks.

Judicious advertising in the newspapers is, I think, the best method of reaching the people. No fixed rule on advertising can be laid down. Remember that

ADVERTISING IS INVESTMENT, NOT EXPENSE,

and it should be as carefully dealt with as any other investment. There is also a great deal of tact to be used in advertising, as well as in selling goods, and every time you write an "ad." drive home and clinch a point that will bring you in dollars and cents.

Advertising is largely improved by the use of cuts. Contract for certain space in your local paper, be it big or little, and change your "ad." as often as you can. Be truthful in your advertising. When a customer comes to your store and finds the goods different from what he was led to believe they were in the advertisement, he may buy at that time, but nine times out of ten you have lost a customer. On the other hand, if people discover that your "ads." are not fairy tales, but a recital of

FACTS TOLD IN A SIMPLE, HONEST MANNER,

you will find you are making new customers and firm friends.

A good "ad." does not need to be a literary gem. One does not need to indulge in flowery language to write an "ad." to bring business to his store. Write as you talk, avoiding elaborate language. The simplest, strongest arguments used over the counter are just those which hold the attention of the reader. Imagine a Hardwareman saying to a customer: "We've got a complete line of Hardware Tools, etc." Hardwaremen don't do that. More likely he would say: "Yes, sir, that knife is just what you are looking for; it's a stiletto—if it breaks from a flaw, you trot it right back and get a new one; it's fully warranted, and the price is $1.50." It is the latter

SORT OF TALK THAT SELLS GOODS,

and the Hardwareman knows it; yet, for some reason, they do not talk that way in their advertising. I take no stock in the style of advertising that simply says: "We carry a full line of Hardware, Tinware, Stoves, etc." Why, if the reader never saw your "ad." he could guess that every Hardware dealer in town could vouch for as much.

Do not make your show window a dumping ground for odds and ends of all kinds, when it should be given more attention than any other part of the store. Remember, your front window is a

FREE ADVERTISING MEDIUM AND BRINGS GREATER RETURNS,

for the investment, than any other method of advertising. Keep your windows clean, and change the display at least once a week. The more taste and originality put into a window show the better. Watch your clerks, and if you have one with ability for this work, encourage and aid him with suggestions. The best results are secured by exhibiting several articles of the same kind, or class, of goods. A window like this the eye will quickly catch, and the memory will retain the impression of it; while, on the other hand, if you fill your window with samples of most of the goods in the store, the mind will become confused and the effect diminished.

The nearer you come to oneness in window displays the more satisfactory will be your window advertising. An occasional display without goods will repay one for his efforts, and if not overdone will interest the people. The aim should be to have something unique and different from the displays of other merchants; also aim to be in

KEEPING WITH THE OCCASION OR TIME OF YEAR.

Any display in motion is bound to catch the eye, but no window display, no matter how attractive, should remain over two weeks to bring the best results.

Advertising, both through the newspapers and by window displays, is to bring the people to your store. Once they are inside, the "ad." has done its work, and done it well, and your stock and your salesmen should be held responsible if you fail to satisfy the caller. Keep your stock up; it is more important for the dealer to have the article called for than to be without it merely because he had not found a suitable opportunity to buy it at a price at which he thought he should. It is a better "ad." to have the goods wanted, even if you have to pay more for them. What is wanted, when you get people inside the store, is to have the interior such that people will see

THE USEFUL AND NECESSARY ARTICLES,

use racks for displaying, not hiding, the goods.

The interior display of goods on the counters, shelves and in showcases is worthy of effort and care, and the aim should be to arrange goods so that they will be attractive to the eye, so that whether people wish to buy or not, they will stop and look. Some day they will want these very same goods, and will remember where they saw them.

EVERY DEALER SHOULD BE OBLIGING

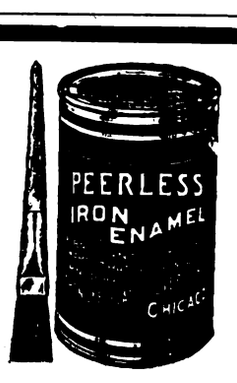
and require his salesmen to be likewise. One of the best, and, I would say, the surest, means of advertising is in the treatment of customers. No merchant should employ any one in any capacity, be he salesman or porter, who does not treat customers with respect. A kind word to every one entering the store is the best advertisement. A surly, overbearing or know it all demeanor on the part of any employee will soon cause a loss of trade. Let every customer leaving your store be a walking advertisement for it, saying a good word to a friend about your treatment of him.

Remember that all the money spent for advertising, all the money spent to make the store attractive, and all the money spent for the goods that lie on your shelves for a long period of time—all these things look forward to one end, and that is having the customer come back.

We have recently received a most attractive and interesting Book of Reference on firearms which embodies in detail descriptions of all the famous Stevens Rifles, Pistols, Shotguns and Accessories. As the advertisements of the J. Stevens Arms and Tool Co., Chicopee Falls, Mass., are constantly appearing in our columns, we think it would prove most beneficial to our many readers to apply to this company for the catalogue in question This manual contains many valuable hints about shooting in general, ammunition, the proper care of firearms, notes on sights, targets, etc. As is universally known, the Stevens output is very popular and reliable, and consists of the most complete and varied number of styles and models, representing the capacity of one manufacturer. The commendable enterprise of the Stevens Co. is exemplified by the handsome colored cover design gracing their 140-page catalogue, the spirited hunting scene being a creation of the able brush of the famous artist, A. B. Frost, of New York City. We have been told that this excellent catalogue and important contribution to firearm literature will be mailed to any applicant for four cents in stamps to cover postage, and the mention of this publication.

✤

STEPHEN MCCLELLAN, 1179 Herkimer Street, Brooklyn, N. Y., has sent us one of his envelope size pamphlet catalogues which he distributed at the St. Louis World's Fair. It exploits the Universal Iron and Wood drilling patented high grade tools which were exhibited at the Fair in connection with Millers Falls Co.'s tools. Included in the book are McClellan's Universal breast drills, patented corner bit braces, the new combination 1904 corner brace and corner bit brace, plain, and the Little Giant Joist Tool which is built of steel and to which one whole page is devoted in description. A copy of the above book will be gladly sent to those interested enough to send for one.



TRADE NOTES.

Salem, Mass.—The Dane-Smith Company of Salem has bought the Hardware stock of Henry Newhall.

Salt Lake City, Utah.—The entire stock of the Utah Stove & Hardware Company was sold on November 14 at 50 cents on the dollar. The company will retire from business in this city.

Senecaville, Ohio.—W. A. Blackmore and John Gardner have purchased the G. W. Blazier Hardware store and taken possession.

Terre Haute, Ind.—The Standard Wheel Co. will have a new delivery motor car on the market for 1905 trade.

ROLLER BEARING

Carpet Sweepers

SOMETHING DIFFERENT—
SOMETHING BETTER
ALL THAT IS GOOD
IN CARPET SWEEPERS

THIS month closes a record-breaking year for "Nationals" in more ways than one. Our sales, in spite of the general business depression which has prevailed, show more than thirty (30) per cent. increase over last year, and every indication point to even a greater increase for next year. A sufficient evidence that the trade appreciates the value of the "Something Different—Something Better" in "NATIONAL'S." As shown in photographic reproduction on this page, the Jury of Awards of the St. Louis World's Fair has proclaimed in no uncertain manner the superiority over all other Sweepers by awarding the Grand Prize and Two Gold Medals to

THE TRIPLE MEDAL LINE

DURING January, a complete line of **National Roller Bearing Carpet Sweepers** will be displayed in a most artistic manner at Grand Rapids in the New Exhibition Building, opposite the Morton House, and at Chicago in the Furniture Exhibition Building, 1411 Michigan Avenue, on the first floor. At these exhibitions we will show for the first time several new models, also the most elaborate and attractive selling helps ever offered to the trade. Some more of the "Something Different—Something Better" kind. Better look us up. You won't lose; neither will we.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Camden, N. J.—The Eagle Hardware Co. has been incorporated to deal in Hardware of all kinds. Capital, $100,000. Incorporators: William A. Forman, Jr., Camden, N. J.; Samuel V. Summerill, Jr., Penn's Grove, N. Y.; Samuel H. Richards, Bridgeport, N. J.

Chicago, Ill.—The Rehm Hardware Co. has been incorporated. Capital, $25,000; manufacturing Hardware. Incorporators: George Rehm, Daniel Rehm, William H. Peters.

Cleburne, Texas.—The Randle Hardware Co. has been incorporated. Capital stock, $10,000. Incorporators, S. B. Norwood, C. T. Randle and G. B. Randle.

Delphi Falls, N. Y.—Arthur Sweetland on December 1st opened a Hardware store.

Jerseyville, Ill.—The Newton-Beatty Co. has been incorporated. Capital, $5,100; deal in agricultural implements. Incorporators: Robert Newton, J. N. Beatty, A. W. Cross.

Lakewood, Ohio.—The Lakewood Hardware Co. has been incorporated by T. L. Weight, C. L. Tompkins, H. A. Thompson, James Gormsen and D. C. Need. Capital stock, $10,000.

Mobile, Ala.—The C. H. Costello Chandlery Co. has been organized to carry on a general ship chandlery, Hardware and vessel supply business in all its branches and the making of contracts, etc.

Montreal, Can.—The Hardware firm of E. Archambault & Co. has been incorporated.

New Brunswick, N. J.—The Strong Hardware Co. has been incorporated. Agent in charge, William Dunham; capital stock, $50,000. Incorporators: William Dunham, Alvin A. Hastings, Frank H. Dunham, Michael McFadden, William Metzrath and Howard I. Stevenson. The company is to acquire and conduct the Hardware business of William S. Strong, deceased, at 289 Burnet Street, New Brunswick.

New York, N. Y.—Joseph Goldstein & Co. has been incorporated; household articles. Capital stock, $2,500. Directors: Joseph Goldstein, Anna Goldstein, Louis Goldstein, New York.

Prosperity, Mo.—The Weeks-Betts Hardware Co. has been incorporated. Capital stock, $16,000, all paid. Incorporators: L. F. Betts, C. E. Weeks, Della D. Weeks and Amy F. Betts.

Schuyler Lake, N. Y.—Newman & Sumberg is a new concern that has recently started in the Hardware business here.

Seneca, Mo.—Clem. Buser will open a cooperative Hardware and Implement store.

Sumpter, S. C.—The Durant Hardware Co. has been incorporated. Capital stock, $12,000.

Waterloo, N. Y.—James H. Haslett and Ross S. Reynolds have formed a partnership and purchased the M. D. Crosier Hardware store, at Phelps, and will take possession at once.

West Bantam—J. Scott has recently opened a Hardware store in this place.

Wichita, Kan.—D. A. Wilson, W. A. Johnson and C. B. Campbell have formed a company under the firm name of D. A. Wilson & Co. They are located in the three-story brick building at 119-121 North Water street. They will occupy the entire building and will have a complete stock of farm implements, wagons, buggies, etc.

Wills Point, Texas.—The Russell Montague Hardware Co. has been incorporated. Capital stock, $10,000. Incorporators: W. E. Easterwood, E. A. Russell and C. J. Montague.

Changes.

Aberdeen, S. D.—N. Gelle, of Morris, Minn., has purchased the Aberdeen Hardware Co., the largest Hardware store here.

Asheville, N. C.—The improvements to the Asheville Hardware Co.'s building on Pack Square and to the company's storeroom have been completed, making one of the largest and handsomest stores in the city. The storeroom's original length of 80 feet has been increased 125 feet, making a total depth of 205, thus relieving the congested condition and giving greater facilities for handling the trade.

Brazil, Ind.—E. L. Winklepleck & Sons have purchased the Charles Herbert property on the corner of Main and Washington streets for $9,000. The lot has a frontage of sixty feet and the new owners will erect a modern building with three rooms on the ground floor and office rooms above. Winklepleck & Sons will occupy the entire first floor with a mammoth Hardware and furniture store.

Chambersburg, Pa.—Norman O. Huber, the Hardware merchant, is now comfortably established in new quarters in the White Building.

Dresden, Tenn.—W. D. Brasfield, who has been in the Hardware business here for quite a number of years, has sold out to Charles B. Brasfield. This is one of the largest Hardware houses in this section. Charles B. Brasfield will take charge the first of the new year and W. D. Brasfield will go in the real estate business here.

Dubuque, Iowa.—On January 1 the A. Tredway & Sons Hardware Co. will become owner of the Schreiber, Conchar & Westphal Co.'s stock and business, the details of the sale being now arranged between the two firms. This business change consolidates two of the oldest Hardware houses in the West. The sale does not include the Schreiber & Conchar Manufacturing Co., which will continue in business as at the present. The officers of the Tredway Co. are A. W. Tredway, president, and W. F. Wodrich, treasurer. C. D. Scott, treasurer of the Schreiber, Conchar & Westphal Co., is conducting the sale on the part of his company.

Fremont, Ohio.—John Tindall has purchased an interest in the Shoupe Hardware store, on Front street, and the firm will be known as Shoupe & Tindall.

Fort Worth, Texas.—The Huey-Phillip Hardware Co. has increased its capital stock from $200,000 to $300,000.

Grand Rapids, Mich.—The firm of Smith & Schantz, implement dealers at 13 West Bridge Street, has been dissolved, Mr. Smith retiring from the firm.

Green Valley, Ill.—Feulner Bros. have sold their Hardware business to C. E. McNaught.

Jefferson, Ohio.—W. M. Kellogg, Hardware dealer, has purchased T. H. Bell's stock of Hardware, stoves, harness, etc., located on North Chestnut Street. It is understood that other business matters require Mr. Bell's attention and make it desirable for him to devote his entire time to them. The stock will be invoiced at once and removed to Mr. Kellogg's East Jefferson Street store.

Le Mars, Iowa.—The Moore Hardware Co.'s store has recently changed hands. The new proprietors are Fred. Melchior, of Marcus, and Charles Hollenbeck, of this city. They will take possession at once.

Lima, Ohio.—A. P. Gill, of Ottawa, a former partner of Mr. Cover in the Hardware business there, has disposed of his business in Ottawa and purchased the interests of Thomas H. Jones in the Cover Hardware Co. He will enter the new firm January 1st.

Los Gatos, Cal.—The Hardware merchants of O. Lewis & Son have purchased fifty feet of ground on the east side of their store and will at once commence the erection of a building 75 feet front and 90 feet deep, to be used as a store and stove room.

Milwaukee, Wis.—Herman F. Haessler, for twenty years with the Philip Gross Hardware Co., has become a member of the firm of A. L. Kiefer & Co., Mason and Milwaukee Streets. This firm is about to open a builders' Hardware department, and Mr. Haessler's long experience in this branch of the business will insure a complete and up-to-date stock.

Pontiac, Ill.—H. C. Hobbs, who has for many years conducted a Hardware store in this city, has on account of failing health sold his stock and business to I. M. Kidder, of Polo, Ill. The transfer has been made and Mr. Kidder is now in charge.

Rich Hill, Mo.—G. W. Bacon has traded his Hardware, furniture and undertaking business to J. A. Frick, of Holt, Mo., for land in Harrison County.

Waco, Texas.—Lots at the corner of Third and Mary Streets are being cleared off for the erection of the new building of the McLendon Hardware Co. The building will be one of the largest and handsomest Hardware structures in Texas. It will be 150x150 feet, specially constructed, highly embellished with terra cotta trimmings, and the Mary and Third Street sides of the building will be of Thurber pressed brick, beautifully trimmed. The building will be three stories high. The total cost will reach about forty thousand dollars by the time the work shall have been completed.

Fires.

Cadillac, Mich.—Fire on December 4 destroyed the Hardware store of Drury & Kelley, causing a loss of $40,000. The store, a brick structure, two stories tall, was completely gutted, very little of the stock being saved. It is thought the fire originated from spontaneous combustion among some oil barrels in the basement. It burned from 6.30 o'clock in the morning to 1 o'clock in the afternoon and was so hot that it was thought for a while the whole block would be burned. The insurance amounts to $26,000.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Appleton, Wis.—The Eagle Manufacturing Co. is a new concern, organized to manufacture all implements for the farm. Three brothers are at the head of the company, F. Saiberlich, as president; O. Saiberlich, vice-president, and E. W. Saiberlich, secretary and treasurer. At present there are twenty-five men employed, but within another year 100 men will be employed. The plant and machinery have cost nearly $30,000.

Baltimore, Md.—The business recently conducted by the late S. B. Sexton, Jr., has been incorporated under the name of the S. B. Sexton Stove & Manufacturing Co.

Brownwood, Texas.—The Hurlbut-Jackson Co. has been incorporated. Capital stock, $100,000. Purpose, manufacture of saddles, harness, implements and vehicles. Incorporators, B. E. Hurlbut, of Brownwood; Ed. S. Hughes, of Taylor County, and Felix Jackson, of El Paso.

Corsicana, Texas.—The Cleveland Tool Co. has been incorporated. Capital stock, $25,000. Incorporators: J. W. Sloan, of Corsicana; J. A. McVeigh, of Sour Lake, and J. F. Maxwell, of Beaumont.

Jackson, Mich.—The Fuel Protector Co. has been incorporated to manufacture and sell the Green Radiator and Fuel Economizer. The company is capitalized at $15,000. The stockholders are Daniel P. Sagendorph, Regnold F. Fennell, Charles M. Wise, Lawrence A. Welch, Detroit; Stephen A. Conlogue, Jackson; Joseph F. Conlogue, Detroit, and Jordan H. Green, Jackson.

Nashville, Tenn.—The firm of Smith, Herrin & Baird, which has been doing business in this city for a number of years, as manufacturers and jobbers of tinware and house furnishing goods, will incorporate on January 1, 1905, with the following men as incorporators: A. C. Smith, E. F. Baird, Hal Tubb, H. S. Hargis and H. S. Williamson, and with A. C. Smith as president; Hal Tubb, vice-president, and E. F. Baird, secretary and treasurer. The new concern will be known as the Smith, Herrin & Baird Mfg. Co., and will greatly increase its facilities for manufacturing. A. C. Smith and E. F. Baird have been connected with the old firm for the past fifteen years. Mr. Tubb has been successfully engaged in the mercantile business at Alexandria, Tenn., for the past eighteen years. H. S. Hargis, of Granville, Tenn., has been a representative of the old firm as traveling salesman for the past ten years. H. S. Williamson, of Celina, Tenn., has also had a number of years' experience in the same line. Both he and Mr. Hargis will continue to represent the new company in their respective territories. H. E. Herrin, who retires from the business on above date, will leave in a few weeks for Denver, Colo., which place he expects to make his future home.

Newburgh, N. Y.—The Staples Valve Co. has been incorporated with a capital of $150,000. The directors are J. A. Staples, C. H. Hanford and C. L. Waring, of Newburgh.

New York, N. Y.—The E. E. Meacham City Lock Co. has been incorporated. Capital, $250,000. Directors, E. E. Meacham, A. W. Otis and W. L. Otis, of New York City.

New York, N. Y.—The J. H. Cort & Son Co. has been incorporated; stoves. Capital, $10,000, and directors: John Van Orden, A. H. Bissell and J. M. Williams, of New York City.

New York, N. Y.—The New York House Furnishing Goods Co. has been incorporated. Capital, $25,000. Directors: T. L. Spiegelthal, N. O. Brown and A. J. Leslie, Brooklyn.

North Adams, Mass.—The Hamer Improved Washer Co. has been incorporated. Capital stock, $25,000. The company will manufacture washing machines, and also the improved axle nut invented by the late Harry R. Hamer.

Ottawa, Ill.—The New Idea Novelty Co. has been incorporated; manufacturing novelties. Capital, $10,000. Incorporators, George W. Stiles, Henry W. Johnson, George P. Hills.

Port Chester, N. Y.—The Globe Foundry Co. has been incorporated. Capital stock is $40,000. The directors for the first year are John F. Mills, Herman L. Marshall and Thomas Fitzgerald, of Port Chester, and James M. Heatherton and M. Sheldon Smith, of Brooklyn. The purpose for which the company is formed is for the manufacture and sale of all kinds of iron, steel, brass, wrought iron, galvanized and enameled manufactures, etc.

Puxico, Mo.—The Fulkerson Bros. Handle Co. has been incorporated. Capital, $10,000. Incorporators: J. M. Fulkerson, J. Fulkerson, W. A. Fulkerson, Nettie Fulkerson and L. H. Lucas.

Salem, Ind.—The J. and B. Octagon Fruit Jar Co. has been incorporated. Capital, $50,000. Incorporators: Effie G. Martin, Warren M. Martin, Walter S. Baker, Howard B. Newkirk, J. Henry Bell.

Southington, Conn.—The Elmohr Manufacturing Co. has been incorporated. The company will be capitalized at $10,000. The incorporators are Richard Elliott, Matthias Mohr, Mrs. Richard Elliott and Mrs. Minnie Mohr. Mr. Elliott has been elected president and treasurer, and Mr. Mohr, secretary. The company will continue for the present in its quarters on Bristol Street. It will manufacture mechanics' tools of all kinds and machinery, and later a more commodious factory will be used.

St. Louis, Mo.—E. C. Atkins & Co., of Indiana, has been incorporated under the laws of Missouri to manufacture Saws. Capital stock, $10,000.

St. Louis, Mo.—The Landay Steel Range Co. has been incorporated. Capital stock, $20,000. Incorporators: Joseph Landay, F. Edward Sudholt, Ben. F. Heyl.

Troy, N. Y.—The Jackson-Van Horn Manufacturing Co., of this city, has been granted articles of incorporation with a capital stock of $30,000. The works are located in the Schnell Building, on East Canal Street, and the company is manufacturing weather strips, wrenches, etc., the inventions of William Van Horn, of Piqua. The incorporators are Messrs. E. A. Jackson, T. B. Kyle, F. E. Scobey, A. F. Broomhall, William Van Horn and others.

Troy, N. Y.—The John Morrison Brush Co. has been incorporated. Capital, $30,500, and directors: John Morrison, David S. Saxe, Troy, and Hyman Gips, of Albany.

Washington, D. C.—The Offset Handle Wrench Co. has been incorporated. Capital stock, $50,000. Incorporators: H. Clay Campbell, Charles W. Embrey and Ralph E. Campbell.

Wilmington, Del.—The Stowe Manufacturing Co. has been incorporated for the manufacture of machinery, tools and engines of all kinds. The incorporators are people of Wilmington, and the capital stock is $25,000.

Changes.

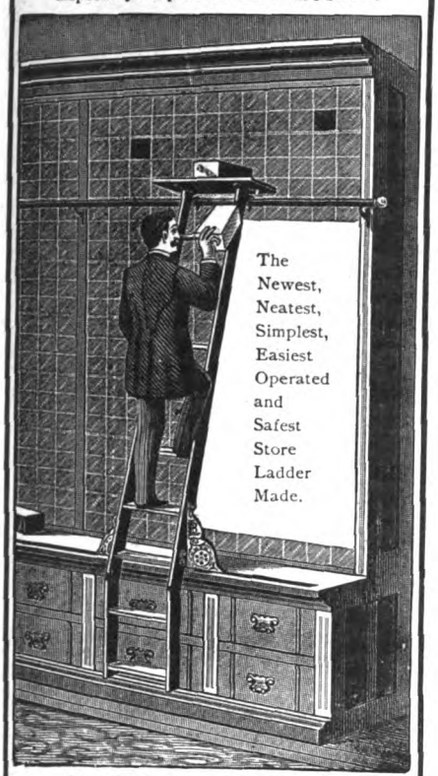
Albany, N. Y.—The Empire Saw Co. and the Albany Saw Co., of this city, which were recently merged, have filed a certificate of consolidation. The directors are: A. H. Spierre, L. H. Burdick, Gaylord Logan.

Ashland, Ohio.—The Ashland Steel Range and Manufacturing Co. is branching out in a new direction. It is about to begin the manufacture of the malleable range in addition to the steel range.

Baltimore, Md.—W. H. Whiting & Co., dealers in and manufacturers of marine Hardware, will return to the corner of Pratt and South Streets, their former location, having leased a warehouse on Pratt Street adjoining the corner.

Berea, Ohio.—The firm name of the Berea Novelty Co. has been changed to that of The Raquette Manufacturing Co.

Chattanooga, Tenn.—The Frictionless Metal Co., a corporation, with capital and surplus amounting to $100,000, with headquarters at present at Richmond, Va., is making arrangements to remove headquarters to Chattanooga and erect here an entirely new plant, which will cost about $50,000.



Collingwood, Ontario.—The big plant of the Imperial Steel & Wire Co. was put into commission on December 5. The plant is one of the most complete wire plants in America. Everything is of the most modern design, and every machine is of the most rapid type. The buildings are large and commodious. The floor space of each department is large enough to accommodate three times the present output. The daily capacity of the plant is fifty tons.

Cuba, N. Y.—A new building to be used as a dry kiln is being erected at the Foster Pulley Works. The building will be heated by steam and equipped with the best of everything necessary for quickly drying the lumber used in the manufacture of pulleys.

Sargent's Gem Food Chopper

is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Baltimore, Md.—George C. Sherick & Co. has been incorporated by Benjamin C. Nicoll, George C. Sherick, Charles C. Carver, John J. Gregg and I. S. Crevey. The capital stock is $1,000. Firearms, fishing tackle and sporting goods will be carried in stock.

Framingham, Mass.—The American Roller Bearing Co. has been incorporated, with $325,000 capital. President, William B. Lambert; treasurer and clerk, Frederick B. Hill.

Grand Rapids, Mich.—The W. B. Jarvis Co., dealers in sporting goods, has been incorporated, with a capital stock of $100,000. The officers are: Chairman, C. B. Kelsey; secretary, James Bayne; treasurer, C. F. Perkins; manager, W. B. Jarvis.

Hamilton, Ohio.—The Smyers Arms and Sporting Goods Co. is a new firm, located at 37 High street. They have installed a large stock of the best sporting goods.

Hartford, Conn.—The Empire Manufacturing Co. has been organized and incorporated to manufacture games and toys. The capital stock is $55,000, and the incorporators are L. S. Lewis, of Hartford; George B. Risley, of Rocky Hill, and C. J. Dorsey, of Baltimore.

Jersey City, N. J.—The W. J. Kells Mfg. Co. has been incorporated with a capital stock of $350,000. They are located at 130 Highland avenue. A. H. Timpson is president and W. J. Kells is vice-president.

Monticello, Ind.—The Tippecanoe Smokeless Powder Co. has been incorporated. The capital stock is $100,000. This company was organized to take over the business, patents and property of the Tipppecanoe Powder Co., recently incorporated under the laws of Washington. The new directors are James Mitchell, the inventor; J. Frank Belding, George F. Palmer, I. F. Palmer, A. A. Anheier, James Simons, Charles E. Newton, Alvin Witz and George Stephens.

New York, N. Y.—A new concern has been organized under the firm name of Lee & Underhill at 38 Warren street. Manufacturers of Hardware Specialties and Sporting Goods will be represented. Both of the parties, H. C. Lee and Gardiner F. Underhill, Jr., were formerly with the Bridgeport Gun Implement Co.

New York, N. Y.—The firm of Abercrombie & Fitch, 316 Broadway, has been incorporated under the name of The Abercrombie & Fitch Co. by D. T. Abercrombie, E. R. Fitch, C. E. Braine and William Kimber. Capital stock, $100,000.

Springfield, Mass.—Barney & Berry has been incorporated; skates. Capital, $75,000. Promoters, Everett H. Barney, W. P. Dodge, R. W. Ellis.

St. Louis, Mo.—The motor cycle business of the late Harry R. Geer has been incorporated as the Harry R. Geer Co.

St. Paul, Minn.—George E. Lennon has incorporated a company for the manufacture of recquets, balls and woodenware necessary for the new game of "richochet," and for the placing of the same on the market. The company will sail under the name of the Richochet Co., and is capitalized at $25,000. The men interested besides Mr. Lennon are Samuel E. Wharton and Thomas McDermott, both of St. Paul.

Toledo, Ohio.—Albert E. Olson, inventor, has decided to incorporate a company with $20,000 capital stock to handle the Olson bicycle saddle spring, the demand for which has exceeded the supply.

Troy, N. Y.—The Troy Automobile Exchange has been incorporated to buy and sell automobiles, bicycles and all kinds of road vehicles and make repairs. The capital stock is $5,000, and the directors for the first year are James Lucey, Victoria L. Lucey and Cornelius Lucey, all of Troy.

Whitehaven, Tenn.—The White Haven Gun Co., capital stock $6,000, has been incorporated by J. B. Hildebrand, J. W. Hale, W. B. Van Hook, J. H. Van Hook, C. B. Hildebrand, J. N. Beasley and E. W. Hale.

William Penn, Pa.—August Gross, gunsmith, has opened a shop in Lower William Penn, where first-class work only will be done.

Changes.

Buffalo, N. Y.—The Hartford Rubber Works Co. have moved the Buffalo branch from 22 W. Chippewa Street to 686 Main Street.

Canastota, N. Y.—H. D. Weed has changed his firm name to the Weed Chain Tire Grip Co. and moved to 28 Moore Street, New York City.

Chicago, Ill.—The firm of Arms & Co. have gone out of business.

Chicago, Ill.—The Hartford Rubber Works Co. has moved its Chicago branch from 136 E. Lake Street to 83 Michigan Avenue.

Chicago, Ill.—The Independent Cycle Manufacturing Co. have moved from 1600 Polk Street to 369 Jackson Block.

Christiansburg, Va.—The firm of Lester & Co., bicycle dealers, have closed out their stock.

Cleveland, Ohio.—W. N. Booth, a bicycle and automobile dealer at Wilson & Paynes Avenues, formed a partnership with E. Holmes, formerly engaged in the carriage business. The new company will handle the Pope cars, and is preparing for a large business.

Gilroy, Cal.—V. Reed Forsythe has disposed of his Bicycle business to J. W. Forsythe.

Kalamazoo, Mich.—The Kalamazoo Bicycle Co., formerly the property of G. R. Slover and F. G. Wilson, has been dissolved, G. R. Slover becoming sole proprietor.

Litchfield, Ill.—The firm of Wilson & Corzine, sporting goods dealers, has been dissolved, Perry Wilson retiring and W. T. Corzine continuing the business.

Los Angeles, Cal.—Fred. Pickles has sold his bicycle business to J. E. Livesey. Mr. Pickles will leave for the northern part of the State to remain.

Meridian, Miss.—E. H. Gast, the gunsmith, in Twenty-fifth avenue, has been succeeded by J. W. Rice.

New Haven, Conn.—The Winchester Repeating Arms Co. has purchased a plot of land adjoining its factory, which has a 150-foot frontage and a depth of 232 feet. This will enable the company to erect more buildings as its output increases.

New York, N. Y.—John Wanamaker will take up the sale of motor boats at both his New York and Philadelphia stores.

Opelousas, La.—G. W. Moriarty & Son have moved their stock of sporting goods to their new fireproof building, where they will carry a much larger stock of firearms, ammunition and general sporting goods than before the fire which destroyed their place of business last June. In addition to this they have decided to handle shelf and builders' Hardware.

Pittston, Pa.—E. C. Bechtold, North Main Street, sold out his bicycle business to Charles C. Garrison, Schnecetady, N. Y.

Spartanburg, S. C.—J. M. Young is succeeded in the bicycle business by John C. Goolett.

Springfield, Mass.—J. F. Burtee & Co., of 246 Main street, will dispose of their entire line of jewelry, etc., and will devote their entire attention in the future to the wholesale and retail business in Sporting Goods, etc.

Syracuse, Mass.—A. G. Spalding & Bros. opened a new branch store here on November 12. A large stock of general athletic goods will be carried regularly.

Toledo, Ohio.—The firm of Ray Samberg & Co. has changed its name and will in the future be known as The Toledo Sporting Goods Co.

Whitestone, N. Y.—Townsend & Co. have opened an addition to their store on Eighth Avenue, which will be used as a Bicycle Shop.

Worthington, Mass.—A new building is being erected for Kilbourn Bros., who are preparing to manufacture gun tubes for the trade.

MANUFACTURERS' RECORD

(Continued)

Somerville, N. J.—The real estate and plant of the New York Agricultural Works, including a large factory building in East Somerville, was sold at receivers' sale on December 8th to B. Lissberger & Co., metal manufacturers, of 738 East Fourteenth Street, New York, for $14.000.

Terryville, Conn.—The Bristol Specialty Co. will remove to this place and erect a one-story and basement brick building to be 140 feet by 32 feet and two small wings. Work on the building will commence at once and meanwhile the company is making preparations to put out a more extensive line of small wooden Hardware.

Toledo, Ohio.—The business and plant of the Wales Pulley Co., of Swanton, has been purchased by the Keasey Pulley Co., of this city. Both the Keasey and Wales pulleys will be manufactured. The Keasey Co. will operate the Swanton plant until the Toledo factory, which was destroyed by fire recently, can be rebuilt.

Toledo, Ohio.—The general offices of the Indiana Truck & Scale Co. have been removed to this city. They have been located up to this time in Bluffton, Ind., but it is probable that the entire plant will follow the general offices before long. V. N. Church will be secretary and treasurer of the company.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

"WHY IS IT
that Jones is so successful? He seems to be busy all the time but never too busy to promptly serve his patrons. I understand Smith who used to be one of your best customers now patronizes Jones. What was the trouble?" "Well, you see, their water pipes froze up and I could not get to him quickly enough. The fact is I should have had more torches on hand, but I put it off until too late." "So that is the reason is it? No wonder Jones prospers."

The **No. 32** is the best quart combination torch on earth. Jobbers sell at factory price, or we will ship by paid express upon receipt of $3.50." Your money back if it does not please."

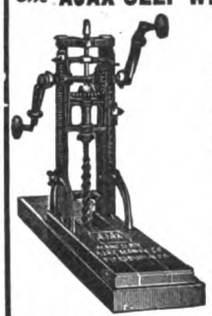
GLASS HANDLE TABLE KNIVES AND FORKS.

No. 1000 C. P.



WE call them VITRICENE handles. Beautiful? Yes, beyond comparison. Durable? Nothing but iron or steel equal to them for wear. Won't they break? Of course they will if you try to break them. They are so made that they will not break unless roughly used. Clean, sanitary, durable, handsome, reasonably cheap, and so attractive that as soon as their merits are known, the sale must be enormous.—We are now ready for orders.

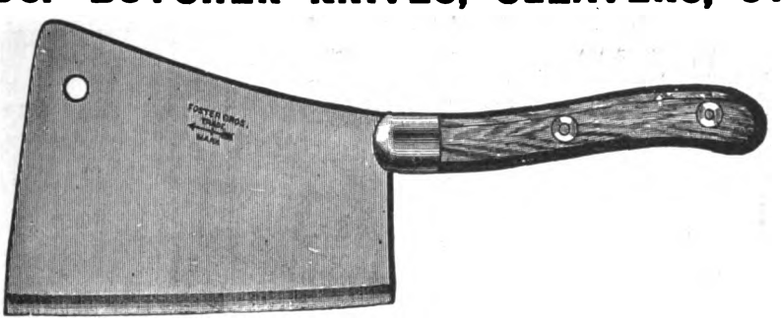
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us



has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

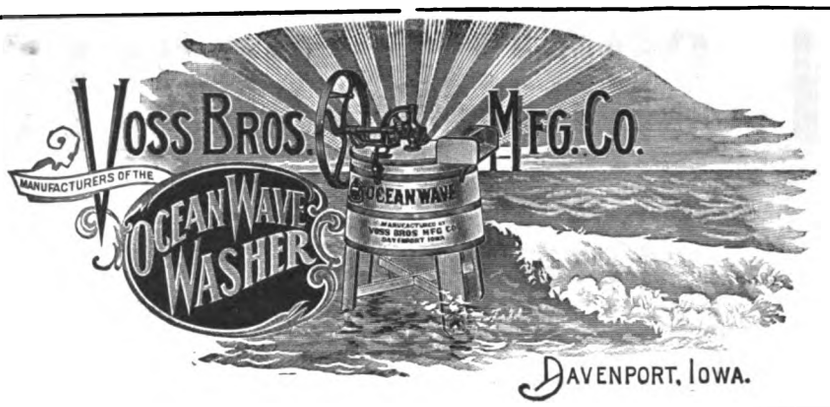
and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent*; enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

BEST BY EVERY TEST

You want the best goods because you want the largest profits.

You want **Hauthaway's "Star" Harness Specialties.** They are best by stable test, and they are the tested best because they are made of the best material, in the best manner, by the best process.

They are "stars," brilliant, effervescent in selling and pleasing qualities. Each year but confirms their superiority over all other similar articles.

Hauthaway's "Star" Harness Oil Soap

The purest made. It is food to the leather, and has the shine in it. It is kind to the hands, healing and cleansing, because there is no free alkali in it, mainly mutton tallow. It is a Cresceus in selling ability. Best, and works that way.

Hauthaway's "Star" Harness Oil Blacking

The much demanded thing. Oils and blackens and shines, all at the same time. Puts new life and good looks into the leather. Best by test. Always sells in a hurry, and at a good profit. Try a sample order.

HAUTHAWAY'S SPECIALTIES

Hauthaway's "Star" Harness Dressing

The "star" of them all! Outclasses all others, surpasses all others in popular favor. Makes old harness look new, and new harness look newer. It is the king-pin dressing, and sells like a spicy novel. It puts money into the dealer's pocket, because it sells and keeps right on selling. Ask for facts.

Hauthaway's "Star" Axle Oil

Makes axles slippery as an eel. No more heated boxes. The Hauthaway body does it—not a greasy body, but a full frictionless body that resists wear. There is money in it for the aggressive dealer. Yes, there is!

Send to us for HAUTHAWAY'S Literature. Tells more facts worth knowing. Secure our prices, and know our goods. The rest is easy.

***The* L. S. STARRETT CO.**

ATHOL, MASS., U. S. A.

NEW YORK 123 Liberty St. CHICAGO, 15 South Canal St.

Flawless Edge Tools

We make all kinds of Edge Tools.

Although we have been in the business since 1837, we have been growing younger every year—using the youngest machinery, the newest methods and doing everything in a down-to-date way.

Standards of Excellence

That is the recognition given them in the markets of the world. The Highest Award was given them at the Paris and Pan-American Expositions.

May be that is the reason why more of our goods are sold than of other manufacturers in our line.

Our goods and prices interest most Hardwaremen. Are you interested? Write us at once.

Mention HARDWARE.

HARDWARE

The ninth annual convention of the Minnesota Retail Hardware Association will be held in the Lyceum Theatre, Duluth, Minnesota, February 22, 23 and 24, 1905. Association headquarters will be at the Spalding Hotel.—M. S. Mathews, Secretary.

✤

The Canton Ceiling Co., Canton, Ohio, owing to their rapidly increasing South American trade, have published a Spanish edition of their catalogue "G," reference to which was made in our issue of December 25th.

✤

In our issue of December 10th, we erroneously stated that "the Columbian Hardware Company had moved all of its local offices to Chicago and would only operate its foundry in Cleveland," stating at the same time "This action caused the discharge of about ten clerks, the rest of the office force being taken to Chicago." Our correspondent is in error regarding his information, as we are assured by the Columbian Hardware Company tne report is without foundation, and its dissemination is causing considerable annoyance from its misleading information.

✤

Wm. N. Courtenay, 126 Liberty Street, New York, is a representative of The Ducharmes & Company, Shelbourne Falls, Mass., manufacturers of high grade screw drivers and other tools of guaranteed quality.

✤

L. M. Hermance, Poughkeepsie, N. Y., has perfected the Revolver fishing reel which bids fair to become exceedingly popular among fishermen. Mr. Hermance would like to hear from manufacturers whose shops are fitted for making this article.

A MAGNIFICENT RECORD.

A splendid example of the results of persistent hustling and fair dealing is shown on page 69 of this number of Hardware. The Norvell-Shapleigh Hardware Company are proud of this record and indeed they have every reason for being proud. Their three years' gain in sales of goods runs from an increase of 353 per cent. on Builders and Shelf Hardware to 5,888 per cent. on Manilla and sisal rope. Among other notable increases are Sewing Machines 2,200 per cent. Paints and Brushes 1,760 per cent, Harness, Saddlery, Hardware and Whips 1,535 per cen.t Their announcement will be interesting reading to everyone in the trade as will also be their pamphlet "Twenty-five ways of increasing business," which can be had for the asking. The publishers of Hardware believe that they are voicing the general sentiment in the trade when they extend to this popular firm, the heartiest congratulations and best wishes for a continuation of good business.

WILL GO TO EUROPE.

Mrs. F. E. Myers and daughters, Mayme, Kathryn and Helen, will leave for Europe, Saturday, January 14, for a several months' visit. F. E. Myers was in Chicago last week and made arrangements for their transportation on the Steamer Republic of the White Star Line. This steamer makes the southern or Mediterranean trip. The ladies will stop several days at historic old Gibralter and will visit both Spain and Africa, after which they will go to Naples by way of the Mediterranean. They will spend a month in Italy, the land of song and romance, and will then travel leisurely through Germany, Switzerland, France and Great Britain, when they will return to Paris there to await the coming of Mr. Myers who will join them some time in March.

OHIO HARDWARE ASSOCIATION.

The Executive Committee of the Ohio Hardware Association met on the 20th ult., at the Algonquin Hotel, Dayton. The next annual convention will be held at the Algonquin on February 28 and March 1 and 2. Some very interesting changes are being planned in the programme for the next meeting. The Executive Committee is working very earnestly to make the coming convention one of great educational value for every retail Hardware dealer. A. L. Shearer of the firm of Rooney & Shearer, Dayton, was appointed by President Baker to fill the unexpired term of Financial Secretary Jones, who has taken charge of a Hardware establishment in the State of Washington. The corresponding secretary of the association feels very grateful at the number of applications for membership that are constantly arriving.

CALENDARS RECEIVED.

The most beautiful calendar received so far at this office is that of the National Sewing Machine Co., of Belvidere, Ill. It consists of six cardboard sheets stamped in the form of placques, the center of each one showing the portrait of a beautiful woman, reproduced from paintings. In a section of the margin of each is shown the dates of each month. The calendar is fastened together with a white silk cord, which is used at the same time as a hanger. With the calendar is sent a neatly printed holiday announcement.

*

F. E. Myers & Brother, Ashland, Ohio, are sending out to the trade a new poster and calendar. The poster part represents a scene at the World's Fair and makes known the fact that a number of prizes were awarded to Myers' goods. The main portion of the poster is given up to the illustrations of an assortment of pumps, hay tools and other goods manufactured by this well-known concern.

*

The work of the celebrated artists, Asti and Rondel, are shown in the calendars being sent out by the Cleveland Pneumatic Tool Co. The reproduced work of these paintings is almost perfection itself, and the Cleveland company is to be congratulated on its enterprise in using this class of advertising.

*

One of the most handsome calendars we have received this season has been sent to us by the Fowler Waste Manufacturing Co., of Philadelphia, for whom Edwin F. Schofield, 47 Leonard Street, is New York agent. It is a large poster calendar, having a copy of Philip Boileau's famous masterpiece, a girl's head, life-size, drawn in free-hand style, on it, making a most striking picture, which appears almost to speak. The above firm are manufacturers of cotton waste, batts and lapps.

*

The beautiful calendar of the Harrington & Richardson Arms Company is being distributed to the trade, and it is certainly an extremely artistic one, showing a handsome girl in hunting costume with her faithful dog beside her, sitting on a bench. On her lap rests a Harrington & Richardson Shot Gun which is her especial pride. There is a combination of color about the calendar that makes it especially striking. A copy of the calendar will be sent to any one of our readers, free upon request, until the supply is exhausted, provided Hardware is mentioned.

A BOOKLET SOUVENIR.

In connection with the second annual dinner and meeting of its officers and salesmen, Stowell Mfg. & Foundry Company, South Milwaukee, Wis., prepared an attractive souvenir in the shape of a booklet, the special feature of which was the portraits presented of those who are conspicuously identified with the direction and conduct of the company's business.

McKinney Mfg. Company, Allegheny, Pa., present the compliments of the season to their customers, by sending them a leather covered memorandum book, stocked full of desirable information on postage, census, maps, etc., beside serving as a daily reminder for every day of the year.

✤

THE JACOB-McINERNY COMPANY.

The Jacob-McInerny Company is the name of a new organization that commences their commercial importance with this issue. It is composed of the two best Job Lot buyers known in this market, and they have been known in it for years. Mr. McInerny has been associated with the leading house in the trade, enjoying the reputation of being a thoroughly well equipped auction buyer, with few rivals, for a score of years. As a buyer of job lots, Mr. Jacobs has had the confidence of the Hardware trade for almost the same period; with abundant capital and knowing well the requirements of the business, thoroughly understanding the wants of their customers they will do the most successful business in their line. They have in preparation a catalogue of their stock which is a large and attractive one, and they request our readers to send for one, and learn the surprises they have in store for close buyers.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review

In another part of Hardware will be found reviews from our corps of correspondents reflecting in a general way the trade conditions of the country, and dwelling upon the many indications that force us to believe 1905 will prove, if nothing unforseen occurs, a banner year to the Hardware trade. The firm feeling of confidence in the future that forms the background for this belief, springs from the large and valuable crops that so greatly increases the emoluments of the farmer; the strength of all the markets that are reflected in so large a field as that of Hardware; the general feeling of prosperity that now prevails throughout the country, and the fact that early orders from the trade, in liberal quantities, emphasizes the views they hold regarding the future; the increasing strength financially of the country generally and the absence of everything of a disturbing character to interfere with the sanguine views they hold; these conditions all have a bearing in giving that feeling of confidence which is so gladly welcomed. The sound condition of our annually increasing export trade and the great desire of those interested in its growth in finding markets so favorably inclined toward its advancement; these facts all combine to foster and encourage the sanguine views held apparently by all alike.

Labor generally is employed with work of a permanent character and under conditions of respect for the employer, which allow a greater sense of its continuance; with the hope under the entire field that no breaks of importance will occur during 1905 to unsettle the harmonious relations that are now so prevalent, so that we may look forward to a display of that restless energy, that disposition of labor with a trend toward general activity, full of the inspiration arising from continuous employment that elevates the laborer and dignifies his sphere of labor.

Advances in prices, limited to volume, are expected by the trade in almost every branch of the business that is affected by changes in cost of raw material. It is hoped manufacturers will be inclined to make moderate advances that have a tendency to the stimulation of orders representing the lightness of the stocks, rather than make them so abnormally high it will later be found impossible to sustain them. The hardening of present prices relieves the market from any uncertainty in regard to the immediate future that might prevent orders so necessary to keep the entire factory force systematically employed, and the jobbers from keeping stocks full and complete.

Catalogue Houses that have created so much discussion are "scotched" but not killed; and will be found with the aid of the Jobbers and Manufacturers, less aggressive in their manner of doing business. The Retail trade have generally adopted methods that enable them to meet Catalogue House competition with greater confidence of success, and do not find that gloom pervading their field of effort when they find the Catalogue House has got in its seductive work, and sold something to one of their legitimate trade. The opposition to this class of houses is now thoroughly organized and the entire trade is aroused and alert.

In the immediate future of the Hardware business, Builders Hardware will receive quite a boom in all parts of the country. There is a demand for a class of houses that is now being planned, and the early Spring will see these plans acted upon and the trade receive the benefit of the increased demand. Dealers will find it necessary to carry heavier stocks stimulated by these requirements and will be found ready to take advantage of the increased business.

The fact of the recent elections having endorsed the policies of the Country for another four years of endeavor, will find the affirmative views that dominate the Nation accepted by a large majority of the people and the future become a very sanguine one. No friction will be found between capital and labor, and fresh hopes of future progressiveness are born every day providing abundant work for the magnificent resources of the country.

From Our Correspondents.

We have given up a large part of our space to our corps of Correspondents from all over the Country who are jubilant over the conditions prevailing in their vicinity, indicating to a large extent the general prosperity that ushers in the present year. They have dwelt on the many phases of engrossing business and the systematic work to be done, the conditions to be arrived at, that will make their labors interesting, and redound to the benefit and advantage of the entire trade. We have let them give their own views, being those of representative Jobbers whose judgment and opinion can be relied upon, being familiar with all the causes concerning which they write, and upon whose efforts will in part depend the prosperity of the future regarding which they are all so confident.

THE POSTAL LEAGUE

OFFERS A SOP TO AMERICAN MERCHANTS IN THEIR LATEST BULLETIN.

The latest move of the Postal Progress (?) League is toward the revival of the old post coach system, and if the postal laws being advocated by this organization are adopted, the rural free delivery wagon of the near future will bear a close resemblance to a four-horse freight truck and the Catalogue House will be in its full glory.

The latest bulletin of this organization reminds one of the prospectus of a Mining "skindicate." After viewing with alarm the present deficiency in the Post Office Department, "which is bound to increase," they tell in glowing language how, if their recommendations are accepted and made into law, the deficit can be turned into a magnificent surplus. The "League" states that the post-wagon system is easily capable of doing a general business, including the carrying of passengers, baggage, supplies or produce, and suggests a rate for house to house service of from one cent for an eight-ounce package to twenty-five cents for a 200-pound package. In the bulletin of the League great stress is placed on the immediate advantage of this system to the "rural population, in which both the Merchant and Customer will share."

Courtesy of *Judicious Advertising*

POSTAL PROGRESS (?) THE LEAGUE'S IDEA OF THE FUTURE RURAL FREE DELIVERY WAGON

This is clearly an effort on the part of the "League" to pull the wool over the eyes of local merchants by pointing out how they will be able to deliver their goods throughout the surrounding country via the Rural Free Delivery wagons at a small cost, and to blind them to the fact that the big Catalogue House will be the chief beneficiary. It is doubtful if this cleverly worded bulletin will deceive any material number of the nearly thirty thousand Hardware dealers in this country or the thousands of dealers in Dry Goods, Clothing, Groceries or Boots and Shoes, all of whom will be hit—and hit hard—if the laws proposed by the "League" are passed by Congress.

It would almost seem that the organization from which "Dr." Cowles draws his salary had adopted as a suggestion a satire on the Mail Order Business, recently published in "Judicious Advertising," in which under the title of "Perkins, the Great," a story is told of the time in the future when those big establishments were shipping via Uncle Sam's mail routes, everything from toothpicks to threshing machines.

The story, in part, is as follows:

We sat in our office one day, Perkins and I, and he was looking over a Chicago mail-order catalogue. You know the kind, one of those eight thousand page affairs that have to travel in a special trunk and pay excess baggage rates. Perkins loved that catalogue—he would sit for hours turning over the pages and looking at the cuts of crocks, corsets, cabs, costumes and can-openers and other things—and the reason he loved it was that he was the inventor of the whole mail-order business. He used to say that the forty-eight pound Chicago mail-order catalogue was his best monument, and that he would like to have one stand in the cemetery where he should be buried—if there was room for it. He looked forward to the time when the mail-order catalogue would be issued in a series of volumes, like an encyclopedia, and when the mail-order houses would have to send each set in a special car, and there would be a special index in a separate volume. He said that some day people would pick up the present eight thousand page mail-order catalogue and say—

"And to think that a little thing like that was once considered a catalogue!"

He said that some day the parcels post would be arranged so that all you would have to do would be to slap a two-cent stamp up in one corner of a grand piano and write the address across the bottom and drop it in a letter box, and the government would deliver it anywhere in the postal union. Then the mail-order business would be something like what it should be! Perkins believed that anything you could paste a postage stamp on should go through the mails, whether it was a chunk of ice or a hot potato. He said this was getting to be a mail-order nation, and that before long people would wonder they could ever have been so

STUPID AS TO BUY THINGS IN A STORE.

"Everything *from* a needle to a threshing machine!" he would exclaim as he looked over the mail-order catalogue. "*From* a pin to a pyramid! And Perkins began it all!"

But this day he frowned. He turned over one hundred pages after another hundred, and ran his long, lean forefinger up and down the columns of the index and shook his head. What he sought was not there. Sugar and sarcophagi, corn plasters and corn planters, oil sardines and oil paintings, everything to make a happy home was there, even to sectional houses and adjustable cyclone cellars, except one thing:

There were no wives quoted. You couldn't order a wife by mail.

There were sewing machines and mattresses and lawn mowers and coffee grinders, all on thirty days' free trial, but no wives on thirty days' free trial or otherwise. Not even a widow. Perkins shut up the book with a slam.

"Who leads?" he asked. "Who shows the way? Who do they wait for?"

This last was not grammar, but it was Perkins.

"For you, Perkins," I said. "Always for you."

"Good!" he exclaimed, "and why? Because Perkins is the Originator; Perkins is the Creator; Perkins is the Unique. He has a head. He has brains. Why not complete the mail-order cycle? Why not round out the grand theme to its ultimate perfection?"

He looked at me and smiled.

"Why not supply wives by mail?" he concluded.

"Why not?" I asked.

Digitized by Google

In ten days we had our contracts for advertising placed and were ready for business. Our advertisements showed a small halftone cut of a happy home with a sweet-faced woman darning socks or knitting—the cut was too small to allow the object in her hands to be distinctly seen—and the text ran so—

"ARE YOU MARRIED? If not, you should be. No man is more than half a man until he has a dear little wife. Consider Solomon, the world's wisest man, he had a thousand.

"Don't depend on the limited home supply, which is sure to be picked over and often shop-worn. Send direct to headquarters. *Perkins & Company's wives are guaranteed first quality.* Full pedigree furnished with each wife. Illustrated catalogue sent on application. Clubs taking five or more wives at one time supplied at reduced rates. Perkins & Company, Matrimonial Dealers, 7576 A, Wabash Avenue, Chicago, Ill."

This advertisement we placed in every paper that we thought a man would see. In the ladies' journals we used different copy—a neat and refined statement that Perkins & Company desired a quantity of well-bred ladies suitable for wives. We found that the ad. in *The Fireside Pet,* a paper devoted to cats, brought us the largest returns per thousand of circulation. The editor assured us that 98 per cent. of his subscribers were unmarried ladies. He was greatly pleased when we wrote him how profitable our ad. in his paper had been, and he used our letter to boom his ad. columns. But he was sorry later. We married off 97 per cent of his subscribers and they all quit keeping cats, and stopped their subscriptions. As soon as we had a good supply of raw material on hand we got out a catalogue. It was a handsome affair. Each prospective wife was given a number, and alongside a two by four inch halftone portrait of her we printed a full and honest description and her pedigree. Our prices varied according to the quality of the goods, and we classified them according to age and value. Later we issued a supplement containing widows, but it was never very extensive. We found that widows who wished to marry again did not usually need our services. They were able to get rid of themselves.

Perkins ran the business on strictly straight and honest business principles. If a subject was a second grade he said so honestly, but an especially attractive bargain he marked with an asterisk and asked a price accordingly. Age, we found, was not necessarily a disadvantage. Many men of some years preferred wives of similar years.

The tattoo idea was Perkins'. Wonderful man, Perkins is. When we had sent out about twenty wives he came down one morning glowing. He was exuding joy from his Air-the-Hair Hat to his Go-Lightly Shoes. He sent right out for a Japanese tattoo artist, and that same day mailed our trade mark to be copyrighted.

"Why waste our sweetness on the desert air?" he exclaimed. "Why turn out first-class wives without our trade mark blown in every bottle? Why advertise the Perkins' High-Grade Wife and not protect the buyer against cheap and inferior substitutes?"

After that we tattooed our trade mark on the left wrist of every wife we sent out. It was a pretty little mark, too, showing Cupid peeping out of an envelope, and above it the words, "Perkins' Mail-Order Wives," while below we put "First Grade," or "Second Grade," and so on' as the case might be.

Don't think for a minute that every customer wanted our First-Grade wife! Our seconds and thirds were in bigger demand than our best selected prime stock was. Look at the men of your own acquaintance—how many of them have first-grade wives? How about your own wife?

As a rule we found that the West, and the country districts, wanted a good, steady article, and that the East, and the larger cities, preferred something snappy and stylish.

Our prices varied with the grade. For furnishing a First Grade Perkins Mail-Order Wife we charged $400; Second Grade, $200; Third Grade, $100; and culls and divorcees, no charge, but our gross profit was $400 on each. A First-Grade wife any man was willing to pay $400 for, if he wanted the best, but if a man was only willing to pay $200 for a Second Grade, we found that the Second-Grade wife was willing to pay the other $200 to get a husband, and the Third Grade list was always filled to our limit with slightly shop-worn examples who thought $300 was a cheap price to pay to secure a loving companion for life.

We received thousands of testimonials, and we made good use of them. Had them reproduced in fac-simile with a portrait of the husband and another of his Perkins' Mail-Order wife, and scattered them broadcast, on the "follow-up" system. Every morning every bachelor in a certain town that we happened to be working would receive one of those fac-simile letters. Just about the time he was pinning his suspenders to his trousers, or running a needle into his thumb, or sitting down to his lonely breakfast, the mail-carrier would leave one of our little reminders that without a wife a man can't be truly happy. Every morning that bachelor would be reminded how sad and lonely he was until he began to believe it himself. We had a series of testimonials tnat began: "For many years I was a bachelor and thought I was happy, but finally I was persuaded by one of my friends who had bought one of your High-Grade Mail-Order Wives," etc.; or, "As I look back on the days when I was a bachelor I shudder. And I shudder again to think that but for your advertisement which I saw in *The Weekly Gazette* I might still be a bachelor. Since receiving my Perkins' High-Grade Mail-Order Wife I have persuaded ten of my friends to order from you, and they are all happy and wish me to thank you for them."

Another from J. C. D. in Utah said: "Until I saw your advertisement I was in the habit of getting my wives by the usual means, but I was so taken by your frank statement that I decided to give you a trial. Since then I have placed four orders with you, and I shall never use any other wives than yours. P. S.—Please send two more Third-Grade Perkins' Mail-Order Wives by next express."

We really found that men who bought the Perkins wives were happier and more contented than ordinary husbands. Perkins said it was because we supplied a superior article, but I think it was because our wives had to be paid for. A man always thinks more of a thing he has to pay for than a thing he gets *free gratis.* A man always wants something for nothing until he gets it, and then he thinks he has been cheated. When we were running *Married Life,* the best monthly publication in the world at fifty cents a year, we used to give absolutely free to every subscriber a solid rolled gold scarf pin set with a genuine imitation diamond—gave it absolutely *free gratis* without charge—and yet people would write us and complain about the pin. It was because they got it free of charge. If they had paid us fifty cents for the pin and received the magazine free of charge they would have liked the pin and kicked about the magazine. It's human nature.

It will be freely admitted that there is plenty of room for reform in our postal system, but that reform should not involve the ruin of the American merchant. The postal laws are full of inconsistencies, but that is no reason why the freight carrying business of this country should be taken over by Uncle Sam with the effect of driving the village merchant out of business.

A. EUGENE BOLLES.

THE FIRE ARMS BUSINESS.

The Fire Arms trade for 1904 was up to the average on most lines and on some far in excess of any previous year. Repeating rifles, revolvers, etc., about held their own; single short rifles increased as did air rifles and medium priced double barrel shot guns, while the higher priced, as fancy double barrel shot guns fell off; single barrel shot guns increased in volume but not value. Owing to an agreement of the single gun makers to disagree and "bad blood" they continue to sell single guns at less than the actual cost to manufacture, each accusing the other of causing the drop in prices. This condition is absurd and only shows how foolish even the best business men will be, to "get even" or "do" a competitor.

The outlook for future business during the coming year was never as bright as it is to-day. Jobbers are specifying earlier than usual and for much earlier shipments than heretofore; many who have in the past made out orders for shipments the first of each month covering their approximate requirements for the year, have this season ordered an equal amount to be shipped during the first six or seven months of the year.

The consumers all have money; wages are high; crops average good and prices generally high; even the cotton planter, who is a purchaser of Fire Arms, got a fair price, and the loss, owing to recent decline in price will fall largely on the dealer and speculator; hence even the South with its low price cotton, was never in as good financial condition as it is at the present time.

The Fire Arms supply is fully equal to the demand in all lines and some in excess, such as boys' cheap rifles and single guns, one or two makers appear to have built up rapidly on medium and low priced single shot rifles and a dozen others imagine the market is unlimited, but some will eventually find the mistake.

When the home product supplanted the foreign Flobert, it opened up a large field which was fully covered some time ago. The same applies to the Belgium double guns; so many are entering this new field that in a few years, in fact by the time they can successfully compete, home competition will be so severe that the profit to manufacturers will be on a par with single guns and the strangest part of it all is when the manufacturer cuts his price to cost or less the jobbers think they must do the same as in single guns. As soon as the drop in singles came, the jobbers all dropped their price to less than cost, counting the cost of transacting business, and one eastern jobber had his printer work at night to get out a printed price the day following the decline, quoting single guns at about the new actual cost which meant a loss of $1 per gun on his stock in his store, and yet the jobber complains of the manufacturers and wants lower prices which do him, the jobber, no good, as he only gives it away meeting imaginary competition.

All in all, Fire Arms makers are happy, look for a most excellent year, and hope to declare for 1905 their usual dividends.

C. F. M.

HISTORY AND PROPHECY

A casting up of accounts seems to reveal that 1904 has not been such a poor year after all. Conditions throughout the year have been somewhat unsettled, due no doubt, in part at least, to the political campaign, but judging from the reports which follow, the year's business has been quite satisfactory.

Just before the close of 1904 we asked a number of firms to give us their opinions on the prospect for the Hardware business during 1905. Manufacturers are naturally optimistic in talking of their own business, but the opinions given herewith are from firms known to be conservative, and it would seem therefore that these expressions should add strength to the confidence of those in the trade as to the outlook for 1905, if, indeed, there are any whose faith needs strengthening. The replies received were, in substance, as follows:

ENTERPRISE MFG. CO., OF PA., Philadelphia, C. W. Asbury: I have never known the prospects in Hardware to give greater promise than they do for 1905. Our information seems to indicate that the retail stocks are low all over the country, and there appears to be an active demand from actual consumers. These bright prospects also extend to the building trades, and I think the returns from that branch of the business will show marked improvement, largely because the labor in these trades is much more rational than it was during 1904. The Agricultural classes of the country were never in better financial standing than they are now, mortgages have been paid off, lands have been improved and fertilized, and money has been expended with fair liberality in the purchase of everything to facilitate the moving of their crops, and they still have a fair bank balance upon which to draw. If, therefore, we are blessed with good returns to them for their investment, and their labors the money will undoubtedly circulate and the Hardware trade will get its full share of the benefits. It is also true that labor is well employed in the large cities, and this will add to the general prosperity. Summing up I am inclined to think that the prospects for 1905 are better than those in the Spring of 1899, because there is now less of the speculative element which usually brings a boom with a reaction. Prospects to-day are that the demand will be healthy because the movement of goods will be caused by actual consumption and not by speculation. It is probably fortunate that we had a slight lull during the summer of 1904, this gave every opportunity to all classes of trade to take their bearings calmly, and to start in the Fall campaign with renewed energy. There are few who will complain of the net results of the entire year of 1904 when an average is taken, but I predict that business in 1905 will be larger and more satisfactory than in 1904.

OSGOOD SCALE CO., Binghamton, N. Y., O. J. Fowler: In regard to the prospects for 1905, we are looking for a good year, and there seems to be every indication that 1905 will be one of the best years we have had.

HENRY DISSTON & SONS, INC., Philadelphia, Samuel Disston says: So far as business prospects look for 1905, it is very encouraging. We have quite a large amount of business in hand for next year and everything that comes to us from our traveling force indicates that we shall have a fair proportion of business next year.

GOODELL-PRATT CO., Greenfield, Mass., W. M. Pratt: The year 1904 just past has exceeded our expectations, our volume of business has been slightly in excess of 1903 and this in the early part of the year we did not deem possible. There is every indication that the stocks in the hands of our customers are at a lower point than they have been for several years, we have more orders on our books for future delivery than we ever had before (it is rather unusual for us to have many orders sent us to be sent at specified future dates) and we are at the present time—during the dull month of December—selling more goods than our factory is able to produce. Unless our deductions are entirely wrong and unless all signs known to us fail, the year 1905 will be the greatest year in the tool department of the Hardware trade that this country has ever known; the great trouble is going to be that the majority of our customers will wait until the early spring before placing their orders and unquestionably be subjected to much annoying delay.

E. C. ATKINS & CO., INC., N. A. Gladding: In regard to prospects for 1905, we are pleased to state that so far as we can see now, everything looks very favorable and we are looking forward to the enjoyment of good business. The slackness that existed in general channels of business during a few months in the late Fall and Summer, was, of course, quite natural, due principally to the Presidential campaign. Since the election there has been quite a revival in our line of business and we know of no reason why it should not improve right along until Spring.

THE H. D. SMITH CO., Plantsville, Conn., Louis H. Schmitt: The year just closing has been a good one with us. Without looking up our records we should say it is the best year we have had in the past twenty. The prospects for 1905 seem to us to be exceptionally bright. We are sold considerable into next year. Running orders are fair, inquiries very active, and everything seems to point to an exceedingly good Spring trade.

REPUBLIC IRON & STEEL CO., Chicago, Geo. A. Baird: Present and prospective conditions are such as to warrant the assumption that the production and consumption of iron and steel products during the calendar year 1905 will break all records as to tonnage.

OLIVER IRON & STEEL CO., Pittsburgh, Henry B. Lupton: In regard to the business of 1904, the tonnage was a large one, but prices unsatisfactory. The buyers only purchased from hand to mouth and seemed to have no confidence in the future. As to 1905, we feel that it is to be the banner year as far as tonnage is concerned. Every section of the country is prosperous; the railroads are to use enormous quantities of rail and structural steel; the agricultural implement manufacturers were never so busy, and with comparative assurance that we are to have no disturbing legislation, the buyers feel every confidence in the future of the market and are buying to the extent of their storage capacity and the liberality of the sellers.

LISK MFG. CO., LTD., Canandaigua, N. Y., L. A. Parkhurst: We believe the prospects for business for the coming year as viewed from our standpoint to be excellent; that the year will be one of the best in all lines that this country has experienced in a long time. We believe conditions favorable for a good healthy revival in all lines, although we are free to say that 1904 has, for us, been one of the best years that we have ever had and we have no occasion whatever to find any fault with it, although we realize that general conditions have not been all that could be desired.

GEM CUTLERY CO., New York, F. H. Hoffmann, Manager: It affords me much pleasure to state that the business during 1904 has been absolutely satisfactory as far as we are concerned. Comparing same with the results of previous years, especially 1903, we have no fault to find, and only trust that 1905 will be equally as well in comparison, which we have every reason to believe, owing to the enthusiastic feeling of the trade in general as far as the product of high class Safety Razors is concerned. I admit that our business is somewhat different and must be judged from a different point of view than general staple articles. The great American public is only to-day appreciating the fact that self-shaving with a good Safety Razor is a luxury and a home comfort. I am convinced that no one who knows a little about this business, will say that I am too enthusiastic if I claim that, although at the present time the United States employs about 1600 working men making Safety Razors and accessories, this business is only in its infancy and still has an immense field for its growth.

STANDARD CHAIN CO., Pittsburgh, John C. Schmidt: Replying to yours of the 24th would say, after passing through two years of falling prices, the pendulum has commenced to swing the other way. This has been brought about by the economies effected in purchases not only by jobbers but by manufacturers and railroads until it was carried to such a point that stocks were depleted on every side, in the hands of manufacturers, jobbers and dealers. With increased demand we, at the same time, have increased costs on our material which necessarily are reflected by increased prices for our various products of iron and steel.

The outlook for an excellent business during 1905 is most promising. Until recently the price of chain has been unchanged throughout almost the entire calendar year 1904, excepting an advance of about $3.00 a ton during the present month which advance, however, is considerably less than the advanced cost of the material entering into our product.

CRONK & CARRIER MFG. CO., Elmira, N. Y., C. F. Carrier: We cover the jobbing trade of the entire United States, and must confess that June, July and August were extremely dull. Since then, there has been a constant improvement, and in our line we are very positive the coming season will be the largest we have ever had. Our men, from all sections, report the farming trade

Digitized by Google

in excellent condition, all sections well supplied with money, for even where the crop is light, prices are so high that farmers have money to spend. We are of the opinion that in some lines this would not be the case, but goods that are used by farmers are in great demand, and in some sections the building trade is good. We believe by Spring there will be a general revival of business in all lines. Prospects never looked brighter.

CALDWELL MFG. CO., Rochester, N. Y., W. H. Caldwell: We will state briefly that our business during the present year has been on the whole very satisfactory, with a slight increase over the previous year. The demand for our goods has been steady, the prices have continued unchanged and on the whole our business has been in a very healthy condition.

The outlook for 1905 is very encouraging and we anticipate a good business. Orders for future shipment are being daily received and we see no reason why, in the present healthy condition of business in general, we are not warranted in not only holding our own, but hoping for a reasonable increase in the year's output of our goods.

HORSESHOE MANUFACTURERS seem to be satisfied with the past year's business and of the general opinion that the outlook in that line for 1905 is exceptionally good. No advance in prices is expected before Midsummer and not then unless raw material—pig iron, scrap and steel—should go to very much higher prices than at present.

The SHOVEL BUSINESS, according to a prominent manufacturer in that line, continues in rather an unsatisfactory condition although the volume of business during the past year has been good, and promises to be up to the average for the coming year. The increased cost of material may compel an advance in price on the part of the individual manufacturers, but there seems to be no prospect of any united action to that end. It is claimed that close to 75 per cent. of the goods produced by all the manufacturers in this line during the past year were sold at below real cost to manufacture.

MCKINNEY MFG. CO., Allegheny, Pa., J. P. McKinney: Viewing the situation from our standpoint, we can see no reason why the volume of business in 1905 should not be much larger than that of the year just closed. Stocks in the hands of jobbers are very low. This is evidenced by the large number of rush orders we are receiving at present. The conditions of the agricultural districts are good; money plenty; labor employed; in fact, every branch of trade seems to be in a prosperous condition which necessarily leads us to look for greater demands for the coming season than in the past. While the volume of business for 1904 was fair, yet owing to the exceedingly low prices, the year was as a whole as satisfactory as it should have been. The first six months was probably equal to that of the previous year, but the midsummer slump of prices had a tendency to curtail orders, and a corresponding lowering of profits, thus making a lower average than would otherwise have been.

PIKE MFG. CO., Pike, N. H., E. B. Pike: We think that at no time in our business career has the situation seemed more favorable for a thoroughly healthy business than for the year 1905. Good crops in almost everything and good prices for them reenforced by unchanged political situation would seem to warrant us in anticipating a satisfactory business.

There are difficult problems to be met but we believe that while the present administration is in power they will be met wisely and in a way that will carry the nation safely through them. We believe that Theodore Roosevelt and his administration will go down to history as the best, in many respects, that this country has ever had. President Roosevelt has had experience and training, is an able man, and has the courage of his convictions. In the selection of his Cabinet and of others whom he has brought around him for advisors he has shown great wisdom. We think the stand taken by the President on Interstate Commerce, in his message to Congress, a very wise one. We believe it should be in the power of the Interstate Commerce Commission to establish new freight rates when the ones in force have been found to be unjust.

We believe that there should be national incorporation laws along the same lines as the national banks and national bankruptcy laws. One of the great dangers to the manufacturing and commercial interests of the country is the fictitious values represented by the stocks of corporations. We believe that corporations should not be allowed to issue stocks beyond actual values for property that they own.

We believe that there should be a revision of the tariff by the friends of the tariff; in other words, we believe the present administration should take hold of the matter honestly to accomplish something along these lines.

If these things are attended to in time we believe that there is prosperity ahead even to exceed that which we have had in the past few years.

In our opinion the labor question is in a much more favorable condition than it has been. The various organizations of employers who are making a stand for the open shop will bring about a fair solution of this difficult and dangerous question we believe.

OWOSSO MFG. CO., Owosso, Mich., A. M. Bentley: We are receiving about the usual number of contracts for our goods; in fact we think some more than we had a year ago and prices are about the same as a year ago and are being fairly well maintained by the manufacturers. There is some disposition among the jobbers to cut prices on our line but not any more so than what has occurred in past years. We are looking for a better business than we had in 1903 and 1904, these two seasons being rather cold and weather backward and the sale of screen goods was on the whole considerable less than in former years when we had better conditions.

AMONG THE RETAILERS.

The Retail Hardwareman had troubles of his own, at least in some sections, during 1904, but it would be difficult to find a retail dealer now who is not optimistic concerning business prospects for the coming year. The good work of the different associations during the past year has brought manufacturer, jobber and dealer into closer relations, and it is safe to say that in the future there will be fewer misunderstandings between the different branches of the trade. The different State Associations have made very material increases in their membership, and during the convention season now opened it is expected that the deliberations of these organizations will result in much that is good for the trade.

There is plenty of work to do—always will be, for that matter—but it is hoped that decided action will be taken in the Parcels Post matter and the recommendations and objections of each association placed in the hands of the proper officials at Washington. All the resolutions that can be resoluted will be of no avail unless the influence of the associations is brought to bear in proper legislative quarters. The Catalogue House question, store management and advertising go hand in hand and the swapping of experiences and methods in handling these matters will bear good fruit. The officers and members of the different associations have our best wishes and heartiest support in their work for the advancement of the Hardware business.

W. A. CHURCH,

President of the Connecticut Association writes us an interesting letter referring to the past year's business. He says:

The year 1904 has been a year that will not soon be forgotten by the Hardware trade. It has had its dark and its bright side.

The first half of the year was a period of marked depression and it is my opinion that the Hardware dealer who could show any profit in his business during that period was the exception. The Spring was very backward, and seasonable goods were, to a large extent, unsold. The average dealer found himself confronted with a large stock of goods and a limited demand. His expense account was as large as it would ordinarily be with trade in a normal state. Not only was a backward Spring to be reckoned with, but still more serious were the strikes in the building trades. The increased cost of labor and of all material entering into building tied up capital, and brought building to a standstill. With no prospect in sight of an early settlement of the labor troubles, and the uncertainty attending all attempts to carry on building operations, the Hardware dealer was surely hurt, and found little in the situation that was encouraging. To sell goods enough to pay running expenses and meet his obligations was a problem that furnished food for very serious reflection But the fact that the storm was weathered and that very few failures were reported speaks well for the soundness of the Hardware merchants in general, and indicates that cool heads and men of good business ability were not wanting in our line of business. The question that was foremost in the mind of every dealer was, what has the future in store for us? The approaching Presidential Election with all of its dire uncertainties was another factor to be considered. What would be the result, and what would be the result upon business if a change in the administration should come? In the early Fall the situation began to brighten. The excellent showing of crops in the West, and the great prosperity of the South and the general impressions that there would be no change in our administration began to affect business favorably, and active buying of steel set in, and as soon as it was known that the improvement in the steel situation was not due to speculative buying, but for actual consumption, confidence became stronger and the general outlook was much more hopeful. Should no unforseen complications arise, and if labor leaders can be brought to see the wisdom and the

Digitized by Google

importance of pursuing a conservative policy, and give building operations a chance to resume, there is no reason why we should not have a continuance of prosperous times.

Conditions in Arkansas could hardly be better, according to the President of the Retail Association of that State,

HAMP WILLIAMS,

who writes as follows:

In reviewing the past year's business, 1904, I must confine myself to local conditions, as a retail Hardware dealer has but little time to study conditions away from home. We have had a bountiful crop of everything, and a most delightful Fall for harvesting Prices have been good, and labor well employed; and notwithstanding the Presidential election and World's Fair, (that most merchants predicted would demoralize trade and create a stringency in money circles) have passed and gone, during which time we have had an excellent business, fair profits, and good collections.

We are now entering the New Year, 1905, under the most favorable conditions; with a newly elected President, and the great World's Fair passed into history, leaving our country in fine condition, the money market easy, and with an advance on all steel and iron products, we can, with safety, predict a great business for the coming year. And when we consider the past year's business, and view the bright prospects for the future, we should certainly be very thankful, and "praise God from whom all blessings flow."

THE DRAWBACK ON TIN PLATES.

We earnestly approve the demand of our tin plate manufacturers for the abrogation of so much of the drawback provision of the tariff of 1897 as applies to tin plates. The original reason for this application of the drawback provision, which provision has been embodied in all our recent tariffs, has ceased to exist. When a tin plate industry had no existence in this country the extension of the drawback privilege to the shippers abroad of petroleum, canned meats and vegetables, canned fruits, fish, oysters, etc., was justified because tin plates of domestic manufacture could not be obtained, and the duty paid on imported tin plates which afterwards exported in manufactured forms, if it had been retained in the treasury, would have been a check upon our foreign trade. But this country is now not only able to supply tin plates in sufficient quantities to meet all domestic demands, both for home use and export, but it can do this at prices very much lower than those which prevailed when our exporters of canned goods were compelled to buy foreign tin plates. Fair play and the public welfare would seem, therefore, to demand that hereafter the exporters of canned goods should not be paid a bounty out of the United States Treasury to induce them to use foreign tin plates. If exporters of such goods should prefer to continue to use imported tin plates they should be required to pay the same duty as other importers of tin plates, with no benefit of drawback. The treasury would gain in needed revenue. Furthermore, it has been represented that it is easy to commit frauds upon the revenue under the drawback provision, so far at least as it relates to tin plates, and in this representation lies an additional reason for the abrogation of this provision to the extent that we have suggested.—*Bulletin of the American Iron and Steel Association.*

MARKETING GOODS ABROAD.

From a series of consular reports on this subject we gather that illustrated catalogues and correspondence by mail can hardly be relied on to develop much business with foreign countries Low price lists and quality of goods go a long ways toward attracting attention to one's wares, but their sale cannot be made on a large scale by the use of printers' ink alone, even though one employs the language of the country for which the advertising matter is intended; literature printed in English and destined for Italy, for instance, or for that matter any other country where English is not generally used, is well-nigh profitless. Resident agents seem to carry the most weight, but care must be taken in selecting such emissaries, as local native agents are not always anxious to push the sale of American goods. Commercial travelers, when properly equipped with not only samples, but a thorough knowledge of the language of the country in which they expect to work up trade, are the best substitutes for the resident agent. So, also, it is well for the commercial traveler to cultivate the social side of his customer, as future trade may follow. In this respect, as well as in many others, the German salesman in a foreign land is an excellent example. Generally speaking, the German agent is in no great rush, but goes quietly along obtaining the details of his line and remains until he has as full a knowledge of the trade as it is possible to obtain. Continental houses frequently succeed where Americans fail because they grant longer credits, sixty to ninety days being common, while six to nine months are not infrequently allowed.

DEATH OF FAYETTE R. PLUMB.

Hurrying West with an invalid daughter in the hope of saving her life, Fayette R. Plumb, probably the best known manufacturer of edged tools in the United States, died suddenly on Saturday last, in Hot Springs, Ark. Despatches which brought the news to the family here indicate that Mr. Plumb caught cold on the train and died either of pleurisy or pneumonia. Miss Georgiana, the daughter, who is ill of consumption, is in turn giving up

FAYETTE R. PLUMB.

her own hope of life in the balmy air of the Southwest and is returning with her father's body. Miss Plumb for the last two years had been in the Adirondacks, but, not gaining strength, her father started to take her to a sanitarium in Arizona, and they were about to start on the last stage of the journey when Mr. Plumb was seized with his fatal illness. Fayette R. Plumb is a brother of Ralph Plumb, the Buffalo bolt manufacturer, and was himself the head of the Fayette R. Plumb Company, incorporated, of Philadelphia. The hammers and edged tools bearing his name are known the world over. He was a former vice-president of the Union League, president of the Manufacturers' Club and the first president of the American Hardware Manufacturers' Association, which largely controls trade conditions. He is survived by a widow, four sons and two daughters.

DEATH OF FRANK CLATWORTHY.

Frank Clatworthy died at the Hotel Marie Antoinette, New York, Monday morning, January 2. Mr. Clatworthy will be remembered by the trade as the senior partner of the former firm of F. & W. Clatworthy, New York, who for over 20 years and until May, 1891, were the sole agents in the United States for Joseph Rodgers & Sons' Sheffield Cutlery. Mr. Clatworthy was born in England and was in his sixty-sixth year. He was a man of high character and pronounced ability. He is survived by his brother, William, who was the junior member of the firm.

MINNESOTA RETAIL HARDWARE ASSOCIATION.

The annual meeting of the Minnesota Retail Hardware Association will be held at Duluth February 23 to 25, inclusive. The headquarters of the association will be at the Spalding, the leading hotel of the city, and the sessions will be held in the audience room of the Lyceum Theatre. All railroads entering Duluth are making special rates—one fare for the round trip is expected—and all the hotels are guaranteeing a special price to those in attendance. It is expected that the attendance will be in the neighborhood of 500, including members and others. The Programme Committee has already mapped out its work and has the programme well along. It is hoped all this effort will make this one of the very best meetings of the association. As a wholesale Hardware point Duluth occupies a conspicuous place, and there are many interesting attractions from a Hardwareman's point of view.

RECENT TRADE PUBLICATIONS.

THE GURNEY REFRIGERATOR CO., Fond du Lac, Wis., are the authors of an attractive catalogue, embracing refrigerators of their manufacture. This is their illustrated catalogue and price list No. 14. In this book they assure their patrons that the former excellence of their goods will be maintained in every respect. They claim to have the largest and best refrigerator works in the world, and have branches and distributing points in all the large cities in this country. The capacity of their factory, which is now being pushed, is two hundred refrigerators a day. They have recently completed a new storage warehouse, thereby doubling their former capacity, and are therefore able to promptly supply all demands for the trade. They claim superiority over all other makes by reason of its improved construction in the following points: Cleanliness, free circulation, economy in the use of ice, condensation and dry air, low average temperature, freedom from condensation on inner walls, freedom from damage by use of ice picks, proper location of drip pipes and long life. If you are interested in Refrigerators don't fail to secure one of the Gurney catalogues.

THE MARLIN CO., Cleveland, Ohio., have issued a most artistic pamphlet catalogue which is their No. 104, and covers Specialties manufactured by them. Included are: Wire on spools, wire belt lacing, cast steel music wire, solid wire clothes lines and stove pipe wire in 50-foot coils. The book is envelope size, and is the neatest one of its kind ever brought to our notice. It is illustrated throughout and contains list prices on all goods. A specialty made by them is the Retail Dealers' stock of spooled wire and the catalogue shows the lowest prices at which the wire is sold at retail. This assortment contains 147 spools of black and tinned annealed steel, copper and brass wire, and comprises almost every size likely to be called for. It has been put up by them especially to meet the demands of the retail Hardware trade, and it covers all of the most salable sizes without any dead stock. It will readily bring over $10.00 at retail, and represents a large profit to the retailer. Don't miss an opportunity to secure one of these catalogues if you are interested.

THE DANA MANUFACTURING CO., Cincinnati, Ohio, have issued recently an attractive envelope size pamphlet catalogue of Peerless Iceland Freezers, the particular feature of which, they state, is the "one motion." They claim it has the fewest parts, and only one motion—all that is necessary for the effective freezing of smooth, delicious cream in three minutes. The can revolves around the stationary dasher. The quick freezing is accounted for by the peculiar construction of the dasher and the way it handles the cream set in motion by revolving can. Magazine advertising, back covers in colors, the biggest and best space it is possible to buy, they state, makes Peerless Iceland freezers favorably known to every freezer user in the country. This advertising of an article of merit, together with systematic co-operation with dealer and jobber, is the strongest kind of selling force, and accounts for the already great and growing demand for Peerless Iceland Freezers. Their catalogue may be had for the asking.

THE ROCHESTER STEEL STANCHION CO., Rochester, N. Y., are distributing an envelope size catalogue descriptive and illustrative of the Rochester all steel stanchion which they manufacture, and which they state is built upon the most approved mechanical construction, and has no weak parts to break or wear out. By its use the cow can swing her head in any direction with perfect freedom, with plenty of room to stand up or lie down. One of their catalogues will be sent upon request.

W. H. ANDERSON & SONS, 21-31 St. Aubins Avenue, Detroit, Mich., have recently placed in the hands of the trade a neat and attractive pamphlet catalogue, of the long envelope size, exploiting their line of automobile and gas engine forgings. This is a "Book of Reasons," showing only a few of the forgings they supply to gas engine and automobile manufacturers. They state they do not make what are commonly called "drop forgings." Their forgings are made from exceptionally high-grade, open-hearth machinery steel—the best that money can buy. They manufacture "special" forgings from the grade of tool steel best adapted to the purpose. Their catalogue is high grade in every respect and contains many fine sectional illustrations of the goods they make. If you are interested, secure a copy of their book, "High Grade Cranks for High Grade Engines."

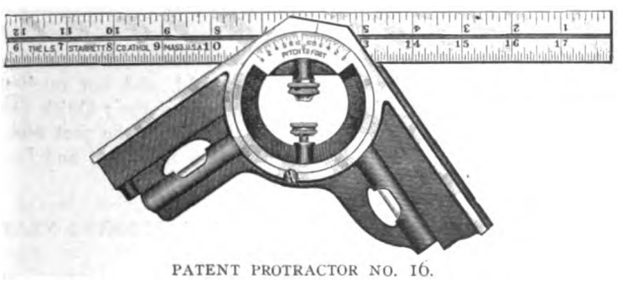
THE ABINGDON TRAP CO., Abingdon, Ill., have sent us one of the most unique and up-to-date little pamphlet catalogues we have seen. The green cover has an oval opening in the centre, through which the words "Something Catchy" show, making a decidedly "catchy" appearance to the cover. The traps illustrated in the booklet are the result of long experience, and they state, it is with pride they declare them to be original, exclusive in design, and to have features not possessed by any other makes. They challenge the world to produce their equal. If not already received, one of their catalogues is well worth the sending for.

THE A. J. PHILLIPS CO., Fenton, Mich., are placing in the hands of their patrons their 1905 catalogue of screen doors, window screens, window screen frames, snow shovels and popular novelties. The material they use in the construction of their screen doors is both soft yellow and Norway pine. The stiles and rails are 3¾ or 2¾ inches wide (nominally 4 and 3 inches), bottom rail 5⅝ inches; thickness, ⅞ or 1⅛ inches. Doors, 1⅛ inch thick (except high grade patterns), are full mortised, glued and pinned with steel dowel pins. Doors, ⅞ inch thick, are put together with long 7-16 inch threaded hardwood dowels, well glued. All patterns except the No. 1-A, B and C doors have flush beaded mouldings over wire cloth, the opposite side beaded to correspond. The best steel, green or black, double selvage, 12-mesh wire cloth is used, well strained and put on with tacks, permitting rewiring of the frames. All natural finish doors are shipped with black wire cloth unless otherwise ordered. Six doors are packed in a crate. The above book will be found most useful to all Hardware dealers, who will be supplied with a copy upon application.

THE SOUTHINGTON CUTLERY CO., Southington, Conn., with offices and warerooms at 42 Murray Street, New York City, have issued a pamphlet catalogue which exploits exclusively their line of Curry Combs, which covers a large variety, among which is the Improved Curry-Comb. The bars of this comb are made of fine grade of spring steel, convexed and fastened to steel shank in such a manner as to secure great strength and flexibility. They claim it will do the most effective work in shortest time without irritation to the most sensitive horse. It is made with black enamel handle and has steel shank riveted through handle. All of their goods are packed one dozen in paper boxes, and in cases of twenty-four dozen, excepting combs Nos. 000 and 000½, which are packed about thirty dozen in a barrel. All combs are shipped direct from factory. They make no charge for packages. On shipments of one hundred pounds, actual freight allowed up to but not exceeding 50 cents per hundred pounds. Those interested in this useful staple will do well to obtain a copy of the above catalogue.

THE GRANITE STATE MOWING MACHINE CO., Hinsdale, N. H., are distributing their catalogue and price list No. 1, which is neatly gotten up, and has a very artistic cover. Among the Mowing Machines illustrated is the New Ideal, a high wheel machine, in the construction of which, they state, no pains have been spared to produce a perfect working mower. It has noiseless ratchets and ball bearings. Height of the driving wheel is 10 inches; diameter of the cylinder is 6¾ inches and they are made in four lengths of cylinders, 20, 18, 16 and 14-inch. All mowers made by this company are furnished with a flexible handle, nicely finished and so constructed as to withstand wear and exposure. Cylinder blades and bed knives are of special tempered steel of best quality. All are geared both sides, insuring a perfect movement. The New Ideal, Mystic and Rover mowers are fitted with adjustable rolls. The rolls to the Granite State and Granite State B. B. can be removed, making them peculiarly well adapted for terrace work. They claim these are the only mowers so made. Attention is directed to the excellent woodwork about their mowers, which they claim will be found much superior in style and finish to the usual contract work. Send for a copy of their catalogue.

PRICE OF RESPECTABILITY.



It's wages when you get four dollars a day; but it's a salary when you get ten dollars a week.—*Life.*

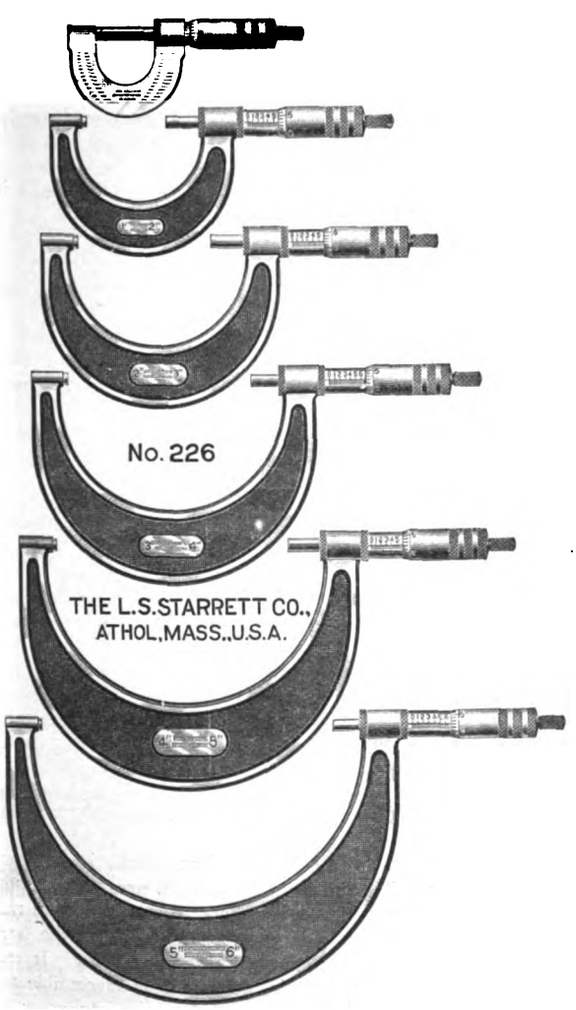
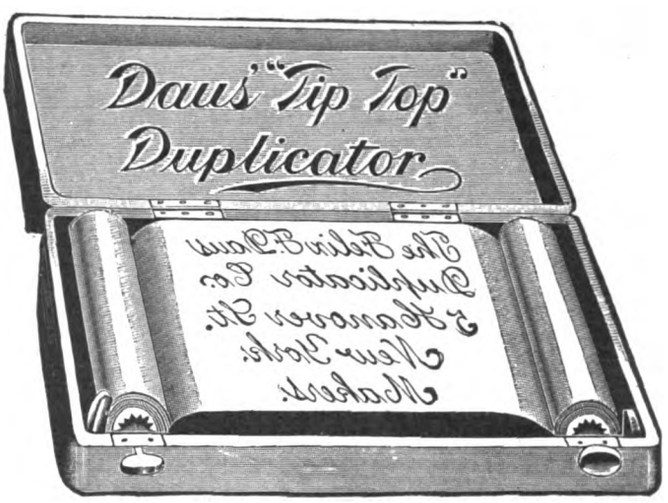
NEW GOODS AND SPECIALTIES.



STARRETT'S NEW TOOLS.

Among the new tools announced in the supplementary catalogue just issued by L. S. Starrett Co., Athol, Mass., is the Patent Protractor, No. 16, illustrated herewith. The Protractor Plate closes in the stock either way against a stop, making a perfect square, plumb and level. The turret is graduated on both sides, one in degrees, the other to show pitch to the foot, so that the plate may

PATENT PROTRACTOR NO. 16.

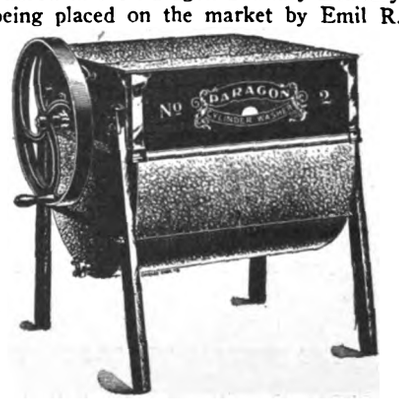


be set by the graduation for laying off angles to any degree or any pitch, and the outside branch of the stock will be right to lay out the complementary angle without mental calculation or error, for valley roofs, bridge work, stair gauges, etc. The protractor may also be used in place of the Carpenter's old-time steel square with the advantage of being packed in a chest without taking up so much room. A number of new Micrometers are also mentioned in this firm's supplement. These goods, it is announced, meet the demand for accurate gauges at a low price, and are better adapted for general use than the vernier or bar Micrometers, as they can be set quickly for the different measurements and

are more easily read. The Micrometers illustrated herewith will measure from one to six inches and each is graduated to read by thousandths of an inch; is furnished with Starrett's patent lock nut, and is set with or without ratchet stop as desired. The frames are drop forged from bar steel and nicely finished. These goods will be supplied either single or in sets, as desired.

THE "TIP-TOP" DUPLICATOR.

The Daus "Tip-Top" Duplicator is meeting with an exceptionally good sale among Hardwaremen, the up-to-date dealer having found that there are many ways he can use the machine to an advantage and further that there is a good demand for it among his customers, due to the extensive advertising done by the manufacturer. In operation the "Tip-Top" is very simple. The "Tip-Top" coated paper is stretched and made ready to use by turning the two cog wheels. The original to be copied is written with ink supplied on a hard smooth ledger paper. A special Duplicator ribbon is furnished for typewriter work. The original, when dry, is laid written side downwards on the Printing Surface, smoothed lightly in every direction with the hand

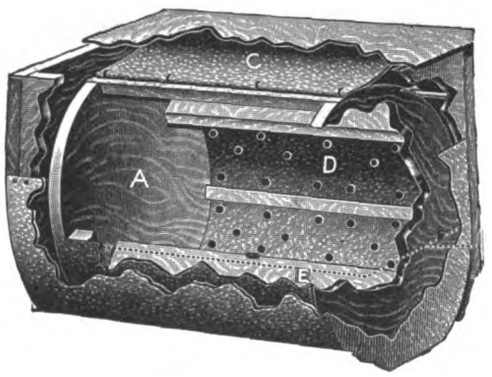


THE "TIP-TOP" DUPLICATOR.

and left to adhere 1½ to 2 minutes. This produces the negative. On this negative, immediately and in succession, the sheets to be printed are placed by smoothing lightly each sheet with the Rubber Smoother and removing it quickly until the desired number of copies is produced. No washing is required; although visible, the old ink of the previous negatives will not show reprints, it will entirely absorb itself in a few days. In this way the same roll can be used from 5 to 10 times over and over again. Reproduction can be made on any kind of paper, smoothest is best and from 100 to 150 copies can be made from one original. The "Tip-Top" which is illustrated herewith is made by the Felix F. Daus Duplicator Co., 111 John Street, New York. A discount of 33⅓% is made to Hardware dealers on complete machines.

THE PARAGON SANITARY WASHER.

We illustrate herewith the Paragon Sanitary Laundry Cylinder Washer, now being placed on the market by Emil R. Beckert,

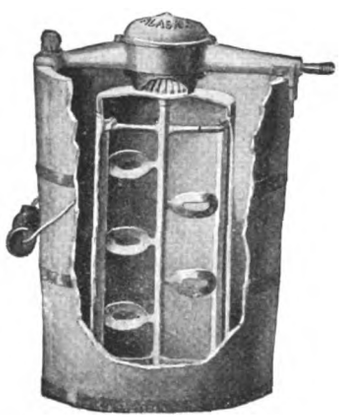


THE PARAGON SANITARY WASHER.

1175 Third Avenue, New York. There are several points of merit concerning this machine that are well worthy of the atten-

Digitized by Google

tion of those in the retail trade. It is claimed that the Paragon is much different from the ordinary iron machine and that instead of being in any respect a clumsy affair is really an ornamental Laundry utensil The outer tub of the Paragon is made

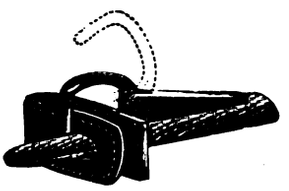


INSIDE VIEW OF CYLINDER.

of heavy galvanized steel, preventing any possibility of leaking on account of shrinkage, and making the machine odorless. This machine is of exceedingly simple construction, having no complicated parts and no iron hoops. It is claimed that its operation is absolutely without noise and that it takes up less floor space than any other washer. It is equipped with a serviceable metal faucet for water outlet. This machine, as will be observed, is built on the revolving cylinder principle in use by leading launderers, and it is claimed that this system has long been conceded by experts to be the most effective and the least injurious method of cleansing clothes. The Paragon is built in two sizes; one with a capacity of 12 shirts, known as Family size, and the Hotel size with a capacity of 25 shirts.

THE ALASKA FREEZER.

We give herewith a sectional view of the Alaska Freezer, made by the Alaska Freezer Co., Winchendon, Mass. In offering this freezer to the trade this firm calls particular attention to the tubs used. They are made of selected staves of old growth North Pine, thoroughly kiln dried and scientifically treated with a paraffine and oil preparation, rendering them positively waterproof.

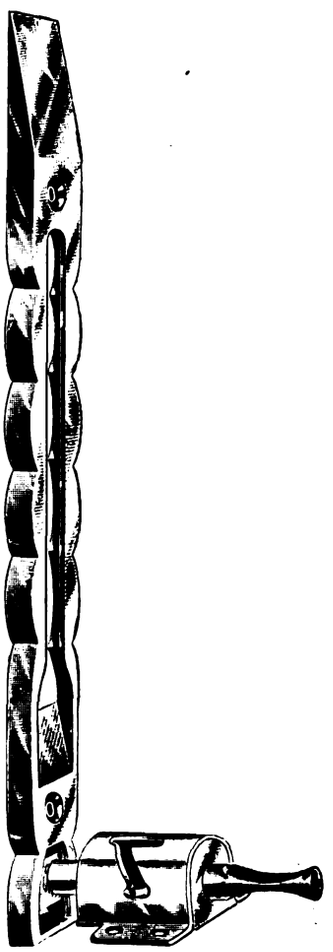


THE ALASKA FREEZER.

The Alaska Co. guarantees that these tubs will outwear any cedar tubs used for a like purpose. The cans used in these freezers are made of the highest grade of American Charcoal tin plate. All metal parts that come in contact with the cream are covered with pure block tin, the outside parts being galvanized. The special feature of these freezers is the "perpetual motion aerating spoon dasher." The action of this dasher on the cream is such that it is kept deliciously smooth and mellow, during the quick process of freezing. Construction of the dasher is shown in the accompanying illustration.

THE FERNALD TRACE HOLDER.

The Fernald Manufacturing Co., North East, Pa., well known as manufacturers of easy selling Specialties, have recently placed on the market the Fernald Double Trace Holder. This specialty was patented November 15th, 1904, and seems to possess many points of merit when compared with other articles in the same line. The accompanying illustration will show how the specialty is used. In placing this article on the market, the Fernald Co. say: "In offering the Fernald Trace Holder we do so believing it



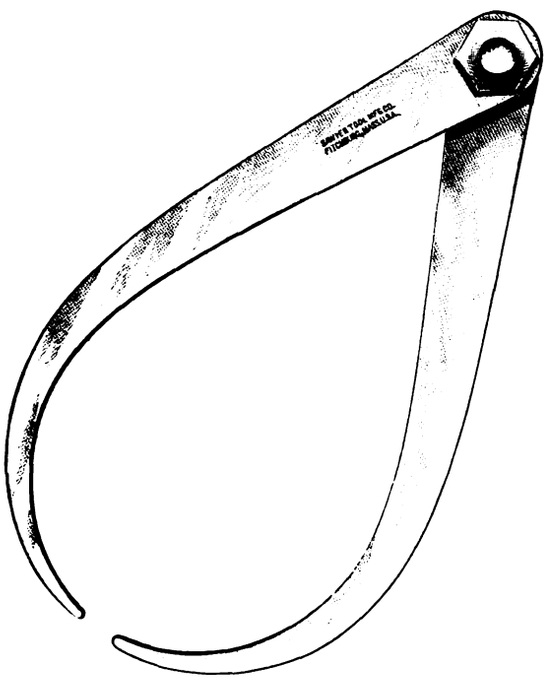
THE FERNALD TRACE HOLDER.

to be the best on the market, and the only one, sold at a nominal price, that will hold the trace as it should, and not catch the horse's tail." This firm has recently improved their Quick Shift, which has met with such enormous sale during the past several years, by adding a new Bail Guard, and a new Bail and Lever as well.

A NEW SAFETY WINDOW LOCK THAT PERMITS VENTILATION.

The Safety Window Lock & Ventilator Company, 21 Quincy Street, Chicago, Ill., are placing upon the market the Safety Window Lock and Ventilator, illustrated herewith. This very interesting and useful invention is a lock for a window which does away with the old style center lock and which, providing

SAFETY WINDOW LOCK AND VENTILATOR.



perfect security, also allows of a sufficient ventilation. This device consists of a ratchet and lock whose bolt, pressed by a spring, is thrust into the depressions or ratchets and prevents the raising of the window. The casing of the lock is made of the hardest steel and the spring is made of the finest piano wire. It cannot be broken by the use of a jimmie, neither is it susceptible to being worked from the outside by means of a wire, string or knife, even when the glass is cut and the burglar tries to manipulate the lock through the opening, he is helpless, as his arms act as a wedge between the sashes and prevent their upward or downward movement; as soon as his hand is withdrawn, the spring

Digitized by Google

flies back into its previous position. The sashes of course, can be raised or lowered a few inches for ventilation, but even then they are safe from the burglar. This constitutes a distinct advantage for the Safety Lock, as it enables the person using this lock to secure fresh air and not sacrifice security to health. When it is desired to raise the sash to its full height all that is necessary is to pull out the spring bolt, preventing the nut from entering the large opening at the bottom of the slide, and when opening is passed the nut slides easily against the outer surface of the groove.

BEESWAX JOINT CALIPERS.

The Sawyer Tool Manufacturing Co., Fitchburg, Mass., are the manufacturers of a new line of Calipers that are made with Cook's new beeswax joint, and are illustrated herewith. They

BEESWAX JOINT CALIPERS.

embody every desirable feature found in other Calipers, with the addition of the above desired excellence, which is alluded to as giving the firmness of feeling desired and appreciated by all mechanics when using a tool of this kind. The problem of properly applying beeswax to a caliper joint in a manner that the beeswax

is retained for an indefinite period, whether the tool is constantly or only occasionally used, has been successfully solved by this invention. The pockets for holding the beeswax are made in such a manner that they in no way impair the utility of the joint, but rather add to it. These Caliper joints must be tried to appreciate their real value.

THE LAMSON & GOODNOW M'FG CO.

The Lamson & Goodnow Manufacturing Co., Shelburne Falls, Mass., have been manufacturing for the past twenty-five years a very attractive line of table and other cutlery. Their line of goods includes everything from a cheap form of kitchen knives to a high grade of pearl or celluloid handled knives for ordinary

LAMSON & GOODNOW'S CUTLERY.

table use, all styles of carvers, including an especially attractive line of stag handled knives; one of these is illustrated herewith. Special knives, such as bird carvers, bread slicers, cheese knives, fruit knives, etc., are also made in great variety, and their butcher's goods and other knives have for several years found large sale in the trade.

A WORSE FEAR.

"Sorry, boys, but I'll have to be getting home," said Underthum at the club. "My wife expects me before midnight."

"What's the matter? Afraid she'd go for you if you stayed any later?"

"No; I'm afraid she'd come for me."—*Philadelphia Press.*

WITH OUR CORRESPONDENTS

THE ALBANY TRADE.

My highly esteemed friend, the editor of HARDWARE, is a man of too much experience to think that a busy Hardwareman burdened with all the cares of a business of considerable extent, can lay aside everything and evolve a suitable letter recounting the conditions of business for the past year, and prophecying what they will be for the coming new year, but we will briefly undertake to reply for the sake of old acquaintance and as an accommodation to an old friend and to aid in a feeble way his enterprising paper. With this understanding we are pleased to say that the business conditions in this section, with our house in particular,

HAVE BEEN FAVORABLE FOR THE PAST YEAR

in point of volume of business. While some months have fallen behind last year's record, other months have shown a considerable increase so that we estimate that the footings of the year will prove to be a trifling percentage over 1903. The fluctuations in prices have been considerable, some being higher and some lower than previously and the expenses of business have been fully as high if not higher than the preceding year but to determine what the aggregate result will be, necessitates waiting for the inventory that as yet has not been taken. We, however, feel that a satisfactory showing will be made that will prompt us to continue our business on about the same lines as we have in the past. The favorable reports of crops and the steady running of mills and factories and all other influences of this character seem to promise a good outlook and if the fickle weather will give us a good ice crop, which is quite an important factor in this section, we may look for an excellent start in business immediately after the holidays.

The strengthening in prices of raw material is already showing its effect in the price of manufactured goods and

HEAVY PURCHASES HAVE ALREADY BEEN MADE BY JOBBERS

for early Spring shipment in the belief that this is a wise move and on the basis that "goods well bought are half sold."

The holiday trade has developed fairly. Re-orders from smaller dealers were received and we believe in this particular branch of the Hardware business the usual returns were to be expected.

We hardly know what recommendations to make for the good of the trade. Level headedness and industry will invariably win in the long run.

THE UTILIZATION OF PRACTICAL IDEAS

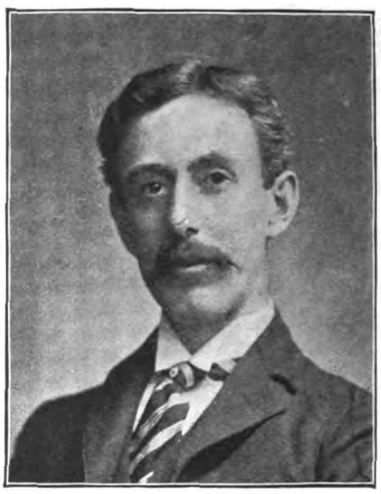
which we all acquire from time to time by the suggestions made in our trade papers all help to build up our business and we believe that well established houses who keep watching their business carefully and pushing their several departments intelligently and steadily may count on good returns for their efforts. We hope that all will realize their fullest expectations and good returns for the energy and capital now employed in their business.

ALBANY HARDWARE & IRON CO.

THE PHILADELPHIA TRADE.

The year 1904 will be remembered for the surprise given the trade in the fall of that year when after a period of some hesitation and uncertainty confidence was abruptly restored, and prices took a sharp turn and began to move upward while the demand developed to large proportions. It is difficult to recall such a sudden change in the general condition of affairs. During the summer railroads had in some cases been cutting down their expenditures, laying off men, and stopping new work. Many

MANUFACTURERS WERE REPORTING BUSINESS VERY QUIET,



and others were only working on partial time. The general feeling of doubt and uncertainty prevailed, and every one was waiting for something to turn up. The unexpected happened, and the decided tone of the presidential election confirmed this feeling in such a hearty way that assurance became general and

A MARKED EXPANSION OF TRADE WAS IMMEDIATELY SEEN.

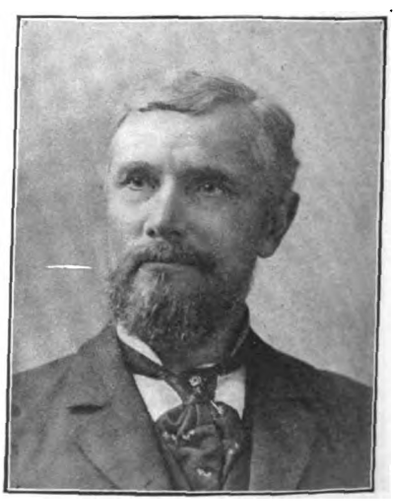
A careful canvass of the manufacturers shows that almost without exception they are heartily pleased with the outlook for 1905. Many report that orders now on hand exceed any period of their history, and the new year is waited with the general hope that it will prove most satisfactory and prosperous.

We can only trust that these hopes may all be realized, and that 1905 will indeed bring the prosperity which belongs to the hard-working Hardware trade. We greatly doubt whether there are many lines of business which involve such detail and arduous work, and we are inclined to think it a safe claim that in no other line of business is there so much brain and ability expended for equal returns.

As to prices, a number of advances have been announced and even where goods have not risen in price the feeling is frequently expressed by manufacturers that the present

JAMES H. RITTER OF BIDDLE HARDWARE CO.

HIGH PRICE OF LABOR AND MATERIAL MUST FORCE A HIGHER LEVEL



of prices in the near future. The annual revisions of quotations are now being made and the upward trend is most noticeable.

We take this opportunity, even although it may be somewhat late, to wish all our readers a most happy and prosperous New Year.

BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

Jobbers and retailers are usually invoicing to find the result for 1904. Invoices will be benefited very little by advances in prices, as most manufacturers have postponed changing until they are compelled to purchase new material. But most goods in the Hardware line will likely be materially advanced during the present month. It may seem an anomoly that manufacturers, jobbers and retailers are adverse to advance in prices. They are all inclined to sell at the old price until they are compelled to pay

HON. C. B. LOCKWOOD.

the advance, and some of them hold the old price after a decline, and that is the matter with the retail trade.

SUCCESSFUL BUSINESS MEN MAKE PRICE BASED ON VALUE

and advance or decline as the market does. If they lose trade by advancing they regain it by declining, and are much more likely to secure permanent trade. Dry rot and overstocks result from never changing prices. Now is the time to discover unsalable goods and find out why they have not sold and take means to correct it. Such goods should not be invoiced twice. Prices

Digitized by Google

should be made on them that will sell them and they should not be overlooked until they are sold. If the merchant's books can be kept clear of old accounts and stock clear of old goods, it is evidence of business ability.

The prevailing tendency to be in a hurry to enjoy the luxuries of life often prove fatal. It is wiser to lay the foundation for that and show ability to pay for them before indulging in them. The steadily improved financial condition is so essential to happiness that the

AIM TO MAKE THIS POSSIBLE IS OF FIRST IMPORTANCE.

Every consideration of duty to yourself, your family and your creditors forbids that you permit your expense to exceed your income. That contingencies may sometimes compel this is sufficient reason for planning against it.

Now is the time to settle accounts, taking notes if cash is not paid, as old unsettled accounts are worse than old goods as an asset. At the end of each year every business man should know how he stands financially and be in condition to revise reports to mercantile agencies. Some merchants decline to make such statements, esteeming the agencies' inquiries as unwarranted prying into private matters. But this is a mistaken policy.

RELIANCE ON THESE REPORTS HAVE BECOME SO UNIVERSAL

that refusal by merchants to make them creates distrust and suspicion. A large capital is not as essential to credit as frankness. Any apparent desire to conceal facts is detrimental. A small capital, other things being favorable, does not prevent high grade of credit.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

The year 1905 opens with good promise for the city of Pittsburg. Our principal products are coal, coke, pig iron, steel and its products such as rail, cars, structural shapes, tin plate, wire and nails. Also window glass and glassware. All of these show a very marked improvement over 1904 at the beginning of the new year, and

THE INDICATIONS ARE FOR A RECORD BREAKING OUTPUT.

If a person even five years ago should have predicted 20 million tons of pig iron as the amount that will be produced in 1905 he would have been thought an enthusiast, yet that is the figure confidently expected to be made this year by careful forecasters.

The slump in the country's business lasted some 15 to 18 months

GEORGE B. LOGAN.

and while it was an uncomfortable contrast to what we had been accustomed to for the previous five years, seemed to be a necessity to get rid of

THE FEVERISH ACTIVITY WHICH HAD RULED IN THE MARKETS

for a year or two. A reaction was due and we think the country is to be congratulated that it lasted only 18 months instead of five to six years as in previous dull periods.

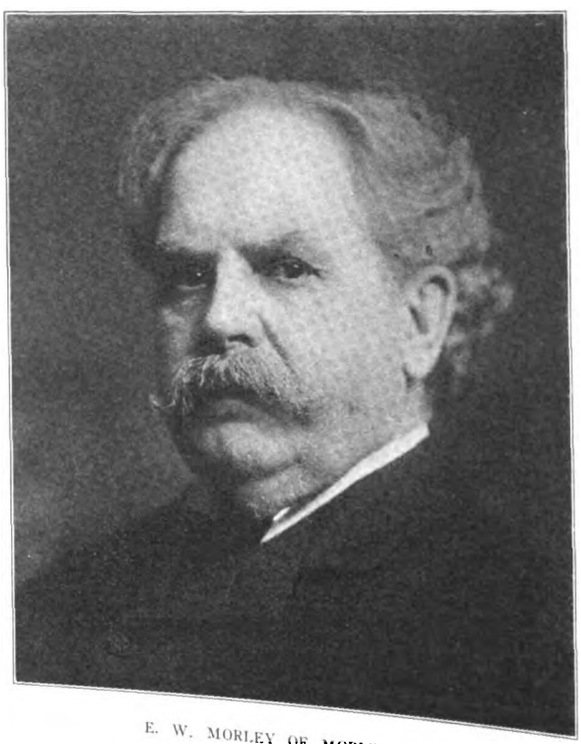
Everything favors good business and we do not see that anything short of some unforeseen public calamity can prevent it. The crops of 1904 were good and the prices received for them were good, thus placing the farmers of the West and South in position to buy both necessities and luxuries. Large enterprises that had halted during the dull period will now go ahead as

CAPITALISTS HAVE CONFIDENCE IN THE IMPROVED CONDITIONS.

Money is plentiful at low rates of interest and can be had for all legitimate business. Political matters in our national affairs have been settled for a term of four years longer, by an emphatic endorsement of the present government, so that a settled policy may be counted upon in this direction.

Locally we hope for the improvement of our rivers by the National Government, a matter which has been moving very slowly and should be hastened. While the direct benefit would be felt most in Pittsburg,

THE WHOLE MISSISSIPPI VALLEY WOULD FEEL THE GOOD EFFECT



of cheapened transportation for coal and steel, lumber and cotton and numerous other products to and from this market. If this improvement were made, Pittsburg coal would supply the fuel for ocean steamers through the Panama Canal without breaking bulk, and both of these improvements should be finished simultaneously.

Quite an interest has been excited recently by a new movement for a greater Pittsburg. We have adjacent to the city, Allegheny with 150,000, McKeesport with 50,000 and numerous boroughs with from 10,000 to 25,000 population, which are to all intents and purposes, except in the corporate name and management, one city and should be consolidated. The political managers are said to be in favor of the movement at this time, so that there is more hope of success than in former efforts in this direction. We hope to have Pittsburgh take its proper position in rank of the cities of the country within the next year or two.

LOGAN-GREGG HARDWARE CO.

THE SAGINAW TRADE.

Your letter asking our views for business for 1905, is at hand. We think the Hardware business prospects look much more favorable than they did in 1904. In 1904 dealers bought very cautiously and carried light stocks, as the market was a declining one, and all dealers seemed to be willing to sell on very fine margins, so as to lessen the chances of losing on heavier declining markets. We think after the Hardware dealers have taken inventory for 1904, the results will show them that

E. W. MORLEY OF MORLEY BROS.

IN 1905 THEY SHOULD GET BETTER PROFITS.

Business is always good when the majority of business men make up their minds it should be. As the majority of the business community now think 1905 will be a good year for business, that fact, with the good crops of last fall, will in our opinion make 1905 a good and prosperous year. The crops in this section in 1904 were good; the hay crop was very fine; the sugar beets produced more sugar to the ton than heretofore, and all other crops were also good.

Answering your question, asking what we would recommend for the good of the trade in the future, would say,

KEEP UP THE FEELING THAT 1905 IS GOING TO BE A GOOD YEAR,

be careful to sell only good customers, buy conservatively so as not to get too big a stock and have to cut prices to unload, and always remember to add the cost of doing business to the factory cost, for in order to pay fair salaries reasonable profits must be made to cover them.

MORLEY BROS.

THE COLUMBUS TRADE.

As the year of 1904 has gone and we start on a new year, it is well to consider what has been accomplished during the past year, and what encouraging and discouraging signs confront us for 1905. It is generally conceded that business for 1904 was not as good as 1903, but we hardly think any one was disappointed, in as much as cautious business men began trimming their sails during the latter part of 1903, fully expecting a squall, but happily for everyone, the squall was very mild. In fact so mild as to be hardly felt. There was a slight decrease in the volume of business in the Hardware line, but so far as we know, dealers both wholesale and retail were as busy as nailers all the past year. There was this difference, during 1902 and 1903, jobbers were overworked. Try as hard as we could, and working a good share of our force until 10 o'clock or later at night, we never could get our orders cleaned up. We were continually getting complaints of slow shipments, which worried us not a little. During the past year, we have been kept busy all the time and worked many nights, but by so doing, we would get all orders up. We did not reduce our force, but increased it. Prices remained pretty firm all through the year. The declines were about evened up by advances, so no one has been hurt.

FAILURES HAVE BEEN FEW AMONG HARDWARE DEALERS,

for which we should all be thankful. Crops have been above the average, the wheat crop being the only one that was really bad, while the hay, oats, corn and potato crops were all excellent, both as to quantity and quality. The fruit crop was also bountiful.

J. H. SMITH.

Taking all in all, we should be well satisfied and thankful for such a prosperous year, and hope for more of the same kind.

There seems to be a well rooted theory that Presidential years must of necessity be off business years, but you can never find any one who can give a logical reason for the belief. The past year will certainly knock that theory in the head, or at least give it a headache. Why mills and factories, and improvements should stop because a president is to be elected is beyond our ken. To hear some talk, you would believe potatoes would be smaller, instead of big long ears of corn there will be nothing but nubbins, pigs will all be runts, rabbits tails will be shorter, all your No. 4 bass will be minnows, and so on, simply because a president is to be elected. If the spell binders could be caged up until election day, nine-tenths of the people would not know it was presidential year and would keep the wheels moving with the same regularity as other years.

What of 1905? Of course time will only tell, but surely everything looks encouraging. With the benefits of the past year, the country is in good shape to forge ahead during this year.

THERE IS LITTLE DANGER IN THE SANGUINE FEELING THAT EXISTS.

Representatives of manufacturers have the feeling that you can't buy too freely, as prices must be higher; but it is well for every business man to consider two very important things when he buys goods. Can he pay for them, and can he sell them at a profit. If they can do these two things, we think most anything in the Hardware line not controlled by combinations, is a safe purchase for legitimate needs. We also feel confident that some articles must bring better prices. We might mention strap hinges, steel butts, bolts, tacks, sledges and shovels. These goods are too low considering cost of material and labor, while some other articles could be reduced in price and still leave good margins for manufacturers. Of course, not being manufacturers ourselves, we may be wrong, but judging from what some goods have been sold for when raw material was no higher than the prices of to-day, there is but one conclusion. There was a heavy loss, or at present prices there is an unreasonable profit. We think some

MANUFACTURERS MAKE A MISTAKE IN FIXING QUANTITY PRICES.

Occasionally the quantity is more than the average jobber or retailer can handle without forcing sales at cut prices, which is demoralizing and unprofitable. For instance, two thousand kegs of horse shoes in a year, one thousand floor registers at one shipment, and some other quantities that are more than small jobbers can handle. In some cases, you must take the maximum quantity every time or pay 5 or 10 per cent more for the goods. Fortunately, our firm has gotten to the point where we can handle the quantities, but we know there are many legitimate jobbers who can not. The same is true of retailers. A dealer on one side of the street can use the quantity to get extreme prices while his neighbor across the street can not. It is unjust that the small dealer has to pay a higher price. He must sell his goods as low as the larger dealer or go out of business. If he meets prices with a nigher cost, he simply ekes out a living while his competitor makes money. Dealers all over the country are opposed to Catalogue Houses, claiming they should be classed as retailers; but manufacturers will tell you their purchases entitle them to better prices on account of the quantity of goods they handle. It is easy for one dealer to sell more goods than another if he buys his goods at a lower price, because he can sell them at a lower price; but if they did not have that advantage, they would only get their legitimate share of business. Dealers who have a small trade could and would sell more goods, and the big fellows would sell less, but the manufacturers would sell the same as there will be a demand for the needs of the people from some source.

THERE SHOULD BE ONLY TWO CLASSIFICATIONS—THE JOBBER AND THE RETAILER.

If a dealer is a legitimate wholesale dealer, he should be so classified, but the fellow who has in prominent type "Wholesale and Retail" should be classed as a retailer for the reason that he is a retailer and only occasionally sells another dealer, and that only when his brother retailer must have something immediately that he has run short on. These retail wholesalers can sell goods lower than their competitor (who does not aspire to the high title) can afford to. Just as the large Catalogue Houses (who in reality do get quantity prices) can undersell the retail wholesaler. Now if the retailer, be he a Catalogue House, or a large or small retailer, all be on the same basis of cost, each one would have to sell goods on his business qualifications. Some people will buy goods from a man they dislike to save a nickel. It is an easy matter for any manufacturer to know who are legitimate jobbers. We claim that in justice, one retailer is not entitled to a better price than his competitor providing he pays his bills promptly, and on the same conditions one jobber is not entitled to a better price than another.

Locally, the outlook for another good year in the way of public and private improvements is good. Most of the large public improvements are only well under way and will be completed during this year. Our City Water Works Dam is well under way, and a filteration plant will be started this year. When completed, Columbus should be provided with an abundance of pure water sufficient to accommodate her rapidly increasing population for many years to come. One new electric road is under construction and another one projected.

COLUMBUS IS CERTAINLY IN THE FRONT OF THE PROCESSION

both in the way of steam and electric roads. That with the many other advantages we have accounts for the satisfactory increase in her population and wealth. The only real drawback is the high tax rate, but that seems to be the curse of every city. Practical business men in every city know tax rates are unreasonably high and all on account of dishonesty or lack of business policies. If tax payers got value received, no one would complain; but that seems to be unlikely. Too many office seekers seek office for the sole purpose of getting a chance to fatten off the public, and there always seems to be an opportunity.

We have a job on our hands that will keep us busy during the holiday season. We refer to

MOVING OUR STOCK TO OUR NEW LOCATION,

one block north of where we are now. Our commodious building is nearing completion, and while we are not boastful, we be-

Digitized by Google

lieve we can safely say that we will have as convenient a Hardware store as can be found any where. We will also have practically unlimited room, as we can use if needed, an entire stock besides our warehouse which is four stories high, located on the Pennsylvania Railroad with a private switch 200 feet long. From the switch, we have a railroad of our own running under the street and leading to the main basement. This will be operated by electricity or hand power. We mention this change to assure our customers that we will be in better position to serve their wants more promptly than we have been in the past. We have also increased our force of salesmen to cover territory more adjacent to Columbus than any other jobbing center. We appreciate the liberal patronage we have enjoyed in the past, and with better facilities for handling goods, hope for a larger share of business. THE SMITH BROS. HARDWARE CO.
J. H. SMITH.

THE CHICAGO TRADE.

The Hardware business of Chicago and its tributary territory for the past year has not changed materially from the preceding year. The result of the Presidential election had its influence to materially change conditions from what they were to a healthy, strong, advancing market. With the tendency still looking upward towards higher prices upon a firm, steady, active demand for all classes of metal goods such as Shelf and Builders' Hardware, Cutlery, House Furnishing Goods, Nails, Wire, Tin Plate, Galvanized and Black Sheets, Registers, Strap and Tee Hinges, and the large assortment of goods that accompanies the jobbing Hardware stock of a city like Chicago; for the Hardware jobber of to-day must be

THE GUARDIAN OF HIS CUSTOMERS' WANTS.

He must buy and have on hand for from six months to a year

J. B. NELLEGAR.

ahead. To do this means large capital and immense storage capacity, which Chicago has and which has made her famous as the Jobbing Hardware Center.

When one stops to consider that Chicago is the fifth city in the world in point of population and is greater in the number of its inhabitants than the combined population of the States of North Dakota, South Dakota, Wyoming, Nevada, Montana, Idaho, Utah and the Territories of Arizona and New Mexico, is it to be wondered at that such

ENORMOUS QUANTITIES OF HARDWARE AND METAL GOODS

have to be kept in stock and are used at a very rapid rate every month in the year?

The condition of the country as a whole is very prosperous and especially so with respect to the territory tributary to Chicago. Merchants of this city have it within their power to make Chicago a greater Jobbing Center through the prosperity and growth of the city as a whole. An awakening, however, has come and with the new year the Commercial Association of Chicago, of which our firm is a member, is taking active steps towards making of Chicago a larger and better market for buyers than it has been in the past. For the

FUTURE PROSPECTS OF THE GENERAL TRADE

of the country, we believe that prosperity is in the air. It is reflected in the railway earnings, in the splendid crops of the entire country, in the advanced and firm price of iron and steel, (which is called a barometer of trade) in the confidence of merchants and in the active demand even in the winter season for Hardware and Metals at advancing prices and in the increased wealth of the entire country. We feel that our company is entering upon the new year fully prepared to take care of what we hope and expect to be the largest business we have ever enjoyed. We are purchasing liberally, have given our customers plenty of opportunity to supply, at least, a portion of their business for the early part of 1905 at low prices. Our traveling salesmen have been doing good work, are enthusiastic for the future and will assist us to market the large quantity of goods we have on hand and have coming in.

Assuring our old and new customers that we shall study their wants at all times, being prepared to fill orders upon demand, thereby giving prompt service for which our house is noted. Referring to prices we predict that we have not felt the advance as to what it will be. Let us consider the shortage of ore upon the market with four busy months ahead of us before any new ore can be used; while the ore is the basis from which all our metal goods are made. Already manufacturers have sold far ahead of their supply and are endeavoring to buy manufactured material to work up. This means a great deal when the spring demand opens up as many buyers have not contracted for their spring stock. We believe in what we state and have governed ourselves accordingly. WELLS & NELLEGAR CO.

THE DAVENPORT TRADE.

The year 1904 which has just passed into history, has been peculiar, and possibly, in some ways, disappointing and unsatisfactory. It seems to have been a sort of settling up, or clearing-house year. Hands have been called, and the commercial players have been asked to show what they have in the way of financial resources, to entitle them to the continued

RESPECT AND CONFIDENCE OF THE BUSINESS WORLD.

Some few have been found wanting, but the great majority have been found flush with money, straight in business methods, and with hands full of lucrative orders.

The want of energy and snap in the business of 1904 may be accounted for, in part, by this settling up process, which has necessarily increased the demand for money, and caused the rate of

COL. J. R. NUTTING.

interest to advance from a half to one per cent. in this locality. Credits have been scanned more closely, and orders sifted more carefully. The great World's Fair, it may be safe to say the greatest World's Fair, which has been of incalculable benefit, has attracted the attention of many of our people from work and business, and

DIVERTED A LARGE AMOUNT OF MONEY

from its usual commercial channels.

It was the Presidential year, which always has a more or less depressing effect on business. The markets have, in many instances, been weak, and a downward tendency has prevailed for at least a portion of this period. As disappointing as some of the features of trade have been during 1904, there have been compensating offsets, which will more than balance, and the memories of the year will be fairly pleasant and agreeable.

That there will be

MARKED IMPROVEMENTS IN THE COMING YEAR

admits of little doubt. Among the reasons for this forecast are the depleted condition of stocks in the hands of dealers, which must now be replenished. Crops have been abundant, and are now being marketed at unusually high prices, making it comparatively easy for farmers to increase their consumption of manufactured articles.

Digitized by Google

There seems to exist a more friendly feeling between capital and labor, and apparently a growing tendency towards amicable settlements, which are gradually succeeding lockouts and strikes.

While there is a deplorable condition of war prevailing in the far East, and while we fully sympathize with the sentiment, and emphatically endorse General Sherman's definition of war; its existence, however, must necessarily be financially favorable to countries not involved.

Our people are inclined to accommodate themselves to the new and rapidly changing business conditions and methods, and they are more and more impressed with the idea that, no matter how undesirable it may be, concentration,

COMBINATION, COOPERATION ARE BEING REALIZED AS PERMANENT CONDITIONS,

and are being met by friendly organizations, and a growing sentiment in favor of legislation intended to control these gigantic corporations.

The policies of the government are well established, are thoroughly understood, and have recently received the endorsement and approval of our people. With these, and many other substantial reasons that are patent on the commercial weather map, the prospects for prosperity are certainly bright for the year 1905.

SICKELS, PRESTON & NUTTING CO

THE ST. PAUL TRADE.

While our territory did not have a first-class crop, still the average money receipts are as great as usual, though some new sections which have only been farmed one to three years are exceedingly poor, as the wheat crop was badly injured by the rust, but due to the high price of wheat and a good price on other farm products, the average farmer, in all but these new sections is really receiving as much or more money than he usually does for his production.

The result is that the dealer is willing to buy or contract for his spring and summer wants to an unusual extent. His mind is made up to do this because of recent advances in prices with possibilities of more advances in the near future. These higher prices are legitimate if reports that the product of iron and steel for next year is and will be contracted for and that the output of material was never used up as early as at present.

SURELY THE YEAR OF 1905 LOOKS PROSPEROUS,

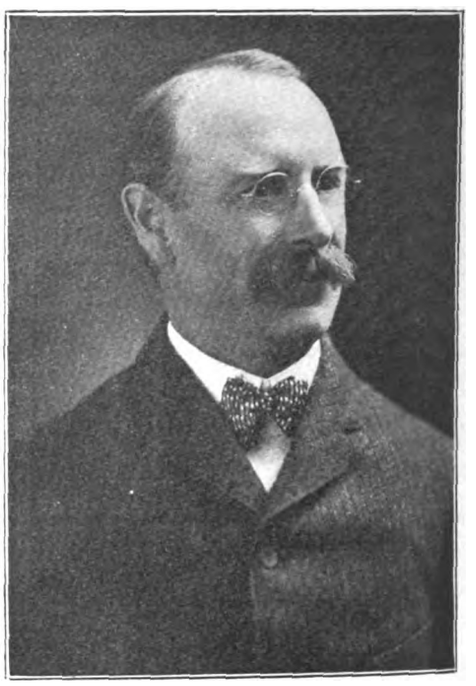
with a government whose effort is to advance our country to a degree of prosperity, never before equalled, with a President whose ambition seems to be to benefit the people, we feel that conditions could not be better.

Our trade extends over nine States and as far as we know, they all feel that the present prosperous times must continue—the feeling engenders a trust which spreads and causes others to have the same faith. As far as St. Paul is concerned, it never was more on its feet. Thousands of homes have been and are being built. Many extensive

BUSINESS HOUSES HAVE BUILT NEW QUARTERS.

Our jobbing trade is extending to a greater era, and we think our part of the globe is the best of all. Our state has still many virgin acres waiting for men with energy and muscle to develop them. The adjoining States of Wisconsin, North and South Dakota, too have vacant lands, as beautiful and productive as ever laid out of doors so, to the eastern man, we say, with Horace Greeley: "Go West, young man, and grow up with the country."

HACKETT, WALTHER, GATES HARDWARE CO.



THE MINNEAPOLIS TRADE.

1904 has used Minneapolis and the Northwest as a whole very well. Sections of the territory tributary to us were effected by blight of the wheat crop and individuals suffered, but fortunately the Northwest of to-day is not dependent wholly upon the wheat crop. The farmer that raises nothing but wheat as of old is a thing of the past. All other crops were abundant and brought good prices and as never before were the farmers more free from debt or their indebtedness was so small comparatively that little difficulty was experienced in making satisfactory arrangements to carry them along.

The fact that there was a world shortage of wheat saved the day. A larger portion of the wheat crop was low grade, bad weather during the threshing season being responsible to a large extent, but the high prices prevailing, gave the farmer that was fortunate enough to have a moderate crop a good big price for it. Taking all these facts in consideration and the further fact that o naccount of the larger cultivated acreage devoted to all kinds of crop and a good price prevailing for all classes, excepting cattle, in spite of the adverse conditions in some sections, we think it is pretty generally agreed that the crop of 1904 was worth practically as much money as any crop that was ever raised, therefore the buying capacity for 1905 ought to be as great and conditions favorable as could reasonably be expected. The only weak point in this argument is the fact as already stated that there were sections where the farmers, who depended on their wheat to a large extent will be obliged to economize.

There was an undoubted decline in volume of business for the first six months of the year and we might say a normal volume of business for the last six months as compared with 1903 and a year or two earlier that were record breakers. In spite of the one weak spot in business conditions of 1904, it may surprise your readers to learn the volume of Minneapolis bank clearings for the year and the fact that there was an increase of over $102,000,000 over 1903. Clearings for 1903 were $741,094,348 and for 1904, $843,230,773, an increase of nearly 14 per cent. We hardly know where this comes from, for the volume of the lumber business is not up to the mark and there has been somewhat of a shrinkage in the value, and the flour mills are not running as full as previous years, occasioned in part by the discrimination of the railroads against flour in favor of wheat, thereby practically losing our whole European flour trade, that has cost our millers years of untiring efforts and hundreds of thousands of dollars to establish, and another factor that has entered into this to some extent, has been scarcity of sufficient No. 1 hard Northern wheat to mix with lower grades to produce the high standard of flour that Minneapolis millers furnish.

As to the bank clearings again. The growing importance of Minneapolis as a commercial center is indicated here. Our manufacturing is not confined to flour and lumber to-day by any

W. K. MORISON.

means. Agricultural implements enter into the case with considerable prominence. This city being the second largest distributing point of this class of goods in the world and this fact is being recognized more and more by the large concerns locating have immense distributing warehouses. Several six and eight-story buildings having been erected in the last two or three years for this purpose and each concern's business running into millions.

We have two large structural steel plants, one a branch of the American Bridge Co., the other only two years old, already doing an enormous business and manufactures engines and machinery as well as doing structural work, these together with a better movement in Real Estate and a larger volume of building operation combined show where the increase in the bank clearings have come from.

BUILDING OPERATION, PAST AND FUTURE.

Building permits for 1903 were $6,200,000; for 1904, $6,700,000: a gain of $500,000 or a trifle over 8 per cent. This money has probably to a greater extent than ever before, been used in home building, but in spite of this fact it is pretty nearly safe to say that there is a great scarcity of good desirable dwellings or flats vacant to-day, than ever before and this applies, not only to high priced apartments, but it is true all along the line. In consequence rents have materially advanced, landlords have been more exacting as to the class of tenants, and this is getting to be quite a serious matter. This is especially true with families where there are young children, landlords giving preference to families without children or where they are of more mature age. This fact has probably had a great deal to do with the increase in number of dwellings, it being comparatively easy for any man drawing a moderate salary and of good standing to make some

Digitized by Google

arrangements with the various Real Estate concerns to build for him on monthly payments.

In line with this is the noticeable scarcity of stores, practically nothing in retail districts and increase in rents where opportunity is offered at expiration of leases, etc. This has been emphasized recently where three large concerns, whose business establishments were destroyed by fire, have been absolutely unable to find suitable location to continue their business. One, the largest concern, has finally succeeded in making arrangements with the owner of the property that was destroyed to rebuild for them, but at largely advanced rates, this made necessary in part by the fact that they will be required by the city to erect a much more substantial and fire proof building than the older one, and the further tact that there were several other parties standing ready to pay them their price.

During last year of the larger buildings erected there were two theatres and a large auditorium to be used as music hall, ball room, for large public functions, with a strictly modern up-to-date stage in connection, thus being adapted for grand opera, the lack of suitable facilities having prevented us this enjoyment for a number of years. There have been several reconstructed and enlarged European hotels, besides many flat buildings and many expensive houses. This all leads up to the question of

BUILDING OPERATIONS FOR 1905.

First and most important is a $500,000 bank and office building that is already assured, plans being practically completed and estimates being made for contracts to be let. Without doubt the largest bank in the Northwest will be located in a home of their own during this year, negotiations being under way now, we understand, and on account of the prestige they will undoubtedly have as fine a building as the new Northwestern National Bank building, that was completed and occupied last Fall. This building being one of the finest bank buildings in the country, probably the finest of any city the size of Minneapolis.

Another up-town theatre is being considered; we understand the architect is working on the plans now. Another indication of progress is the fact that one of the large buildings on Nicollet Avenue, on a very desirable corner is being rebuilt, will practically be a new building when completed, and will bring in an income quite three times as much as in its former condition. Negotiations are under way for another corner in the vicinity, now occupied by some half dozen or more small concerns, greater part of this property is already tied up and if the last piece, which is really the key to the situation can be arranged for, a fine larger first class building will be erected and a tenant is already waiting for the whole of the ground floor, covering a length of half of a city block. Something will have to be done to open a new retail district, but how and where is a question. There is room on Nicollet Avenue to-day, between Washington and Sixth Streets, to settle this question for some years where property is covered with old buildings and small stores, but which bring in such large revenue that the owners do not feel justified in rebuilding and we are afraid it will be many years before the conditions in this respect will be different. It is too bad that property that would sell for from two to three thousand dollars per front foot, should be covered with two story buildings, built twenty to thirty years ago and just fixed up enough to keep them in rentable condition.

Capitalists stand ready to buy this property at high figures, but it is almost impossible to purchase. Outside people have seemed to appreciate this condition of affairs more than our own people have and what sales have been made of this desirable property has been to strangers almost without an exception and to-day quite a large part of the property up and down Nicollet Avenue, in the most desirable retail district is owned by non-residents. This is an unfortunate condition of affairs and seems strange to be true, when you take in consideration the fact that it is not on account of the lack of money for we have many multi-millionaires, but our money men as a whole have been inclined to invest their surplus in Pacific Coast timber lands, Kansas oil, Mexican plantations, mining propositions anywhere, rather than in such sure safe investments as we have mentioned right here at home, but Real Estate is looking different to-day than it has any time for the past twelve to fifteen years, aside for the practically impossibility to buy good first class business property at advanced prices there has been a noticeable increase in valuable property in resident districts, some district values having advanced 300 and 400 per cent. as compared with the extremely low prices prevailing during the worst part of the depression. New resident districts for the "Quality" have been opened up and prices soared into the air. In this district there will be half a dozen or more fine houses erected this coming year and probably one of these will be the most expensive house in the city.

The Catholics will commence the erection of a Pro-Cathedral and at an expenditure of more than a million dollars. A most desirable site has been purchased for an Armory, which will be erected this year. This is near the new parade and amusement park that through the generosity of one of our most prominent men and others who joined in with him, gives Minneapolis a large tract of land in the center of the city, adjoining and practically connecting with our beautiful Central or Loring Park. And the beginning of our boulevard system, which will turn considerable tract of land into a park that any city might well be proud of.

In speaking of parks, our own people hardly know what is going on in the way of a parkway along both sides of the Mississippi River, which, when completed, will make one of the most beautiful drives in the country and the completion of the Government Locks and Dam at Meeker Island will form a deep water lake of the Mississippi from the Minnehaha Falls to the University Grounds, giving us miles of the most beautiful stretch of water with high banks and magnificent trees on either side, an ideal place for boating, and we think this will be the means of reviving the interest in boat racing that has died out here for many years on account of there being no easily accessible place for this grand sport.

LUMBER.

It is to be regretted, but true, the lumber manufacturing at this point is gradually growing less and less. One of our largest operators stated to the writer a few days ago that in his opinion within five years the cut here would be reduced one-half from the high point and that ten years from now he questioned if there would be many mills running here successfully. The shortage of stumpage within easy distance, the increased number of railways in the Northern section of the State and the fact that they are pursuing a policy of giving rates encouraging the establishing of mills practically in the timber and the further fact that the large lumbering concerns do their logging with logging railways accounts for this. While this is all true, still this business is nevertheless in the hands of Minneapolis men and while the actual manufacturing may not be done here, all the business in connection with the marketing and the capital involved will be centered here just the same.

FLOUR.

We have already in the beginning of this letter had something to say on this subject, but there is a new factor now in the flour business of late, that changes the situation materially. Through a recent ruling of the Government Canadian wheat, which pays a duty of 25 cents per bushel, can now be manufactured and exported, a draw-back being given on the exported product, as is usual in all other lines. There is nothing particularly new about this, and in fact for the past two years or so, one or two of our large mills have done this to some extent in mills that have been bonded and the entire product of the wheat has been sent out of the country. There has been the difficulty and question of disposing of the bran, shorts, feed, etc., the low value and large bulk of this making it practically impossible for them to ship it out of the country. Now under a special arrangement the millers may pay a certain portion of the assessed duty and dispose of this here and further than that they are enabled to take this hard No. 1 Canadian wheat, which they have been so much in need of the past year or two and mix it with our own wheat and thus be able to keep up the high grade of flour and their mills running and when you consider that Minneapolis produces about seventeen million barrels a year under normal conditions and can produce considerable more than that this arrangement is of great importance, of course any mill in the country has the same privilege that our own mills have, but they have been fighting for their very existence in a way, for it is absolutely necessary for them to have a foreign outlet and the discrimination of the railroads in favor of wheat has built up enormous mills in Liverpool and Belfast, Ireland, and other points in the United Kingdom, taking away the manufacture from this point.

FEDERAL BUILDING.

Another indication of growing importance of Minneapolis as a trade and commercial center is the fact that in spite of the fact that the new post-office was completed only about ten years ago, additions have been built at two different times, which has doubled its capacity, the building to-day is entirely too small for the business and an effort will be made at this session of congress getting an apportion for a new and larger site.

FIRE AND DISASTERS.

With the exception of the recent fire there have not been many serious fires here this year. The old original building at the University was destroyed in September, thus removing a land mark, but a building that perhaps could best be spared, an appropriation will be asked from the legislature for sufficient money to build an adequate building in a measure to take care of the growth of this, one of the largest Universities of the country, enrollment being something over four thousand.

The very recent large fire put out of business temporarily three of the largest concerns in their respective lines, involving property lost in the neighborhood of about $700,000, two fi-

Digitized by Google

being killed and several others injured and followed a few days later by the falling of one of the walls crashing through a small hotel adjoining, killing six people and seriously injuring some half dozen or more.

RETAIL HARDWARE BUSINESS.

The retail Hardware business here is in fairly good condition. We wish we could put this stronger, but we don't mean that it is not perhaps as favorable as could reasonably be expected. To a very large extent the retail Hardware business in this city is carried on in small stores, there being some forty or fifty such stores scattered all over the city, taking care of nearby districts and so well taking care of them that it has quite an effect on the volume of business in the larger center and the principal retail center is in turn covered by some half-dozen or more good sized and well conducted establishments. Much has been said and written about the benefits derived by the organization and cooperation and up to a certain point this certainly is most desirable, but it is more favorable in our opinion to the small dealer than to the larger ones. As an illustration, the first thought and intention of the local Hardware Dealer's Association, aside from the getting acquainted with each other, feature, was the price agreement on certain leading staple commonly sold by all dealers, nails, of course, being a principal item, but this has gradually worked along into a greater number of principal items carried not only generally by the small stores but a great many things have been put into this list that were only carried by a few of the very largest concerns and which ought not to have been taken into consideration at all, for many of these items, like steel rail at the present time does not need any protection as they were well taken care of, and the consequence is that many of the smaller dealers have taken advantage of the opportunity and in the case of many of the higher price tools—such as saws, planes, and other tools, etc., that they never would have thought of dabbling with under the old conditions, as their attention had not been called to them particularly they did not suppose they were goods that they could hold their own with against the larger down-town dealers and in some cases perhaps were not aware of the margin of profit that could be made on them, now they keep of many of these items, just a sample at a small outlay of money, knowing that they can get it at either one of the jobbers in town and procure another one when it is sold and in this way they are handling with profit to themselves, considerable business that we larger concerns feel should continue to come to us. This is also true of such items as lawn mowers, garden hose, ice cream freezers and a great many items in kitchen ware. Of course on the other hand the whole trade is receiving the benefit of more stable and uniform prices and it is rather a question whether there is not much more profit in the present condition than when former conditions prevailed.

On the other hand we have satisfactory working arrangements with all of the department stores, with the exception of a few items that are arranged for, there are no more goods at below cost sales "for one day only," of this, that and other items that have kept the Hardware dealers in hot water all the time. Our only catalogue house is co-operating with us locally and under the new management seems to be conducted on more conservative lines than before. While they may not be doing as large a volume of business we should think very likely it was more profitable.

We are afraid we have exceeded your limit as to space many times, for which we apologize, if, however, there is any merit in it and our busy Hardware friends take the time to read it we shall be glad. Our whole crew at this time is busy with inventory. We presume this is true with most every one. We are satisfied we have passed through a favorable and prosperous year and can see no reason why there should not be a continuance. You need not worry about the Northwest, tnere is no better section of country in the world, we believe, where the people are more happy, prosperous and contented. We wish every one a happy and prosperous new year.

W. K. MORISON & CO.

HOW WIRE NAILS ARE MADE.

An old retired nailmaker, now a resident of this city, says that few wire nails are made in Eastern Pennsylvania. He said: "Looking at a wire nail few realize the work it requires to make them. A visit to a wire nail plant would be very interesting. Millions are manufactured in this State every week and are shipped to all parts of the country. Pittsburgh is a great wire nailmaking centre."

He gave the following interesting account of how they are made:

"We will first take a glance into the department where the wire is made ready for the nails. The rods having been obtained by previously heating and rolling steel billets to a smaller size, from one-fourth to five-eighths inch round, according to size of wire desired, are first taken to the pickling department.

"These rods are received in coils of about two to three feet in diameter, which facilitates the handling of them. When received at the wire plant they are taken to the pickling vats, which consist of boshes, or tanks, filled with sulphuric acid, which immediately attacks the surface of the steel, removing the scale, dirt and other surface imperfections which would have a tendency to make the surface hard in spots.

"After being removed and dipped in a tank of water and dried a coating of lime is added, in order to check further reaction. Thus prepared the coils are transferred to the wire-drawing department, where they are placed, one at a time, upon a reel situated upon the floor in front of the drawing bench.

"This being done, and the proper drawing plate being placed in position, the end of the rod, which is thin or has been pointed in a pointing machine consisting of a pair of rolls, is inserted as far as possible through the hole of the die plate. These plates consist of the hardest crucible steel, with small holes punched out of them, which have been thoroughly dressed to the exact size of wire desired, the holes gradually tapering from the front to the back, which permits reducing the wire slowly and uniformly.

"To go back to where we left the end of the wire inserted in the large side of the hole, the next move being the gripping of the small end of the wire which projects from the opposite side of the die with a small pair of dogs, or nippers, attached to the revolving drum on the bench, which pulls the wire through the die. When a sufficient amount has thus been drawn to enable the end to be fastened directly in the vice attached to the drum, the drum is revolved by machinery operated from a revolving shaft beneath.

"As the wire is pulled through the dies, which reduce it to the size of the hole in the same, it is wrapped round and round the drum. When the coil has thus been treated it is removed from the drum and placed to one side, either to be drawn to a smaller size or to be sent directly to the nail department.

"As the drawing process has a great tendency to give the wire a hard, tough surface, it is usually annealed before a second drawing. This softening, or annealing, is performed by placing the coils in a suitable furnace, where they are heated to a dark cherry-red color, after which they are slowly cooled, the result being as before stated.

"When sufficiently reduced for the proper size nail, the coils are taken to the nail department, where we find machines of all sizes arranged in many long aisles.

"As was done in the drawing department the coils are placed over a reel located on the floor in front of the machine.

"The first step thus being taken, the operator next places the wire between the rollers on front portion of the machine and between the dies beyond.

"Then the machine is started, the wire, being gripped by the before mentioned dies, is pulled through the rollers, which are so set as to straighten the wire and pushed to a specified distance through another die. This die is naturally grooved to the size wire used, the portion nearest the back being cut away to size and shape of the bottom portion of the head.

"As the wire projects a fraction of an inch beyond this die, a ram on the back of the machine is forced up against the beforementioned die, forming the projecting end of wire into the head of the nail. As the ram recedes, the grip on the front of the machine relaxes its hold and files back to grip another portion of the wire, pushing it into place, while a pair of sharp dies just back of the heading pair meet and cut the headed piece of wire from that of the new one, the cut being of the proper shape and size. As this is done another piece of mechanism throws the cut nail into a pan beneath.

"The operation is instantaneous, the average machine making about 300 nails per minute when one nail is being made at a time. Some of the machines are able to make two, three or four nails at every stroke.

"After dropping into the pan small, adhesive pieces, which the shears were unable to cut entirely when forming the point, are found to be on the nails. To remove these as well as to polish the nails, they are taken and placed in a tumbling barrel, with a certain amount of sawdust. The barrel is then closed and revolved for several hours. Upon removal they are taken and packed into kegs and made ready for shipment."—Reading (Pa.) *Eagle*.

Not a Ten Strike.

Prisoner—I struck him, but he struck me first.
Magistrate—What did he strike you for?
Prisoner—For five dollars.

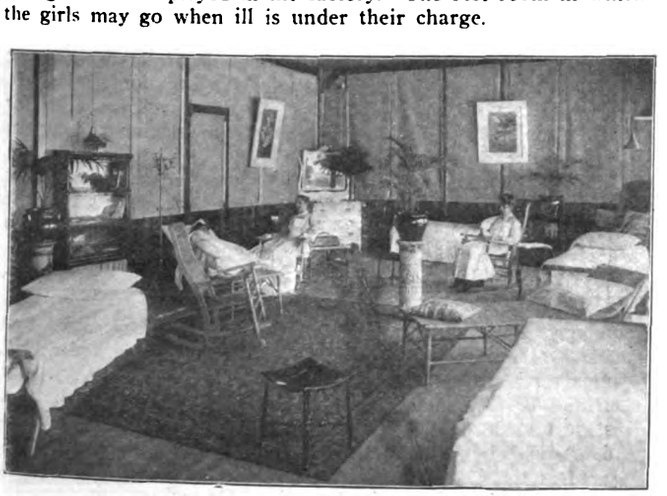
NATIONAL CASH REGISTER CO.

The National Cash Register Company will entertain the members of the Ohio Hardware Association at Dayton, when they meet in annual convention February 26 and 27. The visitors ill inspect the N. C. R. factory which is one of the wonders of the industrial world, after which they will be given a banquet and smoker. Arrangements are being made to entertain over 400 guests.

Undoubtedly the department of the factory which will appeal most strongly to the visitors is the tool room, the largest tool room in the world, operated by a company in manufacturing tools for its exclusive use. But there are many other features which will be of interest to the Hardware men, for instance, the care of its employes.

THE TOOL ROOM.



A physician, two trained nurses, a class in first aid for the injured and beds for emergency cases are some of the many precautions taken by the company, for the health and welfare of its men and women.

The company believes in good health for its employes just as it believes in good materials out of which to make its products. It has followed out such a policy for a number of years and it is safe to assert that there is not another manufacturing concern in the United States which has healthier or happier employes.

When a person makes application for employment at the factory, one of the first requirements is that he shall submit to a physical and medical examination. This is required for two reasons. First, it is the aim of the company to take into its employ only strong and healthy men and women. Second, its employes must be protected from all contagious diseases.

A special study of means to promote the health of its employes is made by the Welfare Department—one of the most important departments of the factory.

A physician employed by the company is at the call of all employes while in the factory without cost to them. He conducts classes in first aid for the injured and many of the employes have become quite proficient in the work. The physician is aided by two trained nurses who themselves are in close touch with the young women employed in the factory. The rest room in which the girls may go when ill is under their charge.

A REST ROOM FOR EMPLOYES.

Ventilation and light receive special attention. The factory buildings are models of the builders art in this respect. They are clean and light and are supplied with pure air. Everywhere are seen unusual sanitary provisions. For instance, in the polishing room the air is changed every fifteen minutes and the emery dust is drawn down by suction into a general exhaust pipe and conveyed out of the building.

The young women are provided with high back chairs and foot rests. They are also supplied with immaculately clean aprons and sleevelets to protect their gowns while at work.

Every building has its bath-room with tubs and shower appliances and employes are given company's time for bathing.

All employes are given Saturday afternoon as a half holiday for the year round. The young women in the factory are permitted to take a recess in the morning of ten minutes, and ten minutes in the afternoon and leave the factory ten minutes earlier than the men.

Dining rooms are provided where employes may secure warm lunches at a nominal charge. None but the purest of foods are served. Lectures on health and food are frequently given in the Assembly Hall for all the employes by recognized authorities on those subjects. All the known hygenic laws are observed throughout the factory. In addition to all these precautions the employes of the factory have a Relief Association in which its members are entitled to sick benefits and the services of a physician when needed.

There is a Men's Welfare League which is the means of providing outdoor athletics of all kinds for the men employes of the factory. A constant effort is being maintained at all times by the company to do everything in its power for the health of its employes, and the good results of this work are becoming more apparent each year.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED DECEMBER 20, 1904.

374,928. WRENCH. H. Bowhall, Cedar Springs, Mich.
374,954. HINGE. C. Fisher and G. B. Burnet, Manitowoc, Wis.
374,988. CONVERTIBLE DUST PAN. E. Migvault and G. A. Prichard, New York, N. Y.
375,019. CARPET STRETCHER. A. P. Steuart, Westport, and H. W. Welliver, assignor to said Steuart.
375,038. 375,039. HINGE. J. Wright, Michell, Dak.
375,094. DOOR CHECK. N. Petersen, Charleston, S. C.
375,155. WRENCH. J. M. Haynes, Maxwell, Cal.
375,166. MOP WRINGER AND SCRUBBING BRUSH HOLDER. Z. R. la Fleche and J. A. Ledoux, Concordia, Kans.
375,206. SCREW BOLT. E. DeForest Shelton, Birmingham, Conn.
375,294. NUT LOCK. J. C. Johns, Baltimore, Md.

PATENTS ISSUED DECEMBER 20, 1904.

777,673. DOUBLE ACTING SPRING HINGE. O. E. Halin, Minneapolis, Minn.
777,813. CARPET FASTENER. C. R. Shaffer, Eureka, Cal.
777,872. SELF CLOSING FAUCET. W. Weber, New York, N. Y.
778,000. WINDOW OR SASH FASTENER. S. S. Bell, Reading, Mass.
778,083. FOLDING DEVICE FOR SAD IRONS. W. Strauss, New York, N. Y.
778,093. HAMMER. A. G. Witmer, Norfolk, Neb.
778,112. CAN OPENER. Z. A. Church, Jefferson and S. A. Smith, Rockwell City, Iowa.

PATENTS EXPIRED DECEMBER 27, 1904.

375,336. BLACKING BRUSH. A. W. Brown, Lansingburg, N. Y.
375,337. DOOR CHECK. A. L. Buskirk, Shalbyville, Mich.
375,341. WINDOW ATTACHMENT. C. Claudy, Cincinnati, Ohio.
375,368. CORK SCREW. F. W. Livermore, New York, N. Y.
375,389. SAD IRON. M. J. Shimer, Freemansburg, Pa.
375,451. CAN OPENER. M. C. Lilly, Decatur, Ill.
375,483. MINCING KNIFE. J. F. Foster, Buffalo, N. Y.
375,712. WRENCH. C. E. Murray, Fairfield, Va.

PATENTS ISSUED DECEMBER 27, 1904.

778,276. SASH FASTENER. J. D. Sanford, Winchell, Tex.
778,302. WRENCH. R. Burnham, Storm Lake, Iowa.
778,349. CARPET STRETCHER. W. F. Baumhauer, Jr., Quincy, Ill.
778,370. WINDOW SASH. L. D. Patten and D. Lippy, Mansfield, Ohio.
778,500. 778,501. SELF COCKING REVOLVER. O. F. Mossberg, Chicopee Falls, Mass.
778,509. SEPARABLE HINGE. G. H. Schiek, Joliet, Ill.
778,516. CROSSCUT SAW HANDLE. M. E. True, East Pembroke, N. Y.
778,540. SAFETY RAZOR. H. Herder, Philadelphia, Pa.
778,565. WINDOW. F. J. Carl and H. G. Carl, Chicago, Ill.
778,669. FISH LINE FLOAT. W. H. Jacoby, Minneapolis, Minn.
778,673. CAN OPENER. J. M. Keep, New York, N. Y.

HARDWARE EXPORTS IN 1904.

By HENRY L. GEISSEL

The year 1904 has been one of unusual activity and prosperity in our Hardware export trade. Unfortunately, the official returns of the Bureau of Statistics do not go into sufficient details, and many articles which would practically come under the heading of Hardware, are included in various items, such as manufactures of brass, zinc, tin, iron and steel. For this reason, it is rather difficult to get at the exact figure showing our Hardware exports, but taking the principal items together we arrive at the considerable value of about $75,000,0000. In this calculation are included agricultural implements, wheelbarrows, push carts, hand carts, instruments for scientific purposes, Builders' Hardware, small tools, cutlery and firearms, clocks and watches, cash registers, sewing machines, typewriting machines, nails and spikes, safes, scales and balances, stoves and ranges, lamps and chandeliers, kitchen utensils and kindred goods.

Our exports of agricultural implements reached the enormous value of nearly $22,000,000. Our best customer was the Argentine Republic, which country imported over $4,000,000 worth of American made machines and implements for its farms. Next in importance come Canada, Russia, France, the United Kingdom, Australia and Germany. In this connection it may be mentioned that most of the export trade in agricultural machinery and implements is done by a few large manufacturing concerns, while there are many up-to-date firms in the agricultural implement line who seem to have never made any efforts to gain a foothold abroad. It may also be said that, though our exports of agricultural machines and implements have increased by leaps and bounds, there are yet countries in which very few American implements can be found. This is especially the case in the Balkan States, the Dutch East Indies, in various countries of Africa, and even in some countries of Europe, like Spain, Portugal, Luxembourg, etc.

It is very gratifying to note the steadily growing exports in

BUILDERS' HARDWARE AND SMALL TOOLS,

the value for these items having exceeded $11,000,000. The United Kingdom, which itself, with its highly developed industries, is one of our greatest competitors in all the markets of the world, was our largest buyer in this line of goods, having taken nearly $2,000,000 worth of same. If we are in a position to sell such enormous quantities of Hardware to England, should it not be possible to gain a stronger foothold in South America?

I have before me a recent report by the Department of Agriculture of the Argentine Republic, showing the imports for the year 1903. It would fill too many columns to enumerate all the articles imported into our great South American Sister Republic, but I would like to ask our manufacturers how much they contributed to the following amounts showing the imports into Argentina during 1903. Kitchen utensils, $475,395; small tools, $496,000; copper and brass goods, $586,931; paints and varnishes, $469,000; wire, $3,162,000; screws, bolts and nuts, $358,920; galvanized iron, $2,715,474; cutlery, $248,276; ropes and cordage, $265,489; etc.

In former years our exports of cutlery were very limited, but last year they amounted in value over $400,000. Increasing have also been our exports in safes, scales and balances, stoves and ranges, lamps and chandeliers, general kitchen utensils, domestic machinery and similar articles.

There is no doubt whatever that our Hardware exports can be largely increased. British India imports every year about $5,000,000 worth of Hardware and tools, of which very little comes from the United States. Egypt consumes large quantities of Hardware, the great bulk of which is supplied by England, Germany and Belgium. The Dutch East Indies offer a splendid market, which has been largely neglected. Italy, Spain, Portugal, the Balkan States, Scandinavia and Holland are markets well worthy of our closest attention.

THERE ARE SO MANY UNDEVELOPED MARKETS

that it is almost impossible to enumerate all the possible opportunities for the extension of our Hardware trade in a short article of this kind. However, I would like to mention a few: There should be a broad field in India for American refrigerators. The absolute necessity for placing the feet of all furniture containing viands in basins of water in order to protect them against the attacks of ants makes it necessary that the refrigerator feet should be high and should be made of hardwood, capable of withstanding the action of water. Such refrigerators would doubtless find a large market in India, Siam, Java, Singapore, etc.

In the Argentine Republic, scythe-blades are largely used, and come almost entirely from France. Augers, gimlets, chisels, axes and files come almost exclusively from England. Wrenches are obtained chiefly from Germany and France. In Chile, there is a steady and growing demand for plows, harrows, seeders, reapers, threshers, cultivators, tedders, horse rakes and all minor tools and appliances that pertain to agriculture and horticulture, but the bulk of them are imported from Europe. Immense quantities of tin spoons are imported every year into the Chinese Empire from Germany; they sell at 60 cents per dozen. Egypt offers a splendid market for rice hullers, in the manufacture of which the United States excels; Egypt, however, buys these hullers from European manufacturers. Last year Greece imported some 4,500 plows, almost entirely from England.

In the past decade, Germany has made competition very keen for all other trading countries. The German manufacturer has long ago realized the necessity for an export outlet for industrial development and has, either by furnishing capital to German houses in foreign countries, or through giving them long credits on his sales, facilitated the means to this end. No requirement escapes the vigilance of the German merchant abroad, who no sooner finds an article meeting with favor, than he sends a sample to Hamburg to get the lowest prices on an imitation.

Up to a few years ago the very large and constantly growing home market for our products has kept the American manufacturers from giving the full measure of consideration to the needs of the export trade, and only spasmodically have they realized the necessity of cultivating foreign markets.

If our manufacturers would consistently and persistently encourage by every means the foreign demand for their goods, and give assurance of continued care in the treatment and execution of orders, they would do far more towards preserving a market for their surplus production than by the occasional trips of a special salesman, who does not speak the language of his foreign customer, or is not acquainted with the commercial customs of foreign markets.

The total exports of iron, steel and manufactures thereof during the year 1904 have materially exceeded those of any earlier year, and the developments during the last few months give promise of marked activity for the year just beginning.

FROM ALL PARTS OF COUNTRY.

Representatives of Glidden Varnish Company Met in Cleveland December 28th.

The annual convention of the sales and manufacturing departments of the Glidden Varnish Company opened December 28th, and lasted for three days. The Glidden Varnish Company has made these conventions a feature of its business policy for years past. The traveling salesmen, managers of branch houses and heads of various departments met, there being about 160 in attendance, not including representatives of the company from London, Paris and Hamburg. The business session of the company was opened at the general offices of the company in the Williamson Building on December 28th at 9.30 o'clock. The meeting was called to order by F. H. Glidden, President of the company, after which remarks on general factory topics were made by the vice-president and also on advertising and dealer's campaign. Addresses were also made by treasurer W. J. Glidden and F. E. Lyman, assistant sales manager. The afternoon session was devoted largely to an address on "Salesmanship and Advertising" by William Boyd, of New York City. Dinner was served at the Century Club at 6 o'clock, followed by a party at Keith's Theatre. Thursday morning, December 29th, the delegation visited the works of the company, and devoted the afternoon to a discussion of general topics, followed by an address by Mr. Kenyon, of Chicago. Thursday evening there was a banquet at the Colonial Hotel with an address on "Scientific Advertising" by Thomas Balmer, of New York City. Friday morning a meeting for general conversation and talk on the outlook for business for the coming year occurred. In the afternoon reports of various committees were received.

OUR BRITISH LETTER.

(By Our Special Correspondent.)

LONDON, January 1, 1905.

WINTER TRADE HAS BEGUN.

British ironmongers move somewhat slowly and it is not until December that Hardware establishments assume a thoroughly Winter aspect. During the earlier months of Winter traces remain of early Autumn and even Summer goods, and although window displays are often somewhat in advance of the season, the majority of tradesmen allow goods which are out of season to remain in view in their shops and showrooms. However, an inspection of the leading ironmongery establishments in Great Britain at the present time would reveal an entirely different appearance, and show indications of seasonable business. Stoves and heating appliances receive attention at this time of the year; English ironmongers have given some considerable attention to the installation of hot water appliances and simple engineering business. Most of the ironmongers' fitters and even tin plate workers have some little knowledge of high and low pressure hot water apparatus, and are often called upon to fit up hot water pipes round conservatories, entrance halls, and even to carry out complete systems of hot water heating in private residences as well as in business premises. The use of petroleum oil greenhouse heating appliances has been extended during the last few years, and in many country localities ironmongers are doing good business in the sale of such apparatus. The use of hot water geysers in houses where there is no high pressure hot water supply has been extended, and the different instantaneous water-heating appliances which have been introduced by British manufacturers during the last few years have been the means of considerably developing this business. At a recent exhibition held in London several ingenious contrivances, whereby bath rooms can be supplied with hot water, were shown, a noticeable feature being hot water towel airers, laundry and nursery fittings.

It is several years since English ironmongers have had what would be called a good season for the sale of skates, although every year in the northern portions of England there have been several days' skating which have resulted in a quick and ready sale of skates of English and American manufacture. Several of the leading London factors of American skates report good business, and state that they have been kept fairly busy during the past few weeks in executing orders from districts where there have been several sharp snaps of frost. So far the ice has not been sufficiently strong to encourage lovers of skating to invest in new skates in the metropolitan area, and therefore London ironmongers still hold full complement of skates. In country localities there is a seasonable demand for ice creepers, frost nails and sundry blacksmiths' requisites, which are required in order to facilitate traffic on country roads where frost and snow make their presence felt.

In addition to the sale of stoves, which, of course, necessitates the making of stove pipe, ironmongers' workshops are kept fairly busy during the Winter season, and men are employed in repairs and other matters connected with the sale of Winter specialties. During the short days of Winter good business is done in lamps and in gas lighting appliances. The sale of lamps affords enterprising ironmongers many opportunities of making tasteful displays in their showrooms and shops, and of utiliizing their lamps as window attractions.

IMPROVED METHODS OF CHRISTMAS WINDOW DRESSING.

There is a distinct improvement in the methods adopted by window dressers just now, and several of the leading trade papers have given an impetus to better displays by offering prizes in connection with Christmas window dressing. A few years ago lamps and kitchen tin goods formed the chief features of an ironmonger's window at Christmastime. The enterprise of grocers and drapers and general storekeepers, who have taken advantage of the Christmas season to make special displays of goods suitable for Christmas presents and New Year's gifts, have shown ironmongers that the sale of such specialties must not be ignored, and that they must make efforts, too, in order to secure a share of this special business during the weeks preceding Christmas. Such novelties, great varieties of which are now on the market, afford ample opportunities for bringing out the best talents of window dressing, and lend themselves to artistic displays better than the generality of Hardware goods sold by ironmongers. During the last few weeks a close inspection of the leading ironmongers' shops in the chief provincial towns, as well as in the metropolitan area, show that there is a marked decline in the efforts made to sell goods of stereotyped designs at Christmastime, and instead of the usual displays of lamps, coal vases, trays and domestic goods, there has been a preponderance of novelties and artistic specialties. Unfortunately, the majority of British ironmongers when first establishing themselves did not realize the importance of a wide frontage, and their buildings, with the exception of those which have recently been remodelled, do not afford the best opportunities for window dressing displays. Until quite recently the majority of British ironmongers had small windows, which in many instances were again subdivided; their doorways were narrow, and, following upon the lines adopted in past generations, goods blocked the entrances and frequently obscured the view of the window contents. This unfortunate state is, however, gradually being remedied, and there is every indication that the British ironmongers of the future will possess establishments worthy of the trade carried on, and suitable for a proper presentment of the latest types of up-to-date Hardware.

PUBLIC-SPIRITED IRONMONGERS.

During the last few weeks the public election of municipal councils, the selection of aldermen and the nomination of mayors has taken place. It is pleasing to note that among the public-spirited tradesmen of the present day are many Hardware merchants, manufacturers and retailers. It is often said that the busiest trader is the man who can find the greatest amount of leisure time, and it is evidently true of many Hardwaremen. Some of the most prominent members of the Ironmongers' Federated Association in this country, in addition to controlling important retail businesses also find time to devote considerable attention to the conduct of the public affairs of their native towns and cities. W. J. Bacon, who is the president of the I. F. A. for this year, and the senior member of one of the most important retail ironmongery businesses in the South of England, is also mayor of the ancient borough of Poole, a justice of the peace. and a prime mover in many important local engagements. He has just lately found time to take up the question of ironmongers and gas companies, and to throw in the weight of his influence in urging ironmongers to look carefully into their present position in reference to the gas stove and fittings trade, in the hope that by some mutual agreement a better understanding may be brought about between members of the Hardware trade, the gas stove makers and the manufacturers of coal gas. W. H. Timpson, who is the president of the London Ironmongers' Association, is also a busy man, having just been re-elected a town councillor of the borough of Ealing. He, too, finds time to take an interest in the affairs of his brother ironmongers, and to give his weaker brethren a helping hand in the improvement and betterment of their businesses. Another busy man, who is a well-known Hardware trade valuer—Edwin Leader Shepherd—has for the third time been elected mayor of the borough of Abingdon, and John Smith, a typical north country manufacturer of Hardware, has found time amidst his numerous business engagements to render his fellow-townsmen good service as mayor of Keighley, an important Yorkshire manufacturing town. These men are but typical of numerous other members of the Hardware trade who have pledged themselves to give their best services, time and money during the year 1905, in order to promote the interests and well-being of the towns and cities they inhabit.

THE GAS EXHIBITION AT EARL'S COURT.

The Gas Exhibition, which closed on the 17th of last month, has been one of the most successful trade exhibitions held at Earl's Court, London. Upwards of 200 manufacturers of gas stoves, lighting and heating appliances have made splendid exhibits of their different specialties, and they have had the satisfaction of interviewing some thousands of Hardwaremen, plumbers, gas fitters and others interested in the use and maintenance of gas lighting and heating appliances. It is confidently hoped that the exhibition will be the means of giving considerable impetus to the sale and use of gas lighting, heating and cooking appliances, by showing the general public the special contrivances by the use of which gas is rendered available for these purposes and may be safely adopted, under almost any conditions. Ironmongers who have visited the exhibition will have many opportunities of interviewing their clients during the present Winter months, and of securing their patronage, thus bringing about a more extended use of stoves and other fittings, which bring profit to Hardwaremen, not only in their sale, but in their upkeep and in the maintenance of the burners and glasses required in their use. There is a won-

JAP-A-LAC

"WEARS LIKE IRON"

THE Hardware dealer, who is willing to take his share of the profits accruing from JAP-A-LAC sales, is sure to become an enthusiast on this new wood finish.

We advertise it in the principal magazines and periodicals, and spend immense sums of money in explaining its merits to the millions of readers.

JAP-A-LAC is the quickest selling commodity of its kind in the market.

JAP-A-LAC does not scratch white or show heel marks.

JAP-A-LAC may be used for all kinds of interior finishing, furniture, iron work, doors, etc.

There is nothing just as good. Why not stock what people call for?

Write for special proposition to dealers and full information.

THE GLIDDEN VARNISH CO.
MAKERS OF HIGH GRADE VARNISHES
No 44 WILLIAMSON BLDG. CLEVELAND, O.

derful variety of incandescent fittings, and many manufacturers, both British and Continental, vie with one another in the production of incandescent gas lighting burners and mantles which will give the greatest amount of light with the smallest consumption of gas, together with doing their utmost to provide the public with economic supplies. The advantages of the different mantles, burners and fittings have been most enthusiastically demonstrated by the exhibitors at Earl's Court, and from the technical descriptions given it is evident that the manufacturers took care to engage a competent staff of assistants who thoroughly understood the technique of the specialties they handled.

ENTERPRISE OF MANUFACTURERS OF FANCY GOODS.

The manufacturers of fancy goods have displayed considerable enterprise during the past few weeks, and have done their utmost to push the sale of their different novelties. Following upon the lines of large drapery warehouses the leading London fancy goods warehousemen now have several seasonable exhibitions at the commencement of the different periods of the year, when they hope to do a large business in the different branches of fancy goods they handle. Doubtless the advertisement of such special sales, and the steps now taken to draw together traders just at the right time, have been the means of inducing more extended sales of their different novelties. The fancy goods warehouses, as they are frequently called by buyers of sundries, embrace many departments, one or more of which are always seasonable. As the Winter months come on sundry fancy goods suitable for Christmas presents are temptingly offered, prominence is given to Winter games and amusements, which, it may be pointed out, are taken up by ironmongers to a much greater extent than formerly. The popularity of talking machines of different kinds has opened up a new channel whereby English ironmongers can offer amusements, and as their sale is now a regular branch of an ironmonger's business they may be regarded as the backbone of the Winter amusement section. Mechanical toys, electrical novelties and such lines which have an increasing popularity are found grouped among such goods. These and many other articles of a similar class have made up tempting displays during the last few weeks, and careful enquiry elicits the information that the sales of such light and one-time neglected ironmongery side lines have been most satisfactory. There is undoubtedly a tendency to lighten the Hardware trade, and to introduce from time to time fancy goods, domestic novelties and sundry popular articles and thereby widen the scope of an ironmongery business, and draw together a wider range of supporters. This, doubtless, materially assists in the sale of ordinary stock articles of the heavier types of Hardware.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Right to Maintain Building on Another's Land.

QUESTION: "A" purchased a tract of land on which there is a small building erected by and belonging to another party whose land adjoins that purchased by "A." The house was put there without any special permission from parties then owning the land. has been standing three or four years, and in use by the owner. Can "A" force the owner to move it whenever he so desires? Does the length of time the house has been there affect "A's" right to have it moved off his land? Should the owner refuse to move it, what is the proper course to pursue?

REPLY: A purchaser of land is presumptively entitled to all the buildings or houses situated on the land not expressly reserved to the use of another. Such houses or buildings are considered an incident of the land and the title to them passes with the title of the land to the purchaser. Presumptively, therefore, "A" is the owner of this house and can do what he likes with it. It is perfectly clear moreover that whether A claims title to this house or not, his neighbor has no right to leave the building on the premises any longer than the owner desires. The only way in which such a right could be acquired would be by deed or by adverse possession. Three or four years would not be sufficient time to acquire a right by adverse possession and we understand from your question that there is no deed in this case. The statue of the adjoining proprietor is, therefore, simply that of a licensee and the license to use "A's" premises can be revoked by "A" at any time at his own pleasure. We advise you that "A" may notify the adjoining proprietor to move the house off his land, and in case of a refusal, he may remove it himself, or if "A" sees fit, he may claim title to the house and do what he likes with it.

REVIEW OF THE MARKETS.

WIRE NAILS: The volume of business confronting the mills at the present time is of the most favorable character, and is apt to keep them busy for over sixty days to come. The greater portion of the trade seem to be confident a further advance will take place; although it is not expected to be very large, it will serve to check the demand. The inability to make prompt shipments is beginning to be felt at the mills. Quotations remain as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. for cash in 10 days:

Carload lots $1.75
Less than Carload lots 1.80

New York: The merchants have stocked up pretty thoroughly during December as an advance was feared, and provision was made for the change. The inability to deliver promptly as indicated by the slow deliveries has made earlier shipments desirable, and though the current demand is but light, the contracts for delivery are requested, irrespective of date. Quotations are firm at the following:

Single carloads $1.94
Small lots from stores 2.00

CUT NAILS: The handling of the market for Cut Nails has been more satisfactory to the trade than ever before, and will be continued if Wire Nails are subject to another advance. The volume of business placed with the mills has been excellent, and the prices of the Cut Nail Association will be advanced at once to a par with its wire competitor, without the formality of a meeting being considered necessary. Quotations are as follows: Carload lots, $1.75; less than Carload lots to Jobbers, $1.80, and to retailers, $1.90 f.o.b. Pittsburgh. Iron Nails for delivery at Pittsburgh, Buffalo and all points west of these cities, 10 cents advance per keg on Steel Nails.

New York: The market is firm at present quotations though local demand is not very heavy at the opening of the New Year. Quotations are as follows: Carloads on dock, $1.89; less than carloads, on dock, $1.94; small lots from store, $2.00.

BARB WIRE: The mills have been liberally endowed with orders for the future, anticipations for a good trade in the early Spring being unusually bright. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.90	$2.20
Retailers, carload lots	1.95	2.25
Retailers, less than carload lots	2.05	2.35

SMOOTH FENCE WIRE: There is a large quantity of orders booked at current prices, being in anticipation of an expected advance. Orders are still being received at the mills and the business for the immediate future cannot be otherwise than good. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots $1.60
Retailers, carload lots 1.65

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advance.

SHEET ZINC: Under date of the 30th ult. another advance has been announced in the price of Sheet Zinc. The price being $7.25 per 100 pounds in 600 pound casks f.o.b. mill. This is subject to the usual discount for cash and quantity.

HATCHETS: There has been an advance of 5 per cent. in the price of Hatchets, the discounts having been advanced from 40 and 12½ to discount 40 and 7½ per cent. A change in the rebate to Jobbers has also been made.

NUTS: The manufacturers of Hot Pressed Nuts at a meeting held December 20 decided upon advanced prices, as follows: Hot Pressed Square Nuts, blank or tapped.....5.60 cents off. Hot Pressed Hexagon Nuts, blank or tapped.....6.00 cents off.

A large volume of busines was reported and the market was represented by great firmness of tone.

STRAP AND T HINGES: Under date of December 20, the manufacturers of Strap and T. Hinges, etc., have adopted a revised list. The new list is materially lower than the one it displaces; there being corresponding changes in the base discounts. This list endeavors to avoid the disadvantages of the long series of extra discounts which were developed. The new base discounts are as follows:

Light Strap 70%
Heavy Strap ..... 75 and 5%
Light T 65%
Heavy T 60%
Extra Heavy T ..... 70 and 10%
Long Chest 50%
Hinge Hasps 50%
Crate Hinges 70%
Crate Hasps 50%

The following is the revised list of McKinney Mfg. Company, Allegheny, Pa., which is subject to the discounts named above.

Light Strap Hinges No. 800.

3	4	5	6	7	8	10	12	14	16 inch.
$0.85	1.10	1.35	1.70	2.10	2.40	3.30	4.90	6.40	7.90 per doz. pair.

Heavy Strap Hinges No. 803.

4	5	6	8	10	12	14	16 inch.
$1.60	2.15 per doz. pairs.	.15	.13½	.13	.13	.13	.13 per lb.

Light T-Hinges No. 805.

3	4	5	6	8	10	12	14 inch.
$0.75	.80	1.00	1.20	1.50	2.20	3.00	3.90 per doz. pairs.

Heavy T-Hinges No. 807.

4	5	6	8	10	12	14	16 inch.
$0.90	1.05	1.25	1.55	2.30	3.20	4.45	5.40 per doz. pairs

Extra Heavy T-Hinges No. 809.

4	5	6	8	10	12	14	16 inch.
$1.80	2.45 per doz. pairs.	$0.15	.14½	.14	.14	.14	.14 per lb

Long Chest Hinges No. 811.

6	8	10	12 inch.
$1.15	1.50	1.70	2.45 per doz. pairs

Hinge Hasps No. 813.

3	4½	6	8	10	12 inch.
0.50	.60	.80	1.05	1.50	2.10 per single dozs.

Crate Hinges No. 815.....3 inch, 85 cents per doz. pairs.
Crate Hasps (single swivel) No. 817.....3 inch, 50 cents per single doz

CARRIAGE BOLTS, MACHINE BOLTS, ETC.: At a meeting of the manufacturers of Carriage Bolts, Machine Bolts, Lag Screws, etc., held December 21, advances were made. The new discounts are as follows, there being the usual extra discounts to large purchasers:

Common Carriage Bolts, ⅜ x 6 and smaller and shorter, rolled thread...75 and 10
Common Carriage Bolts, ⅜ x 6 and smaller and shorter, cut thread.....75 and 5
Common Carriage Bolts, longer and larger than ⅜ x 6, cut thread.....70 and 5
Machine Bolts, ⅜ x 4 or shorter and smaller.....75 and 7½
Machine Bolts with H. P. or C. P. Plain Nuts, larger than ⅜ x 4.....70 and 7½
Machine Bolts with C. & T. Nuts.....65 and 12½
Machine Bolts, blanks.....70 and 7½
Bolts without Nuts, 6 inches and shorter.....10 per cent. addition
Bolts without Nuts, longer than 6 inches.....5 per cent. addition
Bolt Ends, with H. P. or C. P. Plain Nuts.....70 and 7½
G. P. Coach Screws.....80
Cone Point Lag Screws.....80 and 5
Skein Screws.....80

CAST IRON WARE: Under date December 13 advanced prices were determined upon by the Hardware manufacturers of Stove Hollow Ware, and the market in this line is accordingly represented by the following range of prices:

Stove Hollow Ware
Enameled ..... 50 to 55 and 10%
Ground ..... 55 to 60 and 10%
Plain or Unground..... 60 to 65 and 10%
Country Hollow Ware, per 100 pounds..... $2.75 to $3

No changes were made in prices of White Enameled Ware, Covered Ware or Glue Pots, but the market on these goods is decidedly strong, and it would not be surprising if an advance should take place before long. An advance of about 15 per cent. has recently been made in the price of Light Sugar Kettles and English Pots, which are sold by the piece.

ROPE: The market is a good one, though prices are firm and an excellent demand is anticipated for the future. The following quotations represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	11¼ to 12
No. 2 Manila	10 to 10¼
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8 to 8¼

BINDER TWINE: The low quotations announced by the Harvester Company in December, without guarantee, has been availed of by some dealers to place their orders believing they

Digitized by Google

would advance. The market is not effected yet and the Harvester Company's schedule remains as follows:

	Per lb.
Sisal	9½c
Standard	9½c
Standard Manila (550 feet)	10½c
Manila (600 feet)	11½c
Pure Manila (650 feet)	12½c

Five-ton lots, 1-8 cent less; carload lots, ¼ cent less. Chicago delivery, usual terms of payment. Kansas City, Omaha, Council Bluffs, and Minneapolis, ¼ cent added. Prices not guaranteed. Allowing for freight, New York prices would be ¼ cent lower than the above.

LINSEED OIL: The following quotations were announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....44 cents per gallon.
In lots of 5 barrels or more.....43 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon.

THE SAN FRANCISCO TRADE.

After a prolonged spell of dry weather, the farmers and Hardwaremen of California, and all others interested in the agricultural prosperity of the State, received splendid Christmas and New Year's presents in the shape of bountiful rainfalls. But these highly appreciated gifts were so happily sandwiched in between days of sunshine that Hardware merchants, all of whom, by the way, were stocked as never before with gift season goods, are thoroughly well pleased with the considerate way nature made provision for holiday shipping the timely sunny days having proved sufficient for the crush of buyers to carry away beyond all procedence of the stocks of seasonable goods the retail Hardwaremen had to offer.

To close the year just passed with a triumphant trade exhibit of progression the finishing touches to the new business home buildings of the Pacific Hardware and Steel Company were not quite completed, but soon will be, and the area covered by the building will be more than that of any other mercantile structure on the Pacific Coast. These several buildings in one are on a plot of ground bounded by Townsend, Seventh and King Streets, of the dimensions of 275 by 550 feet, and will be the pioneer mercantile structures in that new wholesale district. The main building will have frontages of 275 feet on Townsend and King Streets, and 264 feet on Seventh Street, an area, it is said, the most extensive of any business structure, west of the Mississippi River. It is three stories in height, of the heaviest mill construction, with selected brick, the walls laid in patterns, while the entrance on Seventh Street will be in granite and sandstone, with the vestibule in marble. A basement will extend under the entire building, thus giving a floor space of 336,600 square feet, or about seven and three-quarters acres. Heavy brick fire walls running from Townsend to King Streets will practically divide the main structure into three buildings. On the first floor will be the stock rooms, in the center the packing rooms and order department, and on the King Street and Townsend fronts will be the shipping and receiving departments. Surplus stocks of all kinds of stoves, plumbing goods, etc., will occupy the second story and two rear sections of the third floor. The general offices of the company will be situated on the Seventh Street frontage of the third story. They will occupy about 25,000 square feet, and will be lighted and ventilated by numerous windows and skylights. Four hydraulic freight elevators and fire electric freight elevators, with an electric passenger elevator, will furnish rapid and ample means of transportation from the basement to all floors of the building. A complete and elaborate system of fire protection is being installed, consisting of 6,000 sprinkler heads, numerous fire extinguishers and the necessary fire hose. All departments of the immense establishment are to be placed in quick communication with each other by means of pneumatic tubes and telephones. Full advantage will be taken of the sitaution of the building near the railway tracks. Rails on the company's own ground will permit of the loading or the unloading of ten cars at a time. Tracks and wagons will receive and deliver goods from the King Street front of the building, where a platform, elevated above the street and covered by a glass hood 550 feet long, will protect the goods in process of loading or unloading from exposure to the weather.

Adjacent to the main building and occupying a piece of ground fronting 175 feet on King and Townsend Streets, and extending through the block 264 feet is the great iron and steel warehouse of the company. This is a very heavily constructed one-story building, thirty feet high in the clear. In it the stocks of boiler plates, boiler tubes, pipe and bar iron are to be housed. Two large electric traveling cranes will furnish a ready and an economical method of handling the stock in the building, and delivering it from and to the cars and trucks. Next to the warehouse there has been left unused a piece of ground measuring 100 feet on King and Townsend Streets, and 275 feet deep, upon which additional buildings are to be erected later on. Half million dollars is the estimated cost of these soon to be occupied new headquarters of the Pacific Hardware and Steel Company.

INDUSTRIAL PRESS ASSOCIATION.

LINSEED OIL.

"Linoel" writes to the *Oil and Colorman's Journal* an interesting letter which is headed "A Vital Point for Purchasers of Linseed Oil." It is as follows:

Users of linseed oil in the varnish, linoleum, paint, and allied trades are constantly finding that they get varying results, according to the batches of oil used. The varnish maker complains that the oil "breaks" under heat, gives a non-elastic product, or one that "blooms"; the painter finds his paint crack, does not dry hard, etc.; and the linoleum manufacturer finds he gets a cement that does not set well, and gives with the cork an inferior product; if used for tarpaulins, the dried oil may soon become soft and absorbent, and for these variations in behaviour hardly any two users give the same explanation, though all agree the oil is at fault. Various suggestions, such as adulteration with fish, pine, or hydrocarbon oils, too much "fat" present, newness of seed or admixture; plate seed oil, to cheapen the cost of East Indian or Baltic seed oil, are freely made as reasons why linseed oil nowadays is distinctly inferior to what it used to be in days gone by. The chemist has at his disposal an array of delicate tests to demonstrate the purity of the oil, such as the low flash point, its distinctive taste and smell as proving the presence of lighter oils, the mixed acid test, as given in these columns, to show admixture of La Plata oil, gravity tests, iodine number, weight of oxygen absorbed in a given time, etc. An oil may successfully pass these tests, and be certified as pure and of good quality, and yet be totally unfitted for the purchaser's use, and may exhibit all the faults previously mentioned. After an experience extending over a long period, and the treatment and testing of a large number of samples, the writer is of opinion that nearly all the difficulties experienced by users of genuine linseed oil, lie not so much in the admixture of the seed of various growths, but in want of maturity of the oil itself. The main point, however, is that it lies in the power of every user, by a certain and simple test that can be applied in five minuts, to distinguish with certainty an oil that is unfitted for his purpose if good results are desired. If anyone will take a test tube, say, ¾-inch diameter, half full of freshly-made linseed oil, and apply heat until the dense fumes given off flash or burn, he will find, notwithstanding the oil may have been carefully filtered, and be perfectly bright, that large flocks of gelatinous-like matter are formed, sometimes amounting to 20 per cent. or 25 per cent. by bulk of the oil treated; this is technically known as breaking, or "spawning." If the contents of the tube are allowed to cool, and are poured on glass, a very irregular surface results, showing that the oil is not matured, since if an oil of similar quality be retained in tank it gradually loses its tendency to spawn or form flocks, until, after two or three years' storage, it remains clear and bright, even if heated until the fumes burn quietly, and can then be used with safety and satisfaction for any class of work. The albuminous or flocculent matter appears by age to have become absorbed by the oil; it tends to give increased toughness and backbone in use. Many users are aware of this, and go to the expense of tanknig their oil for a long period before using, and they find that their products are correspondingly increased in quality and uniformity. The test given above, though proving that an oil is unsuitable, does not prove an oil to have been tanked for any length of time, as some firms are able to produce by chemical treatment an oil which, though new, will successfully pass this test. This treatment is usually alkaline in character, and consists in removing the spawn, or albuminous matter, and at the same time the free fatty acids are removed also, the resultant oil commanding a higher price as standing heat without "spawning." This oil does not and can never take the place of a genuine oil, as it tends to produce a finished article wanting in toughness and body.

"Sure," said Patrick, rubbing his head with delight at the prospect of a present. "I always mane to do me duty."

"I believe you," replied his employer; "and therefore I shall make you a present of all you have stolen from me during the year."

"Thank your honor," replied Pat; "and may all your friends and acquaintances trate you as liberally.'

OUR WRITING MACHINES.

America Now Produces an Endless Variety to Suit the Whims of Everybody.

Business men throughout the world are using typewriters more and more than ever before, and they have been liberal patrons of the machines advertised in our columns. The industry in America has been growing rapidly, new factories have been built recently and new ideas have been coming out in commercial form. The New York *Times* has made a study of the situation and its deductions are of more than ordinary interest.

The report prepared under the direction of the United States Census Office in 1900 showed that the amount of capital then invested in the manufacture of typewriters and supplies throughout this country was, approximately, $8,500,000, which represented the value of land, buildings, machinery, implements and live capital utilized, but did not include the capital stock of any of the concerns engaged in the industry. The value of the products turned out was about $7,000,000.

There are indications that since the issuance of this report the total amount of capital employed in the typewriter industry has increased in the United States to about $12,000,000, and that the value of the product increased correspondingly. Although, naturally, some of the concerns which have sprung up of late years have failed, there is abundant proof that many of them have succeeded, and that their machines are installed in offices and elsewhere. Among these machines there are some whose mechanism is very simple and others whose mechanism is extremely complex, at least to a layman. Ten minutes' examination of some of them is sufficient for any one to obtain a fair knowledge of their construction, while to understand the why and wherefore of others would require weeks of study.

It is doubtful if the development of any other modern device has been so rapid during the last twenty-five years, and few persons are to be found who claim to be familiar with the construction and operation of one-half the typewriters now in use. In attempting to explain why it is that, under the present conditions, there is a good demand for a score or more of these machines, a New Yorker of experience said:

"In the first place, no two operators write alike, because no two are of precisely the same temperament. One may depress the keys with a slow and even touch, another's touch may be quick and jerky, that of a third exceedingly irregular and clumsy and awkward in style. The would-be expert strives to cultivate a quick and methodical style of fingering the keyboard, and naturally chooses a machine capable of fine adjustment. A salesman will invariably tell you that the make of machine he handles is susceptible to the most delicate touch, but his statement is not always true. A slow operator, or one who cares more for the appearance of his work than for the speed with which it is done, usually selects a typewriter that looks to be strong and durable, and unlikely to balk or get out of alignment. Others have queer notions about the cause of 'sticking'—that is, the refusal of the typebars to strike—and will not buy a machine which appears to be intricate in construction.

"There is another body of operators who invariably insist on having the very latest machines produced. They resemble the bicyclist who willingly exchanges a wheel that is in good working order and practically new for another of a later model and pay $25 to boot. If they get the impression that their machines are out of date, that settles it; they must get rid of them. On the other hand, there are old, pioneer operators who claim that the machines made five or ten years ago are superior to those of the present, and they practice what they preach by using what are commonly called antiquated models.

"There are other operators to whom the sound of a typewriter is exceedingly objectionable, and who make it a point to obtain the most silent machines to be had. They are not particular about the size of a machine or its peculiarity of action, but it must be, as they say, noiseless. It often happens that an operator occupies the same office as his employer, and that the latter objects strenuously to a machine with a loud click.

In recent years the light-weight typewriter has won a host of friends. Hundreds of people, among them clergymen, authors and newspaper reporters, desire a machine which they can pick up and carry easily, and perhaps put in their traveling bag; they have no use for one of large frame which occupies almost as much space when encased, as a small trunk. They consider portability before all else.

"There are to-day as many sticklers for faultless alignment as ever, but the question of touch above referred to is one in which the largest number of persons seem to be interested. Beginners, as well as experienced operators, are fastidious about the amount of pressure necessary to depress the keys, and, moreover, about the distance the keys drop when they are struck. Attempts have been made to lessen this distance and to facilitate the action of the keys, but they have been successful only in a measure. It is true we now have so-called power or electrical typewriters, which have met with some favor. In using these machines it is only necessary to touch the keys with sufficient force to release the latch mechanism, and electricity does the rest. The mechanism is operated by magnets, the circuit being closed whenever the writer strikes a letter.

"Discussion over the advantages of single and double keyboards, which has engaged the attention of manufacturers and expert operators for many years and has resulted in decided prejudices on one side and the other, will probably continue, but it really amounts to very little, as observation shows that machines of both styles have their adherents, whose views are not likely to be swayed by individual opinions.

"Unquestionably, the 'visible writing' machines have something of a call over the others, but people not familiar with the facts would be surprised to know that some operators care very little about seeing their work while they write. They say they prefer to have it hidden, as it is in most cases, because if it were constantly in view it would tend to sidetrack their train of thought, so to say, or perhaps disturb a burst of eloquence. As a matter of fact, a skillful operator rarely examines his work until it is finished, and wouldn't look at it if it were in sight.

"A machine's price also has much to do with its sale, especially with beginners, but the person who becomes thoroughly acquainted with one or more so-called high-grade machines isn't apt to be influenced by their price, for he knows he can rent or buy at reduced figures a second-hand machine of the style that suits him which will answer his purpose."

FISH HOOKS.

More Than 200 Kinds, Each With Many Sizes.

At a meeting of the Anglers' Association of Onondaga, George Barnes Wood, of Syracuse, read a paper on "Fish Hooks," and told some things about them which will be news to many fishermen. Among other things he said:

"Primeval man hooked and caught fish by the aid of numerous devices, the most important of which were gorges made of bronze and stone. The latter consisted of pieces of stone about an inch in length with a groove in the middle for a line. One of these gorges, a relic of the stone age, has been discovered in France and is about eight thousand years old. When swallowed by the fish, it turned across the fish's gullet and held it secure.

"After stone, bronze was used, and then bone. The early Indians used bone, thorns and antlers, and later improvised hooks made from hand forged nails.

"The saying of Amos in the Old Testament established the fact that fish hooks have been used nearly 2,700 years. He says, 'The days shall come upon you, that he will take you away with hooks, and your posterity with fish hooks.' (Amos iv., 2).

"It has been stated that the best quality of hooks are made in this country and that the imported hooks are inferior in temper and durability. The facts are simply reversed. There has been but one factory in the United States that ever made the attempt to compete with the imported hooks, and it gained a fine reputation for turning out hooks, which were compared to pin hooks, with the exception of their having a barb.

"The reason why Americans do not manufacture as good hooks as those imported is the same as why we cannot make needles. We lack the experience in tempering, and, until recent years, have been unable to make steel to compare with that of England, Germany and France.

"There are over two hundred different sorts of hooks, each having from twenty to thirty sizes, among which may be mentioned:

Eyed, flatted, ringed, tapered, turndown eye, knobbed, spiral eye, Kirby, Limerick, Kendall, sneck bent, Pennell, turndown eye, Cholmondeley Pennell, gravitation cod, double brazed, double black or japanned, double brazed live bait, lip hooks, Mahsen treble, double reversed Limerick, round bent sea hooks, Harwich sea hooks, Exeter, York trout, New York bass, perfect trout, perfect bass, halibut, mackerel, dog, roach, hake, Mackensie, balting hook, central draught, Indiana bass, Kensey, blackfish, sheepshead, Whiting, Virginia, Chestertown, O'Shaughnessy, Aberdeen, sproat, bayonet point, spear point, hollow point, needle point, double, treble, quadruple, double safety pin, Norway, yankee, pothook, weedless, sockdolager, automatie, round bend, Pennsylvania, salmon, crystal.

"Yankee inventions on fish hooks have been numerous, but little attention has been given to efforts to change the shape. I have examined the United States Patent Office reports and find 119 patents were granted on fish hooks from the year 1872 to 1903, an average of about four each year. The banner year was in 1899, there being fourteen patents issued. Nearly all patents have been on the principle of the 'snap-and-catch-'em' order none of which appeals to the true angler.

"The Kirby is the oldest steel hook made in England. Its name is derived from its inventor, a Mr. Kirby of London. Samuel Allcock of Redditch, England, writes me that he remembers the appearance of the Kirby hook sixty-five years ago. This hook has a curve in the body, is commonly called a bent hook and does not lie flat on a level surface.

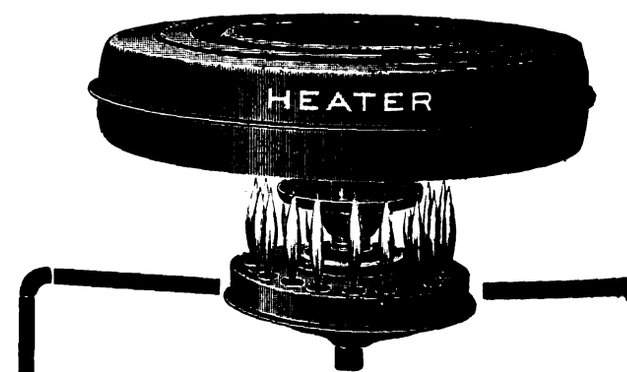
"The Limerick follows next in order. It is a straight hook and lies flat on the level. The bend is more acute and the barb a trifle longer than on the Kirby hook. It was made in Limerick, Ireland; hence its name.

"Shortly after it came out a Mr. Philips of Dublin, Ireland, made a slight alteration of the point. Instead of a straight point, he caused the point to stand out! he also made it not quite so long, hence the name 'Dublin Limerick.' His claim was that upon striking the fish it was more sure of hooking him.

"The Kendall hook was first made in Kendall, England, whence its name. It has an almost square bottom and is bent like the Kirby, the shank being about the same length.

"Carlisle hooks were first made at Carlisle, England. They have a round bend and were termed 'Carlisle Kirby,' which shape have a round bend and lie flat. Later they were manufactured at Kirby and given a bend and were termed 'Carlisle Kirby,' which shape is mostly used in this country and called Carlisle.

"Barbless hooks have been used by the Japanese for centuries. They are much used by the fish breeders in order to avoid injuring the fish when taken from the water to be stripped of spawn and milt for the hatchery.



"When Seth Green was in charge of the New York State Fish Hatchery at Caledonia, he made the assertion that more fish could be caught and saved by barbless hooks than any other. He gave me a few to try and taught me how to make them, which was by using the best steel needles. First we annealed them and then bent them around a form which was like a Carlisle, only the point was a trifle higher.

"I made over one hundred, which were distributed among my angling friends as an experiment. The results were the same. On small trout, which could be quickly landed, it worked admirably, but for bass, pike and pickerel it was a failure as the reports showed a loss of 6 per cent. of fish hooked.

"H. Cholmondeley-Pennel of London was formerly inspector of Sea Fisheries of England. The eyed trout hook was perfected by him in 1885, and, strange to say, it is almost a new hook to the angling fraternity in the United States.

"It is used extensively in England, especially for flies, as they are much easier to carry and with little practice are quickly changed from one kind to another on the leader. I consider the draught better than any other kind. The Limerick style combines the three great requisites of penetration, holding power and flotation, or the general contour of the shank.

"Double hooks originated centuries ago. They are said to

20th Century "White Flame"

Combination HEAT AND LIGHT

Attaches to any Chandelier, Wall Bracket or Portable Stand.

Gives great heat and brilliant light at one time and at one cost.

Delays "Stove and Furnace Time."

There are generally bath-rooms and other places in houses that are better for extra heat, particularly if it adds nothing beyond the cost of the usual illumination.

Must not be confounded with "old-fashioned blue flames," because it gives greater heat besides the light and is strictly Hygienic. Retails $1.25.

Only 8 inches diameter, but it does the work.

Send for circular and discounts.

have been used before the single hook. Many millions of double hooks are now utilized in this country for the manufacture of spoon baits, gangs, and inventions to represent fish.

"More than a century has passed since any attempt has been made to improve the eye. One manufacturer has lately been granted a patent on double interchangeable hooks. The shank is arranged like a safety pin. Its advantages are: It can be attached and detached in a second; it can be made in single or treble hook as well.

"The sproat hook is undoubtedly one of the best known and most universally used hooks throughout the United States. It has been termed by some the hogback, as it has that appearance when laid on its point.

"It has gained a worldwide reputation on account of its admirable form, having a beautiful curve, and its penetrating power is very near correct because the pull is nearly in the direction of the point. It also has the advantage of being less liable to break than any other on account of its general construction, together with the size of the wire used."

A NEW ARGUMENT AS TO THE CHINESE.

In an article entitled "The Folly of Chinese Exclusion," in the *North American Review*, Mr. Hubert Howe Bancroft, the historian, condemns the policy of preventing the Chinese from coming to the United States. Mr. Bancroft characterizes the Chinese as the best working foreign element in the world, the least harmful to American politics and people. One seldom or never sees a drunken or disorderly Chinaman. He is seldom found in institutions supported at public expense. He is not found begging or soliciting. Indeed, the argument of the exclusionists, that the Chinese will not become one of us, marry our daughters, manipulate our primaries, run for office and rule the country, is only an enumeration of reasons why they should be admitted to do the lower class of work which white men do not care to do. Mr. Bancroft continues:

"Some have suggested danger to the Republic in thus leaving open the portal for the unrestricted inpouring of Asiatic hordes to kill and drive us into the eastern ocean. Yet, they must know that the laboring man in China dares scarcely go from one province into another unprotected. The price of passage to California is to them equivalent to a fortune, and the journey like the journey into another world. In times past, he who adventured alone had often to sell or pledge his wife for the necessary means, while contractors for coolie labor would not bring men over at less than some fixed price. As for the rest, the law of supply and demand regulates it. It is a matter of record that, when wages in California fell below $15 a month, Chinese immigration not only ceased but the tide turned the other way. Chinamen will not leave home and face the cost and dangers of the ocean voyage unless they can have work at remunerative rates; and work is all that they desire."

NICKEL.

Nickel is a metal which occurs rather sparingly in nature, and in but few localities, being usually associated with cobalt, says the *Decorators' Gazette* and *Plumbers' Review*, of London. Native or metallic nickel is found at Westerwald, in the Erzgebirge. In Bohemia it is found combined with arsenic in the mineral known under the significant name of kupfernickel; in union with cobalt, iron and copper as arsenic nickel, in the Harz, and at Reichelsdorf in Hesse. It occurs as an oxide in nickelschwartz, as a sulphide in kharhoes, as a sulphide and arseniate of nickel in nickelglanze and with sulphur and antimony in nickelspeiss glanzerz at Siegen. Nickel is always present in meteoric stones. Kupfernickel occurs in numerous forms or shapes, as reniform, globular, botroidal, arborescent, massive and disseminated; its fracture is coarse or fine grained, and it has a metallic lustre, its color is usually copper red, occasionally brown and grey, and it occurs in silver and cobalt veins, in gneiss, sienite, mica-slate, kupfer schiefer, accompained by speiss, cobalt, native silver, quartz, etc. It is found in Westphalia, near Olpe; in Hesse at Reichelsdorf, and Biber in Baden; in the Saxon Erzgebirge, near Saalfield; in Steyermark, near Schladming, in Hungary, France and England.

Since the manufacture of German silver and the nickel plating of iron and other metals became so much commercial importance, the extraction of nickel has been undertaken upon a considerable scale. The cobalt ores are its most fruitful sources and they are chiefly treated by the method of Wohler to effect the separation of the two metals. The arsenic they contain is expelled by roasting the powdered speiss first by itself, next with the addition of some charcoal powder, till the gallic odor due to the arsenic is no longer perceptible.

The residuum is then mixed with three parts of sulphur and one of potash, melted in a crucible with a gentle heat, and the product, being lixiviated with water, leaves a powder of metallic luster, which is a sulphide of nickel free from arsenic, while the arsenic associated with the sulphur and combined with the resulting sulphide of potassium passes into solution. Should any arsenic still be found in the sulphide, as may happen if the first roasting heat was too great, the above process must be repeated. The sulphide is then finally washed and dissolved in concentrated sulphuric acid, with the addition of a little nitric acid. The metal is precipitated by adding carbonate of soda, and the precipitated carbonate reduced with charcoal.

NEW

PUTNAM

Horseshoe Nails.

IN view of the fact that there is room at the top, and a good demand for a high class Horseshoe Nail, we wish to bring it to the attention of the trade that we are making but *one grade* of Horseshoe Nail (**THE NEW PUTNAM,**) which is first-class in every respect, and superior to any that have ever been previously offered, and that we are, therefore, *maintaining prices*, and that our machines make no seconds or inferior nails with which to flood the market and create unsatisfactory and unprofitable conditions; nor have we an overstock to dump to add to the demoralization.

In this relation, it should be borne in mind that the difference in price between our nails, and that of the very cheapest now sold, amounts to only 1½c. *per horse.*

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Allegan, Mich.—The Allegan Hardware Supply Co. has been incorporated with $10,000 capital stock.

Athens, Ohio.—The Carpenter Bros. Hardware Co. will open a Hardware store at once. This company has a store both at Glouster and at Nelsonville and all the members of the company are experienced Hardwaremen.

Antigo, Wis.—The John Hessel Hardware Co. has been incorporated. Capital stock, $15,000. Incorporators: John Hessel, Ida Hessel and George Ewen.

Atlanta, Ga.—The Modern Device Co. has been incorporated by Thomas H. Pope, G. J. Powell and W. T. Jones. Capital, $1,000, to deal in scales, cheese knives and similar devices.

Batesburg, S. C.—The Holman-Cullum Hardware Co. has been incorporated. The capital is $5,000, and the incorporators are: J. A. Cullum, president; E. M. Fuller, vice-president; J. B. Cullum, secretary, and J. B. Holman, treasurer.

Bay City, Mich.—The Bialy Hardware and Supply Co. has been incorporated. Capital stock, $20,000.

Clyde, N. Y.—E. Q. Corrin has opened a new Hardware store in the Collier block on Glasgow Street. He has a very fine and complete line of up-to-date goods in light Hardware.

Corning, Iowa.—The Corning Implement Co. is a new firm that has been organized for the handling of general farm implements. They expect to open up for business February 1st.

Falkville, Ala.—A. J. Jones and Lawson Bean, of Hartselle, have embarked in the Hardware business at Falkville. Mr. Jones has for some time been in the employ of J. H. Corsbie, Hardware merchant, of Hartselle.

Indianapolis, Ind.—The Western Hardware Co. of Illinois has made application to do business in Indiana. Amount represented, $7,500.

Kingsburg, Cal.—A. T. Carson will erect a building on East Draper Street, where he will put in a stock of Hardware and furniture.

Milwaukee, Wis.—The Weinsheimer Hardware Co. has opened a new store at 2401-3 Walnut Street. The firm has just been incorporated by A. Weinsheimer, R. C. Freihube and Edwin Kraus. They will carry a complete line of Hardware, stoves and general house furnishings.

Nashville, Tenn.—The Forked Deer Hardware Co., of Dyer County, has been incorporated. Capitalized at $1,500. Incorporated by C. C. Dawson, Sam Ferguson, W. W. Lauderdale, Dan Cotton and L. M. Mitchell.

New Orleans, La.—On December 8th the charter for another big enterprise was filed and New Orleans now has another wholesale and retail Hardware establishment, in the United Hardware Co., Limited. The capitalization of the new company is $200,000. T. J. Henderson is president, John T. Gibbons, vice-president, and James J. McLaughlin, secretary. The new corporation has leased a building in Canal Streeet. Among the members of the new corporation are: J. B. Levert, John T. Gibbons, T. J. Henderson, Frank Ziegler, J. J. McLoughlin, Mr. Martin, of the United Paint Co.; Seckler Bros., and a number of other equally prominent business men. A. B. Reins, long a prominent attache of A. Baldwin & Co., will be with the new corporation in the capacity of a director. T. J. McLaughlin, who has been in charge of a department for A. Baldwin, will also be with the new enterprise, while Joseph Pritchard, formerly of Simmons Hardware Co., in St. Louis, will be another experienced Hardwareman. O. Ewing, an expert in builders' supplies and builders' Hardware, will have direct charge of that department, which promises to be the specialty of the institution.

Peoria, Ill.—The Illinois Implement Co. has been incorporated. Capital, $2,500. Deal in implements. Incorporators: S. B. Hazard, D. S. Brown, L. W. Hazard.

Petosky, Mich.—The Petosky Hardware Co. has been incorporated. Capital stock, $1,000.

Shawnee, Okla.—The Estes Hardware Co. has been incorporated. Capital stock, $25,000. Incorporators: W. J. George, L. W. M. and E. L. Estes, all of Shawnee.

Snyder, Texas.—The Paxton Hardware Co. has been incorporated. Capital stock, $20,000. Incorporators: George L. Paxton,

Sumter, S. C.—The Durant Hardware Co. has been incorporated. Capital, $12,000. Incorporators: Lucius B. Durant, president; R. K. Wilder, vice-president, and Perry M. Parrott, secretary and treasurer.

Trivoli, Ill.—Mr. Bowton, of Abington, will open a store here, where he will have for sale buggies and Hardware.

Utica, N. Y.—The Smyth-Despard Co., recently incorporated, met and organized on December 13. D. DeW. Smyth was elected president and treasurer; F. DeW. Smyth, vice-president, and Frank T. Despard, secretary. The company's place of business will be at 10 Catherine Street. Mill supplies, machinery and tools will be handled.

Changes.

Belle Plaine, Minn.—D. Callahan, who has been in the Hardware business thirty-two consecutive years, has retired and is succeeded by A. H. Abraham.

Chardon, Ohio.—Rufus Smith, a retired farmer and member of the firm of Smith, Fowler & Co., bankers, of Chardon, on December 19 bought out the Hardware firm of Hugh McGugan, who has been in business here for over ten years.

Chester, Iowa.—John H. Hingweld has sold part of his Hardware stock to Marshall & Murray and will remove the rest to Cherry Grove, Minn., where he has bought a general store.

Elma, Iowa.—E. and W. Galehouse have sold their Hardware stock to F. W. and T. E. Church, who will continue the business.

Elmore, Ohio.—The Banting Sawders Co. have changed the firm name to The Elmore Hardware Co.

Gibson City, Ill.—The Hardware and jewelry stock of Ullery & Jones has been sold to G. W. Fundis and W. A. Cottrell.

Great Falls, Mont.—After a number of years devoted to the carrying on of a successful Hardware business in this city, the Great Falls Hardware Co. on December 7th gave way to the Northern Hardware Co., a corporation, in which Charles Harris owns an interest, and which will carry on the business of the old company. The capital stock of the new company is considerably greater than that of the old and it is stated that the business will be greatly enlarged and will be conducted on a broader scale under the management of Mr. Harris, who is an experienced Hardwareman, long associated with the great house of the Marshall-Wells Hardware Co., of Duluth.

Helix, Ore.—John S. Norvell & Co. have purchased the Hardware and furniture business of Jones & Walker.

Hutto, Texas.—C. R. Stephens sold his Hardware business to Will Wehrung.

Ithaca, Neb.—Barney Schroeder has sold his interest in the Schroeder & Youngstrom implement business to Will Biggerstoff. The firm name will now be Youngstrom & Biggerstoff.

Jacksonville, Ala.—Stewart Bros. are having a warehouse built to the rear of their business establishment for the storing of their buggies, machinery and heavy Hardware, in which they are extensive dealers.

Johnson City, Tenn.—W. J. Barton has sold his interest in the Hardware firm of Summers, Barton & Parrott to J. J. Summers, the head of the firm. The firm is now styled the Summers & Parrot Hardware Co. After January 1st it will do more wholesale business than at present.

Maryville, Tenn.—Will Caldwell and Frank Eagle have purchased the Hardware business of R. G. McNutt.

Memphis, Tenn.—Three large manufacturing concerns have co-operated for the purpose of opening a warehouse and storage plant in this city. A. D. Langstaff, well known throughout the South as a traveling man, is to be in charge of the offices. The Gray & Dudley Hardware Co., of Nashville; the Excelsior Stove and Manufacturing Co., of Quincy, Ill., and the Medaris-Vine Carriage Co., of Cincinnati, Ohio, have named him Southern manager. Mr. Langstaff has engaged offices and warehouse room at 15 Union Street. He will carry full lines of the articles manufactured by the firms he represents.

Mobile, Ala.—S. E. Hodge has disposed of his Hardware store at the corner of North Main and East Court Streets to William J. Knight and Judson Ambrose. This is a deal which has been hanging fire ever since Messrs. Knight and Ambrose retired from the Hardware Supply Co. They are experienced men in the Hardware business and the location they have secured is one of the very best in the city.

Mounty Holly, N. J.—A stock company has purchased the Hardware business of Samuel T. Engle. These officers have been elected: B. V. Summerill, president; William A. Forman, Jr., vice-president; Samuel Richards, secretary and treasurer; Samuel T. Engle, manager. The consideration is said to have been $3,000.

Mention
"HARDWARE"

The **AD-EL-ITES** in bold array
Start out upon their conquering way;
By *ads.* throughout the country round
They've made their work and name renowned.

THE AD-EL-ITE LINE

of Paint Specialties has been advertised so extensively that you are undoubtedly aware that "AD-EL-ITE" stands for the very best—Best in quality of goods and best in quality of sales.

The strongest endorsement of the above which we can give is the carload orders received from some of our old customers recently.

We increase the dealers' sales by creating a demand for our goods among his customers and telling them that he carries our line. Isn't this about the kind of co-operation you want?

Catalogue and dealers' discounts sent upon request.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published,

New Incorporations, Etc.

Aurora, Ill.—Aurora Light and Stove Works has been incorporated; capital, $10,000; manufacturing. Incorporators, K. C. Loehr, M. B. Rich, R. F. Potter.

Boston, Mass.—Massachusetts Oilless Bearing Company has been incorporated; capital, $400,000. President, William T. Carroll; treasurer, Charles F. Pharaoh, Worcester; clerk, Charles S. Forbes, Boston; directors, president, treasurer, and Ira B. Forbes, Melrose, Mass.

Boston, Mass.—North Star Device & Implement Company has been incorporated; capital, $60,000. President, Walter E. Donovan, 80 West Newton Street, Boston; treasurer, Joseph P. Allcott, Boston; clerk, George F. Ramponi, Boston; directors, as above named.

Boston, Mass.—The Clifton Nail & Supply Company has been incorporated; capital stock, $50,000. Incorporators, John F. Scott, Henry R. Scott and Jasper N. Johnson; directors as above named.

Brillion, Wis.—The Brillion Woodenware Company has been incorporated; capital, $35,000; incorporators, Joseph Wolfinger, Charles Bruss, H. Behm, Henry Horn and Hugo Muehlbach.

Bristol, Tenn.—Smith & Wilson are the organizers of a large wood-working plant for which machinery has already been installed. Operations commenced on December 20th.

Brooklyn, N. Y.—Jacques Ochs Company has been incorporated, (arc and incandescent lamps;) capital, $5,000. Directors—Charles Wertheim, Brooklyn; Max Holtzer and Jacques Ochs, New York.

Camden, N. J.—The Simpson Stove & Manufacturing Company, 417 Market Street, has been incorporated; capital stock, $125,000. Incorporators, Paul W. Miller, H. A. Tucker, M. A. McKee. The company is to manufacture and deal in stoves of all kinds.

Chicago, Ill.—Hunt Vise & Tool Company has been incorporated; capital, $5,000; manufacturing tools; incorporators, J. L. McKittrick, G. G. Standart, H. C. Ellis.

Conway, S. C.—The Atlantic Broom Works has been incorporated; capitalized at $1,000. The officers are Charles H. Snider, president; John C. Spivey, vice-president; James A. Lewis, secretary and treasurer.

Fultonville, N. Y.—White Mop Wringer Company has been incorporated; capital, $50,000. Directors—Olin N. Wardwell and Herbert C. White, Fultonville, and Frank S. Porter, Chicago, Ill.

Kiel, Wis.—The Metallic Screen Company has been incorporated; capital, $15,000; incorporators, Dr. J. Barber, F. J. Kabat, and August Born.

Marietta, Ohio.—Mr. J. H. McConnell, who retired from the management of the Marietta Manufacturing Company nearly a year ago, is to engage in a new branch of the manufacturing business in Marietta and expects to be ready for active business within a few weeks. Steam specialties will be the product of the new plant, of which a steam separator and trap will be the main product. Other lines will, of course, be manufactured by Mr. McConnell, and all of his products will be fully covered by his own personal patents.

Mechanicville, N. Y.—The W. F. Green Company has been incorporated to manufacture Hardware; capital, $25,000. Incorporators: W. C. Tallmadge, A. M. Ryan, G. W. Crissey, Mechanicville, N. Y.

New York, N. Y.—Eureka Lock & Metal Company has been incorporated; capital, $20,000. Directors: Morris Kleppner, Samuel Kleppner and David Gotthelf, New York.

Niagara Falls, N. Y.—Another new factory has located at Niagara Falls. It is the H. J. Gurner Company, which will manufacture the Gurner ice-cream freezer.

Rochester, N. Y.—The Pritchard-Strong Company has been incorporated; (Hardware and art metal staples;) capital $100,000. Directors—Henry A. Strong, Albert R. Pritchard, and Thomas B. Pritchard, Rochester.

San Antonio, Texas.—Keyless Lock Company has been incorporated; capital, $25,000. Incorporators, O. Katzenberger, A. Dreiss, O. Koehler, E. H. Elmendorf and R. L. Ball.

Terre Haute, Ind.—The "I. X. L." Manufacturing Company has been incorporated. The company is capitalized at $100,000 and is organized for the purpose of manufacturing vapor burners and stoves, motor power churns, vehicles, and shaft fastenings. The company is comprised of Marcus Dyer, Ira D. Andrews, Leonard D. Scott and William T. Littlefield.

Trenton, N. J.—The Federation Hardware & Manufacturing Company has been incorporated. It is understood that the business will be carried on in New York City.

Warner, Ill.—Warner Elevator Manufacturing Company has been incorporated; capital, $20,000; manufacturing implements of all kinds; incorporators, W. S. Warner, L. C. Warner, W. H. Miller.

Worcester, Mass.—The Stokes Damper Company has been organized, with Francis R. Hayden, of Worcester, president, and Marston E. Stokes, treasurer. The company is capitalized at $10,000.

Changes.

Birmingham, Ala.—J. R. Day is making preparations to double the capacity of his stove foundry that was built in November. So great is the demand for the grate stoves the plant is turning out, that it has been made necessary to enlarge the industry. The stove that is being manufactured was patented by Mr. Day.

Birmingham, Ala.—The entire stock of the Avondale Stove and Foundry Co. was purchased recently by Perkins Ellis, Thomas Ellis and Frank Ellis. The new management will take charge of the plant at once. The plant employs sixty-five men and has an output of 200 stoves a day. The new management will probably increase the capacity of the plant in a short time.

Kingfield, Me.—The firm of Gilman & Landers, Kingfield rake manufacturers, has dissolved partnership, Mr. Gilman going out. Mr. Landers will continue the business.

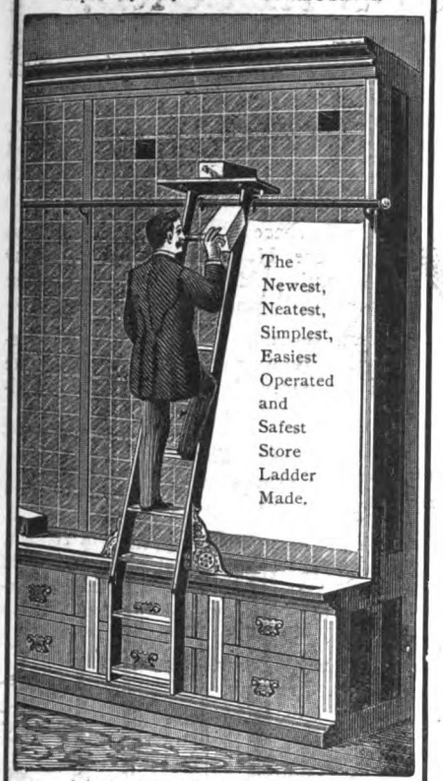
Manato, Minn.—The Rue Manufacturing Co. will locate in this city. This firm has patented the Rue washing machine, and has an immense sale on their product.

Nashville, Tenn.—The International Paste and Polish Co. has increased its capital stock to $25,000.

Omaha, Neb.—The Aultman & Taylor Machine Co. will remove from Omaha. An office and warehouse will be established in Lincoln and the business of the local house will be divided between the Lincoln branch and the new house at Des Moines. The company has been doing business in the city for a number of years and occupies quarters at Ninth and Jackson Streets. It handles, principally, threshing machines, traction engines and similar agricultural machinery. F. L. Loomis, who has been manager of the company, has been transferred to Minneapolis and H. A. Donovan has been made manager in Lincoln and has temporary charge here. "We are making this move," said a member of the firm, "because we want to get nearer our competitors. Some of them are in Lincoln and we feel we can handle our business better from there. We are arranging for a building to be put up there and as soon as it is ready Mr. Donovan will go there to take charge. The Omaha house will not be closed at once."

Pittsburgh, Pa.—The Dowernian Rivet and Bolt Manufacturing Co. has increased its capital stock from $10,000 to $50,000.

Plymouth, Mass.—Stockholders of the Plymouth Cordage Co. at their special meeting on December 14, ratified the proposition to increase the capital of the company from $1,500,000 to $2,000,000. The new capital will be used in handling the company's largely increased business.



Port Huron, Mich.—Frank E. Beard, trustee of the Steel and Screw Works, of Port Huron, sold the property to E. W. Wilson, of the Port Huron Saw Works, for $9,000. The business will be reorganized.

Trenton, N. J.—Ground has been broken for a new plant of the Trenton Hardware Co. to replace the one recently destroyed by fire. This company is composed of Charles B. Everdale and Charles E. Borden. Sixty men will be employed and the plant will probably be ready for operation by early Spring.

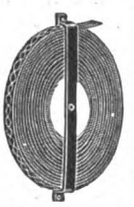
Sargent's Gem Food Chopper



is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Detroit, Mich.—The Reliance Motor Co. has been incorporated. Capital stock, $400,000.

Manitowoc, Wis.—The Eclipse Boat Co. has been incorporated. Capital, $60,000. Incorporators: Samuel Randolph, William E. Kawalle and John J. Schroeder.

Minneapolis, Minn.—The Consolidated Manufacturing Co. has been incorporated with $300,000 authorized capital. The company will manufacture bowling alleys, washing machines and novelties. The incorporators are: Otto Munson, N. P. Brahy and Thomas Cunningham.

Mobile, Ala.—The Mobile Motor Car Co. has been incorporated. Capital stock, $25,000.

Norwood, R. I.—D. F. Hoosie & Co. have rented a store in the Chilson Block and will open a Bicycle, sewing machine, phonograph, gun and electrical novelty store.

Philadelphia, Pa.—Edw. K. Tryon, Jr., & Co., has been incorporated as the Edw. K. Tryon Company. This is one of, if not the oldest, gun house in America. The late copartnership of Edw. K. Tryon, Jr., & Co., which expired on January 1, was formed in 1868 by the late Edw. K. Tryon, Jr., who died on September 19 last, and who remained until his death senior member of the firm. During his careful but aggressive management the firm grew from an exclusive firearms house into manufacturers, jobbers and importers of every class of sporting goods, occupying various buildings of continually increasing size, until a few years ago the two spacious stores, 611 Market Street and 10 and 12 North Sixth Street, were leased by the concern. The entire subscription of stock has been taken by the surviving partners of the old firm, Edw. B. Mears, Jr., Evan G. Chandlee and Charles Z. Tryon, who become the directors and officers.

Wilmington, Del.—The Pittsburgh Powder Manufacturing Co. has been incorporated with a capital of $1,000,000. The company will manufacture gunpowder and other explosives. The incorporators are: John W. Pontefract, H. W. Gleffer and Charles G. Grubb, all of Pittsburgh.

Changes.

Chicopee, Mass.—The Spalding Co. has equipped its new quarters at the Center in up-to-date fashion, and has now a greater capacity than it had at the Falls. All of the departments have been reorganized, the entire shop remodelled, two new boilers and a 200-horse power engine installed. The distinct advantages over the former place of work lie in the fact that a greater water power is secured, and also that more room, both for present operations and for future extensins, is available. Recently there has been installed in the works a better automatic sprinkling system to replace the old sprinklers. A unique golf ball testing machine has been installed at the links of the Chicopee Golf Club by the Spalding Co. The machine, which is kept in a small house, 8 by 12 feet in height, has proved successful in testing the strength and carrying power of balls. It drives the ball with the force and dispatch of a skilled golfer, hitting a blow like the wood and the iron heads of golf sticks. In practice drives it has sent the balls to great distances, and has proved all that has been hoped from it. The machine has been inspected by Charles S. Cox, manager of the golf department of the Spalding Co., of New York.

Defiance, Ohio.—The D. M. LeFever Sons Co. has changed its name to the Defiance Arms Co.

Grand Forks, N. D.—On December 8th a deal was completed between W. B. Wood and M. W. Ferguson, of this city, for the purchase of the stock of the Ferguson Sporting Goods house from the estate of Herman Wolff. The price given for the stock and fixtures of the business was $5,000. The new firm intend to increase that amount and will in the future keep a full line of sporting goods of all descriptions. The store is now undergoing a system of improvements.

Kalamazoo, Mich.—F. H. Wilson and C. R. Slover, comprising the Kalamazoo Bicycle Company, have dissolved partnership, F. H. Wilson retiring.

Marysville, Cal.—Harry E. Miller, formerly with the Keats Automobile Co., in Portland, Ore., has purchased the stock and business of W. B. Brown on D Street. It is a prosperous Automobile and Bicycle repair shop.

Milwaukee, Wis.—The Merkel Motor Co. has formally taken possession of the property of the Merkel Manufacturing Co., and is now at work on the 1905 Merkel Motor bicycle. The new concern expects to considerably enlarge the old plant. Its officers are F. P. Rugee, president; J. F. Merkel, vice-president; W. J. Merkel, secretary, and John R. Ball, treasurer.

Perth Amboy, N. J.—A big powder making plant is being built on the north side of the Raritan River by the Elmira Powder and Explosives Co., of Elmira, N. Y., who have leased from the State a large tract of land in that section, and have given out contracts for the erection of a large number of buildings. Some of the buildings are mere sheds, while others are of large size. It is said that thirty buildings in all will be erected. A number of the buildings are already up, and it is stated that the factory will be in operation by Spring. Smokeless powder is to be manufactured, both for sporting purposes and as ammunition for the big guns of the government.

Princeton, Ill.—Henry Holmes, decoy manufacturer, has built a new factory, and is now occupying the same.

Sioux City, Iowa.—The Boyd gun store, which stood at Fourth and Douglas Streets, has removed permanently. The building was moved into the street to make room for the new building being erected by Dave Davidson. Now this building is completed and the stock of sporting goods is being moved into it.

Union Furnace, Pa.—The plant and business of the Monarch Powder Company were recently sold to the E. J. DuPont Company at Wilmington, Del.

Wilton Junction, Iowa.—Nelson & Shoemaker has been succeeded in the Hardware and Sporting Goods business by A. T. Nelson.

Fires.

Los Angeles, Cal.—An automobile and Bicycle repair shop belonging to A. P. Smith, Jr., at 3613 South Vermont Avenue, was destroyed by fire on December 19th. Loss, $3,000. There was but little insurance on the building and contents. Cause unknown.

McKinney, Texas.—The Bicycle Works of A. O. Browing on December 20 were damaged by fire to the extent of $8,000.

Miscellaneous.

The annual meeting of the stockholders of the Colt's Firearms Manufacturing Co was held on December 13th at the New York office, 44 Broadway, and the old Board of Trustees, consisting of the following, was re-elected: Lewis C. Grover, S. A. Clark, Frank A. Schirmer, Charles A. Morse and William C. Skinner. After the meeting of stockholders a meeting of the Board of Trustees was held, and the following officers were elected: President, Lewis C. Grover; vice-president, William C. Skinner; treasurer, Frank A. Schirmer; secretary, H. Duncan Clark. The usual quarterly dividend of 1 per cent was declared.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

The Pre-eminence of the I. E. Palmer Lines Again Acknowledged by the

Highest Honors

AT THE

Louisiana Purchase Exposition

ST. LOUIS, MO., 1904

AWARDED TO

ISAAC E. PALMER

SIX AWARDS

GRAND PRIZE AND GOLD MEDAL

On Hammocks and Hammock Accessories

Silver Medal on Mosquito Canopies

Silver Medal on Nettings

Silver Medal on Self-Adjusting Pulleys

Bronze Medal on Utopia Invalid Hammock Chair

Twenty-two Medals and Awards have been granted to the I. E. Palmer lines at National and International Expositions since 1863.

The advantages of the oldest established business, the most completely equipped plant, the most original styles and constructions, and the most comprehensive lines, to be found in our field are offered.

I. E. PALMER

Established 1859

MIDDLETOWN, CONN.

THE ONLY CLEANABLE REFRIGERATOR

SEE HOW IT'S MADE ?

THE "GURNEY"

The "Gurney" can be kept absolutely pure and clean because of its Removable Galvanized Ice Compartment.

The "Gurney" is packed with MINERAL WOOL and constructed in the best possible manner, and will show, by actual test, the lowest average temperature with the least consumption of ice.

The "Gurney" is leader in style and finish, and first class in every particular.

MADE WITH ZINC OR ENAMEL LINING

COLD FACTS

THAT MAKE WARM TRADE

A Refrigerator is no longer considered a luxury but a necessity.

A good Refrigerator is a source of economy, a poor one an extravagance.

The best is the cheapest; you can't afford to sell a poor Refrigerator.

A poor Refrigerator consumes ice but does not refrigerate.

A poor Refrigerator is a delusion and a snare with nothing to recommend it but price.

The price is soon forgotten, the quality never.

A poor Refrigerator cheats both the dealer and his customer.

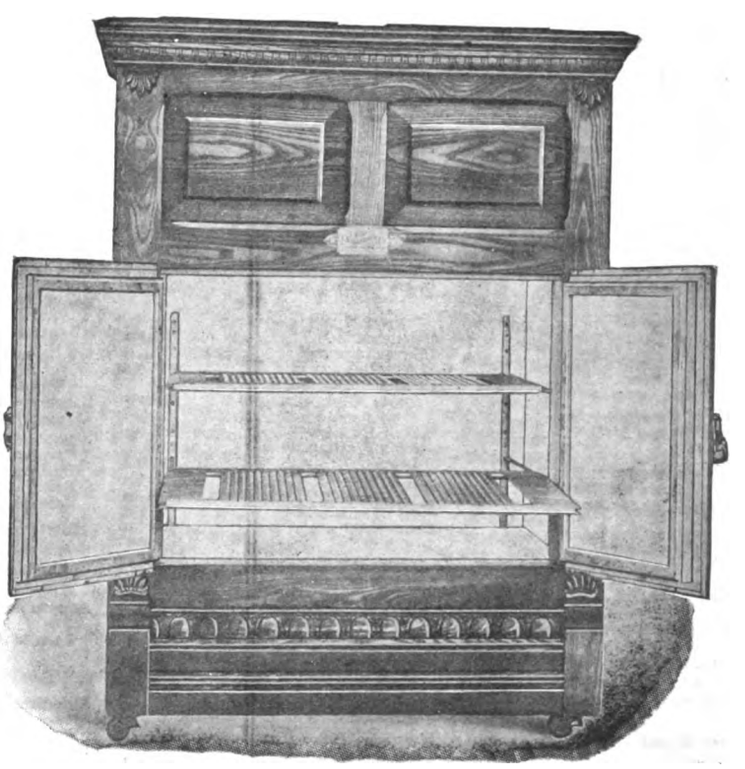
A low priced piece of furniture may answer the purpose for which it was made as well as more costly.

This is not true of Refrigerators.

In buying a Refrigerator the first cost is not the last cost.

A Refrigerator to be satisfactory must be so constructed as to be economical in the use of ice and in the preservation of food.

A profitable and satisfactory refrigerator trade can be built up only by handling high grade honest goods.



The "Gurney" is the best.

The La Belle is the highest grade refrigerator of its class.

The Gurney Patent Chinaline Refrigerator is the height of refrigerator perfection.

The Gurney Refrigerator Co. leads the world in the manufacture of Refrigerators because the "Gurney is the Best."

The Gurney is sold on the exclusive agency plan. One dealer every town.

Daus' "Tip Top" Duplicator

Are You Looking for a Reliable Duplicator?

Then get Daus' Tip-Top. It is noted for its durability, convenience and large capacity for saving time, temper, trouble and unnecessary office work. Print bills? It cuts them in half.

Fifty to one hundred and fifty copies from one pen or typewritten original in 10-15 minutes.

It dup.icates letters, circulars, bills, invoices, drawings, architects' plans, etc.

Yours For Five Dollars

That's all. Full instructions with every machine. Try it for a week without deposit. It is pleasing thousands—it will please you. Drop us a line at once.

The Felix P. J. Daus Duplicator Co.

111 John Street, New York, U. S. A.

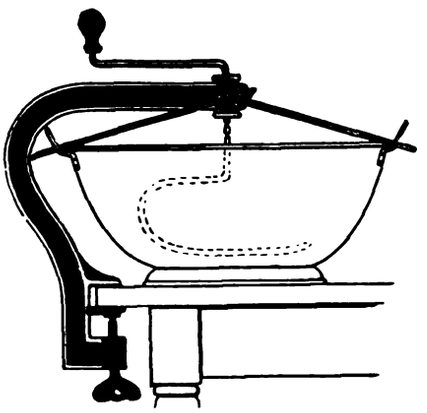
A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.



J. W. WHITE,
General Industrial Agent,
Seaboard Air Line Railway,
Portsmouth, Virginia.
We have a good location for your plant.

THE EASY DOUGH MIXER

Is made of such good material that it will last a life time. Three minutes' turning of the crank will save thirty minutes' labor in kneading bread.

Simple and perfect in construction and operation.

Instructions for use with every Mixer.

SELLS FOR A DOLLAR

Get in line for your share of the profits and write us.

THE R. W. JAMIESON CO.
50 Warren St., New York, U. S. A.

BUTTER IN ONE MINUTE

THE only perfect milk and cream aerator churn in the world, making the best granular butter from sour or sweet cream in a minute—which we guarantee— is

THE ONE MINUTE CHURN

PROTECTED BY 57 PATENTS

Its construction perfect in every detail. All parts interchangeable and carried in stock. Easy to run. Seven sizes, holding 1 quart to 13 gallons.

For farm and family use.

Our Catalogue tells all. Mention HARDWARE.

PERFECT

USE WITH OR AS A HAMMER

The "PERFECT HANDLE" SCREW DRIVERS

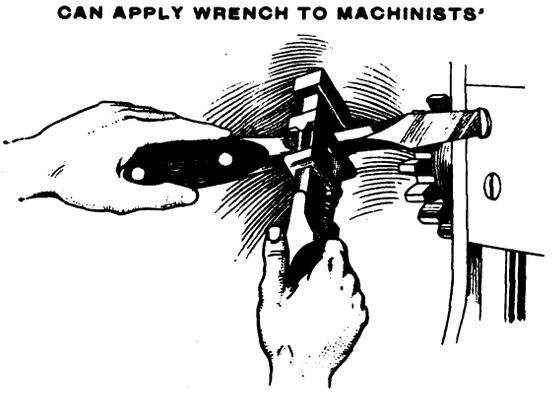
show for themselves—without argument—their great superiority.

They are unquestionably the best selling tool that has been offered the trade in a generation.

Made by

THE H. D. SMITH & CO.

Makers of



Drop Forged Fine Tools

PLANTSVILLE, CONN.

We know you can sell them. They are practically sold if seen.

Won't you let us interest you? It will be money in your till and ours if we get together. What do you say ???????

Oh, what a difference!

No. 32 Torch, $3.00 net.

The forehanded merchant who is prepared to promptly care for freeze-up jobs **frequently gets good new customers** and keeps all he has, while the merchant who is always a few days late and is never prepared **often loses good customers** which means money out.

Be forehanded. See that your torches are in good order and have a few extra. It pays to be a "Johnnie on The Spot." The No. 32 is the best quart size combination torch in the world. Jobbers sell at factory price, or we will send by paid express upon receipt of $3.50. Your money back if you are not pleased.

MEASURING TAPES.

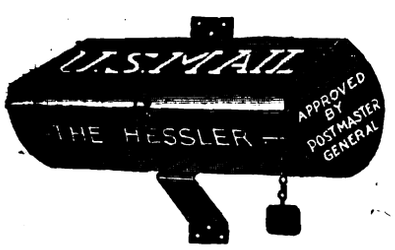
We beg to announce that our line of Measuring Tapes has been made complete by the addition or

"Favorite" Cotton Line Tapes (Ass skin)

"Tip Top" low-priced Steel and Linen Pocket Tapes.

Our assortment of Tapes should now meet every demand as it comprises a greater variety than any other maker's. Each grade represents the highest standard of its kind.

We are the Largest Manufacturers in the World of all kinds of : : **FORKS, HOES, HOOKS, RAKES and HAND AGRICULTURAL TOOLS.**



Our Standard Brands are:

ASHTABULA,	GENEVA,	WITHINGTON & COOLEY,	FORT MADISON,
OTSEGO,	BOLLES,	HARRIMAN,	PHILADELPHIA,
UTICA,	ELY,	BATCHELLER,	COLUMBUS.

The above brands always denote the highest point of excellence in quality that can be produced with the best of material and men who have had a life-long training in the work, and they are only used on our high grade goods. There is none better—few, if any, as good. When you buy any of the above brands you always know that you are getting quality. *Write us for onr new Catalog "C."*

AMERIOAN FORK & HOE COMPANY, Clevoland, Ohio.

Rural Mail Boxes

THE HESSLER

BEST KNOWN. BEST MADE.

Most durable as well as the cheapest fully approved Rural Mail Box on the market. Do not be deceived by manufacturers who claim to have a Box similar in appearance to the "Hessler." Just compare the Boxes and convince yourself. The Hessler Box is storm and dust proof, has the only signal that will not get out of order. It costs you no more than the cheaper made boxes. Write for full description and prices.

Flawless Edge Tools

We make all kinds of Edge Tools.

Although we have been in the business since 1837, we have been growing younger every year—using the youngest machinery, the newest methods and doing everything in a down-to-date way.

Standards of Excellence

That is the recognition given them in the markets of the world. The Highest Award was given them at the Paris and Pan-American Expositions.

May be that is the reason why more of our goods are sold than of other manufacturers in our line.

Our goods and prices interest most Hardwaremen. Are you interested? Write us at once.

Mention HARDWARE.

L. & I. J. WHITE CO.

Buffalo, N. Y., U. S. A.

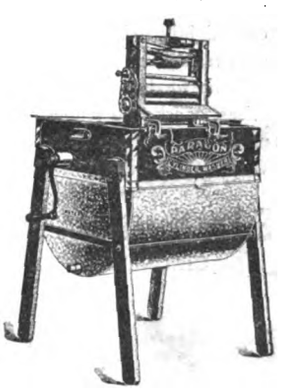
IF THE UNITED STATES

Would place to-day an order for *wooden* warships, the world would ridicule us.

The dealer who handles *wooden* washers shows an awful lack of progressive spirit.

SPAIN has quite a few old *wooden* tugs, cheap and for sale; unfortunately she had not all of her stock at Manila.

Mr. Dealer! How many of those *wooden* washers that you bought before the Spanish War, are still decorating your store?



DO AS DEWEY DID!

And then put in a fresh stock of *Metal Paragon Washers.*

You can safely place them near the entrance *to-day;* because *to-morrow* they will go to their future home, and act as a *free advertisement* for your store.

The PARAGON is made on the same principle (revolving cylinder) as the large power machines you see in every steam laundry and hospital.

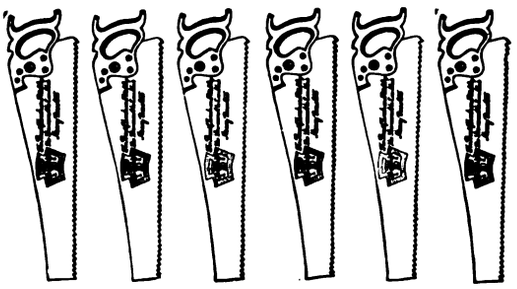
Do you know now *why* and *how* the PARAGON does the work?

PARAGON WASHER.

Compare the *appearance* of the PARAGON to any of the clumsy, complicated, greasy, antiquated wooden "washers (?)," and you have found the reason why you have never made a success of washing machines.

Experts predict for the PARAGON a larger commercial success than that of the Singer Sewing Machine. Dealers will find it to their advantage to come in on the ground floor now, before the agency for their city goes to a competitor.

EMIL R. BECKERT,



1175 3rd AVENUE, - - - NEW YORK.

P. S. Summer resorts are now equipping their laundries. Every proprietor of a hostelry is sure to buy a Paragon, Hotel size. Dealers, make the profits!

NEW

PUTNAM

Horseshoe Nails.

IN view of the fact that there is room at the top, and a good demand for a high class Horseshoe Nail, we wish to bring it to the attention of the trade that we are making but *one grade* of Horseshoe Nail (THE NEW PUTNAM,) which is first-class in every respect, and superior to any that have ever been previously offered, and that we are, therefore, *maintaining prices*, and that our machines make no seconds or inferior nails with which to flood the market and create unsatisfactory and unprofitable conditions; nor have we an overstock to dump to add to the demoralization.

In this relation, it should be borne in mind that the difference in price between our nails, and that of the very cheapest now sold, amounts to only 1½c. *per horse.*

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

HARDWARE

A CARD.

Alfred Field & Company, 93 Chambers Street, New York, warns the trade that recently the patterns of French Plyers and Nippers made by L. Hugoniot Tissot, for whom they are sole agents, have been copied, and are being offered for sale under their numbers. They therefore caution the trade that if they want the genuine Tissot's tools, not to be misled by such a subterfuge.

The Engraving and Steel Stamp business of the Schwerdtle Stamp Company, and the Rubber Stamp business of the Bridgeport Stamp Company, both of Bridgeport, Conn., have been incorporated under the laws of the State of Connecticut, and will hereafter be known as the Schwerdtle Stamp Company. The new company receives all the assets and assumes all the contracts and obligations of both old firms, and is now open for business in their new building. They state that they have equipped their new factory with increased facilities, including modern machinery, new type, etc., and will be able to handle their increasing business more promptly and satisfactory than ever before.

The Novelty Mfg. Company, of Jackson, Mich., on January 7, sold their entire business, including the real estate, plant, machinery and tools, furniture and fixtures, bills receivable, accounts receivable and good will to the Metal Stamping Company, of Jackson, Mich. The new company will be in the hands of those that have managed so successfully the affairs of the Novelty Company for the past fifteen years.

The Isthmian Canal Commission, Washington, D. C., has issued proposals calling for "Machine Tools, Machinery, Hand Cars, Leather Belting, Rope, Canvas and Rubber Hose, Cars, and Miscellaneous Supplies, including Coal Tar, Axle Grease, Glue, Ticking, Horse Hair, Etc." All inquiries for proposals should be made by a request direct of the Isthmian Canal Commission, at Washington, D. C. S. E. REDFERN.

MODERN PAINTINGS.

Sickels, Preston & Nutting, Davenport, Iowa, issue as usual, for distribution among their friends and customers, their reproduction of "Modern Paintings" in the appropriate colors. This is a work of great beauty showing an artistic appreciation of each artist selected. The selection includes: "Constance" by Albert Lynch; "Solitude" by Moran; "The Noonday Rest" by Osthaus; "Late Autumn in Connecticut" by George Howell Day; "On Furlough" by Pierce and "Sunset in Venice" by Moran.

Diamond Saw & Stamping Works, Buffalo, N. Y., send out a very handsome calendar made doubly welcome by the artistic delineation of a beautiful blonde adorning it. In fact, the aforesaid blonde is, as she deserves to be, the sole attraction. The calendar advertises the "Sterling" Hack Saw Blades and frames made by this progressive company.

Iver Johnson Arms & Cycle Works, Fitchburg, Mass., issue a noted calendar, that will be especially valued for the graphic picture of a Barn Door which occupies the whole space, on which are hung on very natural wire nails, a hunting coat, and two Iver Johnson Revolvers in full size and attractive appearance. A leather strap, and door bolt are added to the other items that go to make up a very harmonious picture, and one that appropriately advertises their most important production, namely Revolvers.

Hopkins & Allen Arms Company, Norwich, Conn., have forwarded to us one of their large, new and attractive hanging calendars which they have recently issued. The picture shows a couple, consisting of a young man and his best girl in the latest approved outing dress, both "armed and equipped as the law directs;" she has evidently stolen an approach, and covering his eyes, as he asks "Who is it?" she says "Can't you guess?" The ever present dog, makes the picture complete. The painting is one of the masterpieces of that well known artist of sporting subjects, A. von Beust, and is a realistic scene in the woods.

Smith Brothers Hardware Company, Columbus, Ohio, who are exclusive jobbers, have issued a calendar to the trade in which is a picture of the new plant into which they are now moving. The illustration gives an excellent idea of their increased accommodations which provide facilities by which their trade will be greatly benefitted. The calendar proper, is of good counting house size, and well suited to the offices of their customers.

WINCHESTER REPEATING ARMS COMPANY RECEIVES GRAND PRIZE.

Winchester Repeating Arms Company, New Haven, Conn., have been made happy by the awarding of the Grand Prize at the St. Louis Exposition, the highest mark of distinction given in competition with the leading manufacturers of all countries. The success attained by the Winchester Repeating Arms Company at this Exposition is simply in line with honors received in the past. At the Paris Exposition, Winchester Arms and Ammunition received the Grand Prix; and wherever they have been exhibited they have always been given the highest possible prizes.

HARDWARE MERCHANTS' AND MANUFACTURERS' ASSOCIATION OF PHILADELPHIA.

The Hardware Merchants' and Manufacturers' Association of Philadelphia met on January 17 and elected the following officers for the ensuing year: President, Thomas Devlin; vice-president, John R. Griffith; secretary-treasurer, T. James Fernley; directors, Thomas Devlin, William W. Supplee, Samuel Disston, James H. Ritter, C. C. Tryon, John R. Griffith, Ellicott Fisher, E. S. Jackson, T. James Fernley.

A BIG CONCERN.

The daily papers of January 13th announced the incorporation in New York State of the Simmons Hardware Company of New York with a capital of $1,000,000, the directors being Edward C. Simmons, W. D. Simmons, E. H. Simmons, G. W. Simmons, S. F. Pryor, L. S. Haslem, F. W. Allen, A. H. Richardson, all of St. Louis, Mo., and Morris N. Ely of New York City. This would indicate a business to be accomplished that would be here to stay and the future movements of a company with this amount of capital will be looked forward to with a great deal of interest.

THE COLDWELL LAWN MOWER CO.'S SOUVENIR.

The annual artistic greeting from the Coldwell Lawn Mower Company, Newburgh, N. Y., comes this year with an appropriately framed Cupid, one of the well known group, who, with his musical instrument to his mouth, is making celestial music to which a feathered songster on a convenient branch is endeavoring to reply. The whole is surrounded by a network of graceful and artistic lines formed into the conventional scrolls of a true artist, in which Dan Cupid agreeably makes the center of the picture the prevailing color of the frame and the design being white.

KENTUCKY RETAIL HARDWARE DEALERS' ASSOCIATION.

John R. Sower, Frankfort, Ky., secretary of the Kentucky Retail Hardware Dealers' Association, advises us that at the meeting of committee on arrangements, held in Louisville, Ky., January 18, they decided to hold the next meeting at Louisville, February 14 and 15, with headquarters at Galt House. All jobbers and manufacturers are invited to make display during meeting held at hotel.

BISSELL'S "WORLD'S FAIR" SWEEPERS.

John Wanamaker has purchased for both his Philadelphia and New York stores, the entire display of World's Fair sweepers that were shown in St. Louis by the Bissell Carpet Sweeper Company, and on which they received the award of Grand Prize. The Wanamaker stores will display these goods in the Bissell Carpet Sweeper booths of their New York and Philadelphia stores.

DEATH OF JOSEPH B. MORRISON.

Joseph B. Morrison, President and Treasurer of the Morrison Manufacturing Company, Fort Madison, Iowa, died suddenly in Des Moines, on December 28th. Mr. Morrison, with his father and his older brother established the business of the Morrison Manufacturing Company after the close of the Civil War. In 1892 the firm, which had been incorporated 10 years before, was composed of Mr. Morrison and his two sons. The latter, it is understood, will continue at the head of the business.

HARDWARE

VOL. XXIX. JANUARY 25, 1905. NO. 8

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade.

HARDWARE is published on the 10th and 25th of each month. The subscription is $1.00 a year, payable in advance.

Remittances should always be made by New York Draft, Post-office or Express Money Order.

Foreign Subscriptions.—For each copy to be mailed outside the United States the Canadas, and Mexico, the price is $2.50 a year, postage prepaid.

Change of Date.—It takes two weeks to change the date, after your subscription is renewed.

Change of Address. Always give both your old and new address when you ask us to change your address.

The Name of your Post-office and of the State you live in should always follow your own name when writing to this office. We cannot find your name on our books unless this is done.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review

The travellers are out on the road as usual at this season of the year, while the inventories are being brought to a close; the amount of stock made evident, and the few orders not already provided for, can be hunted up and the trend of business for the future readily distinguished. The orders, however, do not seem to be given in such liberal quantities as they were a short time ago before anything in the shape of advances was talked about. Many houses have provided for their wants by early requisitions and are able to look the future in the face and feel that they have made every preparation.

The numerous conventions that will interest the Retailer and keep him from his native heath during the one week out of four this month, will keep him from being an over active purchaser. Many of them however, have spoken for lines of goods to be delivered on specified dates with which they have secured their usual wants from their favorite jobber, taking advantage of the low prices at which they were held before inventory. Jobbers are, many of them, able to report an increase in the sales for December arising from this cause.

The business of the Jobbers on many accounts are reported as encouraging, and as blocks of goods have been ordered to supply ordinary wants, the Retailers can purchase their stocks without the imminent danger of being swamped at the prices. They will find a stiffening in price all along the line as prices are tending upward, but goods are still obtainable. There are many goods sold by the trade at prices abnormally low, among which may be mentioned Screen Doors, Screen Cloth and Poultry Netting, Wrought Butts, and in fact Hinges of all kinds, Steel goods, Screws and Shovels, Spades and Scoops.

It will be found, when the Jobbers' drummers pay their early Spring visit, the retail stocks, whenever investigated, are running light. On regular stocks the demand was such in the late Fall that stocks were not replenished at the tail end of the season, with a few exceptions, for which the wants were anticipated. Good orders should meet the successful salesman and the promised prosperity for 1905 will already have commenced.

The condition of the country is such that it is doubtful if it ever was better. 13,000,000 bales of cotton, if sold even at six to eight cents, would make the planter feel as though he could be infinitely worse off and seldom better. If holding cotton is going to be the rule, the Jobbers' collections will be slim enough for a while. The entire Western country is feeling the effect of full graneries with corn and wheat galore, placing it in an independent financial condition rarely known. The remunerative crops it has had for several years has caused general business to flourish immensely and is likely to continue.

The Retail Associations.

At this period of the year the different Retail Associations have their innings, and a fine unbroken front they present, so that their strength and importance, their numbers and influence, can readily be seen and recognized. They have become a part of the Hardware business that when known and understood hold their positions in the prosecution of their vocation with a power to command and the strength to back it up.

Although in the building up of these various Associations the object and aim was purely commercial, they banded themselves together to make demands and create reforms that were greatly desired and became eminently successful. In the organization of the various Associations the promotion of that first step was taken when a spirit of comraderie prevailed, and brotherly feeling was uppermost in everything accomplished; the jealous spirit of rivalry, the trickery of methods that underlie a fierce competition were eliminated and they looked upon each member of the Association as entitled to all the rights and privileges gained through organized effort. The moral force of an Association to influence its members to act together in harmony and urge reforms for the general good, cannot be gainsaid, and that they will continue to grow in character and ability, giving evidence through able papers widely read and freely discussed, how unselfishly they give of their own stock of knowledge and experience, for the benefit of those associated with them.

The aims and movements of each association should be guided by the conservative views of the majority which should always be manifested in the large attendance at a meeting. The radical views of the strenuous few must be carefully kept in the background, so that their strength does not degenerate into an abuse of power and fail in their object. And the level-headed and broad minded members of the Association should be more pronounced in their views, more active in the inculcation of them, and by the laying out of the work of the Association, more forceful in the accomplishment of its various aims.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Refusal to Pay Policy of Life Insurance.

QUESTION: A life insurance company refused to pay a policy for $5,000 on account of the following facts: In the medical examination of the person insured is this question: "Has any application for insurance upon your life ever been made to any company or association upon which a policy has not been granted? If so, state name of company or association?" Answer: "No." It appears that several years before this question was answered, an application had been made to another company and rejected, and that an application to a third company was then pending and was rejected a few days after this question was answered. Does this reason justify an insurance company in refusing to pay the policy?

REPLY: The insurance company clearly had a right to know about both applications and in the absence of any explanatory circumstances this untrue answer vitiates the policy and renders it impossible to recover anything from the company. Invariably the statements made in the application for an insurance policy and the answers given by the insured to the medical examiner are incorporated in the policy of insurance and made a part of the contract between the insurer and the insured by the terms of the policy. The law regards these statements as warranties made by the insured and they must be substantially true or the policy will be void. If, however, it could be shown that the insured answered this question correctly and that the incorrect answer was inserted by the medical examiner through fraud or error, and without any fraud or collusion on the part of the insured, the company would justly be held responsible, because in that case the misrepresentation would be, not the act of the insured, but the act of its own agent. Assuming that the answer of the insured was correctly transcribed by the medical examiner and was untrue, we see no possibility of a recovery on this contract of insurance.

Check—Liability of Drawer.

QUESTION: A customer sent us his check for two hundred dollars. We deposited in our bank and the bank sent it to the bank it was drawn on for collection. That bank sent a draft on to New York. When the draft reached the New York Bank it went to protest as the bank that drew it had failed. Query, who must lose it?

REPLY: Until acceptance the New York Bank on which the draft was drawn was a stranger to the bill and therefore incurs no liability by this transaction. We think that in accepting your customer's check, you did not waive your rights against him, until the same was paid. The drawing of a draft by his bank on another bank was not payment of the check. We think, therefore, that you can hold your customer for the two hundred dollars, provided you have given him timely notice.

Savings Bank—Deposit in Trust.

QUESTION: My aunt died, leaving a small sum deposited in a savings bank in her own name, "In trust for my niece, M. C. M.," referred to me. Can I claim the money?

REPLY: Where a deposit of money is made in a savings bank in this form and there are no circumstances or facts explaining the same, the rule of law is that the depositor has vested the title to the money in the person in whose favor the trust is declared. But it is always open to other persons interested to show that the intent of the deceased was not to create such a trust in favor of the beneficiary, but in the absence of such proof you are legally entitled to the money.

Partners—Right to Share in Capital and Profits.

QUESTION: If two men engage in a partnership for the purpose of conducting a business, one contributing $1,000, and the other making an investment of $5,000 in the business, and the partnership is dissolved, first, how is the capital to be divided, and, second, how would the profits or losses outstanding be shared?

REPLY: In the absence of contrary agreement, on the dissolution of the partnership each partner would be entitled to withdraw his original contribution to capital. After the contributions to capital have been restored, the profits or losses would then be shared, but the ratio of distribution of the two funds—capital and profit—is not necessarily the same. Unless the parties have expressly agreed that the profits or losses are to be divided on the same proportions as their contributions to capital, the law will presume that the profits or losses are to be shared equally. This is the rule, even though one partner may have had $10,000 invested in the firm and the other have had contributed only his skill and experience. Whether partners have contributed money equally or unequally, whether they are or are not on a par as regards skill, connection or character, whether they have or have not labored equally for the benefit of the firm, their shares in profits and losses will be considered as equal unless some agreement to the contrary can be shown to have been entered into.

DEATH OF WILLIAM C. PETERS.

William C. Peters, one of the ex-presidents of the Philadelphia Hardware Merchants' and Manufacturers' Association, died at his residence in Germantown, Pa., Sunday, January 15, in his seventy-first year. Mr. Peters was born in Philadelphia, August 7, 1834. He entered the Hardware house of Dilworth, Branson & Company when about 15 years old, and from that time to the date of his death maintained an unbroken connection with the business, which was carried on successively by Dilworth, Branson & Co., Vance & Landis Co. and James M. Vance & Co., as at present. Mr. Peters was given an interest by the firm of Vance, Landis & Co. in 1864 and was later taken into full partnership. At the death of James M. Vance, in 1888, he became senior partner, and for the last 35 years had the active management of the business. Last May he went to Europe for rest and recreation and was taken sick with typhoid fever in Rome, from which he never fully recovered. He was regaining his health and strength when stricken with pneumonia. Mr. Peters was a member of the National Guard during the late Civil War and was a member of Veteran Corps, N. G. Pa.

Mr. Peters was possessed of a disposition of the most affable and generous character; sympathetic to a fault, a just view could always be expected from him, and no man but would be benefitted socially by contact with a heart so open to honest conviction. He was one of the old time merchants and easily approachable. He was ruling Elder in the Mount Airy Presbyterian Church and was also superintendent of the Sunday School connected therewith.

A meeting of the members of the Hardware Merchants' and Manufacturers' Association of Philadelphia was held at its rooms on Tuesday afternoon, for the purpose of passing resolutions of condolence and sympathy with Mr. Peters' family. A committee consisting of Hugh McCaffrey, James H. Ritter and John R. Griffith was appointed for this purpose, with instructions to prepare a suitable memorial, which should be placed on the records of the association and a copy forwarded to the family.

MEMORIAL TO FAYETTE R. PLUMB.

At a meeting of the Executive Committee of the American Hardware Manufacturers, held at their rooms in Philadelphia, the following resolutions were adopted expressive of sorrow because of the death of Fayette R. Plumb and expressive also of sympathy with his family.

Resolutions.

WHEREAS, Divine Providence has removed from our counsels Fayette R. Plumb, the first President of this Association, whose services were so conspicuous in laying the broad foundations of principle upon which we were established, and who, for two years directed the affairs of the Association as its Chief Executive with such marked success, and who has since served us so well and continuously as a member of the Advisory Board, and

WHEREAS, His removal causes us to appreciate most keenly those traits of high moral and business character with which he was so munificently endowed by his Creator.

Now Therefore be it Resolved, That we, the Executive Committee of the American Hardware Manufacturers' Association, express our affectionate appreciation of his noble and useful character, his pleasant personality, his untiring zeal and indefatigable industry, his genial disposition and the personal affection felt for him by every member; our recognition in him of those broad and progressive qualities that contributed so largely to the growth and prosperity of the Association.

Resolved, That we give expression to a sense of the deep personal and official loss we feel and extend to the members of his bereaved family our sincere sympathy in the greater loss they have sustained.

Resolved, That these resolutions be entered upon the permanent records of the Association as testiomny of the high esteem and great affection of all members for our first President; and further that a copy of these resolutions be presented to his family as an expression of our sympathy for them in the great loss we mutually and severally have suffered.

TALKS WITH RETAILERS

By AMOS

The average inventory of a Hardware store seldom fails to reveal a large quantity of odds and ends in stock, particularly where the stock includes housefurnishing goods, kitchen specialties, novelties and the like. While the writer does not advocate bargain sales in Hardware stores as a "steady diet" here is a legitimate opportunity for such a sale and one that should not be overlooked. Whether the goods are in season or not it is an opportunity for doing some good advertising and of drawing attention to the store.

The first thing to do is to get the goods out in sight, brush off the dust, arrange the small stuff as neatly as possible on tables or counters and with a liberal supply of hand printed cards. show the prices in plain figures. It isn't necessary to sell these goods way below cost, but it is better to get them off your hands at once with a small margin than to keep them on the shelves. Select a few of the most attractive bargains and put them in your windows; spend a little time and brain work on this window arrangement, just as the angler carefully fixes the bait to his hook. Your window is your bait—or part of it—and if it is full of unattractive goods it will be no more of a success as bait than a mangled minnow on the fish hook of the sportsman. Don't fail to use plainly printed price cards in the window—the price is, in this case, the thing to draw attention. Before you expose your windows to the public, get out your advertising. Of course the amount of money expended in exploiting this one sale must depend on the resources of the Hardwareman and must be decided by him. The line between rigid economy and extravagance in advertising is sometimes difficult to determine. Stingy advertising usually brings stingy results, and it is never wise to use all the advertising ammunition in the first shot. Quality usually counts more than quantity in advertising. The man with a bell-muzzled blunderbuss usually hits something, but his shots are seldom effective except at short range, while the sharpshooter, with half as much ammunition brings down his game half a mile away.

A bargain sale of this sort is of sufficient importance to warrant the use of a quarter or half page in weekly papers, or from twelve to twenty inches in daily papers. Let the heading of the ad. be forcible but don't lapse into chronic slaughter sale bombast. Start the ad. something like this:

"AFTER INVENTORY" SALE

We find on taking our inventory that we have on hand a large amount of "broken lots" of goods. We want to get them out of the way to make room for new stock, and in order to move the goods quickly we offer them at prices that are much below what you have always paid heretofore. Every article in this sale is just as it came from the factory. A few bargains are given below, you will find a lot more in our windows and still more inside the store. Everything marked in plain figures. Sale opens Tuesday, February 7th.

Follow this introduction with a half dozen or so of your best bargains, selecting where possible, articles the regular price of which is well known. Insist that the printer set the ad. in good style using a large black type for the headline, about "12 point old-style" for the introduction and smaller black type for the prices.

A few well printed circulars distributed around the town and among the farmers will produce good results. In this too, it is necessary to watch the printer, and insist that he use good display type, good ink and good paper.

Now that you have invited your friends to the "feast" be sure that the house is ready for the guests. The whole idea of the "After Inventory" sale is not merely the selling of the "broken lots." The main object is to attract attention, to get people acquainted with your Hardware store, to make them believe that it is *the* store. To do this it is not only necessary to get them inside the front doors, but when once they are in to treat them so well and show them such an up-to-date establishment that they will want to come again.

♣ ♣ ♣

Writing of special sales brings to mind one of novel design, recently held by the King Hardware Co., Atlanta, Ga. Just before Christmas, this firm arranged what they styled a "Musical Discount Sale." Their store was beautifully decorated for the occasion and a musical program arranged for. The sale was held in the evening from seven to ten and on all except contract goods a discount of ten per cent. was allowed. It was originally planned to have the sale one evening only, but it proved such a winning card that it was continued through the entire week. In a letter recently received, the King Hardware Company write that their sales for that week were 85 per cent. more than the corresponding week in 1903. A liberal amount of advertising space was used to acquaint the public with the event; three of these ads. are reproduced; the larger one occupied 18 inches of space, the others 12 inches each. These ads are, as will be seen on the "mystery" order, well calculated to excite inquiry and to bring people to the stores at the appointed time to solve the mystery to their own satisfaction.

♣ ♣ ♣

By the way, have you joined your State Hardware Association yet? There is no end of good to be derived from membership in these organizations and the conventions to be held during the

Digitized by Google

next four months are bound to produce good things for the whole trade. When a lot of hard working, hard headed Hardwaremen get together, swap experiences and speak their minds freely, it means something doing. Competition may be the life of trade but co-operation is its salvation, and if the nearly thirty thousand Hardware dealers in this land of the free ever get completely organized it will come very near being the millenium in the Hardware business.

✦ ✦ ✦

In a Western Hardware store there was shown recently a card on which the following was plainly printed:

"There is so much bad in the best of us,
And so much good in the worst of us,
That it hardly behooves any of us
To talk ill of the rest of us."

✦ ✦ ✦

Germany is coming to the front for honest advertising, and it would be a blessing indeed to the truthful merchant in this country if laws could be passed here on lines similar to those recently recommended by the Chemnitz Chamber of Commerce, who have requested the following legislation:

1. A closing-out sale may be announced only in case of the dissolution of partnership or the final clearing out of a special line of goods.

2. An increase in stock by purchase or otherwise in the course of a closing-out sale shall be prohibited. The seller shall be compelled to sell his goods at the announced price to any and every person who offers to buy.

3. Bankruptcy sales may be conducted alone by the receiver, and not through a third party, and no third party may designate goods for bankruptcy sales. It is desirable that the time during which bankruptcy sales may continue shall be fixed by law with due regard to the requirements in different lines of business.

✦ ✦ ✦

An Exchange says: Some people in business try to find an excuse for slack trade; others try to discover a remedy—and usually succeed.

The foolish dealer says: "If I had more business I would advertise." The wise dealer says: "I will advertise to get more business, and getting more will advertise more."

Advertising is the mother of success. Many repositories that yield a living without advertising would yield more than a living if advertised.

Where there is advertising there is business. The dealer who wants to keep at the head must prove his right to do so by judicious and continuous advertising.

✦ ✦ ✦

An English Commercial Traveller who sold teas, making a trip in a new territory recently, was told by one grocer on whom he called, that he, (the grocer) had bought his teas for years from a certain wholesale firm who always sent him on Christmas a "keg of oysters and a Christmas cake." The drummer, however, induced the grocer to look over his samples and on being asked the price said "Well, with oysters and cake at Christmas this tea will cost you fifteen pence the pound, but without, you may have it at a shilling." If the dear public ever wakes up to the fact that their "oysters and cake for Christmas" that they receive in the form of trading stamps, means an extra cost to them, this very unreliable system of advertising will soon fall into an "innocous desuetude." If on the other hand the merchant takes the cost of the stamps out of his own pocket he may find himself in a position like that of a certain Hardwareman, who gave his trading stamp experience as follows: "During the first week, while I was giving double stamps, I took in over $60 more than the average, and was consequently pleased. The second week I gave single stamps, and the business dropped off $20, with a similar drop in each of the two weeks following, until receipts were normal. As I took the same newspaper space throughout the month, and kept prices down to my usual figures, I am unable to account for the slump. One thing I do know, and that is that there'll be no more stamps given out here after my contract with the company expires. Why—"and here he warmed up"—it has cost me the stamps and an extra man, and I am getting no more business."

✦ ✦ ✦

The *Ironmonger* (London) gives Hardwaremen some good suggestions concerning the treatment of Drummers:

(1) Know exactly what you want, and how much of it. (2) Don't be talked into forward buying when prices are at all high. (3) Buy your sundries on one good house, and thereby dispense with the calls of several men. (4) Dont' keept a traveller waiting half an hour to see you. Remember that his time may be more valuable than your own. (5) Give him the credit for honestly believing what he tells you, and if he ever deceives you give him a wide berth in future. (6) Give every man a courteous hearing. Courtesy costs nothing, and it oils the wheels. (7) Keep your eye on novelties; you cannot afford to despise them any more than you can afford to stock every new thing. (8) Avoid all conversation not bearing directly on the point at issue, and let your "yes" or "no" have the dictionary meaning. These simple "rules of conduct," if generally acted on, would undoubtedly improve the relationship between seller and buyer and make the lot of the commercial traveller much happier than it is at present.

✦ ✦ ✦

Advertising copy is like talking over a long distance 'phone; it costs money, and you can't see the other fellow, so every word has got to count. A bullet is useless without powder behind it. Advertising is the commercial powder that successfully lands merchandise where it will do the most good. Demand and distribution make a team you can't beat. If substitution is the bane of advertising, distribution is the remedy that hasn't failed yet.

THE COBBLER'S KIT.

In many Hardware stores of farming regions, and, also, in a few Hardware stores in metropolitan districts, there may be often seen a kit of cobbling tools, commonly labelled "The Economy Cobbler," of "The Home Shoe Repairer." It usually consists of three size lasts, a flat face hammer, two or three awls, a shoemaker's knife and a couple of boxes of assorted tacks and nails, and it retails from 75 cents upwards. It is usually considered a pretty good investment, both by the purchaser and by the retailer.

This cobbler's kit is one of the little details of the progress of industrial economy of which there is a very interesting story. Its history runs back into the dark ages. On the walls of ancient Thebes there is a painting, believed to have been done at about the time of the Exodus, showing cobblers at work, and they had tools much like those of the cobbler's kit of to-day, including the lasts, the knife, the flat face hammer, though in crude form. A traveller, who made a recent journey to the Holy Land in recent years, said that he saw much the same kit of tools in use in the shoe bazars there.

This ancient part of the world has not progressed much, but in this country achievements have been wonderful, and have effected even the little details of human affairs that make such a humble outfit as the cobbler's kit of value.

The Mayflower brought to this country on her second voyage in 1629, a shoemaker, Thomas Beard, who brought with him a kit of cobbler's tools and leather. He was regarded as such a valuable man to the country that he was given an extensive grant of land, and board and lodging at the expense of the Plymouth company. He was the first shoemaker to settle in America. For a century and more Beard and his successors worked with their crude tools, which were much like those of the cobbler's kit of to-day. The cobblers used to tramp around among the farmers, stopping here and there to mend shoes for the farmers' families, just as umbrella men travel about to-day. Next the farmers themselves began to make shoes, and it is not an uncommon sight to-day to see upon farms a little "ten footer," or shoe shop ten feet square. In these tiny factories the farmers and their sons, of the farm hands, made shoes upon stormy and winter days, using the same hand tools.

Along at the time of the Civil War the big machinery laden factories began to spring up in big shoe making cities, and they took from the farmers their occupation of shoemaking. But the art of cobbling still remained with the farmers. Their shoes wore out, perhaps a little more quickly than those of the city man, and there being no cobbler nearer than town, the farmers formed the habit of mending their own footwear. Home repairing is cheaper than hiring a cobbler, and, besides it saves a journey to town.

With their cobbler's kits some Hardware men, and general stores, offer cut soles, or soles are cut out ready to be nailed onto the shoe and then trimmed down. So practically all that the farmer has to do is to drive the shoe nails and put on the finishing touches. The farmer is naturally a jack of all trades and can do a pretty fair job at cobbling.

Hence the call for cobbling kits in farming regions, especially in the West. In metropolitan districts there is a fair trade in these kits, especially in shoe making districts, where men are skilled in making and repairing footwear, and also in sections where thrifty foreigners have settled down and are not above patching their own shoes.

F. A. G.

Commended.

"Mr. Bliggins says he is a self-made man."

"That is one good trait about Mr. Bliggins," answered Miss Cayenne, "when he is to blame, he owns up to it."—*Washington Star.*

THE COMING HOT SPRINGS CONVENTION.

The committee in charge of selecting a location for this year's convention of the Southern Hardware Jobbers Association and the American Hardware Manufacturers' Association deserve to be congratulated on the selection they have made. In taking the convention to the Virginia Hot Springs they are introducing the members of the two associations to what is to many of them, a new resort, but at the same time one that is of national reputation for its beauty and its health producing air. Virginia Hot

THE HOMESTEAD.

Springs is charmingly situated in the great Hot Spring Valley of Virginia at an elevation of 2,500 feet above the sea level with surrounding mountains rising 1,500 feet high. The reputation of this place as a health resort extends over more than a century during which time it has been visited at all seasons of the year by thousands of those seeking health and pleasure. The climate throughout the whole year is incomparable, the scenery picturesque, and the mountains are clad with verdure to the very top. The summers here are much cooler than at many of the popular seaside resorts, so that while the convention is being held in what is usually an exceedingly warm month in the South, those who visit the Southern convention in June may rest assured that they will not suffer from the heat.

ENTRANCE TO HOTEL.

The hotel chosen for the headquarters of the convention "The Homestead," is an imposing brick structure completed in September, 1902, and capable of accommodating over 700 guests. The style of architecture is colonial, novel and agreeable in its adop-

THE BATH HOUSE.

tion. The interior is a model of convenience, neatness and comfort. The lobby is 150 feet long, 60 feet wide and 20 feet high. At night, when brilliantly illuminated and thronged with guests, it presents a scene of striking beauty. The Homestead has 400 bedrooms—each supplied with a long distance telephone—and 200 private baths. The building is divided into several compartments by fire-walls extending through to the slate roof, with automatic fire-doors in the corridors, after the manner of great ocean liners. The sanitary arrangements are perfect; the cuisine commands unqualified praise. In a word, the hotel is modern in the strictest sense and is conducted on the broadest lines.

For those preferring more privacy than the hotel affords, there are a dozen attractive cottages, pleasantly and conveniently located, within the grounds.

The Casino has been converted into a most attractive Golf Club House, containing lounging rooms, cafe, squash court, ping-pong tables, etc. The golf course extends over 6,000 yards and covers a great variety of play. Other pastimes include tennis, cycling, billiards, pool, etc. An orchestra plays daily at the golf club, the pleasure pool and the ball room.

A thoroughly equipped livery, provided with well-trained saddle horses, is maintained, and the thirteen miles of boulevard in the vicinity, together with a number of mountain roads, are especially attractive to those fond of riding or driving; while for pedestrians the numerous paths through the mountain forests have an endless charm, and mountain climbing is a favorite pastime.

The following special rates have been secured for the period of the convention, June 6-7-8-9, 1905:

NEW HOMESTEAD HOTEL AND COTTAGES. Official Headquarters both Associations.

Single Room, American Plan, without bath, two in room, $3.50 per day each.

Single Room, American Plan, without bath, one in room, $4.00 per day.

Single Room, American Plan, with bath, two in room, $4.50 per day each.

Single Room, American Plan, with bath, one in room, $6.00 per day.

HOTEL ALPHIN. (Within five minutes walk of the New Homestead.)

Single Room, American Plan, without bath, $2.50 per day each.

Single Room, American Plan, with bath, $3.50 per day each.

Engagements of room will be made in the order in which they are received, and every possible effort will be made to give everybody satisfactory service. All reservations to be made direct with the hotels.

LLOYD'S, AND WHAT IT MEANS.

Like most great and enduring enterprises Lloyd's had a small beginning. It is now to the world of shipping and marine insurance what the house of Rothschild is to the banking world.

Lloyd's dates from the latter part of the reign of Queen Elizabeth, and had its origin in a small coffee house in Tower Street, kept by Edward Lloyd. He was an enterprising man, and through his business contact with seafaring men and merchants enlisted in foreign trade foresaw the importance of improving shipping and the method of marine insurance. He was the founder of the system of maritime and commercial intelligence which has been developed into its present effectiveness. Before the time of Edward Lloyd maritime insurance in England was conducted by the Lombards, some Italians, who founded Lombard Street, but after Lloyd embarked in the business Britons conducted marine insurance in London.

The subjects of marine insurance are the ship, the cargo and the freight, all of which may belong to different parties. In time of war there is what is termed the maritime risk—danger from accident, collision and stranding—which is distinctly separate from the risk of capture and seizure by an enemy. This class of marine insurance had its inception in the conditions arising during the seven-year French-English war of 1757 to 1763.

Lloyd's moved to Pope's Head Alley in 1770, and in 1774, removed to the present quarters in the Royal Exchange. In 1871 Lloyd's was incorporated by Act of Parliament. This Act defined the objects of the society to be: (1) The carrying on of the business of marine insurance by members of the society; (2) the protection of the interests of members of the society in respect of shipping, cargoes and freights; (3) the collection, publication and diffusion of intelligence and information with respect to shipping.

The corporation of Lloyd's and the committee of Lloyd's, who are the executive body of the corporation, and the secretary of Lloyd's have practically nothing to do with marine insurance in the way of taking risks and paying losses. Their duty in this respect is to afford marine insurance brokers who wish to effect insurance a place of meeting with those who undertake the risks.

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION.

The North Dakota Retail Hardware Association will hold its annual meeting in Fargo on the first, second and third of February, at the rooms of the Fargo Commercial Club, which have been kindly tendered to the association for the purpose. Hotel Metropole has been assigned as headquarters. The railroads will grant special rates to and from all points in Minnesota as well as North Dakota, and already a great many from the East have secured accommodations with a view to being present. From the number of responses already received from the dealers throughout the State they anticipate one of the largest meetings they have ever held. The following is the outline of the programme.

PROGRAMME.

Wednesday, February 1, 1905.

MORNING SESSION—10:30 A. M.

Meeting of the Executive Committee.

AFTERNOON SESSION—2:00 P. M.

Convention called to order by the President.
Opening Prayer, Rev. Dickinson, Fargo.
Address of Welcome, Mayor A. L. Wall.
Response for the Association, H. B. Allen, Jamestown.
Enrollment of New Members.
Payment of Dues.
Collection of Railroad Certificates.
Address: "The Science of Salesmanship." A. F. Sheldon, Founder and President of the Sheldon School of Scientific Salesmanship, Chicago

The remainder of this session will be in charge of the travelling men: Frank M. Wolfe (representing the Plumbing & Steam Fitting Supply Co., Minneapolis) in the chair.

The reason for setting aside a portion of this session to the travelling men is to permit a free discussion of such topics as may occur to them of mutual interest.

Note.—The Question Box to be found in Convention Hall is placed there for the express purpose of depositing questions in it on topics that will be of interest to take up in the association. It is the earnest desire of the officers of this association that it be freely used by those in attendance. The discussion of these topics will be taken up at various intervals during the different sessions.

Thursday, February 2, 1905.

The entire day is to be designated as Jobbers and Manufacturers' Day, and both sessions will be occupied by them in addresses, Reading of Papers and General Discussion.

MORNING SESSION—9:30 A. M.

Enrollment of New Members.
Payment of Dues.
Appointment of Committees.
Paper: "Heating and Ventilating." O. M. Roberts (Roberts Heating & Ventilating Co.), Minneapolis, Minn.
Address: "Credits." F. J. Hopkins, Manager Credit Department, Janney-Semple-Hill & Co., Minneapolis, Minn.
Address: "The Evolution of the Stove Business." G. L. Nye (Proprietor Minnesota Stove Co.), Shakopee, Minneapolis, Minn.

AFTERNOON SESSION—2:00 P. M.

Address: Platt W. Lyon (Janney-Semple-Hill & Co.), Minneapolis, Minn.
Address: W. B. How (Kelley, How, Thomson Co.), Duluth, Minn.
Address: T. G. Walther (Hackett, Walther, Gates Hardware Co.), St. Paul, Minn.
Address: H. D. Final (Marshall-Wells Hardware Co.), Duluth, Minn.
Address: R. A. Kirk (Farwell, Ozmun, Kirk & Co.), St. Paul, Minn.
Discussion of Question Box Topics.

Friday, February 3, 1905.

Both sessions this day for members only.

MORNING SESSION—9:30 A. M.

Enrollment of New Members.
Paper: "The Modern Tinshop." E. L. Garden (Garden Co.), Souris, N. D.
Address: H. J. Hellekson, Fairmount, N. D.
Paper: "Catalogue House Competition," R. L. Scott, Jamestown, N. D.
Paper: "Wealth in Money," M. G. Evenson, Cooperstown, N. D.

AFTERNOON SESSION—2:00 P. M.

Annual Report of President.
Annual Report of the Secretary.
Annual Report of the Treasurer.
Report of H. F. Strehlow, Casselton, Delegate to the National Retail Hardware Dealers' Convention, Indianapolis, Ind., March, 1904.
Discussion of Question Box Topics.
Reports of Committees.
Election of Officers.
Adjournment.

Note.—At close of this session there will be a short meeting of the Executive Committee.

THE WISCONSIN RETAIL HARDWARE ASSOCIATION.

The ninth annual meeting of the Wisconsin Retail Hardware Association will be held at Milwaukee, February 1st and 2d, and from every indication will be a fine one, as the association, during the past six months, the Secretary reports, has done more and better work than any period since its organization. Special rates will be given by the railroads on the certificate plan and every member will be provided with an identification tag, a badge and a ticket of admission. The following programme will be followed:

Wednesday, February 1, 1905.

Payment of Dues.
Meeting of Executive Committee.

Payment of Dues.
President's Address.
Report of Secretary-Treasurer.
Question Box.
Address: Science of Salesmanship, A. F. Sheldon, Chicago.

ANNOUNCEMENT OF COMMITTEES.

Transportation.
Auditing.
Question Box.
Press.
Resolutions.
Legislation.

REMARKS BY VISITING DELEGATES.

From National Association.
From Other States.
From Other Organizations.
Insurance Talk.
Adjournment.

Thursday, February 2, 1905.

Payment of Dues.
Stereopticon Lecture by Mr. Watrous, Secretary of Citizens' League.
Paper by H. F. Krueger. Profit of Side Lines.
Question Box.
Paper. Benefits of Local Associations. Andrew Esser, Hartford.
Report of Delegates to National Association.
Paper. A Few Things that Will Help the Retailer. James Watson, Marinette.

Payment of Dues.
Address. R. R. Williams of New York, Editor of *The Iron Age*.
Question Box.
Report of Secretary's Visit to Michigan Association.
Election of Delegates to National Association.
Election of Officers.
Reports of Committees.
Unfinished Business.
Adjournment.
Meeting of New Executive Committee.

THE IOWA RETAIL HARDWARE DEALERS' ASSOCIATION.

The Iowa Hardware Dealers' Association have prepared a programme for the annual meeting which will be found of a more interesting character than usual. The meeting will be held at the Commercial Exchange Hall, Des Moines, on February 8th, 9th and 10th, and it promises to surpass any previous meeting in the points of interest prepared by its officers. The following is the

PROGRAMME.

WEDNESDAY MORNING SESSION—9:00 A. M.

Meeting Directors.

Digitized by Google

10:30 A. M.

Opening Session of the Association at Commercial Exchange Hall.
Enrollment of Members.
Payment of Dues.
Announcement of Committees.
Question Box.

THURSDAY MORNING SESSION—9:00 A. M.

Executive Session.
Address, "Catalog House Question," S. Norvell, St. Louis, Chairman Wholesale and Retail Joint Committee.

THURSDAY AFTERNOON SESSION—2:00 P. M.

Address by State Auditor B. F. Carroll, "Mutual Insurance."
Address on Mutual Hardware Insurance, C. F. Ladner, President Minnesota Hardware Mutual Insurance Association.
Report of Insurance Association, Secretary A. R. Sale.
Paper, "Some Suggestions as to How a Retail Hardware Dealer May Increase His Business and Profits," F. H. Luthe, Des Moines.
Address by Secretary M. L. Corey, of the National Retail Hardware Dealers' Association.
Question Box.

WEDNESDAY AFTERNOON SESSION—2:00 P. M.

Invocation, Rev. A. M. Haggard, A. M., of Drake University.
President's Address.
Report of Secretary-Treasurer.
Paper, "Why I Am a Member of the Iowa Retail Hardware Dealers' Association," B. A. Hand, Ottumwa.
Discussion, "Can the Services of the Traveling Salesman Be Dispensed With, to the Mutual Advantage of the Buyer and Seller?" Led by E. H. Norris, Cedar Rapids; A. J. Collins, Des Moines; C. F. Schmidt, Marshalltown.

FRIDAY MORNING SESSION.

Reports of Committee.
Enrollment of Members.
Paper, "Hints for Stock Taking," L. Lindenberg, Dubuque.
Paper, "Some of the Important Problems of the Retail Trade, Other Than Catalog House Competition," J. H. Petty, Elliott.
Question Box.
Election of Officers.

To this programme is attached a number of questions that will undoubtedly be debated and discussed by the assembled delegates, which have usually been left to the haphazard possibilities of the Question Box. The present style is an advance in its interest, for the members, getting these questions several weeks in advance can prepare themselves somewhat to enter in the discussions of those that possess sufficient interest for the individual in which case he will be apt to have something to say, and will say it when the question comes up.

ILLINOIS RETAIL HARDWARE DEALERS' ASSOCIATION.

An exceedingly interesting programme has been prepared for the eighth annual meeting of the Illinois Retail Hardware Dealers' Association, which is to be held at Peoria on February 14th, 15th and 16th. This programme is as follows:

TUESDAY MORNING SESSION—10:00 A. M.

Meeting of Committees.
Executive Committee at Hotel Lud.

TUESDAY AFTERNOON SESSION—2:00 P. M.

Convention called to order by President C. H. Williams.
Address of Welcome, Mayor E. N. Williams.
Response, Charles H. Williams.
Roll Call.
Appointment of Committees.
Question Box in charge of Frank L. McKinney, Rockford. If possible send in questions before Convention.
Reception of New Members.

WEDNESDAY MORNING SESSION—9:30 A. M.

President's Annual Address.
Secretary's Annual Report.
Treasurer's Annual Report.
Committee Reports.
Discussion.
Reception of New Members.

WEDNESDAY AFTERNOON SESSION—2:00 P. M.

Paper, "The Association and Its Benefits," H. C. Cormick, Centralia.
Paper, "Plumbing in Connection with the Hardware Business," L. D. Ray, Belvidere.
Paper, "The Hardware Store, Past, Present and Future," Grant W. Porter, Chicago.
Address, "The Work of the National Association," President W. P. Bogardus, Mt. Vernon, Ohio.
Question Box, Frank L. McKinney.
Payment of Dues.

THURSDAY MORNING SESSION—9:30 A. M.

Paper, "Work and Be Square," F. J. Mathews, Mt. Vernon.
Discussion.
Paper, "Steel Range," S. S. Woodward, Carlinville.
Discussion.
Question Box.

THURSDAY AFTERNOON SESSION—2:00 P. M.

Address, E. F. Baldwin of the Peoria Star Company.
Reports of Committees.
Election of Officers.

THE OHIO CONVENTION.

The following is from Frank A. Bare, Corresponding Secretary of the Ohio Hardware Association:

The Hardware men of to-day find themselves confronted by many serious problems. They realize that these questions can never be for the united action necessary to success.

The National Association has grown to be an influential body of the highest order. The Ohio dealers appreciate this fact. The secretary recently mailed to all Hardware dealers in the State blanks asking for questions for the Question Box. Every mail brings responses to this request. The number and the character of these questions proves that the Ohio dealer is aware of the fact that he may profit by the experiences of his fellow dealers through discussion in the conventions. President Baker has given great care and thought to the selection of a committee of capable men, who will have charge of the Question Box.

Our next convention will be an educational one. S. Norvell who has been so prominently before retail Hardware dealers during the last year will give an address on the "Brands of Experience." A. F. Sheldon, of Chicago, will deliver his inspiring lecture on "Scientific Salesmanship." W. P. Bogardus, President and M. L. Corey, Secretary of the National Association, will be with us during the entire session and in a number of informal talks will tell us something of the great things the National Association is doing. The gentlemen are both forceful entertaining speakers and are rich in their experience gathered in attending all Hardware associations in the United States. We are making an effort to secure other noted speakers.

The entertainment feature has not been overlooked. The Dayton committee has some good things in store. The National Cash Register people, famous for doing things just right will entertain us one evening.

Applications for membership are coming in every day. The increased interest in association work is indicated by the large number of both old and new members who are planning to attend this convention, and we predict that the coming session will be one of the greatest interest and profit to the Hardware dealers of Ohio. Headquarters will be at the Algonquin Hotel, February 28th, March 1 and 2.

LARGEST CUT GLASS VASE.

The largest piece of cut glass in the world, a vase as tall as a man and as brilliant in every part as the finest small piece, has just been completed in Philadelphia, and exhibited at the St. Louis Exposition.

The vase is five feet, six and three-quarter inches in height, and every inch of it is perfectly worked in sunbursts, chrysanthemums and beaded and notched effects that shed prismatic rays of brilliance and luster. The sunbursts on the star are too large to be designated by that usual cut glass term, so they have been given a new name, the Louisiana Purchase star.

In all there are 100,000 cuts or deep incisions on the vase, which required turning it 200,000 times. The vase weighs 360 pounds. It was produced by nine men, who spent 2,000 working hours on it. The man who made the blank is six feet seven inches tall. A shorter man could not have handled the great piece of glass. Twenty blanks were turned out before a perfect one was produced.

The remarkable brilliancy of the vase is caused by the fusing in the glass of 10 per cent. more lead than is ordinarily used. The vase is several times larger than the previous greatest piece of cut glass, completely dwarfing it.

RECENT TRADE PUBLICATIONS.

THE HART MANUFACTURING CO., Greenville, Ohio, are the manufacturers of high grade Screen Doors, Window Screens and Window Screen Frames, exploiting which they have sent us their 1905 pamphlet catalogue. In this book they present three new patterns of doors, Nos. 35, 42 and 192. The No. 35 has a three inch stile, 1⅛ inch thick, four inch spindle, furnished in the natural wood, with two coats of varnish. No. 42 has a four inch stile, ⅞ inch thick, four inch spindles, furnished same as No. 35. No. 192 is a High Standard door 1⅓ by 4½ inch stile, 9 inch bottom; superior grade of work made in their order department, being sanded and smoothed after assembling, raised oval moulding with mitered corners, covers edge of wire cloth. Made of yellow pine, natural finish. The three doors above mentioned are their 1905 patterns and are showing in their catalogue in addition to their regular line. Their regular doors are all made of yellow pine; special doors of plain and quarter sawed oak. Every joint is mortised and well glued, making it impossible to sag or get out of line. Flush headed moulding over wire cloth is used, with opposite side beaded to correspond, except High Standard, which has raised moulding. Their High Standard Doors are made from selected material. A copy of their catalogue will be forwarded upon request.

THE SEIDEL MANUFACTURING CO., 811 Chemical Building, St. Louis, Mo., with factory at Morris, Ill., have sent us a copy of their latest catalogue embracing their extensive line of Sash Pulleys. This is a revised edition, and since the issue of their previous catalogues, they have added special sheaves and pulleys not heretofore illustrated. Their pulleys embody all the essential features of properly constructed sash pulleys. They are of standard sizes, easily applied, and on account of the housing feature, the cord, ribbon or chain cannot run off the wheel or get fast in any manner. All of their products are carefully inspected before shipment, and they guarantee their pulleys in every respect, and will replace defective goods if notified before same are returned to them. The trade of the Seidel Mfg. Co. is principally in the Central, Southern and Western States. They have representatives in San Francisco, Seattle, Denver and they cover the South from their St. Louis office. They state their enormous increase in business is due to their making a wide line of Sash Pulleys, etc., mechanically correct, and their special hood feature is appreciated and preferred by the trade. The above mentioned catalogue is high grade in every respect, and gives illustrations, descriptions and list prices. It is of envelope size, in pamphlet form. Send for a copy.

THE ARCADE MANUFACTURING CO., Freeport, Ill., manufacturers of Family Coffee Mills, Light Hardware Specialties, Household Novelties, Wood and Iron Toys, etc., are the authors of a large pamphlet catalogue of 202 pages. Among their extensive line of Coffee Grinders, the most popular are the Crystal, Jewel, Bell, King, Crescent and Monarch. A specialty made by the Arcade people is their Jewel Cake Turner which they claim to be indestructible, made entirely of steel and weighs less than any other cake turner, the flat serpentine handle giving the user a fine grip. Their No. 10 Spice Cabinet is also a popular specialty. It is a strong, well-made cabinet having six large drawers well fitted and neatly labeled; iron drawer pull finished in black enamel. The cabinet will keep the spices free from dust and retain their strength. The above firm are the manufacturers of the Champion Cork Puller and Re-corker, which is neat, strong, compact, reliable and fully warranted; a quick, sure puller; a safe and effective re-corker; it stands the work. Circulars exploiting any of the above mentioned specialties may be had, also their catalogue, upon request.

THE NATIONAL SEWING MACHINE CO., Belvidere, Ill., have issued an envelope size pamphlet booklet exploiting their new machine, the "Redgeton." The book is decidedly high grade, testifying to the quality of the article it represents. They state: "We have been in the business a goodly number of years, have built any number of sewing machines, good ones, you understand, —and the Redgeton is our latest effort—just a little better than all others, is this new machine—and we back up every one with this statement." The head of this machine incorporates three essential virtues: simplicity, strength and durability, and with its roller bearing stand, they claim it to be absolutely noiseless. The complete set of attachments includes ruffler, tucker, binder, braider foot, shirring slide plate, four hemmers of assorted widths, quilter, thread cutter, foot hemmer and feller. The accessories supplied include: twelve needles, six bobbins, oil can filled with oil, large and small screw drivers, sewing guide, certificate of warranty valid for five years, and an elaborately illustrated instruction book. A handsome folder is included with their new catalogue. Send for their "Redgeton" literature.

LOVELL MANUFACTURING CO., Erie, Pa., have issued an illustrated catalogue of Anchor Brand Clothes Wringers, rubber rolls, mangles, etc. They state that in submitting this catalogue they desire to assure the trade that it is their purpose to maintain the recognized high standard of Anchor Brand Clothes Wringers. This will be done by continuing the use of only the best materials, the adoption of commendable improvements and labor saving devices, and the employment of best mechanical skill to the end that these goods may continue to be recognized as "The Best on Earth." Their high grade five and three year warranted wringers bear the Anchor Brand trade mark, and they guarantee their quality by attaching a warranty tag to each wringer. In case any part should wear out or prove defective within the warranty period, the necessary repairs will be promptly furnished by them, free of charge. Their catalogue is high grade throughout and finely illustrates and describes their entire line of wringers. Write at once for a copy if the subject interests you.

THE WILKINSON SHEAR & CUTLERY CO., Reading, Pa., are the authors of a new catalogue having a cover of dainty appearance, being all white with gilt lettering. It is denominated as their Cutlery Catalogue No. 9, and embraces their line of butchers' and kitchen cutlery, sharpening steels, spatulas, hunting knives, putty knives, scrapers, sheep shears, grass shears, hedge shears, grass hooks, horse shears, etc. About ten years ago they commenced to make butcher and kitchen knives by exact, scientific and uniform methods. By an unbroken line of succession they are the inheritors of an experience of more than two hundred years in the manufacture of sheep shears, and they were convinced that the methods they employed so successfully for a number of years in making sheep shears of the highest excellence, could be applied with equally good results in the manufacture of butcher and kitchen knives. They state "Our production of knives was small at first and was marketed in a limited local field, but the goods scored an immediate and remarkable success." They use their own secret process of tempering, which process, they claim, has earned for their sheep shears the reputation of being the best in the world. Very much valuable information on this particular subject may be obtained from their catalogue which the company will be glad to send upon request.

THE WILLIAM BAYLEY CO., Springfield, Ohio, successors to The Rogers Iron Company, have sent us a copy of catalogue No. 28 covering "Entranceways and Gates," of their manufacture. This catalogue is intended principally as an "Idea Book." It pictures a variety of gates, etc., reduced to small scale. Photographs of any particular one will be forwarded promptly, also larger pictures showing more detail than it is possible to give in a limited space. They request the privilege of submitting estimates on stairways, plain and ornamental window gratings, shutters and guards; joist hangers and anchors, bridge railing, bank and office railing, elevator work, prismatic tile and other sidewalk work, sanitary stable fixtures, fire-escapes, skylights, roof construction of all kinds, cast iron building material, steel construction, and all other items of metal, large or small that may be needed in the erection of any type of building. The above is one of a number of catalogues issued by this firm. The others are: No. 7, Builders' Iron; No. 17, Bolted Rail Fences; No. 25, Fences and Posts; and No. 26, Wire Work, any of which will be mailed to interested parties. Other printed matter of artistic nature is printed at intervals. Tell them what you want and they will send information on the subject. Some interesting bulletins are as follows: No. 40, Settees; No. 41, A Few Fence Designs; No. 42, Stable Fixtures; No. 44, Bridge Railings. These bulletins are brief and to the point. Each contains some good reading and now and then a picture of merit.

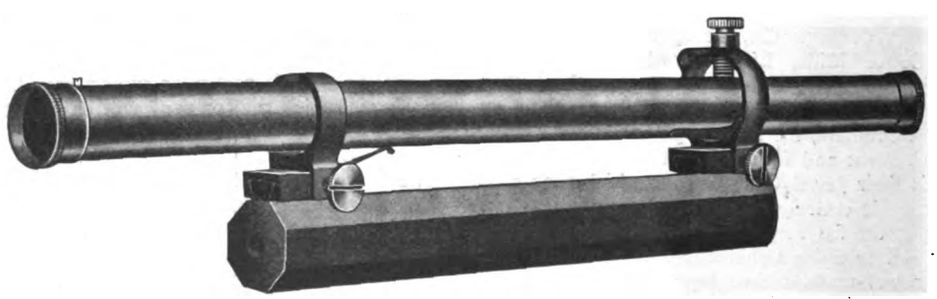
NEW GOODS AND SPECIALTIES.

STEVENS' LITTLE KRAG TELESCOPE.

J. Stevens Arms & Tool Company, Chicopee Falls, Mass., is offering the telescope shown in Fig. 1, which is especially designed for the Little Krag single shot rifle, but can be fitted to other rifles, especially the magazine rifles that eject the shells from the top. The telescope is mounted forward of the receiver and has several inches eye relief. It is referred to as being very strong, and with the relief it has gives a very large field with a bright illumination. In Figs. 2 and 3 is shown the new Ideal detachable mount. The dovetail blocks are screwed firmly on the top of the barrel, one for the rear mount and one for the forward one, and are held in place by thumb screws. The mounts and telescope come off together. The blocks remain on the rifle and do not interfere with the use of the ordinary sights. After sighting the telescope can be taken off and put on repeatedly with perfect accuracy, it is remarked, and in a few seconds. Screw holes in the dovetail slot coincide with the old Ideal mounts.

FIG. 1.—STEVENS' LITTLE KRAG TELESCOPE.

FIG. 2.—DETAIL OF DETACHABLE MOUNTS.



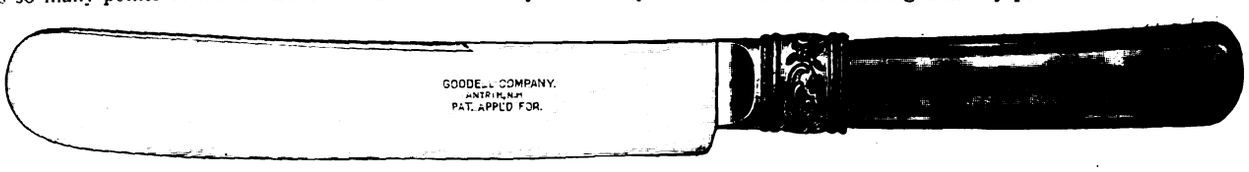


FIG. 3.—IDEAL DETACHABLE MOUNTS.

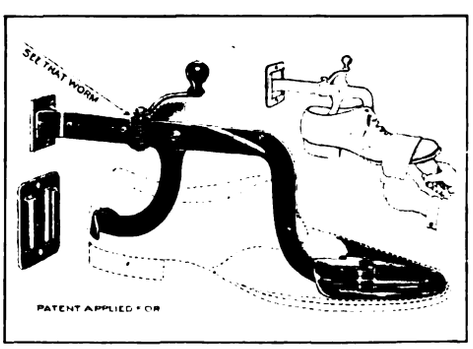
GLASS HANDLED CUTLERY.

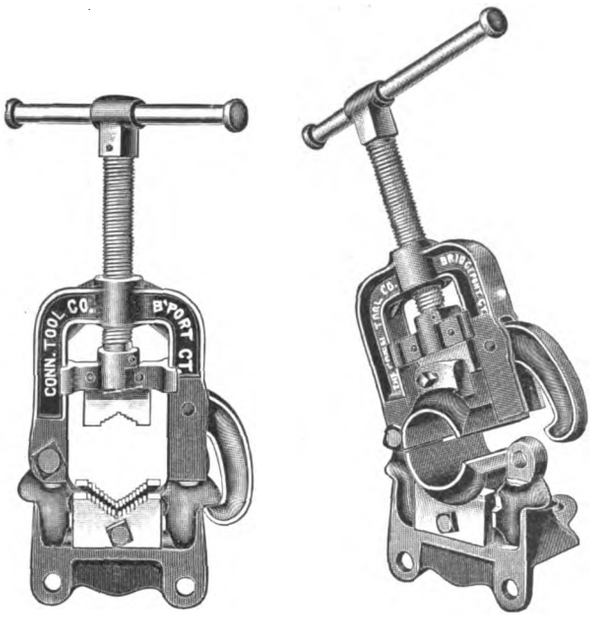


The Goodell Company, Antrim, N. H., are placing on the market a line of Glass Handled Table Knives and Forks which possess so many points of merit that it would seem that they would meet with a very ready sale. These handles are called Vitricene, and are made in either plain or fancy shapes. In either style they are very beautiful, and being made of a high grade of glass that has been put through a process in the Goodell factory, which renders them especially strong, with reasonable care, they will last indefinitely. It is claimed that these handles will not shrink from the ferrule or fade or change color; that they have no cement about them, and are absolutely proof against injury due to change of temperature.

GLASS HANDLED CUTLERY.

"SMART SET" SHOE HOLDER.

During the past two or three years a large number of articles in the Hardware trade that have heretofore been made of castings have been placed on the market made of pressed steel. In practically every case the pressed steel article has been found far superior to its cast competitor. The Kinsey-Burt Company, 136 Liberty Street, New York, are introducing the Smart Set Shoe Holder, which is made of pressed steel, handsomely nickel plated. Owing to its construction, it is claimed that it is impossible to break the holder and further that it is as rigid as though made of cast metal. The worm adjustment makes it possible to hold the shoe rigid in any position desired. The shoe tree is conformable to any size or shape of shoe and when used as a shoe tree it automatically presses out the creases of the shoe restoring it to its original shape. This article ought to prove a valuable addition to the Hardwareman's stock.



"SMART SET" SHOE HOLDER.

REVERSIBLE HINGED PIPE VISE.

The Connecticut Tool Co., Bridgeport, Conn., are the manufacturers of the hinged pipe vise shown in the accompanying illustrations, which contains the important feature of being reversible so that it will open either at the right or left side, which is accomplished by reversing the top. When in use the jaws, which

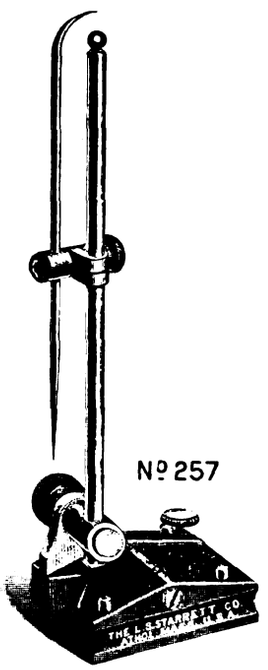
REVERSIBLE FEATURE. BRASS OR NICKEL PIPE JAWS.

REVERSIBLE HINGED PIPE VISE.

are self locking, are held in place by means of a latch. The vise is made of malleable iron, with jaws of crucible steel, milled and tempered, which can be resharpened. The screws are made of machinery steel. The tool is made in two sizes: 1A, taking pipe ⅛ to 1½ inches; 2A, from ½ to 4½ inches. The 1A vise may be quickly fitted with jaws for holding brass or nickel pipe from ⅝ to 2 inches in diameter, as shown in the cut to the right, and these jaws will not mar the pipe.

GATE CITY FILTERS.

It is claimed for the Gate City Natural Stone Water Filter that the reason for its efficiency is found in the disc of natural porous stone which is its filtering medium and which is said to arrest all impurities of any kind on its surface from which its accumulations can be easily removed by the user without taking

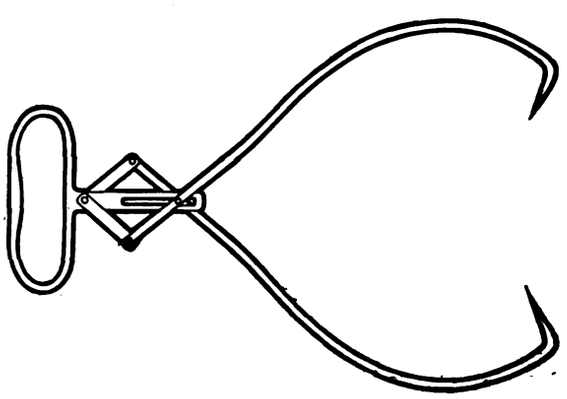


GATE CITY NATURAL STONE WATER FILTER.

the filter apart. The stone used in these filters is mined by the manufacturers from their Gate City Natural Stone Mine. In operation the water drips through this stone and is made pure by this act of filtration. The Gate City Filter is used by over 250,000 people and can be found in many hospitals, colleges and public buildings throughout the United States. It is manufactured by the Gate City Filter Company, 15 East 14th Street, New York, in all sizes from two and a half gallons to seventeen gallons capacity. We illustrate herewith one of their decorated filters.

NEW UNIVERSAL SURFACE GAUGE.

The L. S. Starrett Co., Athol, Mass., are the manufacturers of the New Universal Surface Gauge No. 257, illustrated herewith. It has a heavy case hardened steel base grooved through the bottom and end, adapting it for use on or against circular work as well as flat surfaces. The spindle passes through a rotating head, jointed to a rocking bracket, pivoted in base, the bracket being adjusted by a knurled screw in one end against a stiff spring in the other. The spindle may be set upright or at any



NEW UNIVERSAL SURFACE GAUGE.

angle, or turned so as to work under the base, and can be sensitively adjusted to any position. The snug and head carrying the scriber are so made that when the clamp nut is loosened all may be freely moved to any position, and by friction springs retained in place until a slight turn of the clamp nut holds them firmly. In the base are four gauge pins, frictionally held, which may be pushed to bear against the edge of a surface plate, or in the slot of a planer bed for lineal work. For small work the spindle may be removed and the scriber inserted in a hole provided for it, where it can be sensitively adjusted and used to advantage on bench work. Special attention is called to the four gauge pins in the corners of the base, which adapt it to be used as a locomotive guide liner and make it more convenient than other gauges for many uses. An extra long spindle, which may be quickly substituted for the regular, will be sent with the gauge when ordered.

GLENNY'S "SUPERIOR" ICE TONGS.

W. H. Glenny & Co., Rochester, N. Y., among a large number of household specialties, are making the "Superior" ice tongs which we illustrate herewith, a larger size of this pattern having

GLENNY'S "SUPERIOR" ICE TONGS.

proved so satisfactory to the icemen, they were encouraged to make this size for domestic use. It is made from cold rolled steel, with hardened points and malleable iron handles; opens fifteen inches taking in a good sized cake of ice. They are finished in black enamel, the handles being bronzed, and they weigh one hundred and fifty pounds to the gross.

THE PHILADELPHIA BANQUET.

The nineteenth annual banquet of the Hardware Merchants and Manufacturers' Association of Philadelphia was held at the Bellevue-Stratford, Wednesday evening, January 18th, and was without doubt the most successful affair of the kind ever held in the City of Brotherly Love. Several innovations were inaugurated, among them the invitation of the ladies who participated in a part of the evening's festivities.

At seven o'clock, nearly 200 members and guests of the association, accompanied by about 75 ladies, assembled in the reception rooms on the first floor of the Bellevue-Stratford, and after spending about half an hour in social intercourse, the men adjourned to the Clover Room, where the banquet of the evening was served. The ladies were taken in charge by a committee and escorted over the new hotel, finally returning to the parlor on the first floor where they were served with a buffet lunch. In the Clover Room the banquet committee had arranged the tables in a manner different from the usual custom; at one side of the room there was a long table at which were seated the speakers and guests of the evening. Among those at this table were the following:

T. D. Stewart, Jr.; E. B. Mears, J. R. Seltzer, A. E. Bolles, James H. Ritter, R. R. Williams, E. B. Pike, M. J. Ryan, Hugh McCaffrey, Hon. R. O. Moon, Samuel Disston, John Weaver, Thomas Devlin, T. James Fernley, Rev. Dr. Davies, J. A. McKee, Hon. J. Hampton Moore, William W. Supplee, John E. Harbster, Charles W. Welsh, C. W. Asbury, H. B. Lupton, Geo. Reuter, Jr., Lewis W. Klahr and George Y. Shermer.

The others in attendance were seated at small tables covering the remainder of the room. The tables were strewn with the usual souvenirs and the guests and speakers were presented with a number of special gifts. The banquet itself was, as is usual at this famous hotel, all that could be desired. After the cigars had been lighted several of the small tables were removed, and the ladies ushered in.

Mr. Thomas Devlin, the re-elected president of the association, called the assemblage to order. He thanked the association for the honor conferred on him by re-electing him to his office, and spoke briefly of the extent of the business of the Philadelphia merchants and manufacturers of Hardware. He spoke at some length on the value of co-operation brought about by gatherings of this kind, and of the good work being accomplished by "The shake of the hand and a half hour's chat with a competitor." There was a touch of sadness in his voice as he referred feelingly to those of the association who had in the past year been called to their long home: Edward Darby, E. K. Tryon, Fayette R. Plumb and W. C. Peters. At the close of his opening address, C. W. Asbury came forward and in a few well chosen words presented President Devlin with a beautiful Ivory Headed Gavel, properly inscribed. Mr. Devlin was evidently very much surprised and responded in a witty manner, closing by introducing "One of Josh Billings square bricks," T. James Fernley, who was to occupy the chair as toastmaster.

As a token of respect and esteem for those members who during the past year had died, Mr. Fernley asked the quartette to sing "Lead Kindly Light," all present standing. The toastmaster then, in a jocular manner, explained the presence of the ladies, and introduced the first speaker of the evening, Mayor Weaver of Philadelphia. The speeches of the mayor, and as well those of Michael J. Ryan, J. Hampton Moore and Congressman R. O. Moon were on closely connected subjects, all of them referring to the commercial interests of Philadelphia and the Keystone State, and to the industries of the country at large. Mr. Moore, who has just received his appointment to the office of Chief of the Bureau of Manufacturers in the Department of Commerce and Labor, spoke at some length concerning the work of his bureau. He promised the association that all manufacturers throughout the whole country would be treated alike, and that no special interests would be regarded. He asked business men not to expect all things at once, but to think what should be done, and then make known their views.

Dr. Davies, always welcome among Hardwaremen, spoke on the subject, "Opening of the New World." He referred particularly to the prospective results of the Russian-Japanese War. He reviewed briefly the wonderful history of Japan from the time when, only a few years ago, the inhabitants of the flowery kingdom were little better than barbarians, to the present time with Japan as a world power. He reminded his audience that China was no longer the "Empire of the Dead," and prophesied that the close of the war would bring about a great commercial development of the Celestial Empire. He stated that one matter that was producing a great change in China was the spread of education, the very temples themselves being turned into schools in many instances. In closing, he reviewed the many possibilities for the extension of American trade in the Far East and advised business men to give close attention to this problem.

One section of Congressman Moon's address was of special interest to those present. He reminded them that while thirty or forty years ago the attention of Congress was devoted almost entirely to matters referring to the re-construction of the Government, the questions now before Congress referred almost entirely to the commercial interests of the country. Practically every bill now before Congress having a bearing on either the tariff, interstate commerce, railroad rebates, or labor and capital. He said: "Congressmen of the present day are not Websters or Lincolns; they are business men."

The Banquet Committee deserve to be congratulated for many things referring to this event, especially the introduction of the ladies, the arrangement of the banquet and the very careful selection of the speakers.

The following contributed souvenirs: National Specialty Manufacturing Co., National Cutlery Co., G. & H. Barnett Co., P. & F. Corbin, Henry Disston & Sons, Thomas Devlin & Co., Enterprise Manufacturing Co., McCaffrey File Co., Miller Lock Co., Mayer & Co., North Brothers Mfg. Co., Joseph Dixon Crucible Co., C. T. Ham Mfg. Co., Winchester Repeating Arms Co., and Stanley Rule & Level Co.

HARDWARE ASSOCIATIONS.

Among the State Retail Hardware Associations the following will hold meetings in February:

WISCONSIN RETAIL HARDWARE ASSOCIATION:
Ninth annual meeting, February 1 and 2, Milwaukee, Headquarters, Republican House. Membership, 400; gain since last meeting, 100. President, H. L. McNamara, Janesville; Secretary, C. A. Peck, Berlin.

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION:
Eighth annual meeting, February 1, 2, 3, Fargo. Headquarters, Metropole Hotel. Sessions at Fargo Commercial Club. Membership, 190. President, H. F. Emery, Fargo; secretary, C. N. Barnes, Grand Forks.

NEBRASKA RETAIL HARDWARE DEALERS' ASSOCIATION:
Fourth annual meeting, February 7 and 8, Omaha. Headquarters, Millard Hotel. Membership, 200. President, J. C. Cornell, Ord; secretary, H. J. Hall, Lincoln.

IOWA RETAIL HARDWARE DEALERS' ASSOCIATION:
Seventh annual meeting, February 8, 9 and 10, Des Moines. Headquarters, Savery Hotel. Sessions at Commercial Exchange Hall. Membership, 350. President, S. R. Miles, Mason City; secretary, A. R. Sale, Mason City.

COLORADO RETAIL HARDWARE DEALERS' ASSOCIATION:
Third annual meeting, February 14 and 15, Denver. Headquarters, The Adams. Membership, 125. President, A. L. Branson, Trinidad; secretary, F. C. Moys, Boulder.

KENTUCKY RETAIL HARDWARE AND STOVE DEALERS' ASSOCIATION:
Fifth annual meeting, Louisville, February 14 and 15. President, J. C. Frederick, Owensboro; secretary, John R. Sower, Frankfort.

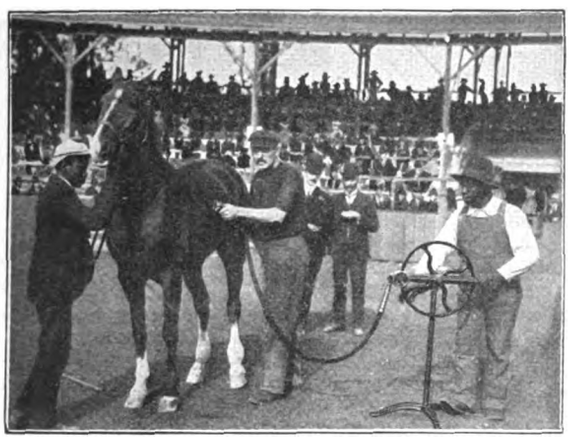
ILLINOIS RETAIL HARDWARE DEALERS' ASSOCIATION:
Seventh annual meeting, February 14, 15 and 16, Peoria. No official hotel headquarters. Sessions at Turner Hall. Membership, 300. President, C. H. Williams, Streator; secretary, L. D. Nish, Elgin.

PENNSYLVANIA RETAIL HARDWARE DEALERS' ASSOCIATION:
Fourth annual meeting, February 21 and 22, Harrisburg. Membership, 200; gain since last meeting, 65. President, Joseph M. Selheimer, Lewistown; secretary, J. E. Digby, McKees Rocks.

INDIANA RETAIL HARDWARE DEALERS' ASSOCIATION:
Sixth annual meeting, February 21, 22 and 23, Indianapolis. Headquarters, Denison Hotel. Membership, 425; gain since last meeting, 48. President, E. M. Bush, Evansville; secretary, M. L. Corey, Argos.

MINNESOTA RETAIL HARDWARE ASSOCIATION:
Ninth annual meeting, February 23, 24 and 25, Duluth. Headquarters, Spalding Hotel. Sessions in Lyceum Theatre. Membership, 600. President, A. T. Stebbins, Rochester; secretary, M. S. Mathews, Boston Block, Minneapolis.

MISSOURI RETAIL HARDWARE AND STOVE DEALERS' ASSOCIATION:
Seventh annual meeting, February 21 and 22, St. Joseph. Membership, 160. President, Taylor Frier, Louisiana; secretary, Fred. Neudorff, St. Joseph.



OHIO HARDWARE ASSOCIATION:
Eleventh annual meeting, February 28, March 1 and 2, Dayton. Headquarters, Algonquin Hotel. Membership, 325. President, John F. Baker, Dayton; secretary, Frank A. Bare, Mansfield.

Digitized by Google

A NEW WORLD'S RECCRD.

The practice of clipping horses is becoming so much in vogue and the number of its votaries so constantly increasing, that the horse clipping exhibition became an important event at the St. Louis World's Fair, and was looked forward to with great interest by that large body of farmers and horsemen who succeed best by the use of modern and scientific methods.

To give the process its best possible showing the clipping machines of the Chicago Flexible Shaft Company were selected for the occasion and an expert clipper, John Yeager, of St. Louis, was chosen to do the work. His time was 17 minutes, but, being stopped and questioned repeatedly by interested persons in his audience or by the judges, time was allowed for this, which reduced the actual time to 13¾ minutes. It is a remarkable showing—gratifying to all concerned, including the large audience. Mr. Yeager modestly attributed his success to the perfection of the "Stewart Clipper," a machine which carries an exhibit of World's Fair prizes from all over the world.

It is claimed not only by the makers but by the users of the machine, that clipping greatly prolongs a horse's life; that a horse, like a man, is liable to "take a chill," while cooling off in a sweaty garment, and that this is the cause of most of the diseases and troubles which shorten a horse's life, and lessen both his beauty and his usefulness and consequently his value. It might be well for farmers and horse owners, who have not given this idea a proper trial, to do so, and find out how much money they can save by the investment.

Stewart Clippers certainly make the horse look smooth and handsome; it seems impossible by any amateur awkwardness to mar a horse with them, as the skin cannot be reached by the cutters.

BISSELL'S BANQUET.

The annual banquet of the Bissell Carpet Sweeper Co., given to the traveling salesmen, and heads of departments, took place at the Pantlind Hotel on Thursday evening, December 29, and was one of the most interesting and delightful functions ever given by the company.

The banquet room and table in point of decoration, and electric effects, was fairyland itself, and fully sustained Landlord Pantlind's reputation for doing things on a fine scale. The table was arranged in a circle, and a veritable flower garden filled the center space.

A novel and interesting place card was used in the form of a cartoon bringing out some characteristic of each person present, and beautiful scarf pins were used for souvenirs of the occasion and were attached to the place cards. As each person had to study every cartoon to locate his place at the table, no end of merriment was occasioned by this first feature of the programme.

A menu for which the Pantlind is famous, was served, and after the banquet short impromptu speeches were made, in which kindly sentiments were exchanged between the salesmen and the officers of the company.

A concealed orchestra discoursed delightful music during the evening, and taken all in all, this banquet will not soon be forgotten by any who were present. During the evening a telegram was read from Mrs. Bissell, from her winter home in Pasadena, California, expressing her regret at her absence from the banquet, and conveying her regards to all present. One of the hits of the evening was a letter from M. Shanahan, treasurer of the company, who with his family is spending the winter in Miami, Florida. Mr. Shanahan's letter was read by the manager of the company, and provoked peals of laughter dwelling as it did in grotesque form on the foibles and peculiarities of the different people present.

The general manager, R. E. Shanahan, made a few remarks in which he emphasized the gratification it gave the company to meet its traveling force once a year at its annual function, and to forget for a short time the burdens of business and to exchange kindly sentiments. There can be no doubt of the wisdom of the Bissell Company's policy of giving these entertainments each year to its salesmen, as it establishes a bond of sympathy and fraternalism between the officials of the company and its men, that is a potent factor for good in a business.

The evening's entertainment closed with a slight of hand performance by the well known master of the magic art, E. Clinton Adams.

HARDWARE PROSPECTS IN CANADA.

From an Occasional Correspondent.

The general business prosperity of Canada is felt in the Hardware trade. During the past year more building has taken place than in any previous twelve months. The business conditions in Canada have been steadily improving since 1893. The improved business conditions have been brought about by the prosperity of the farming communities, by the rapid development of mining, by the largely increased immigration, all of which has made a larger home market. Also the export trade of Canada has constantly increased, especially on manufactured articles—and this development of the foreign market has brought additional wealth into the country.

The soundness and strength of the business interests of Canada is well proven by the fact that no large failures followed the great Toronto fire—and again by the rapid rebuilding of the burned district in that city. The greatest development of the Canadian trade is, however, in Western Ontario and in Manitoba. Few American cities have grown more rapidly or substantially as has Winnipeg. But Montreal is still the great financial centre and will for many years be the great Hardware distributing centre of Canada. To hold the place as Hardware wholesalers, and to better handle their large growing trade Lewis Bros. & Co., are now building a large new warehouse. This new building will be up-to-date and will be equipped with every modern convenience for the rapid handling of goods. Lewis Bros. & Co. have kept apace of the growing business of Canada and being as wide-awake to grasp each opportunity have enlarged their trade—more than doubling it in seven years time. The good wishes of Lewis Bros. & Co.'s many friends in Canada and the States are with them in their enlarged enterprise.

One of the most progressive retail Hardware concerns of Montreal is the firm of R. & W. Kerr, occupying a large double store on St. Catherine Street in the heart of the best retail district of the city. In referring to business conditions Ernest Kerr said to your representative: "Our out-of-town trade is growing. Business in the city is also on the increase, we are making a specialty of hotel and boarding house supplies, and are getting some good contracts. The stove and heater trade has been good and another branch of business—sporting goods has brought us a good share of trade." The store of R. & W. Kerr is a model—one side being devoted entirely to Hardware, stoves and Housefurnishing Goods, the other side to sporting goods and cutlery.

Another well arranged and attractive Hardware store, located at 2266 St. Catherine Street, is that of M. Philbin. The store is light and bright, having windows in the rear. Mr. Philbin makes a specialty of house furnishing Hardware and looks closely after the small pick up home trade.

A new Hardware firm has come into existence as a result of the fire last fall in which the Caanda Hardware Co. was burned out. A. M. St. Arnaud, who for a number of years, so successfully managed the former concern has started a new business—Saint Arnaud & Co.—doing an import business in Hardware and acting as manufacturers' agents. St. Arnaud has a thorough knowledge of the Canadian trade having been connected with the Hardware trade of Canada for the past twenty years. The temporary offices of Saint-Arnaud & Co. are in the New York Life Building.

Mr. A. Y. Jeannotte, of the firm of L. H. Hebert, exclusively wholesale Hardware, is a man of wide experience and there are in fact few better posted Hardwaremen in the Province of Quebec. This being the case any views expressed by Mr. Jeannotte are of interest to all the trade. When asked regarding the outlook for business Mr. Jeannotte said: "The future of the Hardware trade here in Canada can best be Judged by the past—business is growing, the retail Hardwareman here as in the States is constantly adding to the line a greater variety—and is each year doing a larger business. We jobbers are feeling this, and to keep apace are also broadening our lines carried."

Another pushing, growing Hardware jobber of Montreal is Seybold, Son & Co., who occupy a large warehouse built especially for their business. The arrangement of this warehouse could not be improved for the Hardware business. The offices which are large and bright are in front on the first floor. The

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

In the May issue of the Butterick Trio (appearing April 10th), we will have a four page advertisement in colors costing

FIFTEEN THOUSAND DOLLARS.

This is the

LARGEST ADVERTISEMENT EVER PLACED

in this publication for one issue.

We will have in the April issue Ladies' Home Journal (appearing March 25th), an advertisement costing

EIGHT THOUSAND DOLLARS.

This will be the first double page advertisement which has ever appeared in this publication.

We will carry standard magazine sized pages in the following publications in addition to the above during the spring months alone: McCall's, Ladies' World, Good Housekeeping, Munsey's, McClure's, Cosmopolitan, Youth's Companion, Success, Christian Herald, Harper's Bazaar.

The combined paid circulation of these publications is 6,609,665: allowing four readers to each copy (which is conservative), our immense advertisements will reach 26,438,660 readers at just the right time for selling JAP-A-LAC.

Our expenditure for publicity advertising during the Spring months will amount to

SIXTY THOUSAND DOLLARS.

This is by far a larger amount of money than has ever been expended by all varnish houses combined for magazine advertising.

Just think of it,—this expenditure is for four months only. JAP-A-LAC will sweep the market this year. Prepare yourself for some of the dollars.

We are spending this money to help you sell JAP-A-LAC, by educating the consumers fully as to what it is, and what it does.

We will distribute $1000 in prizes for the best Window Displays made "JAP-A-LAC week" which begins April 10th 1905. Let us tell you about it.

ADDRESS 641 WILLIAMSON BUILDING,

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES,

CLEVELAND, OHIO.

rear of the first floor is devoted to the city department. The second floor is used exclusively for a sample room and is one of the best in the city. The floors above are used as stock rooms and the top floor for packing and shipping room. Mr. Seybold, had been confined to the house for some time by sickness, but the business has not at any time suffered, being closely looked after by the two sons, the efficient junior members of the concern.

With a large retail Hardware store at 591, 593 St. Lawrence Street, Amiot, Lacours & Lariviere are carrying on a growing business. The concern also do considerable wholesale trade, having two or three men on the road.

The Kingston, Ont., dealers have been crouching out during the past twelve months. E. Chown & Son are now well located in their new warehouse at 248 Bogot Street. The business of this concern is entirely wholesale and extends into the very smallest towns of Ontario. Mr. Chown said business was good and the outlook very gratifying for Spring business.

Dalton & Sons is the new firm succeeding the old concern of Dalton & Strange. Mr. Dalton, Jr., said that business through the Fall had been good and that the outlook was very satisfactory for Spring.

Up at Brockville on the St. Lawrence River, there are two Hardware concerns doing a nice local trade. A. G. Dobbie & Co., who in addition to a complete stock of Hardware, carry a full line of sporting goods.

A large double store is occupied by R. H. Smart. Hardware and kindred lines is the principal business, although a large business is done in stoves and heaters. Mr. Smart is a wide-a-wake progressive business man and the store proves it.

Not a single merchant interviewed in the three cities mentioned, had a complaint to make of poor business and the outlook for the Hardware trade is exceedingly satisfactory.

HAMMERNAIL.

NEBRASKA RETAIL HARDWARE DEALERS' ASSOCIATION.

The annual convention of the Nebraska Retail Hardware Dealers' Association will be held at Omaha, February 7 and 8, with headquarters at the Millard Hotel, with railroad rates of one and one-fifth on the certificate plan. Indications are for a big attendance and an awakening of interest. Secretary H. J. Hall writes: "The official program for the Nebraska Hardware Dealers' convention is now in course of preparation, and will easily surpass anything heretofore attempted in this line. The design for the front cover is especially appropriate, being a hunting scene, and the binding will also appeal to Hardwaremen. Altogether, the program will be unique and well worthy of being filed away as a souvenir of the convention. It is not the intention to stuff the issue with advertisements, but rather to make it of interest to retail Hardware dealers, so that the program will be read and saved, rather than glanced at and thrown away."

PREPAYING FOREIGN POSTAGE.

A foreign reader calls attention to "underpaid postage" on mail matter sent abroad from this country. His comment is as follows: "Being attracted by one of the advertisements in an American journal, I wrote for further particulars. In return the advertiser sent me a letter enclosing a booklet. The letter was sealed and, with the booklet, weighed considerable. A 2-cent stamp was all that covered the letter. The London post-office collected a shilling and two pence (28 cents) as 'under-paid postage.' This was not all. Owing to the firm's 'follow-up' system, they sent another letter and another booklet. A 2-cent stamp covered this also, and in consequence I had to pay another shilling and two pence for underpaid postage. My inquiry cost me 56 cents in excess of underpaid postage. Now, I thoroughly realize that the delinquency did not arise from the manufacturer's meanness, but was the evident fault of the stamp clerk, who is generally the office boy."

An incident such as is described by the reader just quoted is certainly exasperating and does not aid the business of the American export houses. Apology is due to foreign buyers who have suffered through such carelessness. It is suggested that a word from the buyers to the advertisers, at the time of making inquiries, will soon rectify mistakes and omissions of this character. Exporters to foreign markets do not condone even trifling inaccuracies where it is likely to interfere with the freedom of buyers in making requests for information as to their goods and methods.—*Exchange.*

REVIEW OF THE MARKETS.

WIRE NAILS: Orders are reported as coming in freely but not important as to volume when compared with November and December. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. for cash in 10 days:

Carload lots $1.75
Less than carload lots 1.80

New York. Demand from the local trade is moderate as is to be expected. Quotations are as follows:

Single carloads $1.94
Small lots from stores 2.00

CUT NAILS: Business is moderate and not very heavy in volume being mostly given to drawing on the contract orders already booked. Quotations are firm at the following: Carload lots, $1.75; less than Carload lots to Jobbers, $1.80, and to retailers, $1.90 f.o.b. Pittsburgh. Iron Nails for delivery at Pittsburgh, Buffalo and all points west of these cities, 10 cents advance per keg on Steel Nails.

New York. The local trade is light, but regular. Prices are firm at the following: Carloads on dock, $1.89; less than carloads, on dock, $1.94; small lots from store, $2.00.

BARB WIRE: The demand for the future is very good in the corn belt, while present business is light and likely to increase in volume as the season opens. Mills are busy filling contract orders. Tone of the market is strong. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.90	$2.20
Retailers, carload lots	1.95	2.25
Retailers, less than carload lots	2.05	2.35

SMOOTH FENCE WIRE: Demand is increasing daily, on account of contract orders already given, which the mills have booked freely in anticipation of a change in price. The market is firm and quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots $1.60
Retailers, carload lots 1.65

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advance.

SHEET ZINC: January 7 another advance was announced in Sheet Zinc, the price being made $7.50 per 100 pounds in 600-pound casks, f.o.b. mill, subject to the usual discounts for cash and quantity.

ROPE: Trade is quiet and quite at a low ebb, although expected at this season of the year, Manila rope being in fair request. The following quotations represent the market.

	Cents per pound.
Pure Manila, 7-16 and larger	12 to 12½
No. 2 Manila	10 to 10¼
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼

BINDER TWINE. General market quotations f.o.b. Eastern factories, may be given as follows:

White Sisal (500 feet to the pound)..... 9 @ 10
Standard (500 feet to the pound)..... 9 @ 10
Standard Manila (550 feet to the pound)....10 @ 11
Manila (600 feet to the pound).....11 @ 12
Pure Manila (650 feet to the pound).....12 @ 13

Less than carload lots quarter of a cent extra.

LINSEED OIL: The following quotations were announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....44 cents per gallon.
In lots of 5 barrels or more.....43 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon.

THE ALBANY TRADE.

Good Winter weather has stimulated business, particularly in the goods sold at this season. Trade in Snow Shovels, Skates, Sleighs, Ice Creepers and a few additional articles commonly classed as Winter Goods, has been remarkable. It would seem as though the wants of customers had been pretty well supplied, but re-orders have been very frequent this season. Inventory is absorbing the time of the trade and if stock is priced at the ruling rates, a good showing can be expected. Whether it is best to take advantage of the market rates is difficult to decide as a year hence the reverse may be the case, when a perceptible falling off will naturally follow. A liberal discount from the present ruling prices would seem to be a fair course to pursue. The largest producers, however, seem to convey the idea that present prices will certainly be maintained for quite a period with a strong possibility of higher rates when the season fairly opens. Every one seems to be possessed of the idea that the year is going to be an active one and that a lively demand for goods will start up as soon as the snow and ice have disappeared and the roads get in good condition. Orders taken for Spring business on some of the leading lines in which competition has been sharp do not show a large profit to the merchants. Increase of volume of trade is necessary under these conditions to keep up the standard of profit that is needed. Active work on the part of salesmen is consequently essential to keep up the volume with an increase sufficient to compensate for the smallness of the percentage of profit. We, however, are proceeding, hopeful for our share of the prosperous, active times now with us and which we hope will stay by us throughout the year.

ALBANY HARDWARE AND IRON CO.,
Charles H. Turner, President.

THE PHILADELPHIA TRADE.

The first month of the new year opens auspiciously, and the salesmen who are on the road are sending in a large line of orders. Reports from the South show that the low price of cotton has unfavorably affected trade in that section, and locally we hear some complaint that the severe Winter has hindered outdoor work to such an extent that farmers are buying but little. General trade more than holds its own and it is apparently running ahead of the same month of last year. A most hopeful feeling seems to prevail among all manufacturers. Some revisions in prices are being made, and these, of course, are upward in tone, and there are many promises of higher prices, especially on Staple goods in the near future. It is evident, from the way the trade are purchasing Spring goods, that there is ample faith and a good demand for such goods as Window Screens, Wire Cloth, Netting, Lawn Mowers, etc., as all of these are being ordered for early shipment. It is gratifying to report in some lines, such as Wire Cloth and Hammocks, that there is a growing demand for a better grade of articles. This is notably shown by the demand for Bronze Metal Wire Cloth, which, originally used only at the seashore, is now finding its way into general use, as having recognized merit. With the exception of some portions of the South, collections are up to the average, and we hope that the general inventory will show that the trade of the country is on a sound foundation, and that the profits of 1904 have put dealers in a stronger position than ever before.

BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

It requires time to entirely overcome the despondent feeling that was caused in the last half of 1904. There is some cessation of activity in early January, but February will restore and greatly increase it. We so easily forget the past and join in the spirit of the present that we often deplore our lack of foresight. The difficulty of forming a correct philosophy of business is the personal equation that enters into it. Mathematical and scientifical problems can be demonstrated, but what will be the concensus of opinion is hardly to be guessed, and this is so patent in making good or bad times that one hesitates to predict. But December trade was excellent and orders for Spring shipment liberal. The fear of being buncoed still has some influence, and recent advances are interpreted as a scheme to induce buying, but the amount of steel and iron going into consumption will allay such fears, and everybody forgetting the past will join in the rush to make prosperity certain. The immense demand for iron and steel is a surprise to those who fail to realize the great growth of the country. Traction lines, improved roads and telephones are rapidly changing the possibilities, and they are still greatly underestimated. Double the amount of iron and steel are likely to be used in the near future, immensely increasing the business of the country. Nobody anticipated the change the

Digitized by Google

last twenty years have brought, and it is safe to expect that surprise will be much greater in the future. The cessation of activity in early January is being replaced by largely increased demand, so that the question of how to handle the business is more pressing than how to increase it.

THE LOCKWOOD-TAYLOR HARDWARE CO.,
C. B. LOCKWOOD, President.

THE PITTSBURGH TRADE.

The new year started under favorable conditions and a very much better feeling in business circles. Demand for steel and its products is heavy, taking all the output of the furnaces and mills at advanced prices. This makes activity in the coal and coke works, which employ more labor in proportion to the value of the product than any branch of the steel business. Merchants are feeling the improvement, sales running considerably ahead of last year, but the full effect is still to come and we look for a steady increase in demand for goods as the year grows older. The annual meeting of coal miners now in session in Indianapolis is important, their action affecting so many men, and we trust it may reach wise conclusions as to future demands on the operators. A good boating stage of water in our rivers lately resulted in a large quantity of coal being sent out which had been tied up in our harbor for months. The extreme dry weather last Fall extended up to the holidays and much loss resulted, but recent rains have filled the streams and springs .

LOGAN-GREGG HARDWARE CO.

THE ST. PAUL TRADE.

We consider the present time a strictly buyers market, feeling that the possibility of higher prices are greater rather than lower. We are talking this to our trade with success and are taking future delivery orders, with success. Everything points to our being correct in this estimate of the future condition. Generally speaking, trade is good, though at this time of the year, orders are light. We expect a splendid spring trade and have every reason to do so.

HACKETT, WALTHER, GATES HARDWARE CO.

THE SAN FRANCISCO TRADE.

Out here in the Far West we are hearing from Eastern authorities that trade conditions relating to the entire country for the first fortnight of the new year are exceptionally promising; that manufacturing interests are sending in very good reports, many branches having orders booked for several months ahead and that the best returns are being received from the iron and steel trades, all of which has prompted a Hardware merchant of local prominence to suggest that the writer of this San Francisco letter might well report that on this coast the conditions are as fine as elsewhere in the United States; that we have sold at advance prices almost all of our last great harvest yield of wheat, barley, dried and canned fruits, hops, beans and other leading products of the soil; that our immense wool clip has all been sold at a top figure and the market is bare; that the weather from a farmer's standpoint has been ideal ever since last September and the crops all over the coast are looking finely; that collections are good; that real estate and building operations, both in city and country, are extremely active, and that all conditions indicate continued prosperity.

All is at peace and good will abounds one toward the other as between the wholesale and retail Hardware associations of the coast, and a mutually good time of brotherly fellowship throughout the new year, void of all tiff, of recent memory, is the announcement and prediction of Henry Gracey, secretary of the California State Retail Hardware Association, and Johnson Reynolds, secretary of the San Francisco Retail Hardware Dealers' Association; and in a measure to prevent interference with legitimate business and to permit such merchants to carry on their trades within the bounds of reason the various mercantile and manufacturing associations of the city are the instigators of bills introduced this week in the State Senate and Assembly to put a stop to boycotting.

A half million dollar Hardware business sale was the trade feature of the week, the seller being the pioneer Hardware firm of J. de la Montanya & Co., and the buyer, the Pacific Hardware and Steel Co. The purchaser has taken possession and the stock is being inventoried. The exact consideration will be the inventoried value of the goods, which it is estimated will slightly exceed $500,000. The stock consists principally of a large assortment of stoves, iron, steel, tin-plate and granite ware. No real estate passes in the transaction. For the present the stock will remain in their old quarters, but will be removed soon to the warehouses being constructed by the purchaser at the intersection of Seventh and Townsend Streets. The Pacific Hardware & Steel Co. is composed of the old steel company of George W. Gibbs & Co., and the newer Hardware company of Miller, Sloss & Scott. Since its formation by their consolidation the Pacific Hardware & Steel Co. has been absorbing lesser concerns in the same line of trade, namely, the de la Montanya concern a few days ago, and a fortnight ago the Pacific Pump & Windmill Co., when $50,000 worth of stock was taken over.

The committee on manufactures of the Stockton (Cal.), Chamber of Commerce is anxiously busy these days, since they have only a few more days left in which to accomplish a work they very much desire to accomplish. Their committee work is the result of an announcement made last week to the trustees of the Chamber of Commerce by the Pacific Window Glass Co., of Stockton. This company, the only window glass makers in the State, was established about eighteen months ago by Eastern capital represented by C. J. and U. K. Hurrle of Inidanapolis, where they owned glass factories, and is now not only on a paying basis, but so prosperous that the company's intention is to increase its plant to a capacity equal to four times its present output, so that it can control the trade of the Pacific Coast. This statement the company submitted last week to the Stockton Chamber of Commerce, with this addenda: "It will require $120,000 to quadruple the plant intended, and if the citizens of Stockton will subscribe $60,000 worth of the stock the company will put up an equal amount, and if the people of Stockton will not do this within the current month either one of two other California cities we have heard from, will, and in our selection from these other two the desired plant addition to the Pacific Window Glass Company will be established, the Stockton plant to remain in operation as now." Hence the anxious activity of the Stockton Chamber of Commerce committee referred to.

INDUSTRIAL PRESS ASSOCIATION.

HISTORY OF WEIGHTS AND MEASURES.

The jewellers of the Middle Ages used in their delicate scales the hard brown seeds of the Moorish carob tree (*Ceratonia siliqua*), and the weight of diamonds is still reckoned by carats, each carat being equal to three and one-sixteenth grains of troy. The earliest attempt to regulate British weights and measures appears to have been suggested by this example. In 1266 it was declared by statute that "an English penny, called a sterling, round and without any dipping, shall weigh thirty-two wheat corns in the midst of the ear; and twenty pence do make an ounce, and one hundred and twelve ounces one pound; and eight pounds do make one gallon of wine and eight gallons of wine do make a London bushel, which is an eighth part of a quarter." We have here the basis of the British system of reckoning as it survives to-day—the grain, pennyweight, ounce, pound, gallon, bushel and ton, two hundred and forty silver pence to a pound sterling. The British gallon is still used for both dry and liquid measure.

In 1324 the measures of length were defined by a similar statute providing that "three barley-corns, round and dry, laid end to end," shall make one inch, twelve inches a foot, and three feet a yard.

The thirty-two wheat corns, adopted as the basis of the British system, appear to have weighed twenty-two and a half grains troy, so that the pound of 1266 was equal to 5,400 grains troy. This is the old Saxon pound. The pound troy (pound "du roy") is the Roman pound, and was doubtless in use simultaneous with the Saxon pound for hundreds of years, but it is first mentioned in the statutes in 1414 and was ordained as the standard weight for gold and silver in 1527. As twenty-four grains make a penny-weight troy, the new pound contained 5,760 grains, exceeding the old weight by 360 grains, or three-quarters of an ounce.

The strict pound of twelve ounces was used only in weighing the precious metals, and, with different subdivisions, for the costly drugs and medicines dealt out by apothecaries. For heavy goods, "avoirs du poids," a more liberal measure, was given, like the baker's dozen, and fifteen ounces was called a pound. In the same way twenty-eight pounds was called a quarter, and one hundred and twelve pounds a hundredweight, allowance being made for waste or wrappings. The increase of the pennyweight to twenty-four grains in 1527 raised the value of the ounce to four hundred and eighty grains; and accordingly, the pound of commerce, containing fifteen ounces, was raised to 7,200 grains.

The name "avoirdupois" was transferred at a very early date from the heavy goods which it indicated, to the system by which they were weighed. It occurs first in the statutes of 1335 and 1352. The early pound of fifteen ounces of four hundred and fifty grains each—6,750 grains—was raised by law, as has been shown, to 7,200 grains, making sixteen of the old ounces. In practice, however, the pounds seem to have fallen below the standard to about 7,000 grains, and this weight was finally declared to be a pound avoirdupois.

Mrs. Newwed—Do you keep a servant?
Mrs. Oldwed—Yes, and most of her family.

CELLULOID.

Celluloid is a manufactured article that is entering more largely every day into commerce. Its uses are manifold. There are only three firms in the United States that manufacture celluloid for sale. As the word "Celluloid" is the copyrighted trademark of one of the three, the other two have invented names of their own to apply to the same articles. One is "Fiberloid," the other "Pyralin."

For a quarter of a century perhaps celluloid has been in use. Its advantages were slow to be recognized. People feared it because it was combustible and inflammable, but so is wood inflammable and we live in wooden houses. Occasionally we read tales of "explosions of celluloid;" pure fabrications. It does not explode.

The process of manufacture of celluloid is interesting. Tissue paper or cotton is cut or picked into small pieces, which are placed in a solution of sulphuric and nitric acid and saturated with this mixture. It is then removed from the mixture and carefully washed in water several times, after which it is put in a press and the water squeezed out. The paper or cotton when thus treated is known chemically as nitro-cellulose, cellulose nitrate or pyroxylin. This nitro-cellulose is mixed with camphor and alcohol (either wood or grain) and the mixture is made a homogeneous plastic mass by masticating on steam-heated rollers. This mass is then put in steam-heated presses and pressed into cakes or sheets, after which it is thoroughly dried in steam-heated drying rooms. The only secrets in the business are a knowledge of just what proportion of acids to use, at what temperature to use them, and what coloring matters to use to obtain the best results.

Those familiar with the manufacture of guncotton—which is not necessarily made from cotton, as paper or wood-pulp could be used—will see that the first steps in the process of producing celluloid and guncotton are the same. But there is a vast difference between the two. The United States Dispensatory says: "The name (guncotton) is applied to several closely related yet distinct products." There are at least eight different cellulose nitrates which may be produced by the action of a nitric and sulphuric acid mixture upon cotton, paper or wood pulp. There is, however, some apparent confusion in the books on chemistry as to terms. Some chemists recognize but three grades of nitration—the mono-(1), the di-(2) and the tri-(3), nitrates; while others, such as the United States Dispensatory, mention six, from the mono-(1) to the hexa-(6) nitrate, and still others, from the mono-(1) to the endeca-(11) nitrate.

The object in the manufacture of guncotton for explosive purposes is to have the cotton as highly nitrated as possible. The higher the nitration, the greater is the explosive force. The guncotton used for making collodion (which is made by dissolving guncotton in ether and alcohol) is of a much lower nitration than the explosive kind. The United States Dispensatory also says that "the true explosive guncotton is insoluble in ether and alcohol," and that "the soluble guncotton used in the preparation of collodion is a mixture of the four lower nitrates." The so-called guncotton used in the manufacture of celluloid is of a still lower nitration, about 35 per cent. lower than the explosive kind. It is so low that it is impossible to explode it.

Celluloid is used largely in toilet articles, jewelry, decorations for album covers and so many other things it would be difficult to designate them. The business in the United States aggregates hundreds of thousands of dollars annually.—*New York Commercial.*

ALUMINUM CARS.

New aluminum cars in use in passenger subways in the United States present a clean and really artistic appearance. They are at the same time absolutely proof against fire. Aluminum is rapidly taking the place of many other materials on account of lightness and toughness. One of the drawbacks has been the tendency of this metal to tarnish. This tendency has hitherto prevented its general use in plated ware; there is now, however, a fair prospect of this difficulty being overcome. The announcement is made in a journal devoted to electric chemistry of a process by which aluminum can be given a coating of any desired metal. The film of oxide which covers the surface of the aluminum is removed by adding to the plating bath a small quantity of soluble fluoride, and the metal then receives a superficial coating of zinc or copper, upon which silver or gold can be subsequently deposited. The new process will doubtless be highly valued by the makers of opera glasses, photographic lenses, telescopes and other instruments.—*Exchange.*

E. HENDERER & Co., Wilmington, Del., have distributed an envelope size pamphlet catalogue of pipe vises, all of which are made of a fine grade of malleable iron with hardened steel jaws, while the quality and workmanship are fully guaranteed. The vises and parts are all numbered and they request that in ordering these numbers be used. One of their latest inventions, which they illustrate, is a Double Hinge Vise, patented September 27th, 1904. The vise is made to use either vertically or horizontally, without the use of an angle-plate, thus avoiding the necessity of removing from bench to secure either position. This vise is No. 14 and is made in but one size. Its capacity is from ⅛ to 3½ inch pipe, and weighs 30 pounds. This little book contains a convenient table giving list prices on parts. Each complete vise is also accompanied by price. Send for one of their catalogues.

OUR NEW ORLEANS LETTER.

(Special Correspondence.)

NEW ORLEANS, Jan. 18, 1905.

January has brought something of better hope to the Hardware men of the South than they anticipated from the standpoint of the last two weeks in January. However, the outlook is not yet what they would have it. To summarize. After the incoming of the new year, the trade remained dulled and deadened, apparently past recovery, for some seven days. Then it began to brighten. The men who were hard hit by their overpurchasing, or their decrease in sales to the countrymen or by their bad collections, began to frankly tell the jobbers and the wholesalers just what the situation was. The jobbers, for the most part, have accepted the situation, and have changed their preparations to suit the changed conditions.

Trade just now is estimated to be running just about even with that of last season. The feature of the situation just now is that the implement demand would seem to have slackened up a bit, while the general Hardware lines have quickened a trifle, thus maintaining the equilibrium, for which implements were responsible during the blue days just before Christmas.

Altogether, it would seem that the implement man is going to be very heavily hit in case the proposed cotton convention really does materialize some plan whereby the bankers, the merchants and the planters, among them, decide to work together for a reduction of twenty-five per cent in the cotton acreage. This reduction would just about be sufficient to do away with the planters' usual wear and tear on implements, and he will simply be relieved of his usual forced purchase of new material for worn out goods.

However, there is many a slip between the cup and the lip, and the implement dealers, while they are rather surprised at the slackening of the implement demand, do not believe that the planter will ever seriously consider a twenty-five per cent reduction in acreage.

HOW THE LINES ARE RUNNING.

Just now mill supplies have begun to slacken considerably, and they are now mailing the list of goods being sold. However, builders' Hardware, and building Hardware, household Hardware, etc., are now leading with implements down the line along with the mill supplies.

These lines are running most freely just now to the Southern tier of counties in Louisiana and Mississippi, for the sugar and the lumber districts are just now the most contented with their outlook. The middlemen in these districts have bought heavily, but have not overbought their trade, and in consequence there is still a healthy relation all the way down the line to the consumer. However, the best of the trade in these sections purchases almost directly from the New Orleans jobbers. The sugar planters buy direct, and at jobbers' and middlemen's prices. The sawmill men buy on the same basis. The localities are nearly all easy of access, and the business is brisk and quick.

Much building and builders' Hardware is being shipped, particularly to Southern Mississippi, where the outlook for the coming year is particularly bright. Into Southern Louisiana there is also a healthy movement of general Hardware. Some of the mills are buying mill supplies, but not to any larger extent than was the case one year ago.

Into Mississippi there is a fairly good demand for building Hardware, for a number of improvements were so far under way prior to the drop in cotton that to call them off would have resulted more disastrously than to continue them. However, all the finer lines of trade into this section have practically ceased. There is no Hardware of the ornamental sort going out with any great strength.

As a rule, the middlemen, who had bought over the market for the holiday trade, have, by their almost complete cessation during the three weeks including the end of December and the beginning of January, almost caught up with their stocks, and it is deemed probable that the apparent betterment of trade during the past week has been due to the forced purchases from this source.

Among the rice planters there is considerable buying of a lethargic sort, that might be healthier, but is deemed rather better than was anticipated. Their purchases of implements are less than was looked for, and it is believed that many of the rice planters will attempt to use the implements in their section which the reduced cotton acreage will make idle for the cotton planters.

EVENTS IN THE CITY.

In the city there promises to be disturbances again of a sort that may tie up the building trades for the Spring, and thus do away with a good part of the anticipated demand for building supplies and builders' Hardware. The carpenters, bricklayers and plumbers are discussing strike terms to go into effect about April 1. The demands will probably be for a slight increase in wages, and for union recognition—demands defeated last season. The demands will assuredly be refused.

In the closing days of the old year, however, there was granted a $2,500,000 contract that will bring at least one sort of building material into demand. The Rock-Island-Frisco system let to James C. Stewart & Co., the contract for the erection and excavation of the ship slip at Port Chalmette, below the city, to be 1,700 feet long and 250 feet across, with concrete walls twenty feet thick at the bottom, extending from 50 feet below low water to a point above the highest high water yet known.

In addition there is building in sight to amount to $5,000,000 for the city in case the strikers do not carry out their threats. This does not include the sewerage and paving work now undertaken by the city.

CONVENTION SOCIETIES.

During the week the Executive Committee of the Southern Machinery and Supply Dealers' Association met in the St. Charles Hotel, in New Orleans, to select dates for the convention of the organization to be held during the Spring. The meeting fixed on Savannah, for April 25, 26, 27. The last meeting was in Old Point Comfort.

These members of the committee were present: Peter Blow, of Knoxville, president of the association; C. B. Carter, of Knoxville, secretary and treasurer; George Denny, of Savannah, Ga.; C. H. Briggs, of Dallas, Texas; John Doyle, of Nashville, Tenn.; George B. Smith, of Richmond, Va.; George Strem, of New Orleans, and John Christopher, of Jacksonville. Mr. Christopher is chairman of the Manufacturers' Committee of the Association.

The towns applying for the convention were: New Orleans, Savannah and Knoxville.

All the members of the committee took occasion to comment while they were in the city on the remarkable year that the men in their lines had enjoyed, particularly in the machinery and supplies to the section of the South where cotton is the chief source of wealth. It was said that the membership of the organization had grown steadily during the past year.

According to the figures recently issued by the New Orleans Custom House, the exports of agricultural implements for the year 1904 amounted to $842,000, showing a slight increase over the year before. The bulk of this went to Central and Spanish American ports, although several large shipments were sent to the Black Sea, and some to South Africa.

During the week the cutlery store of Adolph Tittur, 632 Commercial Alley, was raided by some enterprising burglars, who got away with stock estimated to be worth more than $1,000. A discriminating taste was evidenced by the thieves, who picked out the best razors, pocketknives and tableware they could lay their hands to.

A new steamer has been placed in the New Orleans and Central American ports. Vaccaro Brothers & Co. have put in the vessel, an English chartered vessel, larger than any other vessel now in the trade, giving access for exporters to several new ports.

Captain T. J. Woodward, of Woodward-Wight & Co., is being mentioned prominently for the postmastership in New Orleans. He is understood not to be an active candidate, but simply a receptive one in case the present applicant with the backing of the party machinery does not win the approval of the administration.

FIRE AT WINDSOR, ONT.

WINDSOR, Ont., Jan. 10.—Fighting fire amid the crack of bullets and the occasional report of cans of powder was the strenuous task of the Windsor Fire Department this morning at a bad fire in Nelson & Ross' Hardware store. The fire started in some unknown manner in the paint and oil department in the basement. The whole stock and building were entirely destroyed, as well as stocks in adjoining stores. The firemen and the apparatus were coated with ice, and a strong wind helped the flames. Assistance was summoned from Detroit, and a fireboat and firemen from Detroit succeeded in subduing the fire, which at one time threatened to destroy many places of business in Windsor's downtown district. The total loss is estimated at between fifty and sixty thousand dollars, fully covered by insurance. The Nelson stock was inventoried a short time ago at $35,000, while the building, which was owned by the Nelson estate, was valued at $10,000. The firm carried about $40,000 insurance on stock and building.

OUR BRITISH LETTER.

(From our Special Correspondent.)

London, January 14th, 1905.

THE OPENING OF THE NEW YEAR.

Already commercial activity has begun and many business houses have completed their plans for future campaigns. Ironmongers have recovered from the extra work of Christmas trade and Twelfth Night—the traditional date on which holly and mistletoe, once thought necessary reminders of the festive season, were burned—is past, and Hardware windows have assumed their usual every-day garb. Several London ironmongers—notably Benetfink's in Cheapside—made wonderfully artistic displays of fancy goods, and from the way they were gradually thinned during the days preceding Christmas proved very profitable. Enquiries among provincial ironmongers, even in small towns with but from five to six thousand inhabitants, showed that they too reaped considerable benefit from well-dressed windows. The tales told by window dressers and salesmen confirm the opinion I have long held that those ironmongers who devote time and space to display, attract customers and increase business thereby.

LONDON IRONMONGERS PAST AND PRESENT.

The London Ironmongers' Association dinner will take place on the 25th of this month, and will doubtless be well attended. The president, Alderman Pond, is very popular, and the Hon. secretary, E. H. Timpson of Ealing, the son of the ex-president, Councillor H. S. Timpson, is energetic and loses no opportunity for pushing the claims of the London association. The second examination of assistants under the auspices of the Ironmongers' Federated Association has now been definitely settled, and will take place on March 2d. It is to be held in the Ancient Hall of the Worshipful Company of Ironmongers, that old-world guild which, like so many of the London Guilds has outgrown its original character and the trade purposes for which it was designed. However, it has once more been brought into close touch with the Hardwaremen of this country, and it is hoped that the fact of opening its beautiful hall, full of ancient memories, for the purposes of a modern examination of assistants may pave the way to still further concessions. Why should not the funds of the company formed centuries ago for the protection of trade, and the promotion of the best interests of Hardware dealers and craftsmen of medæival London be spent upon forwarding the education of present-day assistants? is a question often asked. Such unions, on modern lines, as those formed by the Hardwaremen of centuries ago, who accumulated funded possessions, are needed badly now. The associations of traders in England have but touched the fringe of grievances waiting to be redressed. It is not trade unionism that is wanted, but friendly co-operation and fraternal association such as the I. F. A. (Ironmongers' Federated Association) offers.

THE PROSPECTS OF TRADE IN 1905.

The prospects of trade in Great Britain during the present year are somewhat mixed, and those manufacturers and merchants who have experienced a long season of quiet do not look forward very hopefully to the immediate future. On the other hand, manufacturers who do good export business as well as home trade are by no means despondent; indeed, many are confident that there is a good time before them during the Spring and Summer months of 1905. Retail ironmongers in this country do not exhibit any exuberant joy at the prospects before them, although they have little real cause for despondency. There are many signs of better trade and even of a brisk demand for more Hardware before long. The recent depression in the Midlands and in the Lancashire district affected the retailers of those localities seriously, but the chief cause of bad trade in the latter area has been removed. The good cotton crops in America point to low prices of raw material prevailing for some time to come; the active enquiries and additional orders coming in seem to guarantee mills working full time, and even overtime, for an indefinite period. The assurance of steady incomes—although possibly small—being earned by the bread winners, gives confidence and brings buyers into the Hardware emporiums of small shopkeepers, who in their turn can pay for the goods they have purchased and buy more. The fairly good harvest reaped throughout all the agricultural districts of Great Britain during the autumn of 1904 means better trade in the rural districts and market towns. This again will enable traders to place more orders for machines and ironmongery, resulting in instructions being mailed by merchants and factors for further supplies of American implements, harvesting machinery and Hardware.

AMERICAN MERCHANTS IN GREAT BRITAIN.

Domestic novelties are very likely to be called for in great numbers this year. I had a farewell letter, just before Christmas, from Walter P. Notcutt of Holborn Viaduct, who was then on the eve of leaving London for the States on a business tour. He intends visiting some of the manufacturers of American domestic sundries and will doubtless pick up some good things. He has been a successful dealer in such articles for many years, and specializes upon American goods. Markt & Co., of 20 Chapel Street, E. C., inform me they are doing well in American guns and pistols; the "Queen" and other special lines made by the Markham Air Rifle Co., of Plymouth, Michigan, are very popular with their numerous clients. The season is now coming on for perambulators and mail carts—nearly all the new cars are built on American types, and the beautiful rattan-cane bodies, first introduced in the States, are almost universally adopted. The Richardson Manufacturing Co., of Worcester, Mass., are very enterprising people and conduct a big business from their European office, 149 Queen Victoria Street, E. C. The machines they principally handle are the "Worcester" mower, the "Bullard" Hay Tedder and the "Worcester" Hay Rake. They also do good business with the "Kemp" manure spreader, the sale for which is under the management of George King, a typical American, who makes an excellent demonstrator and keeps the business in this department going with a thorough Yankee swing.

BRITISH AND AMERICAN ALMANACS AND CALENDARS CONTRASTED.

The New Year has brought its usual crop of almanacs, calendars and booklets. I have examined a large number of such publications, and am bound to say that they fall far short of the standard raised in the States. Taken as a whole English firms do not realize the advantages accruing from the distribution of bright and smart advertising mediums. Agricultural implement firms appear to be ahead of the makers of Hardware, not only in Great Britain, but on the continent of Europe, as well as in the United States of America. The smart calendars published by the Deering, Plano, and other branches of the International Harvester Company, are really good things, and it is little to be wondered at that the International Harvester Company think they cannot do better than reproduce them in the advertising columns of the trade journals they patronize.

CHANGES IN BRITISH REPRESENTATION.

Most of the important divisions of the International Harvester Company have direct representation in this country. Some changes have just been made in connection with the Plano Division. A limited company has been formed henceforth to be known as the Osborne-Plano Company, Ltd., under the control of which the machines made by the Plano Division and by the firm of D. M. Osborne & Co. (whose machines are so popular in England) will be handled. Another important change in the agricultural implement world is the disappearance of the direct representation of the Frost & Wood Company, Ltd. The business of that firm has been transferred to G. F. Thackray & Co. of Victoria Foundry, Huntingdon.

GLASS WALLS FOR BUILDINGS.

An architect in the State of Iowa has devised a method of using glass for the outer walls of residences and public buildings, which he believes to be superior in all respects to other materials. His system provides for a steel framework supported by brackets attached to the beams of the floors, in duplicate, making two walls of opalescent wire glass, the glass being set in the framework.

The glass walls are, approximately, a foot apart, making an insulating dead air space to prevent loss of heat in winter and prevent undue heat in summer.

This system of construction allows of any arrangement of floor plan, because windows are unnecessary. The exterior will admit of any style of treatment.

The glass wall is fire resisting to a practical degree. It has been demonstrated that wire glass will resist a hot fire, and though it would be unnecessary to replace it the fire damage would be local and easily repaired.

The inside treatment allows of a marble wainscoting half-way to the ceiling, with glass over, so that wall space is available for desks, counters, shelving, etc., on all sides of a room. At the same time more light is produced than with windows.

The cost, compared to stone, terra cotta or brick, would be from a quarter to a third less for the outer walls.—*Exchange.*

DUCHARMES NEW CATALOGUE.

The Ducharmes & Co., Shelbourne Falls, Mass., manufacturers of high grade tools, have issued their No. 1 catalogue, a neat book, in pamphlet form, finely printed on excellent paper, illustrated throughout. This concern makes a specialty of hand forged, hardened and tempered screw drivers, using positively none but the highest grade stock in both steel and handles. They guarantee each driver to the trade, and will replace, free of charge, any that break, bend or are not perfect in all respects. Each driver is tested to break a screwhead in its size. The blades are driven into the handle and riveted with an iron pin, making it impossible for blade to work loose. Besides screw drivers they make ice picks, scratch awls, and a nail set and punch. The last named, they state, is something the trade have long been looking for, one that will stand the racket. This they claim will not bend or break and they intend to keep the quality right up to the mark. It is made from the very best steel obtainable. At the back of their book they give a neat and compact list of prices which will be found very handy. Write at once for Catalogue No. 1.

TIME TO STOCK UP ON

BLACK SATIN STOVE POLISH

Our advertising during the coming months will reach nearly 10,000,000 women. Are you ready to supply the big demand that's coming? Do not let your customers send their money to us. **Get the profits yourself.** See your jobber about it without delay.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED JANUARY 10, 1905.

376,102. Step Ladder. J. T. Miller, Chicago, Ill.
376,191. Hand Vise or Clamp. A. H. George, Passaic, N. J.
376,258. Bolt. J. Potter, Morrellville, Pa.
376,276. Chisel. J. R. Bailey, Brooklyn, N. Y.
376,396. Pipe Wrench. D. R. Porter, Chelsea, Mass.
376,413. Tool Handle. W. Millspaugh, Middletown, N. Y.

PATENTS ISSUED JANUARY 10, 1905.

779,417. Skate. P. W. Finkle, Toronto, Canada.
779,489. Wrench. M. C. Morrison, Bar Harbor, Me.
779,503. Fountain Dauber. F. D. E. Robbins, Lansing, Mich.
779,542. Carpet Sweeper. W. D. Hodson, Marion, Ind.
779,843. Fish Hook. C. Fredericks, New York, N. Y.
779,847. Burglar Alarm. O. B. Hansom, Chicago, Ill.
779,917. Door Check. C. Elligen, Santa Barbara, Cal.
779,923. Fire Extinguisher. H. M. Gillett, Grand Rapids, Mich.
779,924. Flower Holder. P. Gommel, Rochester, N. Y.
779,932. Cuspidor. M. S. Hart, Vincennes, Ind.
779,937. Fish Line Bob. L. J. Holt, Phillips, Me.
779,957. Scissors. A. M. Minter, Bridgeport, Conn.

PATENTS EXPIRED JANUARY 17, 1905.

376,439. Floor Clamp. C. E. Holmes, Haverhill, Mass.
376,455. Bench Plane. J. A. Traut, New Britain, Conn.
376,539. Shutter Worker. J. K. McGukin, Newark, N. J.
376,557. Bit Holder for Bit Stocks. H. Smiley, Boston, Mass.
376,572. Hose Reel. J. H. Bacon, Homer, N. Y.
376,577. Can Opener. H. Bruckerman, Table Rock, Cal.
376,596. Combined Scissors and File. C. H. Pawley, New York, N. Y.
376,711. Wringing Attachment for Mops. C. L. Fortin, Whitehall, N. Y.

PATENTS ISSUED JANUARY 17, 1905.

780,067. Safety Razor or Razor Guard. A. W. Scheuber, Hoboken, N. J.
780,172. Blind-Slat Adjuster. J. Hatfield, Brooklyn, N. Y.
780,212. Can Opener. T. T. Merriman, Medford, Oregon.
780,233. Safety Razor Frame. A. W. Scheuber, Hoboken, N. J.
780,259. Safety Razor. J. E. Baker, New York, N. Y.
780,298. Door Mat. T. J. MacCarthy, Holyoke, Mass.
780,305. Wrench. H. H. Riggin, Altoona, Pa.
780,323. Faucet and Line Stop. J. L. Campbell, Butler, Pa.
780,350. Can Opener. M. H. Johnston, Galesburg, Ill.
780,389. Sliding Door Hanger. G. Vogt and J. Miller, Covington, Ky.
780,441. Flush Hinge Door. F. W. Von Oven, Aurora, Ill.

Nichols Brothers, Greenfield, Mass., have recently placed in the hands of their patrons a 1904 catalogue exploiting the knives, cleavers and steels, butcher's saw blades in coils, etc., of their manufacture, which catalogue makes void all previous editions. It is now twenty-five years since this firm began to make butcher knives for marketmen's use, claiming to be pioneers in making goods to take the place of English knives which were then used exclusively by American butchers. They claim their success demonstrates that they have overcome the prejudice which existed in favor of these old brands. They are still sticking to many of the old methods which won for them the reputation their brand now has. Among these they mention forging and hand hammering; tempering by a process used exclusively by them after hardening in oil; grinding by the old whetstone process, and finishing the blades by hand drawing over wheels, and not grinding on emery machines. Their book is thoroughly illustrated and will be appreciated by those interested in their line of manufacture. Secure a copy at once.

GALVESTON'S GREAT SEA WALL.

One of the greatest engineering projects ever undertaken in the United States of America appears in the great sea wall at Galveston, Texas, recently completed, which is the most extensive structure of its kind in the world. The wall measures 17,593 feet long, 16 feet wide at the base, 5 feet wide at the top and stands 17 feet above mean low tide, with a granite riprap apron extending 27 feet out on the Gulf side. The grade of Galveston is now to be raised to slope gradually from the sea wall.

WALKER'S "QUICK AND EASY" VEGETABLE MASHER.

The Erie Specialty Company, Erie, Pa., are introducing through the Hardware and Housefurnishing trades the "Quick and Easy" Potato and Vegetable Masher No. 142, of which we furnish an

WALKER'S "QUICK AND EASY" VEGETABLE MASHER.

illustration. All parts coming in contact with the vegetables are made of malleable iron, heavily tinned. The potato and other vegetables are mashed through a fine rack of steel bars placed 1-16 inch apart, into the pan below, leaving them light, fluffy and free from lumps. All parts are quickly and easily removed for cleaning. There is no waste, as the masher, which is strongly constructed, cleans itself. This machine is largely used in hotels, restaurants, hospitals, colleges and in fact any place where one bushel or less are required. A larger size, No. 141 is called into use where a greater quantity is needed.

MINUTE WATCHMAKING SCREWS.

The fourth jewel screw of almost any of the standard American makes of watches is so small that to the naked eye it looks like a mere speck of metal. It must necessarily be perfect in all respects. When examined under a powerful microscope it is seen that the threads averaged 260 to the inch. It is exactly four one-hundredths of an inch in diameter and over 50,000 could be packed into a lady's thimble with ease. Counting these screws is never attempted, of course, but 100 are weighed on a delicate steelyard and the total number of an output is arrived at by comparing the gross weight with the weight of these. Such tiny screws can only be made in large numbers by machinery, and the operation attending their manufacture is one of the most delicate things in watchmaking.

A POCKET UMBRELLA.

An inventor living in Minneapolis, Minn., has devised a 26-inch umbrella which will fold up, frame and all, into a little case to be carried in the pocket. The handle and all the ribs consist of fine and very strong steel tubes in sections, which telescope one inside of the other. The covering is of very fine silk, which takes up but little room. The wooden handle of the umbrella is hollow, and receives all the rest of the telescoping umbrella rod when shut up. A small and light case, not too big for the pocket, is provided to contain the whole.—*Exchange.*

SENTENCE SERMONS.

Good cheer is half of good courage.
Character is the only true culture.
Borrowed trouble always comes to abide.
When a man has fame he does not know it.
The cynic gets his opinions before the mirror.
A little cant can spoil a whole lot of consecration.
No soul was ever saved by a scheme of salvation.
The crudest truth is better than the most cultured lie.
Trickery in the pulpit does not make truth in the pews.
He who will not pray for others cannot pray for himself.
No man gains anything until he is willing to lose everything.
It will take more than gold-loving hearts to make the golden age.
What the church needs is not fortifying so much as filling with life.
You cannot cover sin by offering 3 per cent. of the spoils to the church.

MAYHEW TOOLS

Are record breakers for quality.

They have "stolen the march" on many similar tools in respect to salability.

If your stock of small Tools is low stock up with Mayhew's.

Our best testimonial of their excellence are duplicate orders.

St. Louis, Mo.—P. Burns Saddlery Company has been incorporated by Patrick Burns, Edward V. and Robert A. Burns, to do a general saddlery and Hardware business; capital, fully paid, $90,000.

Warsaw, N. C.—The H. P. Farrior Company has been incorporated; capital, $25,000; Hardware and general mercantile business. The incorporators are Henry Farrior, F. F. Sanford and H. D. Farrior.

Waterville, N. Y.—W. G. McLean Company has been incorporated, (Hardware.) Capital $20,000, and directors: W. G. McLean, Sarah M. McLean, W. B. Suters, Waterville.

Changes.

Anniston, Ala.—The Anniston Hardware Company are adding a line of mill and furnace supplies to their large assortment of Hardware already carried.

Ashland, Ohio.—The firm of Richard & Stead has dissolved partnership, Mr. Richards having purchased Mr. Stead's interest in the Hardware business, and will conduct it himself in the future.

Barnesville, Ohio.—The McKeever Hardware Company has sold its stock to L. B. Smith & Son, who will continue the business at the same place.

Bristol, Tenn.—The new company which purchased the business of the Barker Hardware Company will change the name of the firm to the Virginia and Tennessee Hardware Company.

Burling, Kansas.—J. L. Evans has traded a farm for N. M. Jasper's half interest in the Hardware and implement business of Reid and Jasper. The style of the new firm will be Evans & Reid.

Canastota, N. Y.—J. Irving Hallagan has bought out E. L. Mason's stock in the Mason & Hallagan Company and Mr. Mason retires from the firm. Mr. Hallagan now holds two-thirds of the stock in the company and William H. Patten the remainder.

Carlisle, Ind.—The firm of Roberts & Alumbaugh, Hardware and implement dealers of this place, has dissolved partnership. This firm has been in the Hardware business in Carlisle for more than twenty-two years. Mr. Alumbaugh retains the Hardware and implement business. Associated with Mr. Alumbaugh will be his son, Harry T. Alumbaugh, and Charles A. Griffin. The latter two will have direct management of the store, each having a third interest in the business.

Colfax, Ill.—H. L. Eggers has purchased the La Rue Bros.' stock of Hardware and will move his stock of harness to that building.

Colton, Wash.—The Kier Hardware Co. has traded its stock of Hardware to A. J. Leavitt of Garfield for a farm of 160 acres.

Dallas, Texas.—The Kenyon Hardware Company has sold its entire stock of Hardware to Thornhill & Malone.

Dallas, Texas.—The property now occupied by the firm of Huey & Philp Hardware Company has been transferred by J. E. Whiteselle and A. V. Lane, executors of the estate of the late Mr. Huey, to the Huey & Philp Hardware Company for the sum of $100,000.

Little Rock, Ark.—Brown & Company and the Camden Machinery & Supply Company have consolidated as the Camden Hardware & Mill Supply Company, with a capital stock of $75,000, and J. B. McCaughey and C. R. Benson, managers.

Ludlow, Ill.—Louis Ledderboge of Rantoul, has bought a half interest in the Hardware and implement business of D. E. Whitmore.

Machias, Me.—W. H. Foss has purchased the entire stock of Crane Brothers Hardware business on Main Street.

Middletown, N. Y.—The Hardware firm of Galloway, Ayres & Galloway has dissolved partnership. George W. Galloway, the senior member of the firm, who is in poor health, retires and the business will hereafter be carried on by John H. Galloway and Frank B. Ayres, under the firm name of Ayres & Galloway.

Pekin, Ill.—Anderson Meyers has sold his Hardware store to Smith Hancock, of Peoria.

Peoria, Ill.—H. S. Hancock has purchased the Hardware stock and business of Anderson Meyer.

Prescott, Ark.—The Prescott Hardware Company are building an addition to their already large store, making it one of the largest buildings in the State, 67x300 feet.

Ritzville, Wash.—The Ritzville Trading Company has been formed with a capital of $150,000, and commenced business as a department store January 1. The company was formed by the consolidation of the Ritzville Hardware Company, and Kendrick & Company interests.

Rosenberg, Texas.—The firm of Hillyer & Marshall of this place sold their Hardware stock to William Morwood & Son.

Sandusky, Ohio.—The Arend Brothers Hardware Company has been sold to Gordon & Sherley, of Elkhart, Ind. They will continue the business.

Sioux City, Iowa.—The Simmons Hardware Company of St. Louis has leased a big building here and will enter the wholesale and jobbing field of this territory.

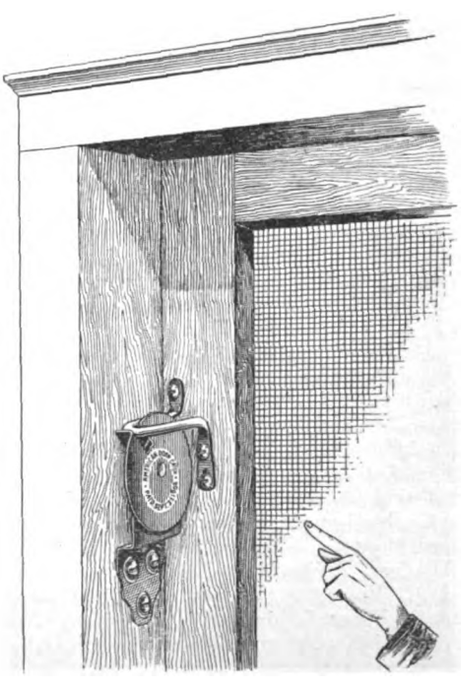
COMFORT SWING CHAIR

MR. HARDWARE DEALER OF 1905



HAVE YOU SEEN A WORKING MODEL OF

THE AMERICAN DOOR CATCH

See
The Circle Action
It
Goes Over The
Center

Simple, Positive
Strong and Silent

We pack each catch, complete in envelope with screws, staple, and cardboard templet, with instructions for attaching. The templet locates the position of screw holes in door and casing, so that any person can attach it. When the customer has the envelope they have it all.

One dozen envelopes in a carton with swing cover showing 2 display cards. Cover remains open on counter showing advantages of Catch.

If you have not seen a model of the American Door Catch, ask your jobber, or write us direct, and we will express one prepaid, no charge.

Do not specify Spring order for screen door catches until you have seen a working model of the American, or an envelope showing how they are packed, and the price. Then use your judgment.

THE BICYCLE STEP LADDER CO.,
65 Randolph St., CHICAGO, ILL.

Sargent's Gem Food Chopper

is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Meriden, Conn.—The Meriden Firearms Company will be the name by which the Sears & Roebuck concern that has bought the Meriden Malleable Iron plant will be known when it begins business here. It is expected that on or before February 1, the company will be in full operation. The branch of the immense line of goods that the Sears & Roebuck Company carries, which is to be made here, will consist of firearms entirely, shot guns, rifles and pistols.

Oakland, Cal.—William J. and Clarence H. Lancaster have recently established a business at 109 San Pablo Avenue, to deal in just three lines: Sporting Goods, Tools and Cutlery, of which they will carry complete lines. The sporting goods department will ambrace complete stocks of guns and ammunition of every make, fishing tackle of all kinds, hunting garments and athletic and gymnasium equipment. An extra fine line of guns, both rifles and shot guns, will be kept for rental at reasonable rates. Clarence Lancaster has been connected with the Freeman and Pierce Hardware stores in Oakland and the C. H. Philpott store in San Francisco, having served in the sporting goods department in the latter place.

Oneida, N. Y.—The Oneida Fishing Reel Company has been incorporated for the purpose of engaging in the manufacture and sale of an automatic reel invented by J. H. Van Horn. The capital stock is $5,000.

Toledo, Ohio.—The Union Fire Arms Company, which formerly held a charter under the laws of New Jersey, has been incorporated under Ohio laws, with a capital of $200,000. The incorporators are John Wickenheiser, John H. Householder, A. B. Tilinghast, George B. Colton and Geo. E. Rouse.

Washington, D. C.—New Process Rubber Company has been incorporated; capital stock, $1,000,000; incorporators, Lawrence Hufty, John R. Lang, Jr., and Thos. G. Miller.

Wharton, N. J.—Eagle Powder & Chemical Company has been incorporated; agent, H. C. Hazzard; to manufacture and sell explosives of all kinds; capital $25,000. Incorporators: R. M. Cushing, R. B. Cushing, E. W. Cushing, New York.

Changes.

Akron, Ohio.—The Enterprise Manufacturing Company, manufacturer of Pflueger's fishing tackle, has lately installed considerable new machinery and materially increased its capacity.

Bristol, Conn.—The capital stock of the Horton Manufacturing Company has been increased from $50.000 to $100,000, and is paid out of the surplus. The concern manufactures steel fishing rods.

Sharon, Pa.—The Driggs-Seabury Ordnance Corporation have decided upon a further extension of its works now in course of erection here. The shell building will be enlarged by 100 feet. The company expects to start its works in three weeks. Rapid fire guns from one up to six inches and projectiles will be manufactured. The plant will afford employment to 500 hands.

Miscellaneous.

Camden, N. J.—Officers for 1905 were elected by the Stockton Wheelmen, as follows: President, John E. Cullingford; vice president, Joseph Gondolfo; recording secretary, Albert Reidinger; financial secretary, Adolph Bothe; treasurer, Frank A. Williams; board of trustees, Fred. Jones, Charles P. Johnston and Thomas Richards.

Lebanon, Pa.—The Century Wheelmen held their annual meeting recently in the clubhouse, on North Ninth Street. The following officers were elected for the coming year: President, Edward Snavely; vice president, Walter Hartz; financial secretary, Charles G. Gebhard; recording secretary, Carl Hermann; treasurer, Charles C. Frantz; captain, Harry Frost. All the officers elected constitute the Board of Directors of the organization.

Madison, Wis.—Cyclists in Wisconsin will not have to pay taxes on their machines this year owing to a law which went into effect January 1. The law was passed at the last session of the State Legislature, and it removed bicycles from the list of taxable personal property.

New York, N. Y.—At the meeting held January 9th, the Associated Cycling Clubs, of New York, decided to hold a 25-mile road race the coming season. The date of the contest will be fixed later, and all other arrangements will be left with the race committee.

North Topeka, Kan.—Sprague Chase has moved his Hardware store from the H. M. Clime building to 420 Kansas Avenue, South.

Ritzville, Wash.—The Ritzville Hardware Co. and A. T. Kendrick & Co., general merchants, are to consolidate and form the Ritzville Trading Co. The frame building on D Street, now occupied by the Ritzville Hardware Co., will be removed and on the site a two-story brick will be erected, making three two-story brick buildings to be occupied by the new firm.

South Manchester, Conn.—Nathan B. Richards, who has been connected with the Blish Hardware Co. for some time, and F. A. Farrar have purchased the business of the Blish Hardware Co. upon the retirement of Mr. Blish from the firm.

South Norwalk, Conn.—The old establishment of Watkins & Dow, formerly known as Comstock, Watkins & Dow, has ceased to exist and the business has passed into the hands of Charles E. Dow, mayor of this city.

Springfield, Ill.—Edward C. Anderson has purchased Adams Bros.' Hardware store.

Thawville, Ill.—J. K. Jones traded his Hardware stock and building to Ray Blasdel, of Pontiac, for 640 acres of wheat land in Canada.

Troy, N. Y.—Frederick R. Blake has purchased the Hardware business of Willard W. Cooley at 822 River Street.

Urbana, Ohio.—The Hardware Supply Co., which has been carrying on a general Hardware business in Miami Street for the past few years, has dissolved partnership. Messrs. Knight and Ambrose retire from the firm, while the businesss will be continued under the old firm name in the future by James S. Robson, who has purchased the interests of his heretofore partners together with all the book accounts.

West Winfield, N. Y.—John A. Jones, of the firm of Jones & Howell, Hardware dealers, has sold his interest in the business to Everett Clark.

Utica, N. Y.—David S. Foster, a wholesale and retail Hardware and iron dealer, has just been succeeded by David S. Foster, Sons & Company, Mr. Foster admitting to partnership a number of young men who have been associated with him for years and who have helped to make his business successful.

Winneconne, Wis.—C. H. Gove of this village has recently purchased an interest in the Wilson Hardware Company. The name of the new firm is the Wilson-Gove Hardware Company.

Detroit, Mich.—The partnership concern of C. H. Blomstrom and Co. has been incorporated under the name of the C. H. Blomstrom Motor Co. The capital stock is $100,000. The incorporators are Chas. H. Blomstrom, Samuel R. Kaufman and Nathan M. Kaufman of Marquette.

Hartford, Conn.—The Empire Manufacturing Company has been incorporated to manufacture games and toys with a capital of $55,000. The incorporators are L. S. Lewis, Hartford; George B. Risley, Rocky Hill; C. J. Dorsey, Baltimore.

In addition to the general line of Hardware and house builders' and furnishers' goods, Fuller-Cook Company will make a specialty of sporting goods.

Malden, Mass.—Edward B. Belcher, a mechanical engineer, has purchased the machine shop and business of Frank P. Greene, 20 to 26 Green Street, and with increased help and facilities will continue the business, giving special attention to the repairing of automobiles.

Trenton, N. J.—The DeLask-Thropp Circular Woven Tire Company is a new concern which manufactures a circular woven wire tire, recently invented, which has met with great success in this country. Frank W. Thropp recently sailed for Europe in the interests of this automobile tire, where he will visit the principal cities of England and France and will establish agencies for the DeLask-Thropp tire.

Westport, Conn.—James Barry of Rahway, N. J. will establish an industry here for the manufacture of 4th of July fireworks novelties.

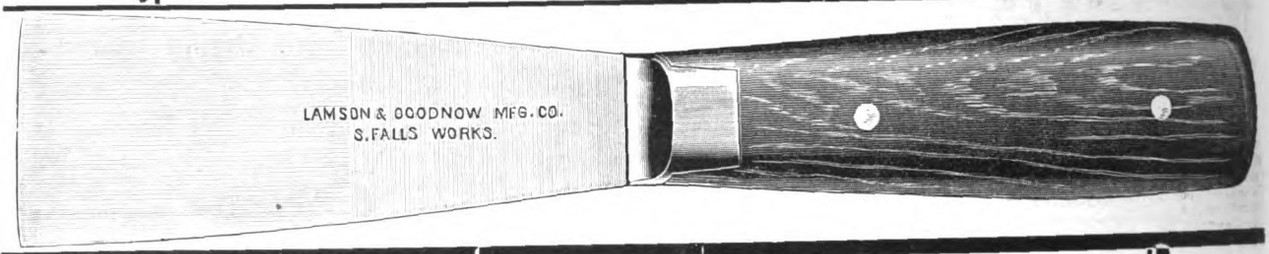
Capture the Paint Trade

With Lamson & Goodnow Putty Knives.

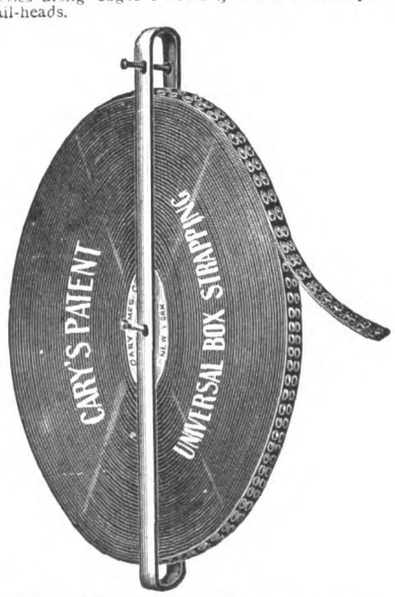


¶It is common talk among hardwaremen that L. & G. Putty Knives are Leaders—being more solid, substantial and serviceable than other makes.

¶Our best testimonial is that thousands of painters use no other kind.

¶Don't stock up on Putty Knives till you have OUR prices.

¶Write us at once—mention HARDWARE.



Lamson & Goodnow Mfg. Co.

Shelburne Falls, Mass., U. S. A.

CARY'S UNIVERSAL BOX STRAP

A continuous Metal Strap with a series of raised bosses along edges to strengthen it and to protect nail-heads.

Put up in coils 300 feet each.
Patent Metal Reel Frame with each coil.
Straps made in four widths: ½, ⅝, ¾ and 1 inch.
Patented in all countries.

CARY MFG. CO,
19 & 21 Roosevelt Street, New York.
Cable Address: CARLEIO

20th Century "White Flame"

Combination HEAT AND LIGHT

Attaches to any Chandelier, Wall Bracket or Portable Stand.

Gives great heat and brilliant light at one time and at one cost.

Delays "Stove and Furnace Time."

There are generally bath-rooms and other places in houses that are better for extra heat, particularly if it adds nothing beyond the cost of the usual illumination.

Must not be confounded with "old-fashioned blue flames," because it gives greater heat besides the light and is strictly **Hygienic.** Retails $1.25.

Only 8 inches diameter, but it does the work.

Send for circular and discounts.

20th Century Mfg. Co.
19 Warren Street, New York.

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

The Blackstone Rotary Washer

THE Hardware dealer who wants to put money in his safe, should put a Safe Washer in his store.

The Blackstone Rotary is the safest washer to handle—the safest to use. Every dollar invested in Blackstone Rotaries earns compound interest both for you and your customer.

Prove this to yourself by displaying it in your store and—tell your customers about its excellence.

It is *The* Washer that gives all-round satisfaction.

Send for catalog and prices.

The Blackstone Mfg. Co., Jamestown, N. Y.

I DO NOT BELIEVE

that there is a hardware dealer anywhere who ever sold a washing machine to a hotel, hospital, Sanatorium or Laundry.

WHY?

Because the manufacturers of laundry machinery do their business direct with the trade. The cheapest wooden washer suitable for hotel or laundry use sells at $30.

My Large Paragon Washer, made of **metal,** better in every respect, retails at $18, and this includes a big profit for the dealer.

SEE THE POINT?

There is a chance to open new fields and "Paragon" satisfaction will incidentally advertise your other goods.

Write for some circulars, mail them to hotels and institutions in your town, and watch the surprising results.

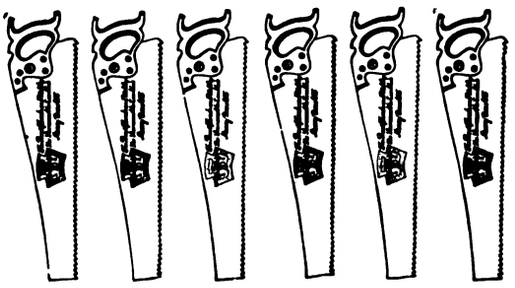
The following testimonials will open your eyes.

R. W. PICK, Sixth Avenue Laundry, 926 6th Ave., NEW YORK: "Your 'Paragon' Hand Washer is the best up-to-date in my experience. The two in use in my place are doing the work of five washwomen, quicker and cleaner in every way. The easier running and durable construction make the 'Paragon' cheap at double the price and in my 15 years experience in hand laundry I never felt more satisfied than since I use the 'Paragon;' it is as great a clothes as it is a labor saver. I can highly recommend the 'Paragon,' and it can be seen in operation every day in the week at my laundry."—R. W. PICK.

NEWARK SANATORIUM, 252 Littleton Ave., NEWARK, N. J. "The 'Paragon' Cylinder Washer which I purchased has given entire satisfaction in every detail. I have used several machines of various makes, but have found them all faulty until I got your machine, which is both a labor and linen saver. My only regret is that I did not know of the 'Paragon' before."—Dr. CHAS. LAUTERWASSER, Prop.

I have similar recommendations from Schools, Dyers' and Cleaners', Hotels, Summer Resorts, etc., etc.—Dealers! Here is an article without competition.

EMIL R. BECKERT,



1175 3rd Ave., New York, **Philadelphia Branch: 208 S. 11th St.**

P. S.—**The "Paragon" Washer, family size, is the most rapid seller known in the history of household machinery. A dealer who does not handle the "Paragon" is behind times!**

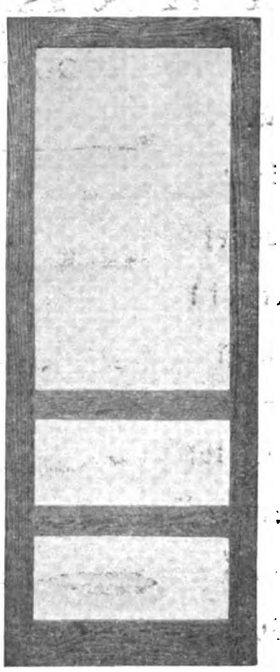
"The New Screen is a 'Dandy.' I'm good for 20,000 Doz. next season."
—*F. P. Wilkinson, our New York City Sales Agent.*

A Cent a Screen

MAY be worth saving. But you haven't saved it if the screen doesn't sell. You haven't saved it if the screen is brought back by a dissatisfied customer.

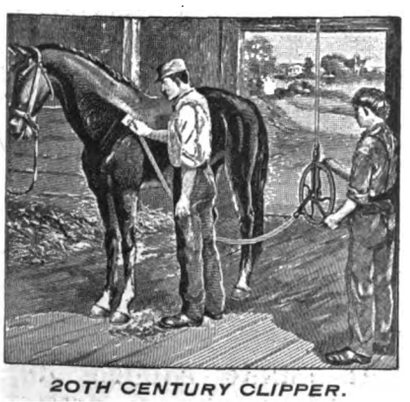


When a woman comes into your store, the good looks of the **AIR LINE WINDOW SCREEN** strikes her first. The faces of the frames are free from slots, grooves, saw cuts, staples and mixed kinds and colors of wood and slivers. She can understand that when the screen is in the window it will look more like a solid frame screen than any other. She works it accordion fashion to see if it will "adjust," smiles and asks the price. That is right too, and **SHE WILL NEVER BRING THAT SCREEN BACK.**

"Air Line."

The Air Line is a thoroughly good screen without metal clips and will be made from good materials. Costs no more than any other respectable screen. Write us for free sample.

THE NEW STYLE "F" SCREEN DOOR is after the pattern of the High Grade Doors, has one coat of dark green paint. It is modest in appearance and sells well to people of good taste with slender purses. The paint will wear several years and is much more durable than a stain finish. Yields a GOOD profit, retails at $1, and is GOOD RETAIL VALUE at $1. Sample of finish mailed on application.



Style "F."

Send for catalogue showing complete line of Screen Doors, Window Screens, and Window Screen Frames.

The A. J. PHILLIPS COMPANY,

23 Years Experience Making Screens. **Fenton, Mich.**

20TH CENTURY CLIPPER.

SEASONABLE GOODS

20th Century Clipper, List $5.00
(Cost but little more than a good hand clipper)

The 1902 Chicago Clipper, List $10.75

and the

1904 Stewart Sheep Shearing Machine,
List $12.75

They are recognized as the best sellers in the horse clipping and sheep shearing machine line ever made. More of them are sold twenty times over than all other makes combined. They are displacing the old fashioned variety everywhere—and are for sale by leading jobbers and dealers everywhere. Send for catalog and prices.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

HARDWARE

The National Enameling & Stamping Company, George V. Hagerty, manager, makes the following announcement: For the convenience of the trade, we will remove our office and sample room February 6, from 78-80 Beekman Street to 374-376-378 Broadway, corner of White Street, where we will show a full line of the goods we manufacture. We shall be pleased to have you call and make your headquarters at our office when visiting this city.

♦

The annual meeting of the stockholders of the Savage Arms Company, Utica, N. Y., was held on January 25 and the following officers were elected: President, Benjamin Adriance; vice-president, Walter Jerome Green; secretary and treasurer, J. DePeyster Lynch. Mr. Arthur W. Savage is no longer connected with the company in the capacity of managing director and is therefore not authorized to make any transactions for the company.

♦

The officers and salesmen of the Adams & Elting Company, about twenty-five in all, held a two days' session at the Hamilton Club, Chicago, the first week in January. The exchange of ideas by the different salesmen from all sections of the country, and the talks by experts on the numerous products of the Adelite Line, proved a help and an inspiration to everyone. At the banquet given on the evening of the second day, William Boyd, of Chicago, gave a very interesting talk on the relationship of advertising to salesmenship. Conventions of this kind do much to promote that co-operation between employer and employee which brings the highest success.

♦

N. & G. Taylor Co., Philadelphia, Pa., have sent us two copies of "The Arrow." One is "Ye Twelfth of Ye Second Quiver," being the Christmas number in which Rufus the Roofer talks to his son about a roofer who has so little confidence in his work that he has to collect his bill before the weather gets ahead if him. Needless to suggest that Taylor Old Style was not used on that roof. The other "Arrow" is the "First of Ye Third Quiver," and is their New Year's number to which they call particular attention, in which Rufus the Roofer tells the young man about people being "too smart." Besides very much other instructive and interesting reading, each Arrow contains one of the parodies on the Sherlock Holmes stories, which have aroused much interest among the friends of "Taylor Old Style," tin.

♦

W. H. Bennett, who for 19 years has been with the Reading Hardware Company, Reading, Pa., nearly the whole of which he has been manager of the Chicago office of the firm, has resigned to give his entire attention to the business of the Lawson Mfg. Company, 40 Dearborn Street, Chicago, of which he is the secretary and treasurer. Mr. Bennett has been an active worker in Hardware circles in the West for nearly 20 years. He is an honorary member of the Illinois Retail Hardware Dealers' Association and an associate member of the Chicago Retail Hardware Dealers' Association. The Lawson Mfg. Company makes a line of Door Hinges, Window Locks and other Hardware specialties.

TEXAS RETAIL DEALERS.

The Retail Dealers' Hardware and Implement Association, of Texas, in convention in January in Dallas, elected the following officers for the ensuing year:

President, S. L. Erwin, Honey Grove; secretary and treasurer, J. W. McManus, Waxahatchie; first vice-president, R. L. Penick, Stamford; directors, T. T. Clark, Ennis; H. S. Allen, Calvert; W. A. Spangler, Bonham; D. B. McCall, Waxahatchie; W. M. Gunnell, Charles Hutchins, San Marcos.

The convention was in session three days, and transacted an immense amount of business.

PATENTS IN 1904.

The report of the Commissioner of Patents for the calendar year 1904 shows receipts of $1,657,327; expenditures, $1,476,000, and balance in Treasury to the credit of the Patent Office, January 1 last, $5,863,867, which includes receipts of past years. There were 52,143 applications for patents, an increase of nearly 2,000 over 1903, and 20,429 patents expired. There were 30,824 patent designs issued, 110 patents reissued, 2,158 trade marks, 1,114 labels and 297 prints registerd. More patents were issued to citizens of Connecticut in proportion to population than to any other State, one to every 1,097 persons.

INCREASE THEIR CAPITAL STOCK.

Owing to the increased business the Hackett, Walther, Gates Hardware Company, of St. Paul., Minn., has filed amendments to its articles of incorporation increasing the capital stock from $300,000 to $600,000 thus doubling it. The company had a very prosperous year in 1904 and looks for a still better one in 1905.

AN IMPORTANT PATENT SUSTAINED.

The United States Circuit Court of Appeals for the 7th Circuit (Chicago), in the case of Murray vs. Orr & Lockett Hardware Company, really The Bicycle Step Ladder Co. vs. Coburn Trolley Track Manufacturing Co., of Holyoke, Mass., on January 13, handed down its decree fully sustaining the Murray patent and declaring the Coburn ladder an infringement thereof. The case was decided on an appeal from the U. S. Circuit Court.

This case was commenced in March, 1902, and was ably and fully contested at great expense, both to the complainant and the defendant. The decision is final, there being no further appeal to a higher court possible. The Coburn ladder differs mainly from the bicycle ladder in that it makes use of small rollers in its upper bearings while the bicycle ladders make use of plain hooks.

The decree sustains the patent in the fullest manner possible. It means that any ladder built on the principle of sustaining the whole weight, practically, on the rollers at its lower end and making use of a secondary or guide bearing at the upper end, which serves the purpose of preventing the ladder from tipping over, is an infringement on the patent. This is so whether the upper bearing is a plain hook, a hook in combination with rollers or rollers with flanges serving the same purpose as the hooks in the Murray patent. The user of such a ladder is liable for damages as well as the maker. The court declares that The Bicycle Step Ladder Company were the first inventors of such a ladder and that they are entitled to the fruits of their invention.

UNION MFG. COMPANY.

The Union Mfg. Company, New Britain, Conn., at its annual meeting January 28 increased its Board of Directors to its full number of seven, by the election of George W. Corbin and A. F. Corbin. The old board, A. J. Sloper, A. W. Rice, L. C. Clark, L. A. Vibberts and M. L. Bailey, for the past five years, were re-elected. At the directors' meeting, which followed the annual meeting, George W. Corbin was elected president, A. F. Corbin, vice-president and factory manager, and M. L. Bailey, secretary and treasurer and office and general outside manager. John W. Carleton, who has been the company's superintendent for many years, still continued in that capacity.

BENEDICT COMPANY CLOSES ILLINOIS FACTORY—FAVORS EAST SYRACUSE.

The M. S. Benedict Manufacturing Company has closed its plant at Ottawa, Ill., and most of its 100 employes and their families will move to Syracuse and East Syracuse. All of the equipment from the Ottawa factory, with the exception of the power plant, will be moved to East Syracuse and placed in a new factory building which is rapidly nearing completion.

The new plant at East Syracuse is of frame, slow burning construction, 55x100 feet in dimensions and two stories high above the basement. The first carload of equipment from the Ottawa plant was loaded recently and the company expects to have the plant ready for operation next month.

The company owns the property in Ottawa which is being vacated. No disposition has been made of it. An effort is being made by the Benedict Company to consolidate its interests at East Syracuse. During the past two years extensive additions have been made to the plant. Harry S. Benedict, president of the company, said recently that orders are coming in freely from all parts of the country and the outlook indicates the biggest year in its history.

FEBRUARY 10, 1905.

Editorial Trade Review

The continuous cold weather with zero conditions has made the business so far this month rather halting in its volume; the immediate wants have not had to be catered to and the volume of purchases needed for Spring sales had already been secured by the larger dealers who have prepared themselves for receiving them at specified dates. Advances in prices have taken place on a number of lines, but not to the extent that was deemed probable; prices have stiffened up, special arrangements have been withdrawn, quantity discounts have been cut, and the decks cleared for action when the active demand shall again become a prominent feature. Advances are relied upon to make a good Spring opening of business, for the supposition is that a vigorous business can be anticipated when the advances on leading goods may be divided with a customer, and he thereby made happy.

The Retailers do not feel at all anxious about laying in their stocks any too early, especially the smaller dealers; throughout the country the roads are covered with snow; sleighing is very good and continuous with a further demand for belated Winter goods, the farmers are coming to town making sales good, and the working off of a Winter stock is regarded with pleasure; it has been exceedingly active, and it will be necessary to carry but few of the usual goods over to another season.

The Retailers in Convention assembled, in every direction are holding conventions, garnering fresh ideas with which to fight the common enemy, the Catalogue House, the strength of whom is daily increasing by the addition of factories to their equipment. The meetings held so far have been of an enthusiastic description, and the gatherings have all been love feasts of the most harmonious kind. The strength of the associations has been greatly augmented, more dealers annually joining the ranks, and combining for the good of the greatest number, but always leaving enough to make an opposition worthy of some attention. When they gradually return to their homes and settle down to business, it is expected trade will move with strength. The travelers for the jobbing houses will find it plain sailing, and trade will have commenced in earnest; orders will be frequent and everybody will be happy.

Then the time to add to stock will be found appropriate, and the assortment of the dealer will doubtless be increased by new lines of goods which everyone knows he can sell if carried in stock. Of new lines, the dealers should feel their way, buying first in limited quantities; increasing the number of lines, is a better policy than the overloading of stock, but the consumer should be made aware good and early, of all such efforts to make yours an up-to-date stock, as that will tend to keep out of reach the competition of the catalogue houses.

Among the jobbers, the amount of trade for January has been of an encouraging character, and of satisfactory volume.

The promise of steady conditions among the mechanical trades, with an improvement in the labor markets in every direction, will have a tendency to bring the better grade of tools to the front, those that have not been sold to any extent during the past year. Dealers are overhauling their stocks with a view to replenishing them with the most improved tools of good quality that can be had. The day when anything will do that will answer the purpose, has been relegated to the background; and catalogue house competition has opened the eyes of the wide awake dealers, and made the disposition to keep their stocks up to date widely prevalent.

While the advances on goods since the first of the year has been fairly frequent, they have not been of a radical character that would cause a dealer to hesitate about ordering without some concessions being made. Among the goods affected by changes may be mentioned Strap and T. Hinges, Bright Butts, Sledges and Hammers, Wringers, Picks, Mattocks and Grub Hoes, Tinware and Galvanized Ware. In a great many cases the advances came in the shape of the withdrawal of special concessions that could no longer be given; causing a hardening of prices which do not show on the surface of market quotations.

There is now at this season of the year many delays in the shipment of specified requisitions on orders. Goods purchased in carload quantities that should be only a few days reaching their destination under favorable conditions. take as many weeks. Whether this is due to the severely cold weather we have had lately, or short crews on freight trains, or inefficient management or any other causes, the conditions are certainly of an aggravated character on some of the contracting lines.

There is a feeling prevailing to some extent throughout the trade which looks forward with a feeling of confidence for this Spring's sales of Builders' Hardware; and they are ordering enough of this class of goods to endorse their views, anticipating a good business in Locks, and Locks in sets, fancy butts to match, and door knobs of the latest style, and everything appertaining thereto. There is indicated a demand that will take a good supply of these goods, for an amount of building is planned that will absorb them. The increasing wealth of the country is noticeable in trade centers in the desire for a better class of houses in which to live, from which rentals may be obtained that will remunerate the capitalist handsomely, and the money can be had for these improvements at low rates, thus making this a most favorable time in which to promote movements of this character.

MAINTAINING THE PRICE

By A. EUGENE BOLLES

Maintenance of prices has been suggested in many instances as a specific for the elimination of all troubles arising from department store and mail order house competition. It is not a new remedy by any means, but it seems to have been put forward recently with additional force. Neither is it an untried remedy for several manufacturers in this country have tested the matter thoroughly with varied results. In a few instances where the policy has proven successful those manufacturers have wisely continued its use, and there are several concerns whose goods can only be bought at certain prices by the consumer regardless of the character or location of the business of the distributing agent.

On the other hand the attempt on the part of some other manufacturers to insist that certain prices be maintained on their goods has produced adverse results. In one particular case where recently a certain manufacturer having refused to sell his goods to a Western catalogue house unless the selling price be maintained, the catalogue house has purchased a vacant factory building in a New England town and is fitting it with machinery for making the goods heretofore purchased from this manufacturer. This is not the first instance of the kind as several different lines of goods are being manufactured by the two larger mail order houses. In view of these facts it is obvious that manufacturers of well known patented articles of the sort that cannot be closely imitated, can with safety to themselves insist upon the maintenance of prices and by so doing keep down to a minimum unjust competition on these particular articles; while on the other hand when the maker of staple or semi-staple goods attempts to put into force such a policy it not only results in his losing entirely the larger orders of the mail order houses, but creates as well in many cases

NEW COMPETITION

to his own line of goods. Is it to be wondered at, therefore, that manufacturers are hesitating in this matter?

The writer was talking to a certain manufacturer a few days ago on this subject. The manufacturer said: "There is one article in my catalogue that we have been making for about twenty years. It has been listed and illustrated in the catalogues of several of the leading jobbers who sold very, very few. A little more than a year ago I was induced to accept from a catalogue house an order for these goods and, do you know, including the orders I now have on my books from this firm, they have ordered from me in a little more than a year more of these goods than I sold altogether through Hardware jobbers during the previous twenty years. Now suppose I would say to that mail order house "Sell those goods at a certain price, or I won't let you have any more of them," what would they do? Why, they would be manufacturing them inside of sixty days, or at least making such a good imitation that it would pass with their trade."

No one regrets the condition of affairs more than the writer, but who can be absolutely honest and condemn that manufacturer. Some might go so far as to say that he should, if necessary, cut off that branch of his business entirely "for the good of the trade" but it requires very little foresight to perceive his ultimate finish should such action be taken. Few business men are willing to turn themselves into human sacrifices, especially where such a sacrifice would be in vain.

THE LEGAL RIGHT

of the manufacturer of a patented article to enforce its being sold at a specified price was covered in the decision rendered in the United States Circuit Court of Appeals in the case against "The Fair" by the Victor Talking Machine Company. The court reviews the facts referring to the patents on the Victor machine and the manner of its sale to jobbers and dealers, namely, on contract that they should be sold at retail for a certain specified sum, and states that in spite of this "The Fair" having at the time full knowledge of the restrictions under which the jobber took the machines, purchased and acquired possession of them, with the labels conspicuously attached thereto, from the jobber; advertised them for sale at $18 each and sold some and insisted on its right to sell more at the cut price." The decision of the court on the merits of the case is as follows:

> Without applying to the Patent Office, one may make and use and sell the device that embodies his invention. That is his natural right. All that the government can and does grant him is the right to exclude others from practicing his invention without his consent. Within his domain, the patentee is czar. The people must take the invention on the terms he dictates or let it alone for seventeen years. This is a necessity from the nature of the grant. Cries of restraint of trade and impairment of the freedom of sales are unavailing, because for the promotion of the useful arts the constitution and statutes authorize this very monopoly.
>
> By its terms, the grant covers three separate or separable fields. The patentee may agree with one that he will not exclude him from making, with another from using, and with yet another from selling devices that exemplify the principles of his invention. Within the field of making it has never been doubted, so far as we are aware, that he may subdivide as he pleases and offer to sell or lease in the most fanciful parcels on the harshest terms; that whether purchasers and tenants come or not is purely his own concern; and that, if purchasers or tenants do come, the courts will enforce the terms of the sale or lease. And how could it be otherwise? Owning the whole, he owns every part. The field being his property, and there being no law for seizing it and adjudging his damages, he can not be compelled to part with his own except on inducements to his liking.
>
> The same conditions must prevail within the field of use, for how can it be distinguished? And the Circuit Court of Appeals for the Sixth Circuit, in a case we thoroughly approve, has ruled that a patentee may farm out such a part of the field of use as he pleases and retain the balance, and that whoever without permission enters the reserved portion is an infringer.
>
> And in Edison Phonograph Company vs. Kaufman, 105 Fed., 960, and Edison Phonograph Company vs. Pike, 116 Fed., 863, the holdings were that a patentee may reserve to himself as an ungranted part of his monopoly of sale the right to fix and control the prices at which jobbers and dealers may sell the patented article to the public, and that whoever, without permission, enters the reserved portion is an infringer.
>
> In the present case, the vice of counsel's argument lies in the assumption that the jobber, by paying his money to appellants, acquired such an unrestricted title to the machines in question that appellee could take them and fix its own prices in offering them for sale to the public. The bill very clearly shows that appellants said to the jobber, "We are unwilling to part with the whole of our monopoly. There are no terms on which we will give you unrestricted right to deal in our machines. However, if you choose to pay our price for a limited right, we will place our machines in your hands to be sold by you or by dealers under you to the public at not less than $25 each;" and that the jobber explicitly accepted this offer. It is axiomatic in all departments of the law that unless the quality of innocence intervenes the title of the purchaser is no better than his sellers. The bill directly charges appellee, a dealer, with prior knowledge of the terms on which the jobber came into possession of the machines. Whether or not appellee covenanted to be bound by the terms is not alleged; and whether or not an implied promise arose from the appellee's purchase is immaterial in this case, for the suit is not upon a promise to keep out of the reserved portion of the monopoly, but it is for the tresspass in entering without permission.
>
> It is perhaps needless to observe that what the rights of the public, who purchase at $25 may be with respect to reselling, is a question not involved."

ROBERT H. INGERSOLL AND BRO.,

manufacturers of watches state their position on the subject in the following:

"Replying to yours of the 11th inst., referring to the Catalogue House Question, we would say that this subject has occupied our attention briefly and we have read the circular communications of various Western jobbing houses, aimed at such houses as a class, and have concluded that so far as we are concerned we do not wish to enter into any controversy on this subject.

So far as these enterprises as a class are concerned, both in the retail and wholesale line, they would seem to have a legitimate place in American markets, judging from their great success of recent years. As to our relations with them, we insist on our Ingersoll line of watches, that our prices shall be absolutely maintained. This has naturally resulted in a number of these houses refusing to handle this line of goods, which meets with our approval.

Digitized by Google

We manufacture another line of goods, however, which we sell to them with less rigid restrictions as to price, but even on those we insist on the maintenance of what we consider a sane price, which has again interfered with our selling a few of these people. To sum up, we apply our rules to these houses and make the conformations to them the gauge of whether we shall deal with them or not. Our relations with a number of them have been of the most satisfactory kind, while they have been the opposite with others.

We wish you to understand from the above that we will not allow Catalogue Houses to demoralize the price of our goods and therefore compete unfairly with either the jobbing or retail trade we have established."

OUR COMMERCE WITH CUBA.

Figures of the trade of the United States with Cuba under the reciprocity treaty are published by the Department of Commerce and Labor through its Bureau of Statistics. These statements include two sets of figures: (1) the report of the United States Government showing the total value of its imports from and exports to each country of the world, including Cuba, during the full calendar year 1904, and (2) the report of the Cuban Government, showing its imports from and exports to each country of the world during the first half of the calendar year 1904. As the reciprocity treaty with Cuba began practically with the beginning of the year 1904 (December 27, 1903), the figures of the year or half year 1904, compared with those of the corresponding periods of the preceding year, give an opportunity to compare the trade under the reciprocity treaty with that of corresponding periods of the year or years immediately preceding.

The figures of the United States Government showing its total imports from and exports to each country of the world show that the imports from Cuba in the calendar year 1904 under the reciprocity treaty were $74,950,992 in value, against $57,228 291 in 1903. This indicates an increase of practically 18 million dollars, or 31 per cent. During that same period our total imports from the West Indies, including Cuba, but excluding Porto Rico from consideration, grew from $74,890,690 in 1903 to $89,561,026 in 1904, an increase of but 14½ million dollars, or 20 per cent. Thus the entire increase in our imports from the West Indies occurred in the trade with Cuba, the imports from the other West India Islands showing in practically every case a decrease as compared with the preceding year. The total imports into the United States in 1904 were $1,035,909,197, against $995,494,327 in 1903, an increase of 40 million dollars, or but 4 per cent. Thus the imports from Cuba increased 31 per cent. while the imports from other sections of the West Indies were decreasing, and the total imports into the United States from all countries were increasing but 4 per cent.

Turning to the export side the figures of the United States Government show total exports to Cuba in the calendar year 1904 valued at $2,644.345, against $23,504,417 in 1903, an increase of $9,139,928, or 38.9 per cent. The total exports to all parts of the world in 1904 were $1,451,355,645, against $1,484,753,083 in 1903, a decrease of $33,397,438, or 2.3 per cent. in the grand total exports, while to Cuba alone, as above indicated, the increase is practically 40 per cent.

Exports from the United States to Cuba in the calendar year 1904 exceeded those of any earlier year in the history of our trade with that island, the highest total in any preceding year having been that of 1901, $27,007,024, against $32,644,345 in 1904, an increase in 1904 of 20.8 per cent. over the previous high record year, 1901. The imports from Cuba in 1904 were less in value than those of the calendar years 1894 and 1892 and of the fiscal years 1874 and 1873. Summarizing in a single sentence the figures of our export trade to Cuba in 1904, it may be said that it is larger than in any preceding year, and that the increase over 1903 was 38.9 per cent., while the increase in imports from Cuba in the same year was 31 per cent.

Considering the Cuban figures of imports and exports during the existence of the reciprocity treaty and comparing the same with those of the corresponding period of the preceding year, the Bureau of Statistics publishes a table received from official sources in Cuba showing the imports and exports of Cuba by principal countries during the first six months of the calendar years 1903 and 1904. These figures, it is proper to add, include gold and silver as well as merchandise, while those of the United States above discussed relate to merchandise only. The table shows that Cuba's total importations from the United States, including gold and silver, in the first six months of 1904 were $15,416,503, against $13,696,673 in the corresponding period of 1903, and that her exports to the United States in the first half of 1904 were $53,109,619, against $36,046,328 in the corresponding months of 1903.

The figures of Cuba's trade with other countries are also given and show in practically all cases a larger percentage of increase in imports from those countries than of imports from the United States. From the United Kingdom, for example, the increase in imports is 34.5 per cent.; from Spain, 23.8 per cent.; from France, 48.4 per cent., and from Germany, 39.9 per cent.; while from the United States the increase is but 12.8 per cent. Thus in the case of each of the countries named the percentage of increase in imports during the first six months of 1904 was greater than that in imports from the United States. Comparing the imports during the first half of 1904 with those of the corresponding period of 1903, Cuba increased her imports from all countries 22.8 per cent., her imports from other countries other than the United States 30.3 per cent., and her imports from the United States alone 12.6 per cent. In the first half of 1903 the United States supplied, according to these figures, 42 per cent. of the total imports of Cuba, and in the corresponding period of 1904 39 per cent.

The exports from Cuba to the United States during the first six months of 1904 were $53,109,619, against $36,046,328 in the corresponding months of 1903, an increase of 47.3 per cent. The exports from Cuba to all countries increased from $44,120,812 in the first six months of 1903 to $60,033,227 in the corresponding period of 1904, a growth of 36.1 per cent., while to countries other than the United States Cuba's exports fell from $8,074,484 in the first half of 1903 to $6,923,608 in the corresponding months of 1904, a decrease of 14.2 per cent.

SOUTHERN SUPPLY AND MACHINERY DEALERS' ASSOCIATION.

We have received the following letter in regard to their future movements.

Knoxville, Tenn., January 25, 1905.

The Executive Committee of the Southern Supply & Machinery Dealers' Association held a meeting at New Orleans on the 16th and 17th inst., and made arrangements for the annual convention of the Southern Supply & Machinery Dealers' Association, which is to take place April 25, 26, 27 and 28, 1905, at the De Sota Hotel, Savannah, Ga. The Executive Committee has appointed Mr. Denny of the Georgia Supply Co., Savannah, Ga., as Chairman of the Entertainment Committee, and Mr. Disosway, of the Cotton States Belting & Supply Company, Atlanta, Ga., as Chairman of the Transportation Committee. Favorable rates have been made with the De Sota Hotel, and the programme that has been adopted will not only be exceedingly interesting to every manufacturer in the United States and to every supply dealer, but will also be enjoyed by all who take part in said convention. The Executive Committee extend an invitation to all supply dealers to be present, and also to the representatives of the different manufacturers with whom the supply dealers do business. Indications are that this will be the most enjoyable and most largely attended convention that has ever been held by said association. Rooms at the hotel are being engaged now by eastern manufacturers, and a great many of them are going to bring their ladies with them. The hotel people have given every indication that they are going to do their part to make the convention a great success. The Entertainment Committee have made such arrangements that will insure every one present a nice time. Savannah is one of the most beautiful cities of the South. The De Sota Hotel is one of the noted hotels of the South, and the time of the year, viz., April, Savannah will be seen at her best.

Yours very truly,

SOUTHERN SUPPLY & MACHINERY DEALERS' ASSOCIATION,
PETER E. BLOW, President.

THE "GEM" MINSTRELS.

Owing to the unexpected and gratifying success of their endeavor last year, the "Gem" Minstrels appeared again this year on a more elaborate scale. The "Gem" Minstrels are amateurs confined entirely to the office of the New York house of Sargent & Company, 151 Leonard Street, and are so named in honor of the celebrated Gem Food Chopper, made by Sargent & Company. The show was held on January 27th at the Germania Club in Brooklyn, and was given to an audience of nearly one thousand people. The efficient interlocutor was Clarence Roberts, who acted in that capacity last year. The "end men" also were the same as last year, being Tambos—F. G. Hammer, H. R. Tait and C. E. Corey; Bones—E. S. Massey, Arthur Mahony and Herman Fritz, each of whom rendered a solo that was received with a great deal of applause. Several of the chorus also rendered solos. One particularly pleasing feature of the programme was a duet by F. G. Hammer and Arthur Mahony, entitled "Seminole." After the show a dance was enjoyed by the young people. Early morning witnessed the end of what was voted by all to be a most pleasurable affair.

TALKS WITH RETAILERS

By AMOS

In a previous issue of this paper the writer made the statement that the most effective weapons for combatting Catalogue House and other competition lay in the hands of the Retail Hardware Dealers. These weapons may all be classed under one general head, namely, "Aggressive Uptodateness in Business Methods." This one main classification, if separated into its several parts will be found to consist of: "Care in selecting stock," "The skillful arrangement of goods in the store," "Attractive store interiors and windows," "Knowledge of stock," "Thoughtful, truthful advertising," and "Politness to customers." Many other sub-classifications might be added, but it is safe to say that the Hardwareman who is armed with all these, each in perfect order, will have little trouble in securing and holding a fair share of the Hardware trade in his neighborhood. It may be suggested by some pessimistic individuals that a merchant thus equipped would be a sort of "rara avis" but after reading the large number of letters recently received at this office from retailers, the writer is inclined to think Mr. Pessimist would alter his opinion.

Previous articles on this subject have evidently awakened much interest among our readers and a number of them have written us giving the details of the plans used by them to hold their trade. Letters of this sort are always welcome. Plans of campaign that succeed in one locality may not always win out in other places, but where many ideas are given, each dealer should be able to select at least one that can be carried out with success with his trade.

With Their Own Weapons

The Ralph M. Burtis Company, of Oshkosh, Wis., have taken up the question of mail order competition in an especially agressive manner, with excellent results. They send us a circular recently mailed to all the farmers tributary to their store, and which had a splendid effect according to their letter, making for them a number of steady customers. In their letter to us they say: "It has been our policy to fight Catalogue House Competition as aggressively as we know how. We never have thought it good policy to sit down and decry it, nor to belittle these houses with our customers. If we find a man who has been buying from these people we tell him that they are good houses, and will undoubtedly treat him well, and give him value for his money; at the same time they are not the great bargain-givers that they claim to be, nor do they sell goods cheaper than anyone else. Then we take him to the mail order catalogues, which we always keep in the store, and prove to him by comparing our prices with theirs, that he is not making anything by sending away for his goods. On some established goods Catalogue House prices are exceedingly cheap, and we believe a dealer makes a mistake if he tries to get a much higher price, for every one knows the mail order prices. On the great majority of stuff Catalogue Houses are not cheap, and we find no trouble, in meeting most of their prices, and make a fair profit."

The circular mentioned is well printed and so arranged that it is easily read. We give it herewith in full:

JUST A WORD.

If you have been buying Hardware from the mail order houses we believe we can save you money. We have been doing it for others ever since we started our store.

HOW WE DO IT.

Perhaps you do not know that the catalogue houses do not carry in stock one-half of the goods that they list. Especially is this true of their Hardware line. For this reason they can and do sell some few things close to cost, using them as leaders. They have no money invested in the stock, and their only expense is a few pages in their catalogue.

We will at all times furnish you anything in our line at exactly the same price you would pay the mail order houses plus the freight you would pay if you bought of them. We will take all responsibility of ordering and seeing that we get exactly what is called for, will stand all postage and cost of sending money, and if there is any breakage of goods in shipment will stand that also.

All we ask is that you put the same confidence in us that you do in the catalogue houses. Leave your money when you leave your order, and give us the same time to get the goods as would take to get them from the catalogue houses.

For many years the mail order houses have been persistent advertisers. They tell you that they sell all goods at wholesale prices. They try their best to give you the idea that they are in business solely for their health, and because they are particular friends of yours. One of the big ones in Chicago started less than thirty years ago with $50,000. Last year they are supposed to have cleared over $2,000,000 in profits. Do you believe all they tell you?

Now we would like very much indeed to have you consider us your particular friends, but we are honest enough to tell you that we are not in business for our health. We need the income from our store to make a living for ourselves, and once in a while, a dollar or two beside. The best way we know of doing this is to get along with just as small a profit on each sale as possible, and make lots of sales.

When we started our store we marked our goods along these lines and we have been very successful. This year, however, we want to increase our sales all we possibly can. This is why we beg you to consider our plan. Come to our store and see the goods and prices. We will treat you courteously, and you will not be urged to buy anything you don't want. WILL YOU TRY OUR PLAN?

THE RALPH M. BURTIS CO.,
117 Main Street,
Oshkosh, Wis.

With each circular was enclosed a letter as follows:

Dear Sir:—Will you kindly look over the inclosed circular, and the next time you come to Oshkosh come in and let us know what you think of our plan?

We are out for the business of the man with cash, who buys where he can buy the cheapest and pays for what he gets.

More or less business has been going to the Mail Order Houses because they have made a strong appeal for it. Sometimes we find that the man with cash believes they can do better for him than his home dealer.

We believe this to be a wrong idea; but, until now, no one, so far as we know, has made any effort to correct it.

We are the youngest Hardware store in Oshkosh, but we have gained the reputation of being the leaders in our line.

Our stock is extremely well assorted.

We are courteous with all our customers, and we are progressive.

To make our business grow we must sell everybody that we can.

If you have been buying of the Mail Order Houses will you please bear us in mind the next time you need anything in our line?

We will always do exactly as we tell you in the circular, and many times we can even do a little better than this and save you the freight. Yours very truly,

THE RALPH M. BURTIS CO.

* * *

A Campaign of Education.

Twixt optimist and pessimist
The difference is droll
The optimist the doughnut sees
The pessimist the hole.

Blessings on the Hardwareman who "sees the doughnut," who sees a silver lining to every cloud; who has faith in the ability of American Hardwaremen to work out their own salvation in this or any other question.

La Due and Baldwin of Coral, Michigan, are the kind of people who see the doughnut. Located in a country town of less than a thousand inhabitants they are getting after the trade in a way that wins. A letter recently received from this progressive firm reads as follows:

"Judging from what experience we have had in reference to the catalogue house question, we believe that the best results are obtained through a 'Campaign of Education.' While the Chi-

Digitized by Google

cago houses undoubtedly sell a large amount of goods of all kinds here, we have found that they have a few regular customers who probably purchase most the goods they can conveniently wait for of them; with these people there is but very little use talking. But in view of the fact that most people prefer getting their goods when they pay for them, and other things being equal, or nearly so, they will buy at home, we think that the proposition resolves itself into convincing them that things ARE equal or nearly so in ninety-five per cent. of the cases. We feel that we have been quite successful in so convincing them. We have had much the largest stove business this season of any of the twenty-two years business we have conducted here and the Chicago people have had the smallest since they became a factor in the business of this locality. This we believe to be the result of work we have done in the manner above mentioned—we can attribute it to nothing else.

"While we believe that more permanent results may be obtained in this manner, we believe the work being done by the various local, State and national organizations is something that should be understood, helped and appreciated by all those in whose interests it is being done. We think, also, that the dealers in all lines who suffer most from catalogue house competition are those who think that business can and should be done on as large a margin of profit as that obtained previous to about the year 1893."

* * *

The story of Washington and his hatchet never grows old, and each year as the twenty-second day of the second month rolls around it is repeated at family firesides and printed and reprinted in the original and burlesque forms in newspapers all over the land. It suggests to the writer (as nearly all good things do) the heading of an ad. How would this do?

WASHINGTON'S HATCHET

is famous in song and story, not because of the workmanship in it but because of the job of chopping in which it was used. Our Hatchets, Axes and other Edged Tools are famous for the metal used in their construction, for their temper, their finish, and the fact that they are JUST RIGHT in every particular, and every man who has bought any of these goods of us, has been singing their praises ever since.

* * *

Where are your cold weather goods these days when the mercury is down around the zero mark? Are your skates, horse blankets, sleigh bells and other seasonable goods out in plain sight where each article can do a little talking on its own account? At the best, the Hardwareman has a lot of talking to do and it behooves him to get all the assistance he can in this line of work. Seasonable goods, if properly displayed, are continually asking the passing customer "Take me with you" and a little work in arranging them carefully and conspicuously will make a great saving in the retailers stock of talk.

* * *

The Postal Progress (?) League will shortly be given a hearing by a sub-committee of the House Post Office Committee on their proposition to combine third and fourth class postal matter under a uniform rate of eight cents per pound. Their claim that the making of this proposition a law will ultimately reduce the postal deficit would hardly seem to hold water in view of the statement recently made by Mr. Madden that it costs our government FOURTEEN cents per pound to handle and transport mail matter. It would be interesting to all Hardwaremen to know the kind of arithmetic the League uses in claiming a profit on a service that costs nearly double the rate they recommend.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Landlord's Liability for Lease of Infected House.

QUESTION: Some time ago I leased a house of a party for the term of one year. Nothing was said about the sanitary condition of the house. Soon afterwards one of my children developed a severe case of scarlet fever and I found that just before the house was leased to me, one of the owner's children had been sick with the same disease and the premises and the house were never properly disinfected. Is the owner liable to me in any way and have I a right to vacate the premises?

REPLY: As a general rule the lessee of premises must take them as he finds them and the lessor is not responsible for any defects in their condition which examination will disclose or investigation will make apparent. In the absence of an express agreement, there is no implied warranty that the house shall be tenantable or fit for occupancy.

But a different rule applies where the landlord knows of defects, the existence of which no amount of investigation will disclose, and leases the premises without informing the tenant of their existence. If the house is infected by a contagious disease and the landlord knows this fact, he is under a legal duty to disclose it to a prospective occupant, and failure to do so is a fraud which will justify the tenant in leaving the premises, and perhaps in holding the landlord liable for damages as well. We think on the facts, as you state them, the landlord is guilty of a manifest fraud.

Conversion—Agency No Defense.

QUESTION: About a month ago a man whom I did not know came to my livery stable with a horse which he asked me to sell for him as soon as possible, stating that he did not wish to pay for keeping it any longer. Acting on his instructions, I sold the horse for one hunrded and fifty dollars and paid the money to him, less my commission. It now appears that he stole the horse and the owner threatens to sue me. Am I responsible?

REPLY: It is well settled that any unauthorized interference with or dominion over the property of another without his consent, constitutes a conversion and renders the person exercising it liable to the true owner for whatever damages he may have suffered thereby. If the man for whom you sold the horse was a thief he had and could have no title to the animal and had no power to authorize its sale. The fact that you sold the horse simply as his agent and in good faith and without knowledge of its true ownership is not material. If he could not sell the animal in the first instance he certainly could not legally authorize you to sell it. One who sells or otherwise disposes of personal property is bound at his peril to ascertain its true owner. Your case is a hard one, but we think you are clearly liable for the value of the horse.

Receipt of Check "In Full"—Suit for Balance.

QUESTION: A dispute arose with a contractor who was employed to make certain repairs on my house. He rendered me a bill for $1,400. I immediately wrote him that I would neither recognize or pay the bill, and that the correct amount due was $765. In the letter I enclosed a check for $765, and stated: "I send my check in full satisfaction of your account. If this is not satisfactory, you can sue me." He cashed the check without replying to the letter. He now threatens to sue me for the balance of the claim. Kindly advise me as to my rights.

REPLY: The acceptance and retention of the check constituted a complete accord and satisfaction, and left no right in the contractor to any further recovery upon his disputed claim. Your letter presented the alternative of the acceptance of the check in full, or the commencement of a law suit, if he should be unwilling to accept the check. By using the check under such circumstances without protest or objection, he must be deemed to have elected to accept the amount designated. In all cases where there is a bona fide dispute as to the amount of an indebtedness, this is the settled rule of law.

Selling Ammunition to Minors—Law in Pennsylvania.

QUESTION: Kindly give me through the columns of your paper, the law in Pennsylvania in regard to selling ammunition to boys under sixteen years of age. W. E. Y.

REPLY: "Any person who shall knowingly and wilfully sell or cause to be sold to any person under sixteen years of age, any cannon, revolver, pistol or other such deadly weapon, or who shall knowingly and wilfully sell or cause to be sold to any such minor, any imitation or toy cannon, revolver or pistol so made, constructed or arranged as to be capable of being loaded with gun powder or other explosive substance, cartridges, shot, slugs or balls and being exploded, fired off or discharged and thereby become a dangerous or deadly weapon or who shall knowingly and wilfully sell or cause to be sold to any such minor, any cartridge, gun powder or other dangerous and explosive substance shall in every such case be guilty of a misdemeanor and upon conviction thereof shall be sentenced to pay a fine not exceeding three hundred dollars." (P. L. 111, Sec. I, Pepper & Lewis Digest, Vol. I, page 1,162.)

A NEW SUBURB OF SHEFFIELD.

The other day, in the market-place of Johannesburg, says the *Ironmonger*, a cheap-jack was loudly proclaiming the excellencies of some pocket-knives which, he declared, were of the best Sheffield make. Out of curiosity I examined one of them. It was marked, "Solingen." On calling the attention of the auctioneer to the fact he remarked, "Where were you educated, guv'nor, not to know that Solingen is a suburb of Sheffield?" The entire audience looked compassionately at me, evidently pitying my lamentable ignorance, and not feeling equal to a war of words, I moved hastily on.

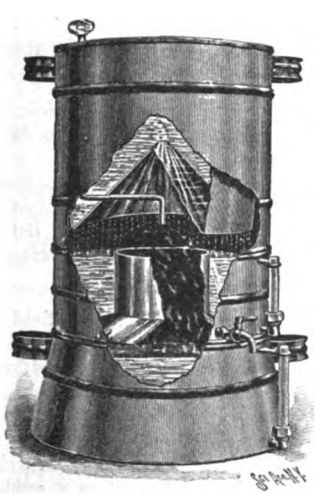
NEW BLACKSTONE ROTARY WASHER.

The Blackstone Manufacturing Company, Jamestown, N. Y., are pushing for preeminence in the trade the new Blackstone Stave Leg Rotary Washer, which in its latest and best form, it is placing before the trade. In the construction of this machine each leg is securely bolted with two heavy steel bolts to the

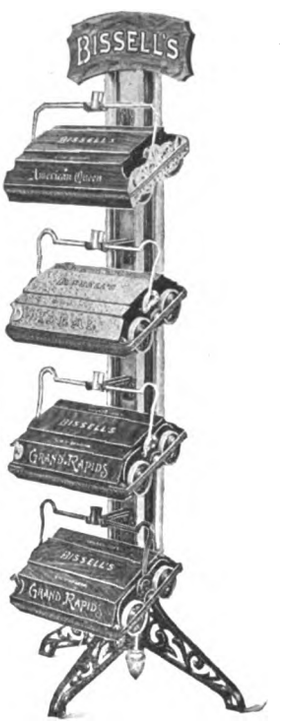


NEW BLACKSTONE ROTARY WASHER.

chime of the tub. They are then reinforced with two steel rods, running through, under the crosspiece, from one leg to the other. The legs therefore may at any time be removed or replaced without impairing the efficiency of the washer. The Rotary Washer has a flaring bottom, a high grade tub, steel braced with extra heavy stave legs, three heavy iron hoops, corrugated sides and bottom inside, handsomely finished, aluminum bronzed gearing, and aluminum bronzed flywheel. It is made in one size, especially suited for family use. The shipping weight, crated, is 70 pounds. The company's rotary washers are fitted with an improved bottom, which insures against warping, and thereby prevents leaking. The cross piece is one inch in thickness and is dovetailed into the bottom, which holds the bottom rigid under all conditions.

THE SANITARY STILL.

The A. H. Pierce Manufacturing Company, 83 North Green Street, Chicago, Ill., are the manufacturers of the Sanitary Still which is shown in the following illustration. They are the makers of twenty different styles and sizes of the Sanitary Still, ranging in capacity from one-half gallon per hour, up to sixty gallons per hour, or more. The styles numbering from No. 1 to



THE SANITARY STILL.

No. 6, are those principally in demand for family use, can be used over any ordinary kitchen range, taking the place of the tea-kettle, and require no more attention to operate. The No. 1 to No. 4, have a maximum capacity of one-half gallon per hour; the No. 5 and No. 6 are a trifle smaller, consequently have a little less distilling capacity. The No. 11 and No. 12 styles, the operation of which is described in detail in catalogue, have a capacity of one gallon per hour with the necessary heat and can be operated automatically or otherwise as desired, if fitted with the distilled water reservoir. The Sanitary Stills are used by thousands of people throughout the country and are admitted to be infinitely superior to any other appliance that has ever been placed on the market and should be in every household, distillation being the only means by which one can be assured of absolutely pure water. A. H. Pierce & Company are carrying ads. in a number of publications which reach the consumers; for instance, *McClures Magazine, Review of Reviews, Literary Digest* and others. They are willing to give exclusive agencies in smaller towns to the dealers, referring the enquiries from that neighborhood to the dealer who represents them.

BISSELL CARPET SWEEPER CO.'S SPRING OFFER.

The Bissell Carpet Sweeper Company, Grand Rapids, Mich., and 25 Warren Street, New York City, are making their usual "Spring Offer," which enables a dealer to order One dozen Carpet Sweepers, and have an assortment to show his customers of six kinds all "Cyco Bearing" or latest improved; with which the company includes, free of charge; one Easel No. 4, of which we

EASEL NO 4.

give an illustration; and accompanying it is an elegant lithographed hanger; a new series of poster cards, which consists of four 11x28 inches; four cards to display the Sweeper Handles; one award card (in colors); one counter card in colors 8½x14 inches; cards for advertising in street cars, as many as are needed, and new electrotypes, as many as are needed for local advertising. They include all these in their "Spring Offer," thus fitting a dealer in good shape to use all of them in exploiting the merits of the Bissell Sweeper, and assist in selling these desirable goods at a profit. Write for complete particulars.

INCREASED EXPORTS IN 1904.

Exports of principal articles of domestic manufacture in 1903 and 1904, grouped in the order of magnitude in 1904, follow:

	1903	1904.
Iron and steel manufactures	$99,036,697	$128,553,613
Copper manufactures	43,509,788	74,816,934

RECENT TRADE PUBLICATIONS.

STURGES & BURN MFG. CO., Harrison and Green Streets, Chicago, Ill., are distributing their catalogue No. 5 exploiting their milk cans, dairy tinware, sheet metal specialties, steel churns, etc. This firm emphasize the fact that they are not in the Trust. In the construction of their milk cans they state the highest grade steel plate is used throughout, tinned and retinned after being cut, squared and punched before putting together. Pure solder is floated into all inside seams, making them smooth, with no shoulders or crevices where sour milk can collect. For further information regarding their products, send for catalogue.

CORTLAND DOOR & WINDOW SCREEN CO., Cortland, N. Y., have recently issued a neat catalogue in pamphlet form, illustrating a much larger line of screen doors and windows than shown in their former catalogue. In response to repeated requests the Cortland Company are placing on the market, the Cortland Five-panel, special made, screen door, which is much better than the ordinary fancy screen door with brackets, and they state they feel confident it will meet with good demand. The door is made from No. 1 selected pine, mortised and tenoned finished natural color wood, sanded and varnished. Edges of wire cloth covered with raised oval moulding, and mitred at corners of each panel. They also present for the consideration of the trade their new Excelsior Window Screen, made with steel slides concealed, which is a great improvement over screens made with clips fastened to the outside of the frame. The edges of the wire cloth and tacks are covered with moulding, matching the outside appearance of the frame; hardwood oiled and finished alike on both sides. The company also make hand painted screen doors and windows. Write to-day and secure one of their catalogues.

NORTH BROTHERS, Philadelphia, Pa., have recently issued an envelope size pamphlet catalogue of more than usual attractiveness. It exploits their ice-cream freezers which they claim are "The newest and Best made." They are constructed with automatic twin scrapers; cedar pails with electric welded wire hoops which are guaranteed not to break or fall off. The cans are of heavy tin plate with drawn steel bottoms and are guaranteed not to leak or break. To dealers handling their freezers the company will be glad to furnish circulars if advised which freezer they sell, also electrotypes for advertising, free of charge. They keep a full assortment of all styles and sizes in stock the year round, and orders can be filled same day as received. Send for their 1905 illustrated catalogue.

THE J. STEVENS ARMS & TOOL CO, Chicopee Falls, Mass., have issued an exceptionally fine catalogue of envelope size in pamphlet form, of the Stevens-Duryea gasoline runabouts and touring cars. The book is finely printed on excellent heavy coated paper and is illustrated throughout, and includes several new cars. They state "The Germans make use of a vehement protest against self-praise, which is emphasized in a famous and forcible Teutonic proverb. We, therefore, refrain from lauding the manifold merits of our efficient carriages, but point with pride to the innumerable unsolicited testimonials and indorsements relative to the Stevens-Duryea." Following the above are a few of the many "certificates of quality" with which they are constantly favored. It is self-evident that their satisfied customers are their best advertisements. Secure a copy of their catalogue and become acquainted with their high grade products.

I. E. PALMER, Middletown, Conn., and 53 Leonard Street, New York, who at the Louisiana Purchase Exposition won one Grand Prize, one Gold Medal and three Silver Medals, are the authors of an extensive 38 page illustrated catalogue, price list and treatise on Hammocks, adjustable hammock supports, awnings, trapezes, mosquito bars, anti-friction hitch hooks, ropes and other accessories. This 1905 catalogue is on the same lines as their 1904 catalogue; it is printed in colors showing every line of hammocks in exact colorings in which the hammock is made. This will be greatly appreciated by dealers as it has made it possible for the salesman to show a complete line quickly and thoroughly without the necessity of carrying large bulky samples. One of these catalogues will be gladly forwarded to interested parties. Send for one.

THE PHILADELPHIA SCREEN MFG. CO., 56th Street and Woodland Avenue, Philadelphia, Pa., have placed before the trade a catalogue of the long envelope size offering for consideration styles for season 1905 of screen doors, window screens and window screen frames. In this book they have endeavored to illustrate the patterns that their long experience has proved to them to be the most desirable to the Southern, Eastern and New England trade. In order to serve their patrons expeditiously they have located in Philadelphia a modern plant situated where they have both rail and water facilities for shipping that, they claim, are unsurpassed. This factory is operated in conjunction with the Owosso Manufacturing Co., of Owosso, Mich., and Perla, Ark., which gives them the advantage of a large distributing power. Send for a copy of the above mentioned catalogue.

THE BALDWIN REFRIGERATOR COMPANY, Burlington, Vt., are offering for the consideration of the trade their 1905 catalogue of Baldwin Refrigerators. These they line with any of the following: opal, glass, porcelain, metal and Vermont spruce, with either handsome oak, ash or softened spruce cases. They manufacture about one hundred and forty popular styles and sizes, enabling the dealer who handles the Baldwin to secure from one maker a sufficient variety to meet the wants of his different classes of customers. They also make special refrigerators and sectional coolers to order, and part of their catalogue is devoted to illustrating some of their numerous styles of special coolers, also giving a few testimonials indicating satisfaction given by their work. Send at once for a copy of their catalogue.

THE GOODELL PRATT CO., Greenfield, Mass., are distributing their No. 7 catalogue of their well known tools. The book is finely gotten up with excellent printing on heavy coated paper, thoroughly illustrated, and presents an attractive appearance, containing 176 pages. The cover is an attractive one of plain bright red with the company's trade mark in the center. The great number of new tools shown and described, together with the many changes and improvements in their older ones, can be fully understood and appreciated by a careful study of the 176 pages of the catalogue devoted to them. Every dealer in tools will be amply repaid for the time spent in thoroughly familiarizing himself with the contents of this book. They have also pocket catalogues for distribution.

THE BULLARD AUTOMATIC WRENCH CO., INC., Providence, R. I., have issued an envelope size pamphlet catalogue describing and illustrating the wrench which they manufacture, which they state is the perfect result of their constant aim to produce the best on the market regardless of price. They state "Expert mechanics who have had it in actual use claim it to be the most powerful wrench made, no more strain coming on the Bullard Automatic Wrench when used in its widest extension than when in its normal capacity." The catalogue in appearance is an attractive one and may be had for the asking.

THE HOLLAND MANUFACTURING CO., Baltimore, Md., manufacturers of double pointed tacks, glaziers points, staples, tacks, nails, butt, strap and T Hinges, are distributing a pamphlet catalogue of envelope size exploiting the above mentioned goods. The book is neat and attractive and contains many useful suggestions and facts. It is illustrated throughout and list prices are given in tabulated form, convenient for ready reference. A copy may be had on application.

THE BARNES MANUFACTURING CO., Mansfield, Ohio, are sending out their "Spray Pump" catalogue, of which commodity they are manufacturers. Together with illustrations, descriptions, prices, etc., they include in this book some useful information for fruit growers relative to the different diseases of trees, how to detect and cure them. This information, they state, was obtained from a number of scientific and experimental stations. Their book will be found most useful as a guide for those who are interested in Spray Pumps in any capacity, and may be obtained upon request. Send for one.

THE WHITE MOP WRINGER CO., Fultonville, N. Y., manufacturers of the White Mop Wringer, have sent us one of their pamphlet catalogues. They claim there is no mop wringer in the world which wrings a mop so dry but that the "White" will wring it drier. They are made in four sizes: No. 0, extra large; No. 1, hotel size; No. 5, for round mops; and No. 2, family size. Write for catalogue.

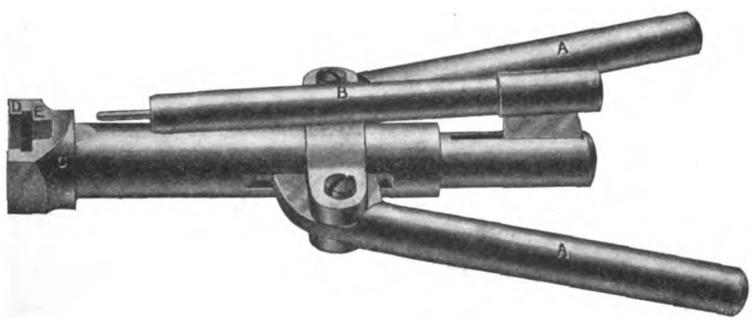
NEW GOODS AND SPECIALTIES.

HERMAPHRODITE CALIPERS, WITH BEES WAX JOINT.

The Sawyer Tool Manufacturing Company, Fitchburg, Mass., are the manufacturers of the Hermaphrodite Calipers with Bees Wax Joint, an illustration of which we give herewith. The adjustable point on this tool is worthy of attention. Constructed in a manner to insure the maximum rigidity with minimum weight. The point is firmly held in position by the knurled nut and stud,

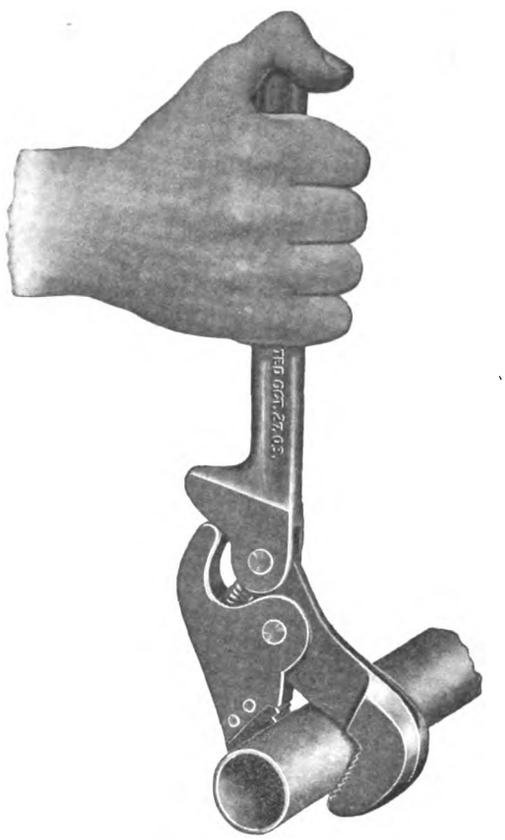


SAWYER'S HERMAPHRODITE CALIPERS.

and gives additional support to the loop at the end of the caliper leg. An auxiliary caliper point is furnished with these tools when desired, which converts the tool into an inside caliper. They are made in five sizes from four to twelve inches, with an additional charge for the auxiliary leg, of ten cents.

STEVENS-POPE RE AND DE CAPPER.

The J. Stevens Arms & Tool Company, Chicopee Falls, Mass., are the manufacturers of the Stevens-Pope Re and De Capper, which is a handy and serviceable tool of which we give an illustration. The body C is hollow and contains a plunger for seating primers, and a spring for returning parts to initial position. To the rear end of this body are fulcrumed levers—AA—which



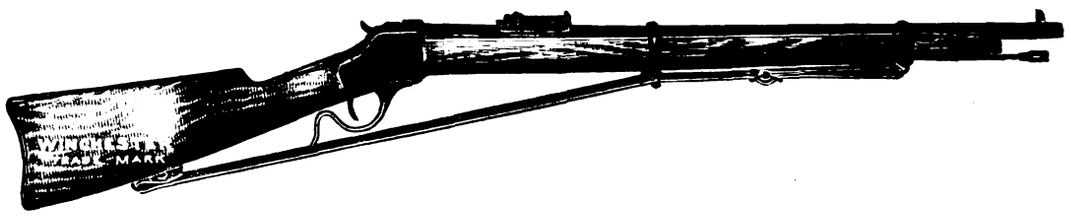
STEVENS-POPE RE AND DE CAPPER.

engage said plunger. To the rear end of this plunger is hinged the expeller B. The forward part of the body has a slot D for receiving head of shell for capping, and a slot E into which primer is dropped, coming to exact position to enter primer pocket. The tool is held in the palm of the hand with levers AA wide open; the thumb is pressed on the rear end of expelling plug B, lifting same so the shell is slid on to it freely, the head of shell passing over shoulder C. On removing thumb, the shell drops down so the head of shell falls behind shoulder C, which prevents shell shifting position when levers AA are closed, expelling old primer. The shell is then withdrawn and reversed with one motion, and head of shell dropped into slot D; a primer is then dropped into pocket E and levers again closed, seating the primer. This tool is very light, extremely powerful, and subject to very little wear. It does not soil the hands as others do. The expelling pin is now screwed into the plunger, so that if accidently broken a new one can be easily substituted. When ordering capper for obsolete shells it is necessary to send samples.

THE BULLARD AUTOMATIC WRENCH.

The Bullard Automatic Wrench Company, Providence, R. I., are the manufacturers of the wrench here shown, which, while of original design, possesses a number of advantages over any

THE BULLARD AUTOMATIC WRENCH.



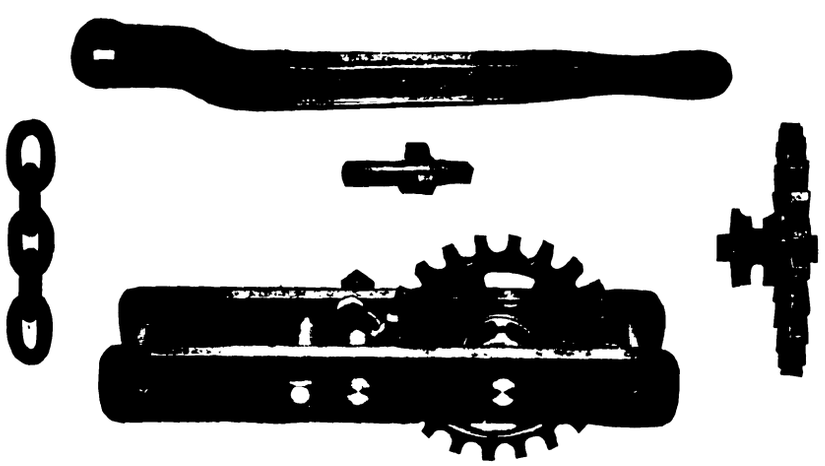
similar wrench now on the market. It can be instantly adjusted to any size within its range. Instantly locks and unlocks with no lost motion. Cannot slip in use, the firmer the pull the greater the grip. The grip is firmer on account of the ability to grasp more of the hexagon, in fact it is claimed to be equally efficient in corners, against walls, between floors, in ditches; in fact in any position requiring the use of a monkey, ratchet or pipe wrench. It is manufactured of the best grade of drop forge

Digitized by Google

steel, the jaws being of high grade tool steel. The wrench is especially strong at the angle of the upper jaw, due to its deep cross section and having few parts, is notably strong.

WINCHESTER .22 CALIBER SINGLE SHOT MUSKET.

The Winchester Repeating Arms Company, New Haven, Conn., and 312 Broadway, New York, are placing upon the market their new Single Shot Musket designed especially for indoor target shooting, of which we give an illustration herewith. In its barrel length, pull of trigger, weight and adaptation for sights, the



WINCHESTER .22 CALIBER SINGLE SHOT MUSKET.

Winchester .22 Caliber Single Shot Musket is nearly identical with the Krag-Jorgensen rifle, and in accuracy it is one of the most effective guns on the market to-day. Its close similarity to the Krag in its salient features, and the excellent accuracy shown in the tests to which it has been submitted, strongly recommend it for use in military target practice in indoor ranges. The new musket has the simple and reliable Winchester Single Shot action and is fitted with a heavy 28-inch round barrel. It can be furnished when so ordered without a rear sight but with the barrel drilled to allow the use of the regular Krag-Jorgensen rear sight. It will be equipped unless ordered otherwise with a regular musket rear sight. These muskets as regularly furnished are sighted at 50 feet, but they are accurate at much longer ranges. The length of the musket over all is 44 inches. Length of pull is 13¼ inches, with a drop at comb of 1¾ inches and drop at heel of 2⅞ inches, and the weight is about 8½ pounds.

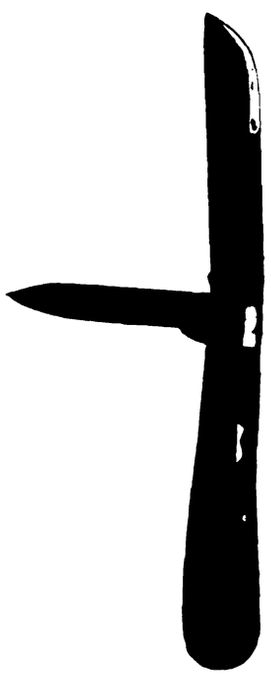
WILCOX GIANT WIRE STRETCHER.

The Wilcox Manufacturing Co., Aurora, Ill., are the manufacturers of the field fence stretcher of which we give illustrations. It is made of steel and malleable iron and is claimed to

WILCOX GIANT WIRE STRETCHER.

be the only stretcher made with a self locking gear and pinion, while it has no ratchets or palls to be released. It can be operated by one man and weighs complete with chain and clamps but forty pounds. Furnished with eight feet chain and grab book and one pair maple clamps with bolts and packed complete, with exception of clamps, one set in a box.

STEVENS RIFLE TELESCOPES TO THE FRONT.



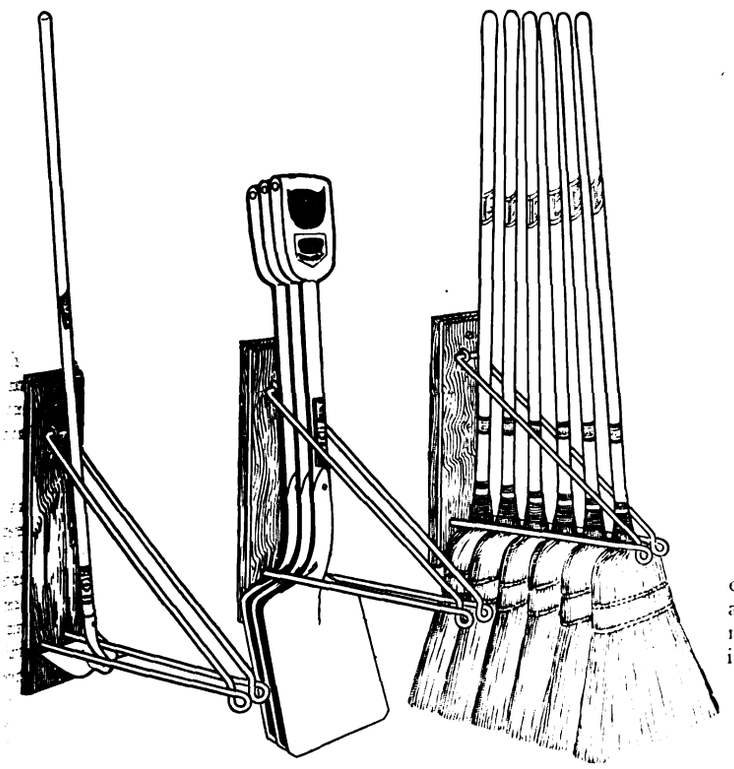
At the recent annual tournament of the Indoor .22 Caliber Rifle League of the United States, held at Pittsburgh, Pa., January 16-20, 1905, Stevens Rifles again demonstrated their peerless supremacy and carried off prizes by an overwhelming majority.

Louis P. Ictel, of Pittsburgh, Pa., obtained the record score of 2150 by shooting a Stevens-Pope Rifle equipped with Stevens Telescope Sight. Peters .22 short cartridges were used in achieving this notable result. Eighteen of the twenty perfect scores in the championship and re-entry matches were won with Stevens Rifles. Thirteen of the twenty perfect scores were secured with Stevens-Pope Rifle Barrels.

All the noted riflemen of this country competed in this national contest and the occasion was especially significant for the fact that Stevens Rifle Telescopes materially assisted in obtaining record scores. Our 'scopes were used in all events—the first time that Telescope Sights were permitted to aid riflemen to better their scores in an important national shoot. This competitive shoot conclusively demonstrated the vast importance of telescopes in shooting contests, to say nothing of their use to prolong the shooting days of a veteran marksman or hunter.

RIGHT HAND JACK KNIVES.

Case Brothers Cutlery Co., Little Valley, N. Y., are manufacturing their pocket knives, with the original features referred to below. For many generations jack knives, a knife with two blades in one end of handle, have been made left handed, the large blade being so arranged in the handle that when held in the right hand it was in the upper part of the handle and not down next to the mark as it should be in order to be handy for the right handed man. Again the pen blade as formerly arranged, shuts in front of the pocket blade hiding nail mark in such a way as to make it extremely difficult to open the pocket blade, without first opening the pen blade. It was left with Case Brothers



RIGHT HAND JACK KNIFE.

Cutlery Company to correct this old fashioned method of putting up jack knives, which are now made with the pocket blade in front as shown in the illustration, with nail mark easy to get at on both blades. Case Brothers Cutlery Company also manufacture all jack knives without the usual division scale, this method leaves the inside of knife free and open, preventing the collection of lint and small obstructive particles from the pocket, so annoying to those who carry a knife with the narrow divisions as arranged in the old way.

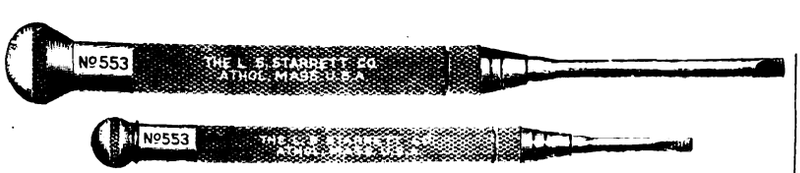
DANHOUR'S PATENT TOOL RACK.

Tucker & Dorsey Manufacturing Company, Indianapolis, Ind., are the manufacturers, among several other specialties suitable for the Hardware store, of the Danhour Patent Tool Rack, of which we give an illustration herewith, which graphically displays its utility. This specialty is made in two sizes of heavy coppered wire, sufficiently strong to hold up 200 or 300 pounds.

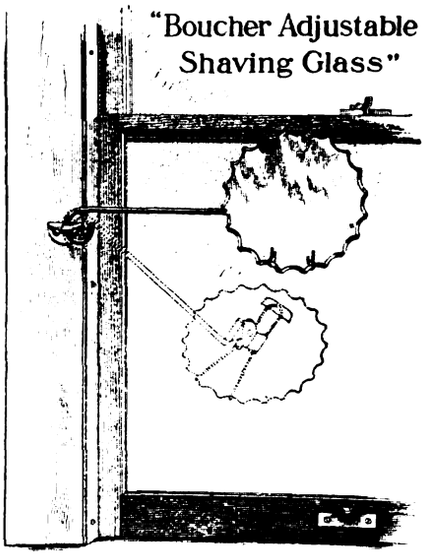


DANHOUR'S PATENT TOOL RACK.

The frame is a strong wooden back, varnished and bored for nails, screws or hooks. No. 1 is intended for store use, has 14 inch arms and will hold from 6 to 12 brooms, scoops, shovels, forks, etc. It can be placed stationary by putting a screw at top and bottom of slot or can be hung in any vacant place on any nail or screw. No. 2 is for farmers' or gardeners' use, has a 10 inch arm, and will hold 7 or 8 tools. Can be hung in a barn or outhouse, and the tools usually kept on the farm will always be found in place. This forms an admirable device for holding harness.

POCKET SCREW DRIVER NO. 553.

The L. S. Starrett Company, Athol, Mass., are the manufacturers of the Pocket Screw Driver shown herewith. This tool is made from steel tubing, knurled and nickel plated. The butt of the blade fits a solid lock in the tube, preventing it from turning, and is held from coming out by a slight turn of the

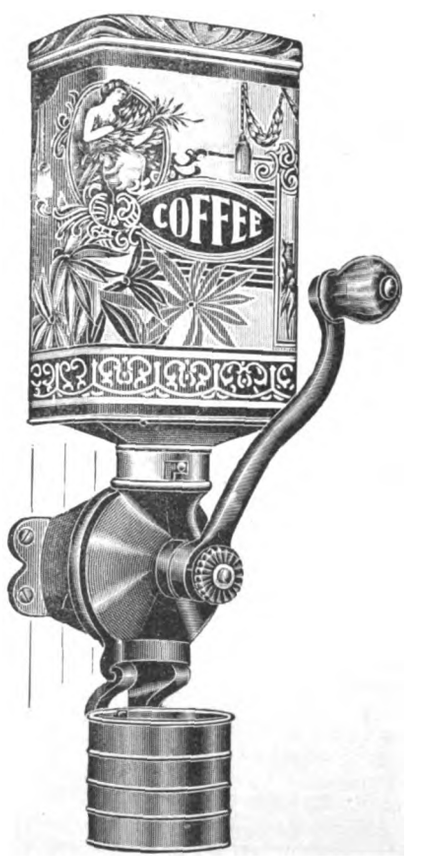


POCKET SCREW DRIVER NO. 553.

chuck. To carry in pocket, reverse the blade, inserting it in the handle, giving a slight turn of the chuck to keep it there. It takes no more room in the pocket than a penknife. The screw driver blades are properly tempered.

"BOUCHER" ADJUSTABLE SHAVING GLASS.

Caldwell Manufacturing Company, Rochester, N. Y., are the manufacturers of the "Boucher" Adjustable Shaving Glass, an illustration of which is given herewith. It is a neat and convenient article adapted for use in shaving, and for general toilet use. It consists of a chipped edge plate-glass mirror, supported by a bracket which is nickel plated. It can be fastened to the window casing, and so adjusted as to catch a strong light upon either side. The bracket which supports the mirror may be



"BOUCHER" ADJUSTABLE SHAVING GLASS.

easily raised or lowered to any height, and the mirror fixed at any angle. The glass is protected by a metal back, and when not in use, the mirror may be dropped against the wall or casing, thus occupying the minimum of space.

THE SUPERIOR COFFEE MILL.

W. H. Glenny & Co., Rochester, N. Y., are the makers of the Superior Wall Coffee Mills, designed to be sold at a moderate price. This mill has been modeled after comparing all the best

packed within the canister which is put up in a paper box, three dozen of which are packed in a case. Weight of case is sixty pounds.

ELECTRIC SILVER FLAT WARE.

M. S. Benedict Mfg. Co., Syracuse, N. Y., and 409 Broadway, New York City, are placing before the trade something entirely new in the manufacture of Spoons, Knives and Forks. They are now made from an original composition which they have named Electric Silver, and by this invention, the hard white constituents can be used in a more perfect manner with the result that while ordinary articles look white and new only when polished, when they are made from Electric Silver they preserve their white and attractive appearance indefinitely. There being no plating to wear off, it is claimed that these goods will remain always the same, being a perfect substitute for solid silver.

ELECTRIC SILVER SPOONS.

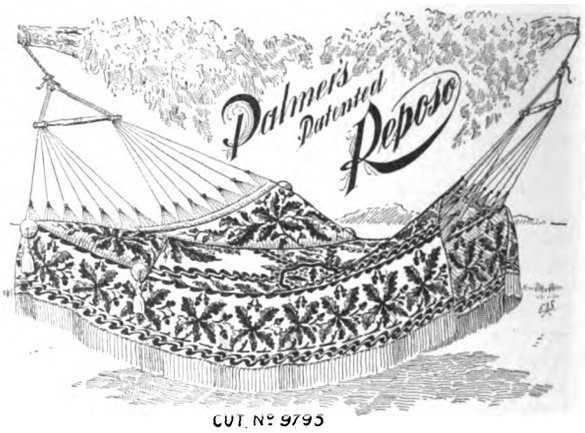
WESTERN RETAIL IMPLEMENT, VEHICLE AND HARDWARE ASSOCIATION.

The Western Retail Implement, Vehicle and Hardware Association held its sixteenth annual convention at Kansas City, Mo., on January 17, 18 and 19. The convention brought 3500 people to the city, including delegates, manufacturers, jobbers and visitors. The sessions of the convention were held in the Century Theatre, where ample accommodations were provided for the delegates. The Kansas City Convention Hall, a short distance from the place of meeting, was filled with a large display of Farm Machinery, Wagons, Carriages, Etc. The half day sessions of the convention gave the delegates an opportunity to visit the exhibits as well as the numerous Agricultural Implement concerns in the city. The entertainment committees of various Kansas City clubs and commercial organizations had made extensive arrangements for the entertainment of the guests, especially the ladies.

President E. B. Robnett of Columbia, Mo., presided, H. J. Hodge of Abilene, Kan., filling his place as secretary and treasurer. Addresses were made by several manufacturers, among them W. S. Thomas of Springfield, Ohio, and H. C. Staver of Chicago.

The annual report of the secretary showed a membership of 1460 members from 859 towns in the States of Kansas, Missouri, Oklahoma, Indian Territory, Colorado, Illinois, Texas, Arkansas, Nebraska, South Dakota, New Mexico and Arizona.

A new constitution and by-laws was adopted. A resolution was passed whereby the association becomes part of the National Federation of Retail Implement Dealers.



NEW OFFICERS

The following officers were elected for the ensuing year:

President, T. G. Wiles, Cherokee, Kan.; Vice-President, C. G. Cochrane, Plainsville, Kan.; Directors: H. D. Skinner, Ludlow, Mo.; J. D. Clarkson, Carthage, Mo.; J. E. Ferguson, Kingman, Kan.; A. L. Branson, Trinidad, Col.; C. L. Turner, El Dorado, Kan.

THE PALMER "REPOSO" HAMMOCK.

Among the popular hammocks which form the production of I. E. Palmer, Middletown, Conn., the patented "Reposo," construction shown in the illustration which we present, marks a new era in the manufacture of hammocks. In countries where

CUT No 9795

the hammock is used generally by the natives in place of a bed, it is the custom to use a very wide hammock and lie either diagonally or directly across it, as such a position gives the utmost comfort. Even in hammocks of the usual construction, many occupants naturally assume this diagonal position in an unconscious search for ease. This patented "Reposo" is constructed as regards width and arrangements of pillows, as to make it perfectly natural to assume this diagonal position in the hammock. All "Reposo" hammocks have varnished wood bars with patented wood tips at both ends, continuous stringing, adjustable hitch end rings requiring no adjustable ropes nor knots, Jacquard designs, concealed folding spreader at head, wide valences and "Reposo" pillows, upholstered with buttons and tassels. Size of woven part 56x86 inches.

THE END OF THE TRUST MANIA.

One of the best signs of the time, says Henry Clews, is the complete subsidence of the consolidation or trust craze, which reached its climax in 1901. In the year just closed it is estimated that the total industrial consolidations aggregated only about $185,000,000, as against $425,000,000 in 1903, $1,122,000,000 in 1902, and $2,805,000,000 in 1901. The causes of this cessation were twofold: First, bankers profited by their experience and refused to finance further schemes of this class, and, second, owners of industrial plants discovered that the trust systems do not always work as well as anticipated, and that, as a rule, they were absolute failures in the maintenance of monopolies. Over-capitalization and heavy fixed charges based upon expected monopoly-profits, proved the strongest possible inducement to the starting of new competition, small fixed obligations, new machinery, fresh brains and new methods. The present generation is hardly likely to see a repetition of the trust mania on its former scale. Combinations will continue, but on sounder and more politic lines. Monopolies we may still have; some of which are inevitable; but the promoters' dream of turning all the vast industrial machinery of the United States into a few ponderous combinations has happily broken down through its own inherent rottenness and weakness.

CANADA TRADE BOOMING.

Toronto.

(*From An Occasional Correspondent*).

As has been noted in these columns recently, the general business outlook throughout Canada is exceedingly bright. Conditions in Western Canada are similar now to what they were in the Western States, about fifteen years ago. And the same active demand exists here for all building materials, agricultural implements and farm supplies. The present commercial history and that of the future of Canada seems to be a repetition of that of the United States. And toward the West is moving the center of business. Some of the Eastern jobbing Hardware concerns have anticipated this by establishing Western branches. This was done by Wood, Vallence & Company, of Hamilton, Ont. The branches at Winnipeg is under the name of George B. Wood & Company, and that at Vancouver, B. C., is known as Wood, Vallence & Leggat.

Frank Vallence, who has charge of the gun and sporting goods department, said that the Western trade was growing very rapidly. Continuing Mr. Vallence had this to say: "I spent some weeks this Summer and Fall at our Winnipeg store and the growth of business there and remarkable demand for all kinds of goods was a good indication of what the future of that part of Canada is to be. More than 100,000 settlers have come into Canada this past twelve months from the United States alone, and the city of Winnipeg is the central point for the new country being settled." When asked how trade had been in the sporting goods department Mr. Vallence said: "Now almost every Hardwareman of Canada is selling sporting goods; and its the jobber here who must take care of the retailers wants. This end of our trade is constantly enlarging." Mr. Vallence is one of the best posted gun men in Canada, and a keen observer of business conditions and his opinions are of value to the trade.

F. Hamilton of the F. Hamilton Company has made a big success in the Hardware trade. Coming to Hamilton only a few years ago and buying a run down Hardware store, Mr. Hamilton has, by close attention to business and a strong winning personality, succeeded in building up a splendid trade. To the HARDWARE correspondent Mr. Hamilton said: "I think conditions of trade have steadily improved here since 1900. Business in our own city has been especially good. No small amount of new building has taken place, a number of large factories having been established here during the past four years. There are very few vacant houses, and all kinds of property are in strong demand. The outlook is exceedingly good."

An exceedingly attractive store is that of Ingram & Davey of St. Thomas, Ont. The store is large, well lighted and goods are displayed in an exceedingly attractive manner. In addition to the usual line of Hardware and House Furnishing Goods Ingram & Davey carry a very complete stock of crockery, glassware and lamps, and find this a good winter line. A large storefront and plate glass windows are used to good advantage in displaying sporting goods. A very attractive effect was had, just before the holidays, by draping one of the large windows with the Union Jack, with English made sporting goods in the foreground.

Many of the Canadian Hardwaremen carry stoves and ranges, and find the trade exceedingly satisfactory. A good line is displayed by W. J. McMurtry of St. Thomas. Mr. McMurtry reported business as good, and called attention to the fact that the railroad development now taking place, was sure to help St. Thomas as a business center.

London, Ont., is one of the conservative business cities of Canada, but can boast of two hustling wholesale Hardware houses, The Hobbs Hardware Co. is a live, wide-a-wake concern and is a power in the Hardware trade of Ontario. During the past few years many new lines have been added and each has proven a success. The manager said that in such lines as House Furnishing Goods, which included Brass and Iron Beds; Sporting Goods, including Pipes and Harness Makers' Supplies, a very satisfactory trade had been built up. All these lines and many others will be pushed in the future. Circulars and little catalogues are issued monthly, in which way the trade are kept posted, and the work of the salesman is made lighter.

The large new warehouse of the H. S. Howland & Sons' Co., Ltd., is now completed. The stock of this concern was completely destroyed in Toronto's great fire last Spring; but remarkable enterprise was displayed by H. S. Howland & Sons' Company in getting a new stock together and a few days after the fire business was going on as usual. The new warehouse of H. S. Howland & Sons' Co. is up-to-date and being built especially for a Hardware jobbing business is almost perfect as to arrangement. The business of this concern is exclusively wholesale.

Among the retailers of Toronto who enjoy a good cash business is the Russell Hardware Co. In addition to the usual Hardware stock a most complete line of House Furnishing Goods and farmers' and country trade supplies are handled. One of the members of the concern in speaking of business condition and changes said: "Our business is largely with the country trade—this is somewhat different than city business, but is a profitable and a loyal trade. If properly handled and if well treated these customers are sure to stay—and are not influenced by fads or styles. Our stock, therefore, is largely made up of the staple and substantial goods in our line and is an easy stock to handle."

"One of the finest retail stores in Toronto and probably in all of Canada is that of Rice, Lewis & Son, Ltd. This concern do a large wholesale Hardware business, covering a large part of Ontario, and having a number of salesmen on the road. The retail store, however, is worthy of special note. The building was erected especially as for the business. The ceilings are high, the store is light and the interior arrangement of stock is exceedingly good. The second floor is given up exclusively to the sporting goods department, and for use of the offices. House furnishing goods are shown on the third floor—a fast elevator, in the center of the store, connecting all floors. The wholesale department is in the rear.

From all sides come the same reports of good business and the trade in Canada for 1905 will undoubtedly be the largest in the history of the Dominion. HAMMERNAIL.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED JANUARY 24, 1905.

376,803. AUTOMATIC HORSE TIE. R. Hymers, London, Ontario, Canada.
376,813. DOOR CHECK. C. Cleveland, New York, N. Y.
376,846. WEATHER STRIP. T. P. Asbury, Tingley, Iowa.
376,881. SCREEN FOR WINDOWS, DOORS, ETC. J. Haish, Dekalb, Ill.
376,953. PRESERVE JAR FASTENING. G. H. Harvey, Pittsburg, Pa.
376,955. TRANSOM LIFTER. S. L. Hill, Boston, Mass.
377,003. TOOL HANDLE. C. L. Young, Springfield, Mass.

PATENTS ISSUED JANUARY 24, 1905.

780,553. WINDOW SHADE MOUNTING. H. Dittenheimer and S. Erikson, New York, N. Y.
780,657. MITERING IMPLEMENT. G. L. Holt, Des Moines, Iowa.
780,706. FLOUR SIFTER. O. G. Cole and O. K. Cole, Turner, Ore.
780,772. WRENCH. J. F. Ballard, Chrisman, Ill.
780,818. CLAMPING WRENCH. L. Schlegle, Easton, Pa.
780,935. JAR SEALING WRENCH. L. D. Burlingham, Warren, Ohio.

PATENTS EXPIRED JANUARY 31, 1905.

377,014. LIQUID GLUE PACKING CAN. R. Brooks, Gloucester, Mass.
377,022. SCYTHE FASTENER. L. R. Edwards, Charlemont, Mass.
377,033. FISH HOOK. C. Kerrison, Jr., Charleston, S. C.
377,034. PACKAGE FOR LIQUID GLUE, MUCILAGE, ETC. J. W Kirkpatrick, Newburyport, Mass.
377,124. TEA KETTLE. L. P. Schneider and G. Waigle, Linder, Mich.
377,140. LEMON JUICE EXTRACTOR. R. E. Bristow, Rockford, Ill.
377,257. SCREW KEY FASTENING FOR TOOL HANDLES. G. Hoffmann, Lebanon, Ill.
377,291. LEMON SQUEEZER. W. K. Crofford, New York, N. Y.

PATENTS ISSUED JANUARY 31, 1905.

781,081. COOKING PAN. E. L. MacFate, Washington, D. C.
781,247. EGG BEATER. W. T. Washington, Harrodsburg, Ky.
781,501. DOOR SECURER. W. P. Dobson, Grants Pass, Ore.
781,515. WRENCH. L. Griffin, Whigham, Ga.
781,543. STREET CLEANER. D. G. McClay, Santa Ana, Cal.
781,551. DOOR CHECK. M. A. Quillin, Jasper, Mo.
781,591. ATTACHMENT FOR RAZOR STROPS. J. S. Burk, Prosser, Wash.

Superstitious.

Ike and Mo were out in their motor car, and they ran over their thirteenth victim, an old woman.

Said Mo to Ike, "I hopes we ain't going to begin to have bad luck now."—*Sporting Times.*

WISCONSIN HARDWARE DEALERS ASS'N

The Ninth Annual Convention of the Wisconsin Hardware Dealers' Association was held in the magnificent convention hall of the Republican House, Milwaukee, on Wednesday and Thursday, February 1st and 2d, and in point of numbers, surpassed all previous conventions, opening its proceedings to nearly 400 members, which filled the hall to its capacity at the opening session.

WEDNESDAY AFTERNOON SESSION.

The meeting was called to order by the president, H. L. McNamara, of Janesville, who delivered the following:

President's Address.

The wheel of time has made another revolution, and we are now assembled in our ninth annual meeting. In reviewing the events of the past year I see nothing but cause for congratulation. The conditions of general trade throughout the country have been good and stable, and business is on a good and fair foundation. Though our Presidential election occurred during the past year, which always has a tendency to decrease trade on account of the chances of a change in policies, still the trade

RALPH M. BURTIS, PRESIDENT.

figures are about equal to those of the previous year and the largest for any Presidential year.

Our association has grown larger, stronger and better. A year ago we numbered 300 members, while to-day we have 400 active, energetic and loyal workers, an increase of 30 per cent.

We have paid all the necessary running expenses and have a very good sum in the treasury. We are fully solvent, and there are no immediate prospects of becoming anything else.

ASSOCIATION FIRE INSURANCE.

At our annual meeting last year a mutual fire insurance company was formed. Only association members are eligible to membership therein, and we started with about $100,000 of insurance taken. We were put to quite a bit of expense in getting started, such as paying for incorporation, for office furniture and the necessary books, blanks, etc., and it was not until the middle of April that we were organized and doing business. However, the results of these few months have been gratifying. We have paid all the running expenses, the expense of starting and all losses, and to-day have sufficient funds in the treasury to pay a rebate of 20 per cent to the members. I earnestly recommend this insurance to the members who have not already taken advantage of it. The insurance company is, as might be said, a "child of this association," and I believe should receive and is entitled to receive the careful investigation and consideration of every member of this association before he refuses to become a member thereof. The class of risks is of the best, and the men in charge—practical Hardwaremen—are imbued with sound business principles. You can rest assured that the dividends of this association will play no part in "frenzied finance."

WORK OF THE NATIONAL ASSOCIATION.

By the courtesy of this association it was my great pleasure and honor to be one of your delegates to the National Convention of Retail Hardware Dealers, and I consider that meeting one of the bright spots of the year. I found the officers of that association to be able, energetic, conscientious business men, who have the welfare of the Hardwareman at heart. I became deeply impressed with the good work of the association and of the great power and protection it affords to the individual retail merchant throughout the country.

The work it has already accomplished in suppressing the unfair competition of catalogue houses, in preventing them from buying staple articles of Hardware and selling them below cost merely as an advertisement, is sufficient to commend it to every dealer in the country. I believe its scope and influence will increase and that the time will come when each one of us will look upon it as our greatest benefactor and protector. It is founded on the right principles. As you all know, it is composed of State associations, and each State association is entitled to one delegate therein for every 100 members. It is similar in organization and representation to our National House of Representatives, and I trust it may become as celebrated in the world of trade as that illustrious body has become in the world of parliaments. Its object is the protection and advancement of the retail Hardware business, and I deem it the agency through which we can find relief when we do not get just treatment from the manufacturers.

The National Association, however, is hampered and handicapped by lack of funds, and if it had greater resources its work would have greater scope. Is it not in keeping with the spirit of the times? This is an age of combination. On the one hand we find manufacturers combining in trusts for their mutual protection and benefit, and on the other hand we find the laboring men combining in unions for their mutual protection and benefit; and where is the retailer? It is only through such organization that we can expect to maintain our place and standing in the industrial world.

INCREASED MEMBERSHIP.

In my opinion we should increase the dues to the National and thus enable it to continue the good work. I believe in the national organization, and I believe Wisconsin should have a greater representation in that body. At the present time we are entitled to four delegates, and I do not think this is commensurate with the power and standing of the State of Wisconsin. The only remedy is to increase our membership, and I would ask that every one of you deem himself charged with securing at least one new member for our association. If you receive benefits from this association tell your nearest neighbor about it, and induce him to become a member. In this way you will help yourself and the business with which you are engaged.

BROAD FRATERNITY.

To me these annual gatherings are a source of great benefit, and I trust they are to each individual. I hope every member will take a deep interest in this session and that you will feel perfectly free to bring up for discussion the cases which every day confront you in your own business affairs. There may be some here who have successfully solved the very problem on which you are working, and I sincerely hope no member will refrain from giving to any other member information which may be of value. We should have a broad fraternal spirit, and not be guided by petty contentions. Commercial relations are interdependent and the success of one man helps indirectly the success of every one else engaged in that business.

HARDWARE NEXT TO BANKING.

While competition is the life of trade, yet no man should stoop to any low, mean, nor narrow thing to gain a temporary advantage over his competitor. Especially is this true of the Hardware business. Why, gentlemen, do you realize and do you know that there is more money invested in the iron and steel industries, together with their kindred branches, than in any other business in this country, excepting alone the banking business?

SHOULD CO-OPERATE FOR MUTUAL ADVANCEMENT.

You are engaged in and are representatives of no small business, and the magnitude of this industry demands that each of us manage our business in a manly, dignified way. Let us co-operate for mutual advancement and stand to make our asso-

Digitized by Google

ciation foremost in attaining the desired ends in the universal brotherhood of man.

Let us so shape our policies and our endeavors that a membership in the Wisconsin Association of Retail Hardware Dealers will be a sufficient guarantee in commercial circles, where honesty, integrity and square methods are the criterion.

At the conclusion of the address of the president, Secretary C. A. Peck, of Berlin, then delivered the following:

Secretary's Report.

GROWTH HAS ALWAYS BEEN FORWARD.

In coming with my annual report this year, I come with more encouraging news than at any previous meeting. When those of us present to-day look back to the first meeting held at this same place in 1897, and remember that the best we could do with the Hardware trade of the State was to get out only about twenty, and to-day look at our register and see the names of 400 who have paid their dues and are in good standing, we may well feel that our work has not been entirely in vain. We might add that many jobbers felt that we would meet for a year or two and our enthusiasm would go where the woodbine twineth, but our growth has always been forward, and we have never recorded a retrograde movement. Some may be inclined to ask, What have you done? but to almost every one of our members the answer is too plain to need mentioning.

To-day the jobbers and manufacturers of the whole United States are ready, and what is more, they are willing to co-operate with us in every legitimate effort to benefit the retailer, and the work along this line that has been accomplished the last six months alone is enough to encourage every dealer to persevere. The jobbers, manufacturers and retailers of Hardware are closer together to-day than ever before, and right here I want to urge every retailer to be true on their part to those who are trying to be true to them. When you are advised of one that is not, spot him, and do it so hard that he will feel it. They are few and far between, but don't forget this unasked for advice.

A FEW DEALERS SHOW SKATES IN JULY.

My work along the line of complaints has been less the past twelve months than at any other like period since we started. The formation of our own insurance company has given the association a wonderful start ahead, and the end is not yet. There are a few dealers who show skates in their windows in July that have no use for association work, but they are few and far between, and I wish to go on record here and now, in saying that I believe the men in the retail Hardware trade in Wisconsin are as fine a set of fellows as you can find engaged in any other one line of business, and don't you forget it.

My report on finances will show a handsome increase, and that in face of the fact that our annual dues would have to be increased fifty per cent to equal the dues of the lowest other State in the Union. We go home with $2,300 in our treasury.

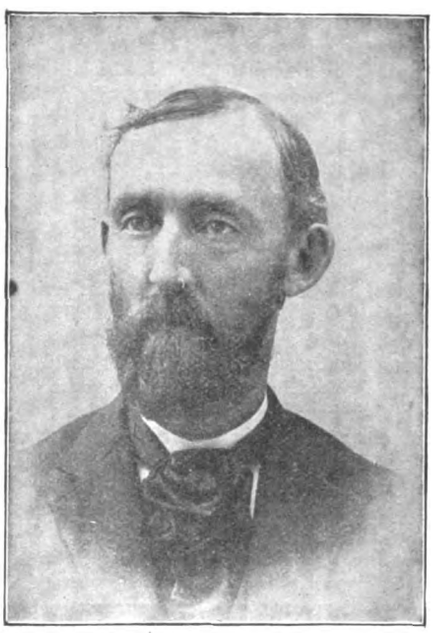
OTHER MEETINGS.

I had the pleasure, with your president, of attending the annual meeting of the National Retailers at Indianapolis, Ind., a report of which will be presented later, but I might say, in passing, it was an inspiration to see representatives of some 6,000 retailers from seventeen different States in session, and every one of them working for the same beneficient object of bettering the condition of their membership. I also attended the annual meeting of the Michigan Association at Grand Rapids in August, and found them alert in combatting the evils which we all have to contend with. They reported progress all along the line and went to their respective homes with new ambition to push the fight into the enemy's country.

ROUTINE WORK.

February 24th I sent out 126 statements to delinquents, followed May 7th with 66 more to those still in arrears, which was again followed May 20th by 49 more, and again on July 28th to 34 still unheard from, which number was reduced August 17th to 26, when I made drafts on these, and I think all paid but 11, whom I had to drop. It was not pleasant work, but I saw no other way to keep some of you fellows who are awfully busy in line. I say thanks to every one of you.

April 7th I mailed 800 copies of the proceedings of the last annual.



The Executive Committee met me but once during the year, August 2d, at Green Bay, when we blocked out the programme for this meeting and did other necessary work. As far as I know, we have lost by death but two during this year, August 2d, Robert H. Halstead, at Sturgeon Bay, and September 28th, Louis Welso, at Winneconne. I notice that John Hessell, of Antigo, and H. L. McNamara, of Janesville, suffered from burglaries, and from fires the Ridgland Hardware Co.; Foss, Armstrong & Johns; R. R. Bratz, Biechl Bros. and R. M. Burtis Hardware Co. There may have been others, but these are all that I have noted down.

Of the $350,000 pledged for insurance at our meeting a year ago all but $40,000 has been taken, part of this refused for good reasons, and a part of it for reasons not so good.

I would not close this report without thanking you, one and all, for the very courteous treatment I have received at your hands. I have made some mistakes for which I beg pardon, but you must bear in mind that I am now a grandpa many times over, and while I may sometimes seem persistent, it was only that we might all win out, and with your hearty co-operation in the future, as in the past, we shall do it.

R. R. Williams, editor of the *Iron Age*, then addressed the meeting, speaking in substance as follows:

"I have long looked forward to meeting with this association, as it is a sincere pleasure to come into personal touch with the trade. I bring you the greetings of the New York Association, from President John G. Ferres, of Jamestown, N. Y. I wish to congratulate your association on the noble man you have for president, and on your secretary. It seems sometimes as if these associations were gotten up for the benefit of editors, as it enables them to get a broader outlook and do their work better. The keynote of association work is the spirit of fraternity with the larger circles of friendship which it makes possible. There is a necessity for the cultivation of the fraternal spirit with all branches of the trade, manufacturers and jobbers as well as retailers. One advantage which the retailer has in attending these conventions is that he can break away from the things

C. A. PECK, SECRETARY-TREASURER.

that narrow his field of vision and look at his own business in the distance. He can take a calm, unimpassioned view and get the right perspective, seeing his work as others see it. He can be impartial in his judgment of his methods, etc. These conventions help the dealer in overcoming difficulties. When he comes to a gathering of several hundred merchants, he can see that other dealers have their troubles as well as himself, and that conditions are not so very different in different communities. Trade tendencies have been a special subject of my thoughts, and the interplay of forces between manufacturers, jobbers and retailers should be considered."

The speaker noted several trade tendencies: (1) narrower profits for the retailer as well as the jobber and manufacturer; (2) a wider range of goods, bringing into the store what were sidelines some years ago but are now recognized as staple stock with other goods just outside the door; (3) a tendency toward large establishments shown in consolidation of manufacturers and jobbers, and in the edge the large retailer has over the small one. He regretted this condition of things, and urged on the dealers present the duty of growth and the necessity of adapting manufacturers' and jobbers' tactics in retail trade conditions. An aggressive search for business should be made and new methods should be introduced.

The speaker closed by quoting a couple of stanzas from Kipling, the point of which were in the last three lines, as follows:

"But they couldn't copy my mind,
And I left them swearing and sweating,
A mile and a half behind."

The application was that the large number of young men present should use the faculty of origination.

Digitized by Google

President McNamara then announced that the Executive Committee had made the following appointment of committees:

Committee on Transportation—E. H. Ramm, New London.

Auditing Committee—Ernest Dewey, Kenosha; J. Montgomery, Wausau.

Committee on Press and Publicity—J. C. Lewis, Antigo; P. J. Jacobs, Stevens Point.

Committee on Resolutions—F. T. Sengbusch, Burlington; Mr. Wernecke of Wernecke & Schmidt, Manitowoc.

Committee on Question Box—L. Martin, Viroqua; Arthur Heins, Tigerton.

Committee on Legislation—Jacob Kornelly, Milwaukee; H. C. Schofield, Sturgeon Bay.

Reception Committee—F. Merbach, Ripon; J. Hughes, Fond du Lac; John Hessel, Antigo; O. A. La Budde, Elkart Lake.

Sergeant-at-Arms—A. Schupinsky, Milwaukee.

A. S. Sheldon was on the programme to deliver an address on the "Science of Salesmanship," in the absence of Mr. Sheldon, Lewis Cass Hitchcock appeared as his representative and delivered the address, from which we make the following extracts:

"The power to pursuade is the underlying principle of salesmanship. Trickery brings only flashlight success. Real success is permanent and increasing. It is business building. Commercial institutions are composite salesmen. Trade rests on confidence. The salesman's personality is everything. Courage is developed out of faith. Many men when they reach the top of the ladder are told by their friends that they have reached the limit and are as far as they can go, but the right kind of a man says pass me up more lather. This illustrates the force of initiative. The man with bad health cannot do much business. Education is a drawing out process. The hardest men to sell to are the sullen men who say nothing and it is a serious thing to be up against the monologue in business. When you try to sell goods the first thing is to secure the customer's attention, the next is to arouse his interest and the third is to make him resolve to buy.

The speaker told of being in the office of a Milwaukee promoter who was placing some bonds. One agent reported that he had almost placed eight, a second that he had almost placed six, and the third man said that he had sold one bond. He further stated that the man that had sold one bond had done some business, while the almost fourteen orders received could not be cashed for a cent. He finished by telling the story of an old maid who had asked a widow how it was that she had been so successful in securing husbands and the widow attributed her matrimonial success to the "comehither" look in her eye.

President McNamara then called attention to the fact that Secretary Peck would give them a talk on "Insurance" as the next feature on the programme. Mr. Peck said:

"I have nothing special to say on this subject at the present time. I would like all those who have not yet taken out an insurance to try and see me and have our methods explained to them. With the membership we have, we should have a million and a half of insurance in force."

The Executive Committee of the Wisconsin Retail Hardware Dealers' Mutual Fire Insurance Company held a meeting recently and voted that in the future our association should make no discount in the payment of fire losses, but should follow the English plan and send full amounts. You know it is the custom of the old line companies to take off from one to one and a half per cent. cash discount in case of a fire loss, and we have done that heretofore, but will not in the future. It is our aim to carry the best goods and to give our policy holders the best insurance on the market.

The most frequent objection which I have heard from members in regard to our insurance is that we ask all parties taking out insurance with us to carry a five hundred dollar policy in one of the old line companies. We do this in order to make a rate. If it is worth one and one-fourth to any old line company to take a risk on any given property, it is worth one and one-fourth to us, and if the old line companies do this, this makes a rate that is safe for us. By following this rule we must win out. At the meeting of the Executive Board of the Insurance Company held recently, we voted to return a dividend of 20 per cent. to the policy holders and we hope to make it 35 per cent. next year. This means that $1.50 rate amounts only to $1.20.

Some dealers do not understand about the limits of their liabilities in cases of unprecedented losses. If the insurance company should go bankrupt through what would practically be an impossible series of fires, and all the policy holders should go bankrupt, any individual policy holder that was left can only be held liable for three times the amount of his yearly premium. In my individual case my yearly premium is $12.50, and the limit of my liability would be $37.50.

If I have a fire, I want the money. Not so very long ago I received an application from Connecticut and I wrote a $3,000 policy for a Willimantic dealer. We should all be proud of our meeting and proud of our association. A little while ago, when I was called out of the room, I met a man who wanted some insurance. To-day we have $409,000 of insurance and in a year we would have a million or a million and a quarter.

The meeting then adjourned until Thursday morning.

THURSDAY MORNING SESSION.

Upon being called to order by the president, Secretary Peck read the following communication:

"The undersigned jobbers and manufacturers request the pleasure of your company at the Alhambra on Wednesday evening, February 1, to witness 'Shadows of a Great City,' also at the Academy on Thursday evening, February 2, to enjoy 'Sue, of Lone Farm.'—John Pritzlaff Hardware Co., Brand Stove Co., National Enamel Stamp Co., Lindsay Bros., Speich Stove Repair Co., A. J. Lindemann & Hoverson Co., James E. Patton Co., Milwaukee Corrugating Co., Wm. Frankfurth Hardware Co., Fuller-Warren Co., Geuder & Paeschke Mfg. Co., Washington Cutlery Co., L. J. Mueller Furnace Co., R. J. Schwab & Sons Co., Badger Nail Co., J. P. Lindemann & Sons.

It was referred to the Cimmittee on Resolutions.

A telegram was read from Frank A. Bare, Mansfield, Ohio, secretary of the Ohio Hardware Association, extending fraternal greetings to the Wisconsin Association.

A letter was read from F. W. Lucas, a Litchfield, Minn., Hardware dealer, in which he asked for advice in combatting farmers' co-operative stores.

D. D. James, Richland Center, wrote regretting his inability to be present on account of the recent death of his wife and wished the association a prosperous session.

The following motion was handed in by A. G. Kroncke, Madison:

"Resolved, That it is the sense of the convention that all manufacturers and jobbers should refrain from giving exhibits."

President H. L. McNamara, Janesville, said the manufacturers are our friends and at these meetings they show a number of things which dealers in small cities would not otherwise see.

A letter was read from the H. D. Smith Co., Plantsville, Conn., in which they stated that they were sending a number of Perfect screw drivers for distribution to the members of the convention.

The hall was then darkened and Mr. Watrous of the Citizens' League gave an interesting stereopticon exhibition. He started by throwing on his screen the features of President McNamara and gave an extensive series of views showing the different public buildings, hotels, parks and other features of Cream City interest. He concluded by extending a cordial invitation on behalf of the association to have the delegates meet in Milwaukee the next year.

H. F. Kreuger, Neenah, Wis., delivered an address on

THE PROFIT OF SIDE LINES,

in the course of which he said:

That the term "Hardware" implies more to-day than it formerly did and the public demands variety. A number of goods had been added to Hardware stocks which were considered as side lines at one time, but were no longer to be looked at in that light.

Mr. Krueger then took up the topic that goods well bought are half sold, and, by means of a number of catalogues and literature of various mail order houses, he went into a thorough and practical demonstration of the intensity of catalogue house competition and pointed out that he believed that the prices made to retailers on various stove sundries and other goods were too high.

For instance, he said: "I do not know whether any of my hearers do much steam heating business or not, but, if they have any dealings with the American Radiator Co. and desire new sections of radiators, they can secure core castings which, when they weigh them on their own scales, show that their cost is 2½ cents per pound. Every section of this radiation that is sent out is tested and it must be made of good iron. Now suppose you send to a stove manufacturer for a new water front, which is nothing more or less than a piece of cast iron, and weigh them and you will find that you are paying from 10 to 12½ cents per pound for these fronts. Now why should a piece of cast iron used for a radiator job cost 2½ cents per pound, while a grade of iron no better than is used for a water front should cost from 10 to 12½ cents per pound.

"The case of stove shakers is even worse than that. Weigh them and you will find that you are paying from 18 to 19 cents per pound for them. They are nothing but cast iron nickel plated. Can you not get them made out of brass for less money than this? Or, to take an illustration from another class of goods where a good grade of iron is used. Take Mrs. Potts Sad Irons made by the Enterprise Manufacturing Company of Pennsylvania, Philadelphia, Pa., and you will find that these do not figure over 4

Digitized by Google

cents per pound. Why do we have to pay 4 cents for our iron in the shape of sad irons and 18 cents for it in the shape of stove shakers?

Besides stoves, Mr. Krueger took up the matter of Hardware and gave the association a number of figures and experiences which claimed their close attention.

Andrew Esser, Hartford, read an interesting paper on "Benefits of a Local Association," which occupied the attention of the delegates present. As National Delegate, Secretary Peck then made a short report.

A. Kroncke, Madison, then addressed the members as follows:

"The number of exhibits made by manufacturers and jobbers at these meetings are increasing every year. This morning one dealer was telling me that he had been buttonholed by a certain manufacturer's representative yesterday afternoon, and it was 4.30 p. m. before he was able to get away. Consequently he missed the session of the convention. Our object in coming here is to learn from and teach each other. This is not fair. We do not come here to buy goods. If this motion is passed the exhibitors cannot be forced out. It is an injustice to the manufacturers themselves to allow some of them to have exhibits when there is not room for all.

"Some manufacturers have exhibts and this forces others to follow suit. Traveling men who have exhibits in charge are tied down to their rooms and cannot circulate freely among the dealers. I move that a committee of three be appointed to whom this resolution can be referred and that they be instructed to report at the afternoon session."

Otto Schlafer, Appleton, said: "Traveling men who entice dealers away from the convention do so unintentionally. We cannot afford to cut out the manufacturer and the jobber. Some dealers located in small towns cannot see displays of goods at home and this is the only opportunity they have to do so. I think we should have a large hall and rent space to the manufacturers and jobbers. This will prevent them from enticing the traveling men away and will keep the good will of the traveling men and not antagonize them.

The meeting then adjourned.

THURSDAY AFTERNOON SESSION.

President H. L. McNamara, of Janesville, called the Thursday afternoon session to order at 2.25 p. m. and announced the appointment of the following committee on the condition of the stove trade; Ernest Dewey, Kenosha; O. Schlafer, Appleton; O. A. Labudde, Elkhart Lake; J. Kornelly, Milwaukee and H. Krueger, Neenah.

James Watson, Marinette, then delivered a paper on the subject, "A Few Things That Will Help the Retailer."

At the conclusion of his address, he briefly narrated the scheme organized by the merchants of that town along the line of co-operative advertising to check department store competition. He stated that to have a scheme of this kind a success, all merchants entering into it should have a perfect understanding and all should go in for a certain length of time, say, for a year.

C. A. Peck then read a communication from M. L. Cory, Argos, Ind., secretary of the National Retail Hardware Dealers' Association on purely executive business.

S. Norvell, St. Louis, Mo., then addressed the meeting.

Secretary Peck then referred briefly to a visit he paid the Michigan Retail Hardware Dealers' Convention. He stated that there were a number of dealers in Northern Michigan that wished to come into the Wisconsin association and that he had Secretary Scott's permission to take them in.

A motion was made by Secretary Peck that Wisconsin send four delegates to the National Association; it being carried, the following were elected: Ralph Burtis, Oshkosh; C. A. Peck, Berlin; Emil Tietgen, Manitowoc; and E. H. Ramm, New London.

The following officers were elected for the ensuing year:

President—Ralph Burtis, Oshkosh.

Vice-President—Emil Tietgen, Manitowoc.

Secretary-Treasurer—C. A. Peck, Berlin.

Members of Executive Committee—James Murphy, Racine; H. J. Krueger, Neenah.

The Question Box was taken up, and the questions placed in it were thoroughly discussed.

The following resolution, presented by Chairman Otto Schlafer of Appleton of the Committee on Stove Conditions, was carried:

"*Resolved*, That it is the sense of the Wisconsin Retail Hardware Dealers' Association, in convention assembled, that present prices asked by the leading stove manufacturers for their medium and higher priced stoves and ranges are too high in proportion to the present cost of raw material and labor entering into their manufacture; and be it further

"*Resolved*, That they adjust their prices in proportion to the prices charged for other articles manufactured of like material and labor and that a copy of these resolutions be submitted to the National Association of Stove Manufacturers asking them to take action on the same."

The Committee on Resolutions reported adversely on the resolution presented by A. G. Kroncke, Madison, on the question that it was the sense of the convention that all manufacturers and jobbers should refrain from giving exhibits. They also resolved that the secretary of the association should express sympathy with the bereaved family of Lewis Nelson, Winneconne; R. H. Halsted, Sturgeon Bay and John L. Walcott, Sharon; also with D. G. James, Richland Center on account of the recent loss of his wife.

A motion that the session of the convention for 1906 be prolonged to three days was under discussion and lost.

Convention adjourned.

NEW ENGLAND IRON AND HARDWARE ASSOCIATION.

The annual banquet of the New England Iron and Hardware Association was held at the Hotel Vendome, Boston, January 24. It was preceded by a reception in charge of a committee of which R. M. Boutwell was chairman. Former annual dinners of this association have established a standard of excellence, which was fully lived up to on this occasion. The banquet room was tastefully decorated with bunting and the tables with cut flowers. Music was furnished by an orchestra during the reception and dinner.

President Charles F. Bragg of Bangor, Me., acted as toastmaster. Those occupying places at the head table were Charles F. Bragg, Hon. J. L. Robinson, Hon. P. P. Campbell, Edgar Van Etten, vice-president N. Y. C. & H. R. R. R.; Edward B. Wilson, president Boston Board of Trade; Rev. Thomas Van Hess Samuel A. Bigelow, president National Hardware Association; William P. Hill, Samuel Disston and Walter C. English.

Many representative Hardwaremen and manufacturers from all parts of New England were present, many of the members of the association having one or more guests.

The arrangements for the banquet were in charge of John T. Boyd and were perfect in every detail. Mr. Boyd is the manager of the New England office of Yale & Towne Mfg. Company, and has been clerk of the association for several years.

Following is a list of those present:

Thos. H. Baldwin,
Edgar Reed,
John H. Robbins,
L. H. Pease,
Wm. A. Hopkins,
Geo. P. Hart,
A. H. Decatur,
Josiah E. Bacon,
Chas. F. Dowse,
Geo. P. Bullard,
Chas. King,

We have received from the Lord Advertising Agency, Scranton, Pa., their new list of trade papers, a booklet that should be in the hands of every trade paper advertiser. It contains a very complete list of trade journals with the most important particulars concerning each, a number of specimen advertisements, and several pages of valuable suggestions for users of trade papers space. Altogether the booklet seems to be worth many times its price, $1.00.

SOUTH DAKOTA RETAIL MERCHANTS' AND HARDWARE DEALERS' ASSOCIATION

The eighth annual convention of the South Dakota Retail Merchants' and Hardware Dealers' Association was held at Sioux Falls, S. D., on January 24, 25 and 26. Col. T. H. Brown, president of the Board of Trade, welcomed the association to Sioux Falls. He said in part:

"It is thirty-two years since I enlisted in the ranks of the merchants in Dakota. The retail merchant of to-day bears but little semblance to the retail merchant of the past. The box of tobacco and pipes, lounging place and headquarters for town gossip, even the bale of cotton cloth used for a pillow for the loafers, have disappeared. The retail merchant of to-day stands forth as an important factor in advancing civilization. The telephone, telegraph and modes of rapid transit have brought him in close touch and has made him a part of that great army which stands between and ministers to the needs of the producer and consumer.

"The retail merchant of to-day is not a mere weigher and measurer of commodities. He is much more. He has not only discovered, but has laid hold of the ethics of business. A financial success is not the full measure of his purpose, the church, the school house, the social and moral atmosphere of his home town are within the compass of his duty. Every city, town and hamlet of South Dakota gives evidence of his duties well performed. How fitting it is that you should meet and discuss together these broadening duties and added responsibilities.

Hon. P. F. Wickhem of Alexandria responded on behalf of the members of the association. T. Homer Green of Minneapolis, who was scheduled to make an address on "Credits," was unable to be present, but sent an able paper on this subject, which was read to the association by O. L. Schutz of Minneapolis. In the paper Mr. Green stated that credit adds to the ability of the merchant to do business by enabling him to enlarge his capital and carry a larger stock. Yet a merchant should have sufficient real capital to conduct his business safely and not get beyond his depth. People, he stated, often fail in business on account of a lack of attention to details. Indiscriminate trusting is a common cause of failure. A merchant must be honest with those from whom he received credit. Above all, merchants to be successful and bring about desired conditions, must co-operate.

WEDNESDAY MORNING SESSION.

At the opening of the morning session President Grimm appointed an auditing committee, and W. J. Andrews, treasurer of the association reported that during the year he had received the sum of $935.84, which in connection with the sum of $68.56 on hand at the close of the last meeting made $1004.40 which had come into the hands of the treasurer. The sum of $716.55 had been paid out on warrants, which left $287.55 in the treasury at the time of making the report.

The report of L. S. Tyler, secretary, among other things referred to the working of the Transient Merchant law, which in practice was found to be incomplete except so far as it related to peddlers. Through it the Steel Range peddler had been driven out of the State. Mr. Tyler advocated the appointing of a committee to take up the matter with the State Legislature for the purpose of amending the law so that it would contain a penalty clause.

Mr. Tyler, in the absence of H. P. Packard of Redfield, who was on the programme for a paper on "Benefits of Mutual Fire Insurance," addressed the convention on this question. He referred to the Merchants' Mutual Insurance Company and urged the members to take more interest in it. He stated that the old line companies were now taking many risks as low as 50 cents on $100 for the purpose of driving the mutuals out of business. The rates were lower now by far than they were ten years ago, and this was due to the advent of the mutual companies.

WEDNESDAY AFTERNOON SESSION.

President A. F. Grimm in his annual address went over the history of the past year and told what had been accomplished by the association. He stated that while there was some enthusiasm among the merchants of the State, what was needed was more thorough organization of local bodies. He was confident that with more local associations the State organization would be put on a healthier basis. He said that the retailer and the manufacturer were being brought closer together through such organizations as the South Dakota Association and said that the new condition was proving beneficial to both. The manufacturer had seen that it was to his advantage to come to the aid of the retailer.

Then followed an address by S. B. Nelson, of Luverne, Minn., on "Credits From the Merchants' Standpoint; How to Manage Them and Successfully Collect." This was one of the most interesting addresses of the session. Mr. Nelson said that in giving credit to his customers he rated them just as the manufacturer and wholesaler did the retail merchant. One customer might be entitled to more credit than another, but when they had reached a certain point, credit was stopped. Another thing, he was not at all bashful in asking for a settlement of accounts. He made a statement to all of his customers every month and did not feel that he was insulting his customer when he did so.

He thought the principal thing was watching the books and taking care of the accounts.

George E. Pingree, of Chicago, addressed the convention on "Courtesies Due the Traveling Man by the Retailers." His idea was that the matter of courtesy should be mutual. If the traveling man treated the retailer with respect, he would receive like treatment in return; that was a general proposition. He said there were exceptions to all rules, but he found that it applied on one side as well as the other. A. J. Alwin, of New Ulm, Minn., who himself is a traveling man, had a similar subject. He, however, took the question from a merchant's standpoint and thought that the traveling man was very often the one to blame for what he considered discourteous treatment on the part of the merchant. He made a striking illustration by telling a story of a traveling man stepping from the train and walking into the palatial store of his customer. Everything was bright and sparkling, shelves full and the "boss" in his office at work. The salesman walked back into the office and accosted the "boss" and got a "turn down" and went away feeling that the merchant had been discourteous. The traveling man does not stop to think that this merchant may have loaded up heavily in anticipation of a heavy trade and been disappointed; that most of the goods he had ordered several months ago are on the shelves; that bills are due and collections are hard, and the merchant is driven almost crazy in figuring out some plan to meet his creditors so as to satisfy them. Mr. Alwin said there was not nearly so much talk among the traveling men of to-day regarding discourteous treatment as in the past. He thought this was due to the fact that the present-day traveling man was more of a business man, and he had keener realization of the situation and did not bring down the wrath of the merchant.

J. S. Johnson of Sioux City, Iowa, addressed the convention briefly on the topic of "Credits." He gave a list of failures for a certain period and showed where over thirty per cent. of them were cases where the merchant had less than $5,000 capital and attempted to do a business far beyond his ability. Failures due to dishonesty were comparatively small. Drink, gambling and sporting were responsible for a great many failures. He thought that a merchant who was not a good collector himself should be mighty careful about granting credit.

President Grimm announced the following committees:

LEGISLATIVE—J. A. Lockhart, Pierre; Mark Betts, Mt. Vernon; Senator Vessey, Wessington Springs; P. F. Wickhem, Alexandria; H. P. Hanson, Volga.

RESOLUTIONS—O. H. Rime, Dell Rapids; H. L. Arnott, Hurley; C. S. G. Fuller, DeSmet; P. Byrnes, Montrose.

NOMINATING—L. H. Loftus, Desmet; F. L. Pixley, Montrose; Joe Schoeller, Howard; N. W. Kramer, Chamberlain; A. H. Nohlgram, Canova; A. Anderson, Colton.

THURSDAY MORNING SESSION.

C. P. Hanson, of Bridgewater, read the first paper of the morning. His topic was "Union Sales." He believed that the merchants, especially in the smaller towns, would be more successful if they would, every so often, get together and hold union sales. He thought it the best way to get rid of surplus stock. The plan he proposed was for the merchants to go through their stocks and pick out the surplus, which should be put together under the direction of some one of their number and sold. If such a sale was well advertised he was confident that it would bring in large numbers of people from the outside. He thought that this was a metter for local associations to take charge of where there were such associations.

Digitized by Google

(Continued from page 36.)

W. L. Williams, of St. Paul, Minn., read a paper on "The Trade Papers and Association Work." He thought that the trade papers could be of great benefit to merchants in general. Trade paper, if they filled the field which they aim to occupy, would advance new methods for the benefit of the retailer, and would keep the members of the trade posted on all that was going on in their field.

THURSDAY AFTERNOON SESSION.

There were no papers read at the afternoon session, but a number of topics on the programme were taken up and discussed. "Rural Mail Carriers Carrying Merchandise" was the first topic discussed. It was thought to be a scheme of the parcels post, and the association went on record as against the plan. The next was "Catalogue House Competition," which was discussed at some length. It was decided that the way to meet it was by more extensive advertising and not talking against the catalogue houses.

It was decided to place organizers in the field and have auxiliary organizations started in all the towns of the State. This proposition met with considerable favor. On the proposed modification of the exemption laws there was a difference of opinion, some holding that an honest man would pay his debts with a high exemption as well as with a low exemption.

The following officers were elected for the ensuing year:

PRESIDENT—A. F. Grimm, Parkston.

VICE PRESIDENTS—F. I. Pixley, Montrose; C. S. G. Fuller, De-Smet; M. Millstad, Milbank; M. Cook, Webster; S. W. Huntington, Aberdeen; E. V. Blaine, Redfield.

SECRETARY—L. S. Tyler, Sioux Falls.

TREASURER—W. J. Andrews, Sioux Falls.

DIRECTORS—J. D. Bartow, Plankington; David Moore, Howard; T. J. Rowe, Fort Pierre; A. P. McMillam, Conde; P. F. Wickhem, Alexandria; John O'Leary, Flandreau.

The secretary was authorized to select the date for the next annual convention of the association. The matter of selecting the place for holding the convention was left to the executive committee, including the president and secretary.

There being no further business, the convention adjourned sine die.

MINNESOTA RETAIL HARDWARE DEALERS' ASSOCIATION.

The Minnesota Retail Hardware Dealers' Association will meet in Duluth, February 22, 23 and 24, and every indication points to a most successful meeting. The following interesting programme has been prepared.

WEDNESDAY AFTERNOON SESSION, 2 P. M.

Address of Welcome—Hon. M. B. Cullum, Mayor of Duluth.
Response—President A. T. Stebbins.
Opening Address—President A. T. Stebbins.
Announcement of Standing Committees.
Announcement of Committee on Nominations—To report Thursday afternoon.
Secretary's Report.
Treasurer's Report.
Why Should a Hardware Man be a Member of the Association? Vice-President George M. Evenson.
A Few Insurance Pointers. Ex-President A. C. Hatch.
Paper—Advertising a Hardware Store in a Country Town. C. H. Casey.

WEDNESDAY EVENING SESSION, 8 P. M.

Meeting of Retail Hardware Dealers' Mutual Fire Insurance Co.
Address—President Charles F. Ladner.
Secretary's Report.
Treasurer's Report.
Election of Directors.

THURSDAY MORNING SESSION, 9 A. M.

Unfinished Business.
Report of Delegates to National Convention. C. D. Decker.
Address—The Science of Salesmanship. Prof. W. L. Barth, Sheldon School of Scientific Salesmanship.
Address—From a Jobber's Standpoint. H. D. Final, Marshall-Wells Hardware Co.
Paper—Co-operation. Jesse Gregg, Nichols, Dean & Gregg.
Address—As Seen by a Traveler. F. H. Young.
Jobbers and Traveling Men Have the Floor.

THURSDAY AFTERNOON SESSION, 2 P. M.

Open Meeting.
Report of Standing Committees.
Address—W. P. Bogardus, President National Retail Hardware Association.
Address—A Hardware Man of Minnesota. E. L. Millar, *Duluth Trade News.*
Address—Hon. T. D. O'Brien, Insurance Commissioner, State of Minnesota.
Address—Hon. John A. Johnson, Governor of Minnesota.
Opening of the Question Box.
Report of Nominating Committee.

THURSDAY EVENING, 8 P. M.

Banquet, Spalding Hotel, Complimentary to the Hardware Dealers by the Hardware Jobbers of Minnesota.

FRIDAY MORNING, 8.30 A. M.

Trip to Zenith Furnaces. All are invited.

FRIDAY MORNING SESSION, 10 A. M.

Executive Session. Members only.
Addresses by National President Bogardus, Secretary Fred. Mason, of National Grocers' Association, J. F. McGuire and others.
Next Meeting.

FRIDAY AFTERNOON SESSION, 2 P. M.

Unfinished Business.
Meeting of Executive Committee.
Appointment of Delegates to National Convention.
Meeting of Directors, Retail Hardware Dealers' Mutual Fire Insurance Co.

MISSOURI RETAIL STOVE AND HARDWARE DEALERS' ASSOCIATION.

The seventh annual meeting of the Missouri Retail Stove and Hardware Dealers' Association will be held at the Commercial Club, Third and Edmond Street, St. Joseph, Mo., February 21 and 22. The programme is as follows:

TUESDAY MORNING, FEBRUARY 21, 9.30 A. M.

Address of Welcome—W. E. Spratt, Mayor; E. A. King, President Commercial Club.
Response—Taylor Frier, President of State Association.
Appointment of Committees on Press, Resolutions, etc.
Recess for Admission of New Members, Payment of Dues and Becoming Acquainted.
Annual Address—President Taylor Frier, Louisiana, Mo.
Annual Report—Secretary Fred'k Neudorff, St. Joseph, Mo.
Report Executive Committee—F. A. Kansteiner, St. Louis, Mo.
Short Addresses—Impressions of Conditions and Progress of Association Work, led by S. P. Johnston, Editor *The American Artisan*, and representatives of press and trade interests present.
Discussion of Missouri garnishment law, its benefits and defects, by members of the association.
Paper—"Novel Methods of Advertising," H. W. Beegle, of Chicago.
Paper—"Stove Troubles Up to Date and Remedies," F. P. Haus, St. Louis, Mo.
General Discussion of Competition—Local Department Store and Catalogue, and how to meet it, members of association.
The 5 and 10 Cent Counter, How to Make Successful.
Question Box.

TUESDAY EVENING, 7.30 P. M.

Public Lecture—A. F. Sheldon, Chicago.

9 P. M.

Social Entertainment, provided by Entertainment Committee, Commercial Club of St. Joseph.

WEDNESDAY MORNING, 9.30 A. M.

Insurance Meeting—Presentation of Report, Discussion of Laws and Other Matters Affecting the Insurance Company of the Association.
Address—R. R. Williams, New York.
Address—Officer Representing National Association.

WEDNESDAY AFTERNOON, 2 P. M.

Report of Committees.
Election of Officers.
Appointment of Standing Committees.
Selection of place next annual meeting.
Good Will Meeting.
Adjournment.

IDAHO HARDWARE AND IMPLEMENT DEALERS' ASSOCIATION.

The Idaho Hardware and Implement Dealers' Association has elected the following officers for 1905: President, James E. Clinton, Jr., Boise; vice-president, A. B. Moss, Payette; secretary, Geo. W. Fletcher, Boise; treasurer, E. A. Fraser, Ontario; Executive Committee, Messrs. Clinton, Moss and Fletcher, and V. C. Kerr, Boise, and S. W. Dee, Caldwell. At the recent annual meeting a committee was appointed to arrange for the drafting of a bill to be introduced in the Legislature prohibiting peddling.

BOOM IN STEEL GUN BARRELS.

The price of steel gun barrels has gone up almost 100 per cent in the last few weeks, and manufacturers refuse to quote prices for future delivery. This rise is attributed to the advance in the price of steel. All the gun barrel manufacturers are running full time and are taxed to the limit of their capacity. A manufacturer of note here, having one of the largest plants in the world, informs me that he has already booked orders for the United States for over 100,000 gun barrels, and that orders are coming in more rapidly than ever before. This condition with regard to gun barrels reflects similar conditions in the manufacture of guns. The trade is at present booming, and 1905 promises to be a record year in the industry for which Liege is noted.—*James C. McNally, Consul, Liege, Belgium.*

TRADE MARKS IN INTERSTATE AND FOREIGN COMMERCE

BY PHILIP T. DODGE, *Chairman Committee on Patents, National Association of Manufacturers.*

For many years past the need of a federal law which would protect manufacturers against infringement of their trade-marks, used in interstate commerce and in foreign trade, has been well recognized. It was also well recognized that it was desirable to give the Federal Courts jurisdiction over cases of infringement of marks used in interstate commerce.

Various bills have been framed from time to time by the different bar associations, the manufacturers' associations, and others, but, owing to the want of co-operation and the antagonism of the different interests before the Congressional Committees, and the wide variations among the different bills, nothing was accomplished.

The present bill, for which great credit is due to Representative Bonynge, to Senator Kittredge, Chairman of the Senate Patent Committee, and to Chairman Carrier, of the House Committee on Patents

IS A COMPROMISE MEASURE,

arrived at as a result of conference and co-operation among the National Association, various bar associations, the industrial organizations and others. It follows along the general lines proposed by Mr. Greeley, at one time Assistant Commissioner of Patents, and one of the commissioners appointed to revise the statutes relating to patents, trade marks, etc., under the Act of Congress of June 4, 1898. The elaborate report of this committee is known as Senate Document No. 20, Fifty-sixth Congress, Second Session. The principal advantages of the present bill lie:

First, in the fact that it provides for federal registration, not only of trade marks used in foreign commerce and with Indian tribes, but also of marks used in interstate commerce;

Second, in that it confers jurisdiction in all cases of infringement of registered marks on the federal courts;

Third, in that it provides for an appeal from an adverse decision of the Commissioner of Patents to the Court of Appeals of the District of Columbia, thus insuring uniformity of practice and a careful judicial determination of the various questions which may arise;

Fourth, in that it provides for the registration of certain classes of marks, consisting of proper and geographical names, which have been in use for a term of years and which are commercially recognized; and

Fifth, in that it provides definitely a procedure for recovery against wanton infringers.

It also provides means for determining, as between two contending applicants, the one entitled to registration, by an interference procedure closely analogous to that in patent cases. It further provides means for canceling the registration, when proper reasons are shown therefor, under a definite mode of procedure.

Effort was made on the part of various interests to include in the bill provision for the criminal prosecution of deliberate infringers. During the various considerations of the matter, in committees and elsewhere, it was found that it would be impossible to secure the passage of the bill if these provisions were included. In view of this fact, and although strong arguments were offered in support of the criminal clauses, it was wisely agreed by all concerned that the bill should be supported in its present form.

Under this bill the honest manufacturers of America will be afforded

A RIGHT OF PROPERTY AND SECURITY

in trade marks not heretofore enjoyed, and they will be enabled by speedy and comparatively inexpensive procedure to prevent infringement. Whatever individual views there may be as to the need of additional legislation, there can be no doubt that the bill is a vast improvement on the existing law and quite sufficient to accomplish the principal results desired.

The first section of the bill, in the words of Mr. Bonynge, provides for the registration of trade marks used in interstate commerce, as well as in commerce with foreign nations and with Indian tribes, and provides for a

REDUCTION OF THE AMOUNT OF THE FEE

required for the registration of a trade mark from $25 to $10. Only such changes as were necessary to make the law agree with our treaty obligations, or to accomplish the purposes of the proposed amendments, have been made. The language of the present act has been retained throughout the bill in every case where it was possible to do so.

In the past there has been considerable complaint in regard to what could be registered under the existing law as a trade mark. Section 5 of the proposed bill will permit the registration of all marks which could, under the common law as expounded by the courts, be the subject of a trade mark and become the exclusive property of the party using the same as his trade mark.

Full protection is given by the court, under the doctrine of unfair competition, to the users of such marks as do not, under the common law, constitute technically what is known as a trade mark and which can become the subject of exclusive ownership. Provision is made for an appeal from a decision refusing the registration of a trade mark. It would seem that there could not be a conflict of decisions, about which so much complaint has been made in the past. Through the decisions of the courts a uniform system and uniform rules governing and controlling the registration of marks will in time be adopted. A proviso has been added permitting all marks that have been in actual use

AS TRADE MARKS FOR A PERIOD OF TEN YEARS

to be registered.

The procedure provided by the bill for the registration of trade marks is similar in many respects to the procedure in patent cases. When the application for registration is filed Section 6 provides for an examination of the mark offered for registration. If upon such examination the application is refused, notice is given to the applicant, in order that he may appeal, if he so desires, from the decision. The procedure for appeals is regulated by other sections. If, on the other hand, the examination discloses that the mark is entitled to registration, then the act provides that the Commissioner shall cause the mark to be published at least once in the *Official Gazette* of the Patent Office. The purpose of this publication is apparent. Owners of trade marks ought not to have their rights to the use of a trade mark jeopardized by the

REGISTRATION OF SIMILAR TRADE MARKS

by other parties not entitled to the use of them. Some notice should be given whereby the true owners of marks may have an opportunity to be heard by the Commissioner before any mark is registered and given, by reason of such registration, the evidence of ownership provided for by the terms of the bill.

Section 10 provides for the assignment of trade marks either before or after registration, but requires that such assignment shall only be valid when made in connection with the good will of the business in which the mark is used and when recorded within three months from the date thereof.

By Section 12 of the bill the life of a certificate of registration is changed from thirty years to twenty years. The purpose is to make the term of such registration correspond with the term for which registration is granted by the international union for the registration of trade marks. The right to the use of a trade mark is perpetual, so long as the same is actually used in commerce. Such perpetual ownership of a mark is provided for by means of renewals of certificates.

By Section 13 provision is made for the cancellation of registration of marks which may not have been entitled to reigstration. The only notice which is required of the application for the registration of a trade mark is the publication of the application once in the *Official Gazette*. The purpose of this provision is to give to the owner of a mark an opportunity to have a prior registration of his mark, if granted, canceled upon a proper showing.

A remedy at law is given to the owners of trade marks by Section 16. The provision to give the court power to enter a judgment on a verdict for three times the amount of the verdict; in such cases as the court may deem it advisable, is new in the law of trade marks. Similar provisions exist in the copyright and patent laws and in other statutes. The difficulty of proving exact damages in cases of this character is well understood. The Government, which has made provision for the registration of trade marks, should accord to the owners thereof, who have complied with the terms of the statute, full and complete redress for violation of their rights. By another section provision is made for designating registered trade marks by printing under the trade mark the fact that it is registered, as is done in cases of patents; so that any person who imitates or counterfeits a trade mark will do so with notice and should therefore be held to a strict accountability for the fraud committed.

By Section 19 provision is made for proceedings in equity against the infringer of a registered trade mark. This section corresponds in terms with Section 4921 of the Revised Statutes

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

In the May issue of the Butterick Trio (appearing April 10th), we will have a four page advertisement in colors costing

FIFTEEN THOUSAND DOLLARS.

This is the

LARGEST ADVERTISEMENT EVER PLACED

in this publication for one issue.

We will have in the April issue Ladies' Home Journal (appearing March 25th), an advertisement costing

EIGHT THOUSAND DOLLARS.

This will be the first double page advertisement which has ever appeared in this publication.

We will carry standard magazine sized pages in the following publications in addition to the above during the spring months alone: McCall's, Ladies' World, Good Housekeeping, Munsey's, McClure's, Cosmopolitan, Youth's Companion, Success, Christian Herald, Harper's Bazaar.

The combined paid circulation of these publications is 6,600,625: allowing four readers to each copy (which is conservative), our immense advertisements will reach 26,438,660 readers at just the right time for selling JAP-A-LAC.

Our expenditure for publicity advertising during the Spring months will amount to

SIXTY THOUSAND DOLLARS.

This is by far a larger amount of money than has ever been expended by all varnish houses combined for magazine advertising.

Just think of it,—this expenditure is for four months only. JAP-A-LAC will sweep the market this year. Prepare yourself for some of the dollars.

We are spending this money to help you sell JAP-A-LAC, by educating the consumers fully as to what it is, and what it does.

We will distribute $1000 in prizes for the best Window Displays made "JAP-A-LAC week" which begins April 10th 1905. Let us tell you about it.

ADDRESS 641 WILLIAMSON BUILDING,

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES,

CLEVELAND, OHIO.

relating to patent cases, except that it specially provides the manner in which profits shall be ascertained. Under existing rules it is necessary for the

COMPLAINANT TO PROVE SALES AND COSTS

with entire and absolute accuracy. The only persons having knowledge of the cost of making the sales are the defendant or some one in his employ. It has seemed only fair and just, therefore, that if the complainant proves the sales, the defendant should be required to produce evidence of the expenses he was put to in making such sales as an offset against the sales proven by the complainant.

Section 23 is identical with Section 10 of the Act of 1881 on the subject of trade marks, and is intended to give the user of a commercial mark, whether such mark comes within the technical definition of a trade mark under the provisions of the proposed act the right to have such remedy against those who make use of such mark with fraudulent intent, as is given by the courts under the doctrine of unfair competition, and further to provide that the courts of the United States shall continue to have such jurisdiction as they now have to enforce relief in such cases.

Section 28 provides that it shall be the duty of the registrant of a trade mark is registered either by affixing thereon the words "Registered in U. S. Patent Office," or abbreviated thus "Reg. U. S. Pat. Off." If counterfeiting or imitation of a trade mark is to subject the counterfeiter or imitator to the penalties by way of trebling of damages, then it seems entirely proper that some notice should be given to the public of the registration of the trade mark.

Now that the Senate has passed the bill it goes to the House for concurrence in a few minor amendments, after which it will be sent to the President for signature. It is indeed a fact that this legislation is regarded as of the highest importance to manufacturers and dealers, "as it closes," to quote well known authority, "a gap in trade mark protection created by the decisions of the United States Supreme Court, holding that the present federal trade mark law authorizes the registration in the Patent Office of trade marks employed in commerce with foreign countries and the Indian tribes only and that the much more important class of commerce between the States cannot be protected by registration in the Patent Office."—*American Industries.*

PACIFIC COAST HARDWARE DEALERS' ASSOCIATION.

The fifth annual convention of the Pacific Coast Retail Hardware Dealers' Association was held at Stockton, Cal., January 18th and 19th.

One of the principal matters of importance considered by the convention was the forming of a central State body, to which all matters of interest to the retail Hardware dealers might be referred.

Wednesday evening the delegates enjoyed a theater party at the performance of "Sis Hopkins," with Rose Melville in the title role, at the Yosemite Theater.

Thursday evening the visitors and a number of invited guests were entertained at a banquet at the Philson Cafe.

Hon. J. A. Louttit was the toastmaster at the banquet. The programme was as follows:

March—"Always Forward" (Ellis).

Toastmaster—Hon. James A. Louttit.

Address of Welcome—C. E. Williams, Mayor of Stockton.

Intermezzo—"Ahwanda" (Henry).

"Our Hosts," John C. White, President Pacific Retail Hardware Association.

March—"Vidette" (Kuebler).

"The Commercial Relations Existing Between Merchant and Traveling Salesmen," Orrin S. Henderson.

Song—"They're All Good Fellows" (selected).

"The New Stockton," Ed. R. Thompson.

March—"To the Front" (Blossom).

"Why as Jobbers and Retailers We Should Work Together," W. R. Wheeler.

March—"In Union There Is Strength" (Cary).

The next convention of the association will be held at Marysville in 1906.

The following named were elected officers for the ensuing year:

President—John C. White, Marysville.

Vice-President—A. L. Nichols, Chico.

Secretary—James O. Gates, Marysville.

Treasurer—William Earl, Chico.

Executive Committee—George A. Legg, Nevada City, and L. O. Johnstone, Arbuckle.

REVIEW OF THE MARKETS.

WIRE NAILS: An advance of 5 cents per hundred pounds on all Wire Products including Nails, took place on February 1st. The mills are busy shipping on old contracts booked some time ago, and trouble is found already in transportation thus early in the season. The severity of the weather conditions contributed greatly to cause delay. The market is firm at the advance. Quotations are as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers.....$1.80
Carload lots to retailers..... 1.85

New York. Quotations have changed to meet the advance as follows:

Single carloads.....$1.99
Small lots from store..... 2.05

CUT NAILS: At the meeting of the Cut Nail Association held January 25th existing prices were reaffirmed for the month of February; but upon the advance announced for Wire Nails, Cut Nails, according to understanding, were advanced accordingly, without formal announcement. The market is firmly held at the advance. Quotations are as follows:

Carload lots.....$1.80
Less than carload lots to jobbers..... 1.85
Less than carload lots to retailers..... 1.95

F.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Cut Nails.

New York. Prices on the advance were made 5 cents per 100 pounds higher. Moderate demand, weather conditions being unfavorable for work. New York quotations are as follows:

Carloads on dock.....$1.94
Less than carloads on dock..... 1.99
Small lots from store.....$2.00 to 2.05

BARB WIRE: The advance on all wire products of 5 cents per 100 pounds affected this line to that extent. Business is expected to be brisker this month. Sales during January were moderate, although previous orders were more encouraging. Market is firm at the advance. Quotations are as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers carload lots	$1.95	$2.25
Retailers carload lots	2.00	2.30
Retailers less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: Trade is brisk in this line which is also affected by the advance. The demand is good and mills are busy working on specifications already booked. Quotations are as follows, f.o.b. Pittsburgh 60 days or 2 per cent. discount for cashin 10 days:

Jobbers, carload lots.....$1.65
Retailers, carload lots..... 1.70

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advances.

ROPE: The following quotations represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12 to 12½
No. 2 Manila	10 to 10¼
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼

Less ¼ cent to the large trade.

BINDER TWINE. General market quotations f.o.b. Eastern factories, may be given as follows:

White Sisal (500 feet to the pound)..... 9 @ 10
Standard (500 feet to the pound)..... 9 @ 10
Standard Manila (550 feet to the pound)....10 @ 11
Manila (600 feet to the pound).....11 @ 12
Pure Manila (650 feet to the pound).....12 @ 13

Less than carload lots quarter of a cent extra.

LINSEED OIL: The following quotations were announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....44 cents per gallon.
In lots of 5 barrels or more.....43 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon.

THE ALBANY TRADE.

Conditions in this market are showing indications of a good volume of trade for the early Spring. The orders being entered by dealers are equal to, if not ahead of previous years, indicating that a good feeling is very general throughout this section, and that the anticipated prospective trade is sure to materialize. The added strength to prices on some leading goods is helpful in keeping a steady market. Early purchasers will realize excellent returns on contracts and if goods are distributed based on the cost ruling when these goods move, it is certain that the profit gained will be very satisfactory. The good clear Winter weather that has prevailed here for some time, together with the excellent condition of the roads, making sleighing good, has been the means of bringing the farmers and those from the outlying districts into market, and has helped the retail business which is usually rather dull at this season. The long Winter here has used up the goods in the Hardware line, which are adapted for the season's requirements, and everything seems to have conspired to make business run along about as merchants like. Consequently, all concerned in the Hardware trade seem to have been very kindly favored this present season, and all will enter into the opening up of Spring trade, hopeful and confident of good active business. ALBANY HARDWARE & IRON CO.

THE CLEVELAND TRADE.

Whenever it becomes necessary for a government to be sustained by force, one of two things create that necessity—the ignorance of one party or the arrogance of the other. Great expenditure is being made to protect this country from the first, by a provision for universal education. Danger from the other source demands most careful attention. The moral sense is not always adequate to control selfish interests, and it is a curious psychological fact that corporation officials do not recognize the moral code as a part of corporation law. Men of high moral character in their private business, under the plea of necessity, in their corporal official capacity are in the habit of ignoring the moral law; so that legislation is imperative to protect the public 11 government is to retain respect and confidence. Laws for this purpose should as sacredly respect the rights of corporations, as individuals. Such a government will endure and no other will permanently do so. History points out the rocks upon which nations have stranded, and lovers of the republic must insist that ours must escape them. The sin of leaving undone what we should have done is a national danger that calls for the earliest attention. Everybody knows what the views of the president are, and if congress fails to act, the suspicion that capitalists have legislators to represent them in our legislative halls will be strengthened. Officials who desire to serve their country and the public should favor legislation that would benefit both. The services that corporations render the country entitle them to consideration, but unjust discrimination and favoritism has created the impression that they are lawless, and this prevents justice being done them. Their rights will only be safe when they show a willingness to grant the rights of others, but the unfriendly feeling towards them will never be suppressed until they show a willingness to have, and obey a just law.

Notwithstanding the good outlook, it is not wise for business men to over purchase because of an anticipated advance. It is taking an unnecessary risk and will in the average of chances, end in loss. When prices are based on quantity, the tendency is to over purchase, and this where the capital is limited, prevents keeping up stock in other lines, resulting in diminished business. Increased lines are more profitable than increased quantities. New and desirable goods, such as your customers will buy, if their attention is called to them, are being produced and it should be the business of the merchant to find and furnish them. It will advertise you among your people and increase your profits. Do not let your customers say, "Why don't our merchant keep such goods?" but be first in showing them. This does not mean that you should buy every new thing. If you are undecided, get the seller to guarantee the sale of the first purchase and in this way test his convictions as to the merits of the goods. He may hesitate to do this on desirable things, but it will help you in deciding. However great your confidence, it is best to buy light at first, but get new things and keep getting them. It makes it interesting for your customers to come to your store, if you have

Digitized by Google

some new novel thing to show them. It is wise to occasionally ask the judgment of your customer, as to the value of some new article, as it is often better to ask advice than to offer it. Modesty is better than conceit to win good will. It is usual after an activity, in business caused by advancing prices, to find hesitation among purchasers, because they fear a decline, and it will be natural if February trade is affected in this way, but advances have been too moderate in manufactured goods to justify such expectations. Prices for the last half of the year, are more likely to be higher than lower, and unless raw material declines, advances will be more radical.

The Lockwood-Taylor Hardware Co.
C. B. Lockwood, President.

THE PITTSBURGH TRADE.

While the jobbers and the large retailers appreciate the advancing tendency of the market and keep manufacturers busy with early orders, the small trade has not waked up to the situation. The usual slack demand from consumers during the cold weather is the only argument in sight and merchants refuse to buy until there is an actual demand upon them for goods. This will result in a rush of business as soon as Spring opens, for there undoubtedly will be a large amount of Hardware go into consumption this year and those who are not ready for it will come into market altogether. These short sighted buyers have to pay for their tardiness. Another advance in nails and wire of 5 cents per 100 pounds, is announced to-day and there are almost daily advances of some one or more items. The longer they put off buying the more they will pay. Our advice for this year is, "Buy early." Winter has been severe and constant in this section. February 2nd was "groundhog day." Thermometer near to zero and a bright sun shining. Mr. Groundhog could not help seeing a good strong shadow, so that according to our weather prophets we are in for six weeks more of good strong winter. Our manufacturing interests are all busy. The building trades are having some differences to adjust with employes for the ensuing year which we trust will soon be settled. Just at present, however, the men are out. Logan-Gregg Hardware Co.

THE DAVENPORT TRADE.

The average Hardware jobber has evidently become so wealthy that he has passed the want-for-money line, and has no use for further profits in business. There has been of late most strenuous efforts made both in and out of conventions, to secure a reasonable margin of profit from the manufacturers, to enable the jobber to carry in stock most convenient to the retail dealer, such an amount of goods as would supply his wants in a small way promptly, when needed for seasonable use. The manufacturers have been very liberal in granting these requests, and now the jobbers show their appreciation by cutting the manufacturers' prices; ungrateful to say the least, and unprofitable beyond a doubt. This condition gives a temporary advantage to the retail dealers and also incidentally to his customer the consumer; but think of the poor jobbers balances being on the wrong side of the ledger next New Year's day, and also of his embarrassment when he again appeals to the manufacturer for a wider margin of profit. The general sales manager of a large concern once told the writer that all Hardware jobbers were fools; prefixing fools with two blanks. Of course, he did not tell the truth, but he came near enough to justify the question: "When will the average Hardware jobber learn wisdom?" Sickels, Preston & Nutting Co.

THE CHICAGO TRADE.

We have to report very flattering results from our city and country trade. General Hardware and metal dealers are buying freely and with confidence. Realizing that prices have passed low water mark and with the advances that have come to stay, and with the anticipation of further advances; those who have not protected themselves have no time to lose. With inventories over the time is near at hand when Spring goods should go forward. This accounts for the strong active trade coming in by mail and many buyers paying Chicago their annual visit to place orders. At the present time it is very difficult to get factory specifications filled for present wants. The demand for Tin Plates, Galvanized Sheets, Registers, Strap & T Hinges, Steel Goods, Saws and Tools has so far exceeded the output that jobbers are commencing to feel, what will soon be a famine in these lines. This together with the future business not placed, that must come, will make it very difficult to fill Spring orders. We are very fortunate in this respect, having bought very largely of everything in our line last year. We are pleased to state that we have the goods in stock and are prepared to take care of anything that comes to us. With the increased storage enabling us to have the goods on hand we are prepared to make prompt shipments upon the shortest notice. We have added the Evart Lumbering Tool Company's lumbering tool line to our stock and have a full and complete line of Lumbermen's Tools, Rope Cordage, Rafting Pins, Dogs and Supplies. Never before during our 26 years uninterrupted business career have we been so well stocked as we are to-day, and with increased help we can promise everything favorable to our customers' demands.

Wells & Nellegar Co.

THE SAN FRANCISCO TRADE.

"Up to the point of satisfaction" is a fair way to put it—the composite response of local representative Hardwaremen to the query, "What would be right to report as to trade conditions on the Pacific Coast?" The frequent and general rains of the fortnight just passed surely foretell brilliant crop prospects, and that the season is ideal from the common viewpoint of farmers, miners, fruit growers and horticulturists. Unless some serious climatic deficiency, such as a dry Spring, or hot north winds early in the Summer, occurs, we shall probably harvest banner crops of everything this year. This most excellent crop prospect imparts a feeling of buoyancy to the whole coast, not alone everybody in Hardware and affiliated lines of trade, but alike everybody in manufacturing, farming and financiering, is confident of another good year.

The representative Hardwaremen of San Francisco, Secretary Gracey, of the State Retail Association, and President Philpott, of the Philpott Retail Hardware Association, and H. C. Bennett, of Bennett Brothers, treasurer of the San Francisco Retail Hardware Association, and from one to eight representatives each of the several wholesale Hardware houses, have returned highly pleased with their visit to the three days' business session and closing night banquet of the seventh annual convention of the Pacific Retail Hardware Association of California, held in Stockton, and presided over by the Pacific's president, John C. White, of the John C. White Hardware Co., of Marysville. In his annual address President White reviewed the past year, unfolding by way of comparison that present trade conditions, brought about through the work of the association, have vastly improved the last twelve months, "matters pertaining to retail trade," he said, "being much better than formerly."

According to the constitution and by-laws, under which the Pacific Association has been working for years, "the objects of the association are to bring about a better condition of affairs between retailers and wholesalers, and harmony of action regarding rates and prices and a better understanding of trade conditions generally."

And now the 8th, 9th and 10th of next month is a triple-date occasion that is being talked of in trade circles as the coming feature event of the year, and that on this triple-date occasion in San Francisco, it is confidently asserted by high officials in the State's Hardware association life, fully 400 of the 825 retail Hardware dealers in California will rally in this city in annual convention in the name of California State Retail Hardware Association. The rallying point selected is the twelve-story Hotel St. Francis, the Waldorf-Astoria of San Francisco, under the management of Mr. James Woods, who, until, recently, was high up officially in connection with the great New York hotel named.

Traveling men in the trade, recently returned from the other two States of the Pacific Coast, Oregon and Washington, report as follows: In Oregon, J. D. Matlock has opened in the Hardware trade at Eugene. In the town of Halix, J. S. Norgell & Co. have succeeded Stone & Walker. The James W. Duncan Furniture Co. have added a Hardware line. At Ashland a new store has been opened in the name of the Ashland Hardware Co. C. F. Harris has established a store in Forest Grove. The A. A. Muck Hardware Co., of Portland, has opened a branch store in St. Johns, and in Springfield the Springfield Hardware Co. has added a furniture stock.

In the State of Washington the Seattle Hardware Co. are now having laid the foundation for a modern building that will be the largest warehouse exclusively for Hardware west of Duluth and north of San Francisco. This company has made rapid strides in the last ten years, having developed a large export business as well as a large business in Alaska. In Farmington the Hopper Hardware Co. has absorbed the store of William Service, a competitor. The McCollum-Patterson Hardware Co. has succeeded McCollum, Hill & Co., Hardware, in Waterville, and incorporated for $17,000 by E. G. Patterson. George McCollum and S. N. Dolson, and E. N. Scott & Co. have bought the Benton & Manning Hardware store in Thornton.

DEVELOPMENT OF THE TYPEWRITER.

While it is in the last thirty-five years that the typewriter has come into practical and expensive use, its birth dates back to the early part of the eighteenth century. Hardly any other useful apparatus has given its inventors more perplexity or has been so slow in its evolution.

In 1714 the first typewriter was patended by Henry Mill of England, and the claim of his patent indicates that his invention had several points in common with our modern typewriter but it is supposed to have been designed mainly to print embossed letters for the use of the blind. The practical merit of this machine did not warrant its continued manufacture and beyond marking the introduction of the typewriter era, it seems to deserve little notice.

With one exception, no other effort seems to have been made for nearly 130 years to produce a writing machine. The exception was an invention that appeared about 1784 in France. From the records this typewriter, too, was intended to print raised characters for the blind; and not until 1829, when an American patent was issued to William Austin Burt, was a machine made that showed in construction some of the properties of a successful typewriter.

According to the *Scientific American* of May, 1891, France is next in line with a typewriter called the "Ktypograph," which was patented in 1833. The extreme oddity of this machine is shown in the following description: "Instead of having the paper rendered movable and the machine stationary, as in the modern style of machines, our French inventor held the paper fast and flat, and moved his machine over the surface of the paper. With this device he not only executed typewriting, but also wrote music and made printing plates."

Ten years later Charles Thurber of Worecster, Mass., conceived the true development of a mechanical writing machine and at the request of a wealthy Southern gentleman began its construction. The printing of lines by rolling a sheet of paper through the machine was first realized in this device, and in almost every way it was a satisfactory typewriter, except as to its rate of manipulation, which was extremely slow. Therefore it was abandoned.

Another step in the perfection of typewriters was accomplished by Oliver T. Eddy of Baltimore, his apparatus being patented in 1850. From the tenor of his application for a patent it is evident that Mr. Eddy had a clear vision of what was needed in a machine that would take the place of a pen and meet the requirements of practical usage and rapid writing. This typewriter printed as many characters as the standard machines of the present day, and did very good work, but its construction was intricate and clumsy, and its operation slow and unsatisfactory. This, too, was soon laid aside and forgotten.

Not two years after the Eddy patent, another machine for the same purpose, was patented by John Jones, of Clyde, N. Y. This differed principally from its predecessors in that the types were arranged in a circle and printed at a common point. This feature constituted a very important stride in typewriter development, but the possibilities of such a method were then only suggested. The Jones typewriter was of little practical utility, and, together with its ancestors, became popular only with the inventor.

Next to attract notice was the invention of Alfred Beach of this city, about 1855. Some years before Mr. Beach had invented a writing machine which, though considerable of a success, did not meet his expectation; and while that invention awaited improvement he brought about a typewriter to print in raised letters, without ink. This machine was publicly exhibited at the Crystal Palace Exhibition of the American Institute in 1856, and received the highest award.

In 1857 came the Francis typewriter, constructed by Dr. S. W. Francis, also of this city. Of all previous attempts to produce a substitute for the pen that would write with both rapidity and neatness, this was far in advance. Yet the old objections still prevailed; the machine was bulky, delicate, and complex, and seems never to have been manufactured in quantities and offered for sale.

A still greater advance in the art of typewriter construction was made in 1865 by G. House of Buffalo. His apparatus was never patented, yet it embodied very many valuable features which were eagerly adopted in the rapid series of inventions that followed. The device itself, however, was seriously defective in the alignment of its type when writing, and this proved a fatal objection.

From the number of typewriter inventions about this time, inventors everywhere began to appreciate the advantage of being able to write by machinery, and in 1866 John Pratt, of Alabama, patented a writing machine destined to incite the production of such complete and serviceable typewriters as we have at present.

Out of the many inventions that closely followed the Pratt patent the typewriters now so generally used have developed. One concern in this city manufactures some fifty different styles and varieties of typewriters, including those writing all languages, cipher machines, those for clergymen, telegraphers, railroad employees, and many other special styles.

Although the typewriter has for several years been universally used in England and America, it is a singular fact that its general adoption in Paris has been only in the last two years, despite a majority of the old inventions having been made by Frenchmen.

TRADE JOURNALISM DEFINED.

The conviction is growing as trade and technical journals are coming within the range of observation of larger members, that they represent to-day in many respects the most advanced type of journalism. It is not fully understood, however, as it might be that special journals, with all their characteristic features, have been in existence for more than a generation. During and soon after the war there were established and maintained both trade and technical journals in the branches with which I am familiar, which were highly creditable productions from every point of view. They cannot compare in volume with their successors, since the industries they represented were truly in their infancy, but under the adverse conditions of the missionary period some exceedingly able work was done. Some of these pioneers have disappeared from the scene of their labors, others are withdrawing from active work, but much that is hailed as an achievement of the present day was really accomplished by them.

Of the many journals which were started from time to time, only those have survived which have pursued a broad, liberal, business-like policy, the tricksters and fakirs having had but a brief, though sometimes, apparently, brilliant career. There have been numbers of the latter who at one time brought trade journalism into some disrepute by their methods. It was a source of never-ending wonder that the men in charge of important enterprises fell victims to the guiles of brazen adventures, but while the education of the clientele of the trade journal was occasionally exasperatingly slow, it has none the less been effective and lasting. To-day there is hardly one branch of our national industries in which one or more trade journals have not conquered an honored place. Much that was trivial has disappeared and the sycophant of an earlier period has fallen into well-earned contempt.

A trade journal is a business enterprise, pure and simple, as any mercantile or manufacturing enterprise must be; in fact, the printing departments of some of our larger publishers have risen to the dignity of very large undertakings of the latter class.

But what a few publishers realized thirty years ago, the majority now acknowledge as the basis of their business—and that is that their profits and their good-will depend upon rendering valuable service to their readers and to their advertisers, giving more than an equivalent for the money which they have paid. To cajole or coerce an unwilling manufacturer or merchant into advertising under false pretenses as to circulation or the character of the subscribers is happily a matter of the past. Publishers seek and succeed in obtaining business connections with their advertisers which continue uninterrupted for many years. There are trade journals to-day who are carrying advertising of which the original contracts were placed thirty and forty years ago.

The basis for the business which they do must primarily be the hold upon the subscribers both as to numbers and as to character. A journal which the president of a large concern insists upon seeing as soon as the mail arrives is of infinitely greater influence and value than that which disputes with the penny dreadful the honor of dissipating the ennui of the office boy. It is not too much to say that the reading of our leading trade and technical journals is regarded as one of the duties of the modern captain of industry each in his own particular field, and it is a more recent achievement of the publisher that he studies the advertising pages as closely as he goes over the reading columns.

The broad foundations of the publishing enterprise must be enterprising editorial management. It is in this respect that different class journals must meet widely varying conditions. The trade journal proper which is largely concerned with current commercial affairs and with news has imposed upon it limitations in certain directions which do not embarrass the purely technical papers. They must work with newspaper speed, and yet conform as closely as possible to magazine standards of physical appearance. Many of the technical journals have ample opportunity for careful and slow printing. The trade journal must hold its pages open for many columns of telegraphic and market reports and do in hours what others have days to accomplish.

The trade journals proper cover a wider field since they must and do report not alone commercial and trade news, but also present carefully prepared technical articles describing the latest developments or manufactures in their own particular field.

The quality of the matter printed in the class journals has improved very greatly. The puff has practically disappeared, the scissors and the paste pot have ceased to be the main reliance, nearly every line of the better journals is original matter. Some of the brightest men among engineers and manufacturers are contributors who are usually paid at rates equal to those of the newspapers and magazines. The illustrations which are numerous and well executed are specially made for the publishers, many of whom have established their own engraving departments.

The commercial reports are prepared by men of experience and training in their field, and aim to get at the truth irrespective of special interests. They express the honest conviction of the writers, and for that reason command respect and confidence. Many of the class journals supplement their market information with statistical work, often collected at great expense and much labor. The result is that their reports are often quoted in all the leading daily journals in the country as authoritative, and are cabled to foreign financial and commercial centers.

So far as trade news is concerned it is becoming more and more the practice of trade journals to insure accuracy by verifying all rumors, and even at the expense of occasionally printing matter late.

In some respects the subjects which many of the class journals treat of do not lend themselves readily to the essay style of leader writing, and there appears to be a tendency toward neglecting work in this direction in the weekly journals.

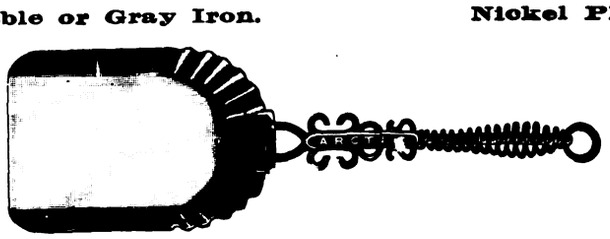
With growing prosperity our trade and technical journals have secured the means for, and have developed the opportunities of their business. They are equipping them better and are giving increasing attention to aiding their clients in placing their announcements before interested parties in the most effective manner. Appealing as these clients do to purchasers who are usually fairly well informed concerning the articles they desire to purchase, the advertisement must seek to present specific facts or clear cut arguments, rather than unsupported assertions. The links in the main chain between the reader and purchaser on the one hand and the seller and distributor of goods on the other, through the medium of the trade journal, are being strengthened day by day. They are more effective than they ever were, and are therefore more profitable to all.

In recent years class journals have taken an active and a helpful part in extending American export trade by attracting an increasing number of foreign subscribers until to-day American class journals reach the remotest part of the world as persistent and able missionaries of American industry.—C. Kirchhoff, in *Profitable Advertising*

WISDOM IN A NUT SHELL.

Never kick a man when he is down. He may not be down for good.

When you hear what ought not to be true, don't hear it.



Take your view of life from the hill top.

Great men are born in the country, but they come to the city to find it out.

LIFTING MAGNETS.

Wherever steel or iron is handled in quantities by means of cranes a suitable lifting magnet is understood to economize in time and labor sufficient to pay for itself in from one to six months. This statement is supported by experience in steel plants, jobbing houses, safe works, etc., and is not improbable when the methods, chains versus magnet, are compared. In all cases the electro-magnet is used, suspended from the hook of the crane. Direct current at any of the common voltages is employed to energize the magnet. A flexible twin-conductor cable conveys the current to the magnet and a small switch operated by the crane man is usually the only additional apparatus necessary. The amount of current required is small, being from one to twelve amperes, according to the service for which the magnet is designed.

In operation, the magnet is lowered upon the surface of the material and the switch closed. This causes the magnet to attract and hold the load, which may then be hoisted by the crane and transported to the desired point. By opening the switch the weight is instantly released.

Comparing this method of operation with the common methods of connecting the load to the hook of the crane, with chains, hooks or clamps, the saving in both labor and time is evident. In general the attachment of the magnet to the load, as well as the release, may be accomplished by the crane operator without assistance. This saves the labor of one or more men for prying up the material, attaching hook and chains at the point of suspension and additional men at delivery for unhooking the load from the crane. Magnets can be so quickly attached to and detached from a load that by their use the work which may be done by a given crane is greatly increased, in some cases more than doubled. It frequently occurs that the attachment of lifting magnets to existing cranes greatly increases their capacity for handling material. Lifting magnets require much less head room than the chains for lifting material of considerable width, such as plates, etc. By the use of magnets, therefore, material can be conveniently lifted a greater height in the storage space under a given crane than is otherwise possible with chain slings, and this increases the capacity of storage space without altering the crane runway or enlarging the building.

Lifting magnets may be used to advantage in handling pig iron, scrap, rivets, bolts and similar articles in bulk, as shown in Fig. 1. Ingots, blooms, slabs, billets, bars, plates, rails, structural shapes, pipe, etc., may also be handled to advantage, as in Fig. 2. The Illinois Steel Co. uses fourteen magnets in the South Chicago works alone and has found the economy in time and labor so substantial that they will be put in service wherever possible in all the plants.

A single design of magnets is not adapted to handling the full range of material above mentioned; on the contrary, the magnet must in every case be designed to meet the form of material to be handled. For instance, there is a wide difference in the design of a magnet for ingots or blooms and one adapted to the handling of thin plates. A magnet which would handle five tons in the form of an ingot might not handle 500 pounds of thin plate. It is therefore necessary to understand in each case the operating conditions with special reference to the form and range of material handled.

The question of risk of accident arises and is quite important. The Electric Controller & Supply Co., of Cleveland, reports that with experience of scores of lifting magnets in successful operation it has yet to learn of a single accident which has occurerd through their use. On the contrary, accidents due to the slipping and breaking of hooks and chains are by no means uncommon. Magnets are built and tested to from four to five times the specified load and in addition to wide experience in the application of lifting magnets the Electric Controller & Supply Co. has comprehensive data, secured through the testing of some forty designs of magnets on a testing machine constructed for this special purpose. Lifting magnets of this make are protected by the Wellman, Clark and Peik patents.—*The Iron Trade Review.*

THE TOP O' THE MORNIN'.

MANAGER—How was the "snake charmer?"

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Altoona, Pa.—The A. R. Wolf Hardware Co. has opened up their store at 1018 Twelfth Street.

Appleton, Wis.—The Schlafer Hardware Co. has been incorporated. Capital stock, $50,000. Incorporators, Otto P. Schlafer, Albert A. Wettengel and W. D. Schlafer.

Burlington, Iowa.—The H. W. Stadtlander Hardware Co. have engaged in business in this town.

Calumet, Mich.—The Pearce Hardware Co., Limited, has been incorporated. The company will take over the business of Joseph Pearce of Lake Linden. The capitalization is $10,000, all paid in.

Chattanooga, Tenn.—The Hardware firm of McCaslin & Jones has been incorporated; capital $15,000. Incorporators: J. M. Jones, J. H. McCaslin, O. K. Jones, J. M. Jones, Jr., and S. T. Jones.

Chicago, Ill.—The Wilson & Friend Co. has been incorporated. Hardware. Capital stock, $20,000.

Columbus, Ohio.—The Thornton & Broz Hardware Co. has been incorporated. F. C. Thornton, J. L. Broz, T. J. Thornton, E. Jahnke, M. L. Bernstein, incorporators. Capital, $25,000.

Conway, S. C.—A new Hardware concern has been organized by W. A. Johnson, of Birmingham, Ala.; J. W. King, of Dillon, and A. C. Thompson and Walter Mishoe, of this place.

Conway Springs, Kan.—Q. Campbell will engage in the Hardware business here.

Cookeville, Tenn.—Jere Whitson and A. P. Barnes have formed a partnership under the firm name of Whitson & Barnes, and will open a large wholesale Hardware establishment.

Danville, Ill.—A company composed of G. Wilse Tilton, Thomas A. Taylor, Fletcher Keeney and J. R. Colyer have matured plans to erect an up-to-date brick building, in which they will open a first class Hardware and implement store in the near future.

Detroit, Mich.—The R. J. Rutledge Co. has been incorporated with a capital stock of $20,000, to handle the output of the Stimpson Computing Scale Co. Stockholders are: Robert J. Rutledge, Levi J. Robbins and Charles G. Hilton.

Elizabeth, Pa.—Joseph H. Gamble & Son have opened a new Hardware store.

Evansville, Ind.—William Griener and J. F. Batholome have formed a partnership and have opened a new Hardware store. They will make a specialty of Builders' Hardware. The firm name is Griener & Bartholome.

Frankfort, Ind.—The Shanklin Hardware Co. has been incorporated. Capital stock, $30,000. Directors, John C. Shanklin, Bert G. Shanklin, Harry C. Shanklin.

Fremont, Neb.—H. J. Lee has disposed of his Hardware store to J. C. Lee and T. W. Miller.

Gadsden, Ala.—The Ewing Hardware Co. has been incorporated. Capital stock $60,000. Incorporators are: C. W. Ewing, T. G. Ewing, W. L. Ewing and H. L. Ewing.

Glassport, Pa.—George J. Gobble has opened a new Hardware store.

Goldsboro, N. C.—The Ideal Hardware and Commission Co. has been incorporated with $25,000 capital. The incorporators are: W. H. Huggins, G. W. Baker, George D. Bizzell, J. Wash Bizzell and J. O. Bizzell.

Gridley, Cal.—Chris Mayer will take charge of the Hardware store recently purchased by himself and Lloyd Ashley, of Yuba City.

Humboldt, Kan.—H. A. Ewing has opened a new Hardware store.

Iola, Kan.—Schell & Hall have opened a new stock of Hardware.

Jackson, Mich.—The Smith-Winchester Hardware Co. has been incorporated. Capital stock, $60,000.

Mahaffey, Pa.—The Wrigley Hardware Co. has just been reorganized and application has been made for a charter to incorporate under the name of the Wrigley Co., with a capital of $50,000. The president is Miles Wrigley; treasurer and secretary, G. E. Conroth, and the directors, Miles Wrigley, E. M. Binder, F. H. Markle and H. P. Galer.

Manitowoc, Wis.—The Worel, Zeman & Stangel Co. has been incorporated. Wholesale and retail dealers in Hardware. Capital stock, $30,000. Incorporators, Albert G. Worel, Frank S. Zeman and Jacob J. Stangel.

Merkel, Texas.—The Merkel Hardware Co. has been incorporated. Capital stock, $25,000. Incorporators, W. T. Berry, Fred. B. Gentry, C. W. Harkrider, George S. Berry, R. M. Barnes.

Mulhall, Okla.—A. J. Justice & Co. have opened a new Hardware store.

Muskegon, Mich.—The Alberts Hardware Co. has been formed at 46 Pine Street.

North, S. C.—The Farmers' Hardware and Furniture Co. has been incorporated. Capital, $3,000. Incorporators, E. M. Livingston, J. C. Witt and J. C. Price.

Oregon City, Ore.—C. W. Frederick is opening a new Hardware store.

Owatonna, Minn.—A new firm, Hastings, Hadley & Jacobson, has been formed as wholesale Hardware and implement dealers.

Roanoke, Va.—The Graves-Humphreys Hardware Co. has been incorporated.

Salineville, Ohio.—W. H. Kintner has opened a store, carrying a line of general Hardware, stoves, tinware, etc.

Schuylkill, Pa.—William G. Stoffler, who has purchased the post office property, will start to remodel the building about April 1st and will open his store as soon as the alterations can be completed. He proposes to keep an up-to-date Hardware establishment. He is an experienced Hardwareman.

Shoshone, Idaho.—C. F. Borden will open a Hardware business.

Rochester, N. Y.—The Adjustable Washboard Co. has been incorporated. Capitalized at $10,000. The directors are: Frederick F. Remmel, Edward J. Galvin and Frank Mitchell.

Springfield, Mass.—A new company, with a capital of $500,000, has just been formed to manufacture machine screws with a new machine invented by George T. Warwick. A large number of Springfield business men are interested in the enterprise, and its factory is likely to be located in that city.

Streator, Ill.—The G. & D. Manufacturing Co. has been incorporated. Capital, $12,000. Manufacturing implements and Hardware. Incorporators, Frank Gahm, C. L. Horn, Herman Dorman.

Toledo, Ohio.—The Indiana Scale and Truck Co. is a new concern.

West Hoboken, N. J.—The North Jersey Stamping Co., office 527 Walnut street, has been incorporated to manufacture household utensils. Capital stock, $125,000. Incorporators, Jacob Werner, Ernst Vahle and Stephen Treen.

Changes.

Alton, Ill.—The Beall Bros., Beall Shovel Co. and the C. L. Beall Manufacturing Co. have consolidated their interests and will incorporate under the name of the "Beall Brothers." The new concern will operate the Alton and East Alton plants. It will be a close corporation and all stock will be owned by Edmond Beall, A. M. Beall, J. W. Beall, C. L. Beall and P. B. Gates. The capital stock will be $100,000. It is the intention of the new corporation to increase the output of the two plants, and add the manufacture of several new lines at the East Alton plant.

Bradford, N. Y.—H. E. Cransall, of the Cransall Cutlery Co., has purchased an interest in the Platt Brothers firm of cutlery manufacturers at Eldred.

Camden, N. J.—The American Bar Lock Co. has been dissolved.

Greenfield, Mass.—In view of the rapidly increasing demand for its products from Great Britain and the Continent, the Wells Bros. Co. has made arrangements to carry a stock of goods in London. The company has appointed Theodore Butler as its resident representative, with quarters at No. 149 Queen Victoria Street, E. C., where a complete line of taps, dies, screw-cutting tools and machinery will be carried in stock.

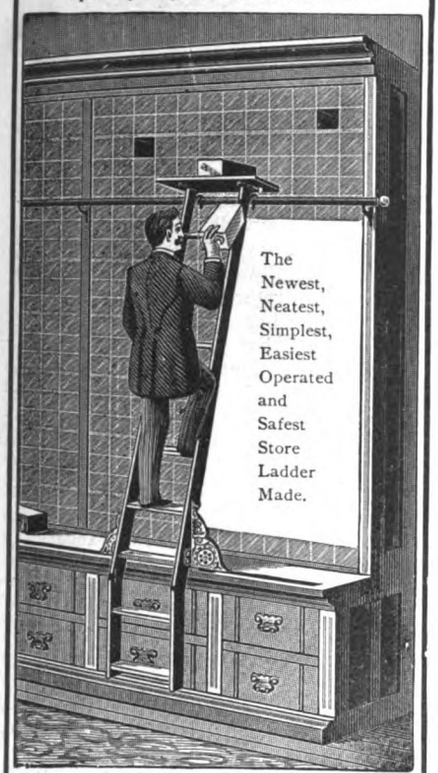
Hudson, N. Y.—Gifford Brothers, makers of ice machinery, and The William T. Wood Co., of Boston, makers of tools, have combined under the name of The Gifford-Wood Co. The company will be capitalized at $200,000. The incorporators are: William E. and William B. Wood, of Arlington, Mass., and Malcolm Gifford, of Hudson. William E. Wood is president; Malcolm Gifford, vice-president; Arthur Gifford, treasurer; William B. Wood, assistant treasurer, and A. E. Heard, secretary.

Monessen, Pa.—Plans have been prepared by the Page Woven Wire Fence Co. for the erection of a new plant this Spring for the manufacture of furniture, coil and all kinds of springs. The new buildings will cost about $50,000, and will give employment to 100 more skilled men.

St. Paul, Minn.—The incorporators of the Twin City Fence and Wire Works have changed the name of the concern to the Twin City Iron and Wire Works.

Miscellaneous.

Binghamton, N. Y.—The annual meeting of the Osgood Scale Co. was held January 12. Directors and officers were chosen as follows: J. W. Sturtevant, president; L. A. Osgood, vice-president; O. J. Fowler, secretary and treasurer. The entire interest of H. B. Osgood, both in the Osgood Scale Co. and the Evolution Scale Co., has been acquired by L. A. Osgood, O. J. Fowler, A. J. Parsons, W. G. Phelps and J. W. Sturtevant. There will be no change in the management.



Crawfordsville, Ind.—The stockholders of the Crawfordsville Wire and Nail Co. met recently and elected officers for the ensuing year. They are as follows: President and treasurer, Capt. W. P. Herron; vice-president, Dr. I. A. Detchon; secretary and general manager, Richard Schweitzer. Directors: W. P. Herron, I. A. Detchon, P. C. Somerville, H. H. Ristine, Benjamin Crane, H. E. Greene.

Marion, Ohio.—The annual stockholders' meeting of the Marion Manufacturing Co. was held in New Jersey, and the following old Board of Directors was re-elected: William R. Archer, James Bastable, Ward H. Bones, H. Chisholm, Lewis B. Dailey, A. C. Edmondson, W. B. Everett, C. C. Fisher, William B. Fisher, Frederick Haberman, H. B. Hane, W. G. Harding, S. G. Kleinmaier, C. W. Leffler, James F. Prendergast, William H. Schaffner, Henry Strelitz and E. K. Uhler.

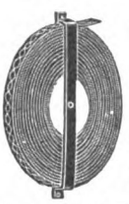
THE BICYCLE STEP LADDER CO.,
65 Randolph St., CHICAGO, ILL.

Sargent's Gem Food Chopper



is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

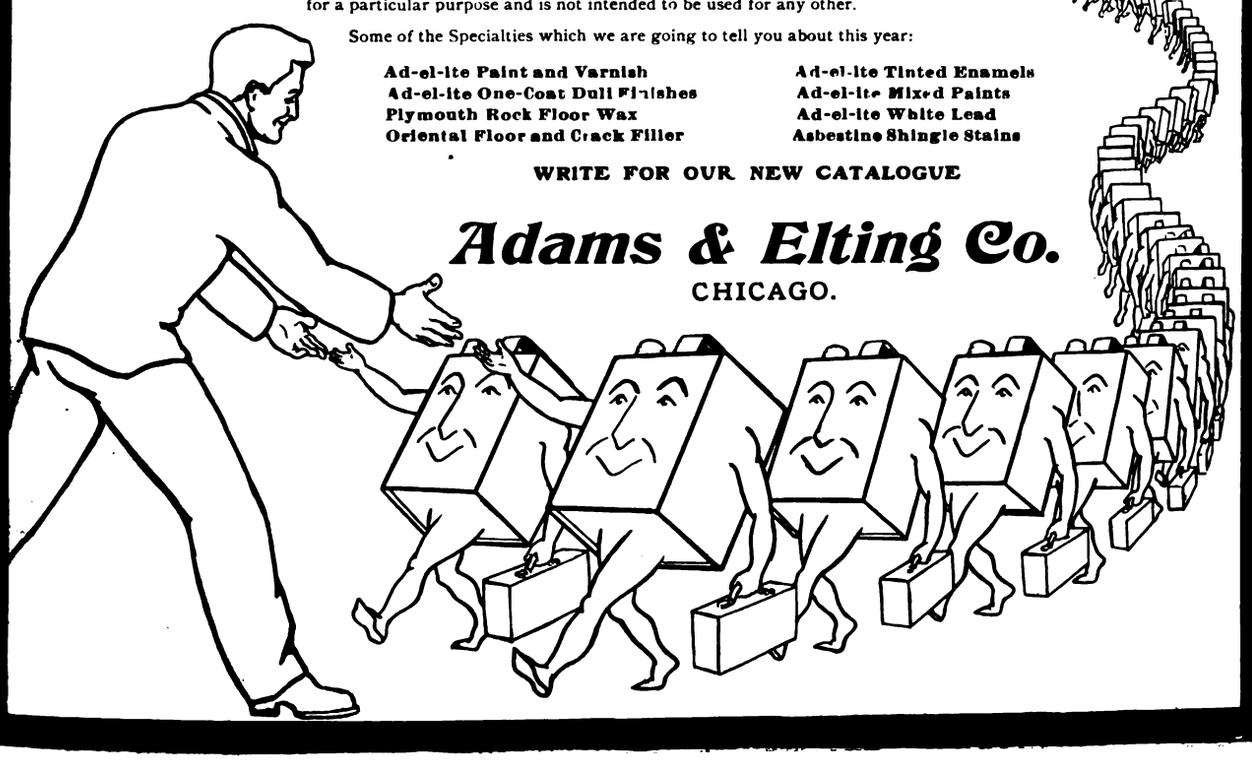
The dealer bright with smile so light
Extends his hand in greeting bland
To welcome in this band of knights
The money making Ad-el-ites

The TRADE Ad-el-ite MARK Line

Comprises everything in the Paint and Paint Specialty Line that a dealer can handle profitably.



And every Ad-el-ite specialty can be handled with profit, because—There is a real active demand for all of them, because—The superior qualities of the whole line have been extensively advertised, and because—The goods have the superior qualities which we claim for them, and always give satisfaction, because—Every Ad-el-ite Specialty is made for a particular purpose and is not intended to be used for any other.

Some of the Specialties which we are going to tell you about this year:

Ad-el-ite Paint and Varnish
Ad-el-ite One-Coat Dull Finishes
Plymouth Rock Floor Wax
Oriental Floor and Crack Filler
Ad-el-ite Tinted Enamels
Ad-el-ite Mixed Paints
Ad-el-ite White Lead
Asbestine Shingle Stains

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Dodgeville, Wis.—A new firm, under the name of Morsman & Morsman has been formed and will deal in automobiles and bicycles.

Fairfield, Me.—J. W. Sawyer has opened a new bicycle store in the Burgess Building.

Jersey City, N. J.—Aluminum Crown Stopper Company has been incorporated; to manufacture all kinds of machinery for bowling purposes; capital $25,000. Incorporators: Horace A. Kimball, William G. Smithers, Clarence W. Goodwin, William P. Catlin, Kenneth K. McYarin, No. 15 Exchange Place, Jersey City.

New Haven, Conn.—The A. Ochsner & Sons Company has been incorporated. Capital stock $15,000; to manufacture automobile and carriage Hardware trimmings.

New York, N. Y.—Charles J. Godfrey Co. has been incorporated; sporting goods; capital $50,000. Incorporators: Charles J. Godfrey, Brooklyn; Charles J. Godfrey, Grace N. Godfrey.

Oakland, Cal.—The Duck Motorcycle Co. has been incorporated with $25,000 capital stock, paid in. Incorporators are A. W. Duck, E. M. Rockliffe, M. H. Weed, and Benj. F. Woolner.

Westboro, Mass.—Andrew J. Fyrberg, former head of the Fyrberg Arms Company, which is moving to Meriden, Conn., intends to open a factory either in Hopkinton or some other place nearby, soon, for the manufacture of fire arms.

Whitehall, N. Y.—C. B. Pike has closed his jewelry store, and will in the future devote his entire attention to the manufacture of fire arms.

Changes.

Asbury Park, N. J.—Mark Guy has removed his bicycle store to 406 Main Street, where he will enlarge his stock.

Dayton, Ohio.—Ed. Borderwisch & Co. have moved their bicycle store to 12 and 14 North Jefferson Street.

Hartford, Conn.—The Colt Patent Fire Arms Manufacturing Co. has perfected an agreement for the manufacture of the celebrated Vickers-Maxim automatic machine gun of rifle caliber, including carriages and all equipments for the guns, for the entire United States. The work is in addition to that heretofore customary of the factory, which is to continue as in the past.

Nashville, Tenn.—J. S. Roler, dealer in bicycles, motors, autos, etc., has erected a new garage at 179 Third Avenue, North. It will be in charge of J. L. Hedges who holds the 6 to 10-mile steam track record for the world.

New Haven, Conn.—The Buell Cycle & Automobile Co. has been dissolved.

Youngstown, Ohio.—Max Oresky has opened a new bicycle store.

Embarrassments.

Somerville, Mass.—Henry H. Morse, bicycle supplies and novelties, doing a business as Morse Novelties Company, has filed a bankruptcy petition.

Willows, Cal.—Creditors of T. D. Orr, dealer in bicycles, sporting goods, etc., filed a petition on January 10 asking that he be declared an involuntary insolvent. They represent an aggregate indebtedness of $1,500.

Miscellaneous.

Batavia, N. Y.—At the annual meeting of the stockholders of the Baker Gun Company the following officers were reelected: President, E. J. Mockford; vice-president, Hon. R. A. Maxwell; secretary and treasurer, F. M. Farwell. E. W. Atwater, the Hon. George Bowen, H. L. Miller and A. G. Hough, together with the officers, will constitute the board of trustees. The officers reported that the sales had increased twenty-five per cent. during the past year and that the outlook for the coming year was very promising. The factory is now running ten hours a day and will not be closed this winter.

Norwich, Conn.—The annual meeting of the stockholders of the Hopkins & Allen Arms Company was held on January 16. The following board of directors was elected: A. H. Brewer, C. H. Osgood, H. A. Briggs, C. B. Lee, F. T. Brown, W. A. Briscoe, C. H. Preston, Archibald Mitchell, all of Norwich; Gardiner Hall, Jr., South Wellington. At a subsequent meeting of the board of directors these officers were elected: President, A. H. Brewer; vice-president, C. H. Osgood; general manager, treasurer and secretary, C. B. Lee.

Some curious statistician has recently procured information to the effect that there are 7,500 bicycles in the Paris pawn shops. The government has charge of these institutions and charges 7 per cent. on the loan.

The Union Velocipedique de France will celebrate its twenty-fifth anniversary next month, having been founded on February 6, 1880. Some festivities are to be held on this auspicious occasion, and it is rumored that an amnesty will be granted to most of the French racing men who are under suspension.

WEATHER SIGNS.

The formula of popular weather signs most approved by scientific men is that adopted by the Farmers' Club of the American Institute some years ago:

1. When the temperature falls suddenly, a storm is forming south of you. 2. When the temperature rises suddenly, a storm is forming north of you. 3. The wind always blows from a region of fair weather toward a region where a storm is forming. 4. Cirrus clouds (curl-cloud, cat's-tail) always move from a storm region toward a region of fair weather. 5. Cumulus clouds (hay-cock) always move from a region where a storm is forming. 6. When cirrus clouds are moving rapidly from the north or northeast, there will be rain within twenty-four hours, no matter how cold it is. 7. When cirrus clouds are moving rapidly from the south or southeast, there will be a cold hail-storm on the morrow if it be in the Summer, and if it be in the Winter there will be a snow-storm. 8. The wind always blows in a circle around a storm, and when it blows from the north the heaviest rain is east of you; if from the south, the heaviest is west; if from the east, the heaviest is south. 9. The wind never blows unless rain or snow is falling within 1,000 miles of you. 10. Whenever heavy white frost occurs, a storm is forming within 1,000 miles north or northwest of you. This is about as far as popular weather prophecy has advanced. It is not a great distance, but it is better than the old fashion of trusting to the italic warnings in the almanac, prepared a twelvemonth ahead.

QUICK SELLER, LIBERAL PROFIT
A perfect manicure. Never fails to please. The original German silver 25c.; Klip-Klip, Jr., nickeled 15c. Order at once from your jobber, or write direct for prices. As heretofore made only by KLIP-KLIP CO., 572 Clinton ave. South, Rochester, N. Y.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

A Look Behind The Scenes

Reveals that man creates; monkeys imitate

Originality Is Growth

Case Brothers Cutlery Company's designs and improvements along the line of usefulness to the user of cutlery in the past seven years, outdo all other cutlery improvements in twenty-five years.

Our method of right-handed jack knives, so simple and so naturally right, makes a man smile at the stupidity of habit that binds most people so persistently to the past.

Our knives are made without division scale, leaving them clean and free from all lint and small particles from the pocket.

All Blades Double Strength At the Tangs

Our original design, as here illustrated, is widely copied by monkey-faced competitors, who cannot think for themselves, and to whom inspiration is only a word. These things, coupled with honesty of hand forging from the highest grade material, places Case Bros. in a class by themselves as manufacturers of cutlery.

We sell to the retail trade only, and always under our own brand.
Tested XX is on the back of all our pocket knife and razor tangs.

Mention HARDWARE when writing.

THERE'S A HEAP O' SATISFACTION

in a name—a name that stands for bestness—best quality.

Take Axle Grease for instance: if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

Its the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs, barrels. The question is: how much do you need?

FRAZER LUBRICATOR COMPANY,
85 Murray St., New York.

A $250.00 Cash Register for
$125.00
HOW CAN WE DO IT?

The New Hallwood Leader embodies all of the up-to-date features on every make of Cash Register; it has many features which no other machine has; it meets every need of 80 per cent. of all businesses. We are thus able to bring it out in large lots and to reduce the cost of manufacturing to a minimum.

It will pay for itself in a short time.

Write for our catalogue and our booklet "SYSTEM" for a retail store.

THE INTERNATIONAL CO., Sole makers Hallwood Cash Registers.
Columbus, Ohio.

NEW
PUTNAM
Horseshoe Nails.

IN view of the fact that there is room at the top, and a good demand for a high class Horseshoe Nail, we wish to bring it to the attention of the trade that we are making but *one grade* of Horseshoe Nail (**THE NEW PUTNAM,**) which is first-class in every respect, and superior to any that have ever been previously offered, and that we are, therefore, *maintaining prices*, and that our machines make no seconds or inferior nails with which to flood the market and create unsatisfactory and unprofitable conditions; nor have we an overstock to dump to add to the demoralization.

In this relation, it should be borne in mind that the difference in price between our nails, and that of the very cheapest now sold, amounts to only 1½c. *per horse.*

PUTNAM NAIL CO.,
No. 50 Congress St., Boston, Mass.

Colt's Clamps

EVER hear of Colt's Clamps—Colt's Quick Acting, Self Locking, Eccentric Lever and Adjustable Screw Clamps?

If you haven't—write us at once. We have for you

A Special Offer To Handle Colt's Clamps

good until April 1st, 1905.

We have, and are still spending thousands of dollars in advertising to the consumer to help you sell them.

THE ONLY CLEANABLE REFRIGERATOR

SEE HOW IT'S MADE ?

THE "GURNEY"

The "Gurney" can be kept absolutely pure and clean because of its Removable Galvanized Ice Compartment.

The "Gurney" is packed with MINERAL WOOL and constructed in the best possible manner, and will show, by actual test, the lowest average temperature with the least consumption of ice.

The "Gurney" is leader in style and finish, and first class in every particular.

MADE WITH ZINC OR ENAMEL LINING

COLD FACTS

THAT MAKE WARM TRADE

A Refrigerator is no longer considered a luxury but a necessity.

A good Refrigerator is a source of economy, a poor one an extravagance.

The best is the cheapest; you can't afford to sell a poor Refrigerator.

A poor Refrigerator consumes ice but does not refrigerate.

A poor Refrigerator is a delusion and a snare with nothing to recommend it but price.

The price is soon forgotten, the quality never.

A poor Refrigerator cheats both the dealer and his customer.

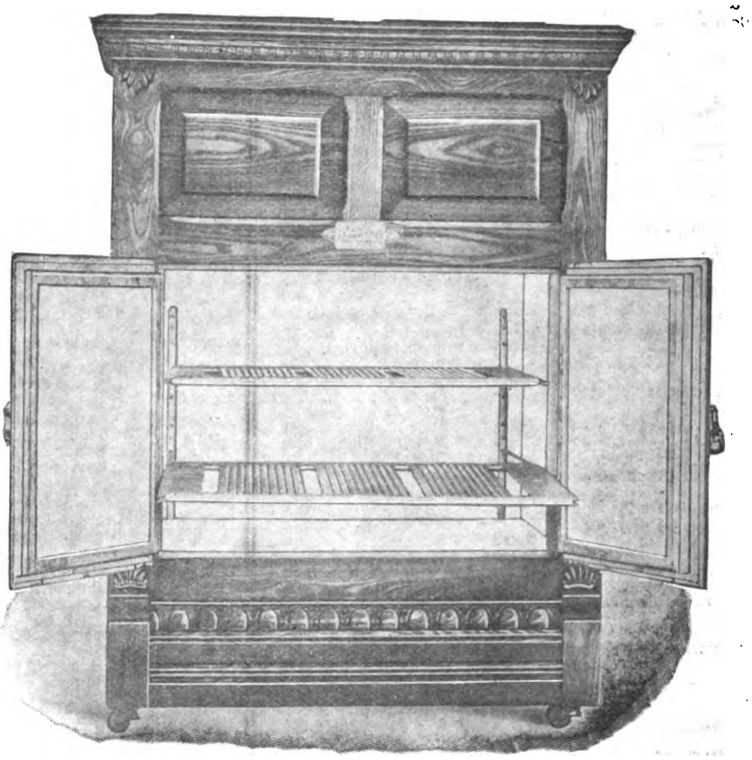
A low priced piece of furniture may answer the purpose for which it was made as well as more costly.

This is not true of Refrigerators.

In buying a Refrigerator the first cost is not the last cost.

A Refrigerator to be satisfactory must be so constructed as to be economical in the use of ice and in the preservation of food.

A profitable and satisfactory refrigerator trade can be built up only by handling high grade honest goods.



The "Gurney" is the best.

The La Belle is the highest grade refrigerator of its class.

The Gurney Patent Chinaline Refrigerator is the height of refrigerator perfection.

The Gurney Refrigerator Co. leads the world in the manufacture of Refrigerators because the "Gurney is the Best."

The Gurney is sold on the exclusive agency plan. One dealer every town.

YES!

We make 'em--
Cronk's Oregon Pattern
Pruning Shears

They enjoy an enduring reputation for efficiency and durability among users everywhere.

Our line is large and it will pay you to investigate.

Hardware Specialties

Our complete line is fully described in our 1904 catalog.

You ought to have a copy—may we send one?

Cronk & Carrier Mfg. Co.

Elmira, N. Y., U. S. A.

HAUTHAWAY'S STAR HARNESS DRESSING

The BEST Dressing ever produced for new or old harnesses.

Contains no acid, alcohol, or anything injurious to the harness.

Put up in barrels, half barrels, 5 and 10 gallon cans, pint, quart, gallon and half gallon tins.

Packed securely 2 doz. in a case.

Warranted to keep in any climate.

For use by all manufacturers of Harness, Collars &c., and in Livery, Express and Private stables.

Sold by Harness and Saddlery Houses in all parts of the world.

Order direct of us, or of any New York Commission House.

C. L. HAUTHAWAY & SONS

Established in 1852

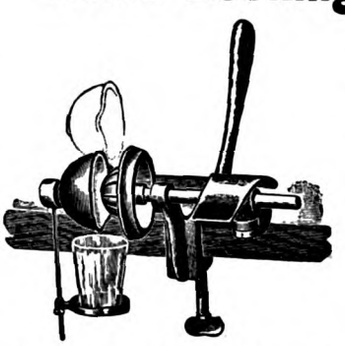
Hack Saws
That cost less than the "Sterling" are worth less—sometimes worthless. Don't be deceived by looks. Looks, even in Hack Saws, are only skin deep. It's otherwise with the "Sterling"

Diamond Saw & Stamping Works
357 7th St., Buffalo, N.Y., U.S.A.

Hack Saw Blades
Whenever ordering don't say: "As good as Sterling". Come right out and say you want the Sterling. Have the name with you. You can't get away from the name "Sterling"

TIME TO STOCK UP ON



BLACK SATIN STOVE POLISH

Our advertising during the coming months will reach nearly 10,000,000 women. Are you ready to supply the big demand that's coming? Do not let your customers send their money to us. Get the profits yourself. See your jobber about it without delay.

Black Satin Polish Co.
107 Chambers St., NEW YORK.

While Looking About

for a Lemon Squeezer, compactly put together, working rapidly and thoroughly—unbreakable—Look at

"The Leader"

Has no loose parts—always ready to squeeze.

Two styles—nickel plated and japanned.

MENTION "HARDWARE"

THE LEADER MFG. CO., Hartford, Conn.

BUTTER IN ONE MINUTE

THE only perfect milk and cream aerator churn in the world, making the best granular butter from sour or sweet cream in a minute—which we guarantee— is

THE ONE MINUTE CHURN

A Heart To Heart Talk

Perhaps you have only a bowing acquaintance with White's Edge Tools. If so, let's get acquainted.

They are the best Edge Tools for every purpose, not because we say so—no—but because thousands of satisfied users have found them Best by every possible test.

Moreover, at three International Expositions they took the palm—The Highest Awards. Their excellence stands to-day unchallenged. Do you wonder? They have been

Three-Quarters of a Century On the Market

Long experience has taught us how to make them best. That's why every tool, bearing the imprint of our name carries with it the reputation of Best-ness. Just solder your mind to that.

'T'would make a big dent in your reputation and ours to sell anything else than the best—wouldn't it?

You have never sent for our catalog. It is replete with information about our entire line. It's the matter of a postal—Send it To-Day.

Insulated Driver for Electricians

Ducharmes Tools

O. K. No. 9 Screw Driver

WE make a specialty of Hand Forged, Hardened and Tempered Screw Drivers, using positively none but the highest grade stock in both steel and handles.

We guarantee each driver to the trade, and will replace free of charge any that break, bend or are not perfect in all respects.

Each driver is tested to break a screwhead in its size.

Send for our latest catalog and discount sheet. We know you'll be interested.

HURWOOD BRAD AWLS

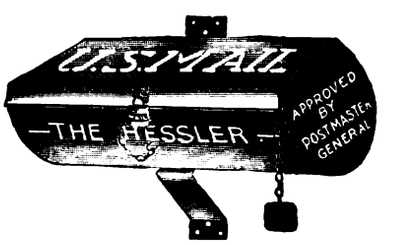
Are of the lasting kind. One piece of best quality crucible steel extending from point to head and a rivet through ferrule, wood and steel, have given our Brad Awls the name and fame of outlasting six of any other kind made.

Built for business they are business builders.

* *

Our catalog tells an interesting tale about Hurwood Tools. You ought to have a copy for reference. Shall we send it?

HURWOOD MFG. CO., Inc.
Bridgeport, Conn.



A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.

J. W. WHITE.
General Industrial Agent,
Seaboard Air Line Railway,
Portsmouth, Virginia.
We have a good location for your plant.

Rural Mail Boxes

THE HESSLER

BEST KNOWN. BEST MADE.

Most durable as well as the cheapest fully approved Rural Mail Box on the market. Do not be deceived by manufacturers who claim to have a Box similar in appearance to the "Hessler." Just compare the Boxes and convince yourself. The Hessler Box is storm and dust proof, has the only signal that will not get out of order. It costs you no more than the cheaper made boxes. Write for full description and prices.

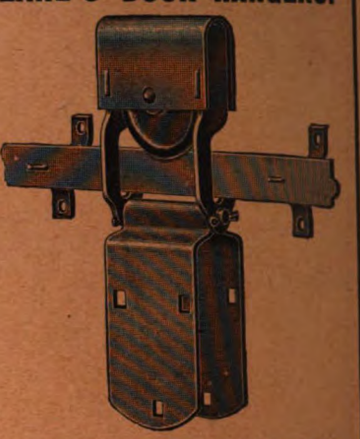
THE NO. 10 COIL FIRE POT.



WHILE in appearance it is like Coil Fire Pots of other makes, you will find it stronger, better and more durable; at the same time giving you better control of the fire. The tanks are made of heavy galvanized iron, and needle point valves which never leak are used. Our catalog tells of other advantages, any one of which will soon save you the entire cost. When buying insist upon having our make and see that our name is on the top plate. Jobbers sell at factory price. "Your money back if not pleased," is our guarantee.

Rural Mail Boxes

THE HESSLER

BEST KNOWN. BEST MADE.

Most durable as well as the cheapest fully approved Rural Mail Box on the market. Do not be deceived by manufacturers who claim to have a Box similar in appearance to the "Hessler." Just compare the Boxes and convince yourself. The Hessler Box is storm and dust proof, has the only signal that will not get out of order. It costs you no more than the cheaper made boxes. Write for full description and prices.

HESSLER MAIL BOX CO.,

SYRACUSE, N. Y.

I Do Not Believe

that there is a hardware dealer anywhere who ever sold a washing machine to a hotel, hospital, sanitorium or laundry.

Why?

Because the manufacturers of laundry machinery do their business direct with the trade. The cheapest wooden washer suitable for hotel or laundry use sells at $30.

My large Paragon Washer, made of **metal,** better in every respect, retails at $18, and this includes a big profit for the dealer.

See the Point?

There is a chance to open new fields and "Paragon" satisfaction will incidentally advertise your other goods.

Write for some circulars, mail them to hotels and institutions in your town, and watch the surprising results.

The following testimonials will open your eyes.

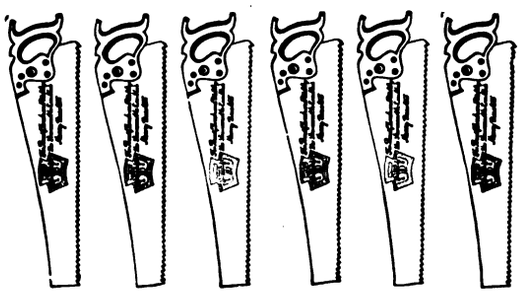
R. W. PICK, Sixth Avenue Laundry, 926 6th Ave., NEW YORK: "Your 'Paragon' Hand Washer is the best up-to-date in my experience. The two in use in my place are doing the work of five washwomen quicker and cleaner in every way. The easier running and durable construction make the 'Paragon' cheap at double the price and in my 15 years experience in hand laundry I never felt more satisfied than since I use the 'Paragon;' it is as great a clothes as it is a labor saver. I can highly recommend the 'Paragon,' and it can be seen in operation every day in the week at my laundry."—R. W. PICK.

NEWARK SANATORIUM, 252 Littleton Ave., NEWARK, N. J. "The 'Paragon' Cylinder Washer which I purchased has given entire satisfaction in every detail. I have used several machines of various makes, but have found them all faulty until I got your machine, which is both a labor and linen saver. My only regret is that I did not know of the 'Paragon' before."—Dr. CHAS. LAUTERWASSER, Prop.

I have similar recommendations from Schools, Dyers' and Cleaners', Hotels, Summer Resorts, etc., etc.—Dealers! Here is an article without competition.

Emil R. Beckert,

1175 3rd Avenue, - - New York.



PHILADELPHIA BRANCH: 208 S. 11th St.

P. S.—The "Paragon" Washer, family size, is the most rapid seller known in the history of household machinery. A dealer who does not handle the "Paragon" is behind times!

NEW

PUTNAM

Horseshoe Nails.

IN view of the fact that there is room at the top, and a good demand for a high class Horseshoe Nail, we wish to bring it to the attention of the trade that we are making but *one grade* of Horseshoe Nail (THE NEW PUTNAM,) which is first-class in every respect, and superior to any that have ever been previously offered, and that we are, therefore, *maintaining prices*, and that our machines make no seconds or inferior nails with which to flood the market and create unsatisfactory and unprofitable conditions; nor have we an overstock to dump to add to the demoralization.

In this relation, it should be borne in mind that the difference in price between our nails, and that of the very cheapest now sold, amounts to only 1½c. *per horse.*

PUTNAM NAIL CO.,

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

ST. LOUIS FAIR'S TOTAL.

The official report of the Director of Concessions and Admissions of the Louisiana Purchase Exposition shows that the total recorded admissions for the period of the Exposition, from April 30th to December 1st, inclusive, were 19,694,855, of which 12,804,616 were paid and 6,890,239 were free. The total admissions at the World's Columbian Exposition at Chicago was 27,539,041, of which 21,479,661 were paid.

BISSELL'S INCREASED FACILITIES.

The demands from dealers handling Bissell's "Cyco" Bearing Carpet Sweepers, for advertising matter, have been continually increasing, until the Bissell Company have found it necessary to add another large cylinder press to the equipment in their private printing department. The machine they have just installed is one of the latest models of two revolution Meihle cylinder presses, weighing 8,000 pounds, and is built to do the finest printing known to the art, including the new three color process work.

GOSSETT S SUSPENSION HINGES are used very extensively in attaching full-length window screens. Screens hung in this manner may be removed or replaced without the use of tools or ladder. This feature makes them particularly desirable for use on upper stories. The sale of these hinges is constantly increasing. They are sold by numerous Hardware jobbers or may be obtained from the manufacturer, F. D. Kees, Beatrice, Neb.

♣

At the annual meeting of the Stanley Rule and Level Company, New Britain, Conn., held February 6, the following officers were elected for the ensuing year: President, Charles E. Mitchell; vice-president and secretary, A. W. Stanley; treasurer, C. B. Stanley. Directors: The officers and H. S. Walter, M. H. Whaples, Hartford; F. L. Hungerford and W. J. P. Moore, New York.

♣

William W. Woodward, Newton, N. J., who has carried on a large Hardware and Implement business at that place for forty years, has just filed a certificate incorporating the Wm. W. Woodward Hardware Company with a capital stock of $90,000. The stockholders are all members of his family, taking over the business so long managed by Mr. Woodward.

♣

A grooved steel hoop to replace the wood hoop on nail kegs, flour and cement barrels is now being manufactured by the Carnegie Steel Company, Pittsburgh, Pa., and is meeting with success. Owing to the weak nature of these barrels the ordinary hoop was not found satisfactory and although experiments have been under way for many years to replace the wood hoop nothing, it is said, as desirable as the grooved hoop was found. It was impossible to drive the hoops into place as they are on the heavier oak flasks, tubs and casks of a more substantial nature, nor did the hoop withstand the pressure occasioned by piling one barrel on the other. The groove in the hoop greatly strengthens it and in addition it is kept in place with an ordinary wire nail. The hoops are all riveted.

♣

The New York post office furnishes the following data with regard to its daily business: Number of letters handled between 4 p. m. and 9 p. m. each day, about 1,000,000; tons of mail sent to Grand Central Station daily by wagon, 135; by pneumatic tube, 13; number of wagon trips daily, 59. The authorities recommend that about $119,700 be expended to establish four new branch stations, one in the Wall Street district. It is also planned to use the subway for delivery of mail to the trains, saving about twelve minutes on each trip

AN ANCIENT IRON MILL.

Upon a beautiful fall day of 1904, a temporary tourist, a Hardwareman, escaped from the toils of business, looked from the swiftly moving trolley car upon the rich harvest of corn, onions, celery and other vegetables upon the level plains of Danvers, Mass., and his mind dwelt upon the beauties of nature and the goodness of the Creator. Suddenly the road twisted around a beautiful estate, and the Hardwareman's eye rested fully upon an iron mill, furnaces in full blast and red hot iron rods rushing from its rolls like live fiery serpents.

Curiosity led him to alight, as the car stopped at the railroad track running to the mill; for there was something unusual about the place. It was apparently more fitted to quiet farm life than for the grim toil of the rolling mill or the racket of the nail factory in the rear. There was much to inspire the mind to scholarship and reflection about the spot, too. Not far away was the farm of Captain John Endicott, the first governor of Massachusetts, who boldly cut the cross from the British flag because it savoured of popery, so offensive to his Puritanism. And nearby, too, are the Jacobs and the Nourse farms, from which were dragged those brave witchcraft martyrs, "Goody" Nourse and Goodman Jacobs. And not far off was Oak Knoll, the home of Whittier, the Quaker poet, and also the home of the famous General Putnam and also General Porter.

So the Hardwareman was not surprised when he learned that the iron mill, too, was rich in history. It was started in 1795 by Nathan Reed, a remarkable but little known figure in early American history, and the following ancient record, a copy of which was shown to the Hardwareman, thoroughly proves the date:

"To the freeholders and other inhabitants of the town of Danvers the petition of Nathan Reed respectfully showeth that he has it in contemplation to build certain mills near Waters' Bridge, so-called, on Waters' River, and requests the town grant, convey and quit claim to him, his heirs and assigns forever its consent, license, right and permission to erect a dam, or dams, on and across the bridge, and to do everything necessary to completing and using said mills without any let, hindrance or molestation whatsoever of said town." (Signed) NATHAN REED.

Salem, March 9, 1795.

At a legal meeting of the inhabitants of the town of Danvers, on March 9, 1795, voted that the prayer of the above petition of Nathan Reed be granted.

(Attest) GIDEON FOSTER, Town Clerk.

So armed with this grant, Mr. Reed laid the foundations of the mills that are to-day still running. He had a remarkable invention, a nail cutting machine, the nature of which is not known to-day, and many splendid projects in mind. He had experimented with steam propulsion of both land and water carriage, though at the time it was considered utterly impossible to make a portable boiler that could be fed with coal fuel and water to say nothing of carrying its own weight. Reed experimented with a steamboat in the river near the mills eighteen years before Fulton put his steam vessel on the Hudson. Reed also endeavored to make a carriage that would travel on land, by steam power, so it may be said that he early experimented with automobiles.

When Reed appeared in Congress with his application for a patent on his portable steam boiler, or steam carriage and steamboat, he was laughed out of Congress. But Fate played a strange trick, for he was soon sent to Congress by his fellow citizens, and he drafted the patent laws of this country.

His iron works in Danvers began the manufacture of anchors for vessels, and the anchor of the celebrtaed United States frigate Essex was cast in these Danvers' mills, and was wetted down with enough punch to drown it, according to the tradition to-day.

Reed, the founder of the iron works, was a genius. He graduated from Harvard College, studied medicine, experimented with a steam carriage while running an apothecary store, became an owner of an iron mill, settled down on a farm, was sent to Congress, became a judge, and finally went back to a farmer's life, and in pursuit of agriculture he invented a number of valuable farming tools. He was active to 90 years of age, and wrote his biography during the last days of his life.

Among the men who came to these Danvers iron works in days gone by was John Sylvester, and it is one of his descendants who is to-day owning and operating the mill. Of course, the mill has been modernized from time to time and it is a very different structure from that which Reed first built.

It is quite an interesting mill, even to experienced eyes of to-day. A fresh water river flows down to its dam, and beyond its dam schooners of the sea unload coal and take on iron bars. A great deal of waste and scrap iron is brought to this mill in railroad cars, which run right through the mill. But just across the street from the mill a flock of farm ducks waddle in the pond, and the scent of new mown hay, ripening onions, rosey red apples and other products of the neighboring farms frequently blows through the heated air of the shop.

These and other interesting things the Hardwareman learned and saved at this old time mill, and then he climbed abroad the trolley car and sped onwards upon his trip to the New Hampshire hills. F. A. G.

FEBRUARY 25, 1905.

Editorial Trade Review

This is the busy season for the Conventions of Hardware Associations, and they have been pretty active during the past fortnight. The delegates have read their carefully prepared papers, papers that show considerable thought and painstaking development of facts, from which is deduced the wisdom that guides the guild in their every-day life, and fosters and encourages the success which so many obtain, while they make their mark in the world. Many of the papers show an originality worth listening to, and it is to be hoped that the participants in the various gatherings of zealous Hardwaremen have aided their experience, and reaped the advantages of communing with the brightest minds in the business; knowing what benefits accrue when the annual meetings take place, each one anxious to hear the trials and troubles, the difficulties that beset the average Hardwareman everywhere, and learn how they may be surmounted.

These powerful organizations in the trade are gaining every day, and by combining, they learn what intelligence can demand of their rivals and competitors; learn the advantages of getting only a fair profit, making the catalogue houses and department store trade know something like an aggressive opposition from the Hardware trade, the dealer having awakened, is willing to fight for his existence and his share of the business.

The orders for immediate wants are somewhat slow in the aggregate during the current month. The weather has been held accountable for a portion of it, for with the thermometer in the neighborhood of zero for weeks at a time, the immediate wants were slow in maturing. The trade awaits the first breath of Spring to inspire those conditions that are ready to encourage the anticipated opening, when things get settled.

The manufacturer is already in receipt of orders enough to warrant the contented feeling he exhibits, and is wondering whether the markets for raw material would justify the advance in price he has been long in prophesying, and fearful of fulfilling. The fear of a possible advance has filled him full of orders from customers always to be relied on, and not to disappoint, his prices are daily becoming more rigid, and his quotations unrelaxing. In some cases comparison with previous years finds an encouraging contrast, business being greatly in advance.

Transportation has been greatly interfered with, being retarded by snow in every direction, and colder conditions that make it lie for weeks when we usually experience a January thaw. As soon as the intensely cold weather and the accompanying snow shall have cleared away, sales will give every encouragement to the Jobber, who will find a solid and substantial demand for goods in every direction which will last all Spring.

Goods offered at anywhere near old prices are already snapped up by the hopeful buyer; many advances that were thought out, and deemed necessary have not as yet taken place in all their importance, and the manufacturer has been satisfied with the slight advances which so far have braced up the market. Everybody is in a satisfied frame of mind, present and prospective, with no pessimistic atmosphere within reach, and the feeling that is prevalent is that present quotations are safe to buy at.

The trend of thought displayed in the Conventions now being held by the Retailers is that old fashioned methods in distributing Hardware must go, as the profits on specialties is growing smaller by excess in competition, and a reconstruction of the ideas that govern among Retailers must take place by conforming to the new conditions. Lessoned efforts as effecting the compulsory distribution through strictly Hardware stores of certain specialties by manufacturers is noticed, and dealers have extended their own lines by adding salable goods which will increase the gross profits on their sales and make the lines of goods selected, staple to a Hardware stock, instead of a side line calculated to sell itself.

THE NEW YORK STATE ASSOCIATION OF HARDWARE JOBBERS

The New York State Association of Hardware Jobbers held a meeting in Troy February 16 as the guests of J. M. Warren & Co. A business session was held at 11 o'clock at the Troy Club and in the afternoon dinner was served. The association was formed in 1888 and is one of the strongest local organizations in the country. Its annual meeting will be held in September. Among those present at the session to-day were Messrs. Treman and Hawes, Ithaca; Palmer, Rochester; Barker, Elmira; Johnson, Kingston; Weed and Neal, Buffalo; Black and Born, Syracuse; Detmers, Buffalo; Boucher, Rochester; Underwood, Binghamton; Turner, Wackerhagen and Dunscomb, Albany; Conde, Watertown; Secretary Fernley of the association, Messrs. Dickinson, Taylor and Nealey, representing the American Sheet and Tin Plate, American Steel and Wire and American Screw Companies, respectively.

THE NORTH COAST RETAIL HARDWARE AND IMPLEMENT ASSOCIATION

The North Coast Retail Hardware and Implement Association held its annual meeting and election of officers at the Occidental Hotel, Santa Rosa, California, February 9. The election of officers resulted in the re-election of James Clark Mailer for president. C. E. Haven was chosen vice-president; August D. Ketterlin, secretary, and E. E. Morrow, treasurer. The finance committee consists of A. P. Brunner of Ukiah, D. Schwarz of Napa and J. H. Steves of Petaluma. The executive committee consists of James C. Mailer, C. E. Haven and A. D. Ketterlin of Santa Rosa, J. H. Gunn of Healdsburg and N. M. Crossley of Petaluma. The retiring secretary, Arthur de Witt Brown, was made an honorary member of the association in recognition of his efficient services. Mr. Brown has been secretary of the association since its organization several years ago, and relinquishes the post because he has retired from business and intends going to Los Angeles in the near future.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Divorce—Custody of Children.

QUESTION: If a man and wife are residents of the State of New York, and the wife goes to South Dakota and obtains an absolute divorce, who is entitled to the custody of their children?

REPLY: If the question is determined by the courts of this State the custody of the children will be awarded to the parent whose care will be most conducive to the children's welfare. Mother and father are now equal in their rights of guardianship over their children (Domestic Relations Law, Sec. 51 as amended by the Laws of 1899, Ch. 159), and therefore, the mother is not confronted as heretofore with the common law preference for the father. The chief concern of our courts in such cases is always the welfare of the children.

Gift—Subsequent Statement Immaterial.

QUESTION: A woman in contemplation of death, gave her bank book to her companion who retained possession of it until after the donor's death. After the book had been thus given, the woman stated in the presence of several witnesses that she still claimed to own it and that she only parted with it so as to get cheaper board at the hospital than she would have been able to do with the book in her possession. Who is entitled to the deposit?

REPLY: The person having the book, as it is well settled that the declarations or statements of a donor or assignor of personal property made after a gift or sale, are ineffective for the purpose of defeating the claim or title of the donee or assignee.

Deed—Delivery Ineffectual.

QUESTION: A man made a deed of his farm to his wife. This deed he delivered to a third person with this endorsement, "this deed was delivered as an escrow by the grantor to be handed over to the grantee, his wife, on the grantor's getting drunk again after this date." After his death, the person entrusted with the deed, upon receiving the wife's affidavit that her husband had been drunk since the date of the deed, delivered it to her and she recorded it. Has she a good title to the property?

REPLY: We think this was nothing more than a gratuitous promise to deliver a deed to the wife. It was not a deed in escrow, because it was not made pursuant to a valid contract. While the husband might have given his property outright to his wife, for the reason that he became intoxicated and that it was unsafe in his hands, his agreement to deed the property can only be sustained by showing a sufficient consideration. The husband simply promised to forfeit his property in case his appetite got the better of his judgment. The wife agreed to do nothing and did nothing. There was no consideration for the husband's promise, and as the deed was not delivered during the husband's life time, the property must pass to his heirs

NEW ENGLAND TRADE EXPANDING—TENDENCY TOWARD LARGER LIVES—SPORTING GOODS BEING ADDED—TRADE GOOD.

The business outlook in New England is better to-day than it has been for some time. In the Hardware trade there is a greater activity than is usual at this season, the outlook for a brisk Spring trade is exceedingly good.

In Providence, R. I., there is more new building being planned and more contracts actually being let than last year at this season—that is what C. W. Aspinwall, of the firm of Bosworth & Aspinwall said. This concern caters especially to the Building Hardware trade and being in close touch with this end of the Hardware business, are in good position to know trade conditions. Continuing Mr. Aspinwall said: "Business with us has been good all Winter, collections are satisfactory, and trade generally is in a very healthy condition."

Here in Providence is located one of the most progressive Hardware concerns in the East. Although only having been established four years the Union Hardware & Electrical Supply Co. has built up a trade covering the greater part of southern New England, with eight salesmen on the road. The Union Hardware & Electrical Supply Co., this month, moved into their new store, which will put the concern in a position to better handle their fast growing trade This new store is a model and when all fixtures are completed will be one of the most up-to-date Hardware stores in the East. The building is 200 feet deep by 30 feet wide, and the entire four stories and basement are occupied by the Union Hardware & Electrical Supply Co. President C. S. Angell in speaking of the business said: "We are increasing our stock in some departments—paints and oils, sporting goods, and factory supplies, and in all lines of Hardware are looking more closely after the jobbing trade." W. H. Angell is vice president, H. L. Perkins, treasurer, and W. L. Adams, secretary. These officers together with C. E. Dudley, F. S. Clark and E. A. Smith form the board of directors. The success of the Union Hardware & Electrical Supply Co. has been most remarkable and is due to the fact that each of the members of the concern are practical Hardwaremen and hustlers. The new store is fitted with every modern convenience for the rapid handling of orders—telephones connecting all departments—elevators and all stock under one roof.

A large double store at 89-91 Weybosset Street has for many years been occupied by the Belcher & Loomis Hardware Co. The store is being rearranged and so fitted that more goods can be displayed on the main floor. A large business is done in safes, of which line the concern carry a big stock.

Brown Bros. devote their entire attention to mill and factory supply trade, and each year are adding to their business in this line.

Another Providence firm doing both a retail and wholesale trade is Barker, Chadsey & Co., at 40 Westminster Street. This concern carry a complete line of Shelf and Builders' Hardware and look closely after the mill supply trade. It is worthy of note that Providence Hardwaremen are gradually taking up the line of sporting goods. Until recently this trade was largely in the hands of two or three exclusively sporting goods stores and the pawn brokers. But here as in other cities throughout the United States the Hardware dealers are adding each year some branches of the line, and it would seem that it is only a question of a few years, when the Hardware store will be the sporting goods store.

Pawtucket, R. I. Hardware trade is closely looked after by A. F. & F. Bray who carry a large stock of general Hardware, including factory supplies, tools and Builders' Hardware. Sporting goods also have recently been added and the line has been found very satisfactory. Mr. Bray said the outlook was good for Spring business.

Doing both a retail and local jobbing trade Duncan & Goodell Company have built up a fine Hardware business in Worcester, Mass. A large business is done in Mechanical Machinists Tools and this concern carry a large line.

The wire mills and wire goods manufacturers of Worcester are all busy. A. H. Parker, who is at the head of the Parker Wire Goods Company, one of the largest manufacturers in the line in the United States, said that business was unusually active all through the Winter. Mr. Parker is also interested in the Worcester Supply Co., which concern are large jobbers of specialties and sporting goods. Through this business Mr. Parker is able to keep in touch with the retail trade—and from what was said to your correspondent one would judge that business was booming throughout New England.

One of the most wide-a-wake Southern New England Hardware jobbers is Jordan Bros., of Willimantic, Conn. Both brothers are practical Hardwaremen, knowing the business from the ground up. They work the small trade of Southern New England closely, and by close attention to business have built up a large wholesale trade. Jordan Bros. recently added sporting goods and issue an attractive up-to-date catalogue of fishing tackle. The entire line of sporting goods has been found to be a good paying side line—and many of Jordan Bros.' wholesale Hardware customers who formerly bought their sporting goods in New York or Boston are now buying these goods of them. As profits are constantly being cut down on many lines of staple goods, and some branches of the Hardware trade is being taken up by other stores, as house furnishing goods by the department stores, it would seem perfectly natural for the Hardwareman to take up kindred lines such as sporting goods.

HAMMERNAIL.

THE TROY NICKEL WORKS, Albany, N. Y., with Chicago branch at 219 E. Kinzie Street, are distributing their 1905 catalogue of Alaska Stove Trimmings and Hardware. This is their twenty-third annual catalogue and price list. A specialty made by this company is the Gaitley mincer. Its construction is such that it is easily taken apart and put together when occasion requires. The crank revolves horizontally with the table to which it is fastened, which they claim does away with the tiresome stooping position required by other mincers. The knives are of hardened steel and all the parts are so adjusted that there is the least possible wear. The clamp is separated from the body and can be clamped on the shelf or table and left there permanently. The body can at any time be quickly attached to the clamp and can be placed in four different positions over the table or shelf, or reversed when a pail, jar or barrel can be placed to receive the product after being minced. Three knives are supplied with each machine to cut fine or pulverize. Substitution of one for another can be made without removing the contents. Send for their catalogue which describes and illustrates fully all of their products.

NORTH DAKOTA RETAIL HARDWARE DEALERS

The Eighth Annual Convention of the North Dakota Retail Hardware Dealers was held at Fargo on February 1st, 2d and 3d, the sessions taking place at the rooms of the Fargo Commercial Club. The attendance was the largest and the spirit manifested the most enthusiastic of any convention held thus far. The souvenir programme prepared for the occasion was an extensive affair, containing a large amount of advertising illustrated by portraits of the president and principal salesmen of the patrons.

WEDNESDAY AFTERNOON SESSION.

After prayer by Rev. Dr. Dickinson, of Fargo, the association was welcomed by Mayor A. L. Wull, which was responded to by H. B. Allen, of Jamestown, in part as follows:

Address of H. B. Allen.

It is only fair to the Honorable Mayor that he should know who we are and what we are here for. We are the retail Hardware dealers of North Dakota, and we have no apologies to offer regarding our personality. We believe you will find our convention will not suffer by comparison with other conventions which so often meet in your convention city, whether they are business or professional men or politicians. We are at least very well satisfied with ourselves.

This is largely due to what we have accomplished in the eight years of our existence as an association. One of our objects is the

H. F. EMERY, PRESIDENT.

protection of our rights. We are what are called middlemen, and we have to watch both fore and aft. It is of vital importance that the retail dealer buys his goods right, and we have learned by experience that a wholesaler can hear far better and sooner when spoken to through the association than by one retailer who stands alone, thus proving true the old adage that "In union there is strength."

Another object is education; for no one can rub shoulders with the Hardwaremen of North Dakota without learning something which he can turn to his advantage. Another fruitful source of information are the addresses of the representatives of the wholesale houses. While our interests are not identical in every particular, yet we have a common foe and we have joined our forces to resist his encroachments on our prosperity. We do not flatter ourselves that the catalogue houses of the large cities are a thing of the past, but their encroachment on the legitimate Hardware business is handicapped by the united efforts of wholesaler and retailer.

Another source of pleasure and profit to the members of the association is the privilege of meeting and greeting the knights of the grip. I fear we do not appreciate the labors of these faithful friends. We owe much of our prosperity to them. Their visits to our places of business are a source of inspiration as well as information, and let us not forget to give them the glad right hand of welcome and as large an order as our business will justify.

The president then appointed the following committees:

TRANSPORTATION—F. Harrington, Fargo; G. S. Cole, Lisbon; John McCollum, Hope.

NOMINATIONS—H. T. Helgesen, Milton; R. L. Scott, Jamestown; E. E. Elliott, Sanborn.

LEGISLATION—G. W. Wolbert, Bismarck; M. G. Evenson, Cooperstown; Wm. Schnur, Fingal.

FINANCE—E. E. Elliott, Sanborn; W. H. Pinkerton.

SPECIAL COMMITTEE—E. E. Elliott, Sanborn; W. W. Jamieson, Wahpeton; H. S. Diesem, LaMoure.

A. F. Sheldon, of Chicago, delivered an address on the

Science of Salesmanship,

which was on the lines of his previous address on the same subject.

THURSDAY MORNING SESSION.

The first paper was an address on

Heating and Ventilating.

BY O. N. ROBERTS, ROBERTS HEATING AND VENTILATING CO., MINNEAPOLIS, MINN.

Artemus Ward, who was not a great lover of snakes, used to say that a snake's hole always reminded him of the fact that the hole belonged to the snake. To quite the same extent, although in not exactly the same way, I believe that the furnace business belongs to the Hardware dealer. Moreover, the furnace business is unquestionably one of the Hardware dealer's most valuable assets because it is one of the few things that can never be successfully carried on by department stores or supply houses. Fancy a 15-year-old girl with chewing gum in her mouth and a red ribbon around her neck making up an order for the material necessary to put in a heating plant for a 14-room house.

There are merchants who will not handle furnaces because they think it is impossible for furnaces to give satisfactory results, and their conscience as well as their business sagacity tells them that it is not well or wise to sell gold bricks to customers, no matter how eager they may be to buy. Now, it is easy to understand why a merchant should refuse to handle a line of goods in which he has no confidence, but why he should choose to remain in ignorance of the real value of warm air heating when there is so much at stake is a mystery.

For ordinary residences there is nothing in my opinion that will give more universal satisfaction than up-to-date warm air furnaces properly installed. I know there is a prevalent opinion that hot water plants require less fuel than warm air, but my personal experience has convinced me that this is not true except in houses where it is impossible to secure comparatively short runs for the warm air pipes and a thorough system of inside circulation.

Moreover, the difference in price between warm air and hot water plants will always give the former preference among people of moderate means, while those who prefer a practicable system of ventilation in connection with their heating plant and who appreciate the advantages of securing quick changes in the house temperature during the spring and fall will certainly decide in favor of furnace heat.

There is another system of heating, however, that combines many of the good features of both warm air and hot water; I refer to what is known as combination heating. Of course, if all houses were so arranged that every room could be directly reached by warm air pipes there would be very little need for combination heat except, perhaps, in some very exposed corners, but there are usually in large houses some rooms that cannot be heated successfully by any other method than hot water.

F. J. Hopkins then delivered the following address on

Credits.

BY F. J. HOPKINS, JANNEY, SEMPLE, HILL & CO., MINNEAPOLIS, MINN.

What is credit? Of what is it composed? Why so valued? As applied to your business and ours it means the power we possess to obtain the property of another without immediate payment therefor. It is composed of many qualifications, some of which are capital, integrity, ability, habits, and, in this age, the power to hustle and succeed. Why is it so valued? For the reason that modern methods make the possession of it a necessity to enable one to do business. More than 98 per cent of our sales are on credit, and a full 100 per cent of our purchases.

I wish I could tell you how to make only good credits. It would be worth some little to me if I knew. I can simply say, "Do your best," as we all have to, keeping in mind a few fixed principles. Your credits and ours are quite different, and the same rules would scarcely apply. There are some, however, that do, and I would call attention to such as honesty, ability and not being afraid to work. These should recommend to you every man applying for credit. I would also call attention to such as intemperance, laziness, lack of any capital and the man who always owes too much. These should be shunned.

An account rightly opened on the proper basis makes easy its collection. I would suggest in all cases where you open a new account or after balancing an old one, if it is again reopened, that you would try to impress upon your customer that you have in mind the pay day. When he begins his purchases say to him, "John, I am willing to give you credit and to accommodate you, but I wish to know at what time you expect to pay your account. I have my bills to meet and must figure accordingly." Get fixed in his mind a time when you expect him to pay, and, if the conditions are right, present your account at that time to let him know you remember the transaction, and it will aid you more than you think in getting your money.

Credits and collections are as close relations as the Siamese twins: the one determines the value of the other; and, in speaking of credits, one cannot ignore the twin brother.

Digitized by Google

From years of comparison and experience covering the same field of operations I have found one combination that seldom, if ever, fails to win in business. It may be possessed by an individual, but more often by two men. It is

THE POWER TO BE A GOOD SALESMAN

and also possessing the ability to be a good collector, and not only having the ability, but making use of it. This combination very often begins business with a limited capital, but in a few years it enters the list of discounters and its progress is rapid.

CREDITS FROM THE WHOLESALE STANDPOINT.

I have endeavored up to this time to occupy a place behind your office desk and to briefly outline some suggestions that I feel will aid you in extending credit and making your collections; but you would think I had missed my opportunity at least did I not say something of credits from the wholesale standpoint. For many years the manufacturer and jobber have depended largely, and been greatly aided, in extending credit from the information furnished by the two leading mercantile agencies, Dun and Bradstreet, until they are now recognized throughout the land as the natural source for the distribution of credit information, useful alike to the jobber and retailer, and it is unfortunate that in giving your credits you cannot rely on some agency of this character to ask your customer what you sometimes think personal questions. We have also in our house for some years past made it a practice of obtaining from customers at a time when invoicing is general and the inconvenience least

A STATEMENT SHOWING THE CONDITION OF THEIR BUSINESS.

This we believe to be the best and most authentic information possible to obtain, and I desire to ask your hearty co-operation along this line. It must first be understood that the entire transaction is of a confidential nature, and the information is obtained only for our use and mutual good. The principle involved is right, because it is fair and just, that if we trust you with our money we should be allowed to at least form an opinion as to your ability to repay. Guessing is eliminated; and at this point I wish to say that your interest and your jobber's are identical. He is almost as anxious to see you succeed as you are to do so; and if in these yearly exhibits which are examined with much interest the seeds of danger are discovered—such as overcredit or poor collecting, evidenced by heavy outstandings; overbuying as seen in unusually large stocks, heavy and out of proportion indebtedness, extensive land holdings, first payments of which have often been taken from the capital of the business, and light insurance—these are, with a deep interest your jobber has in your welfare, taken up and suggestions offered for the betterment of your business. Could you know how often some one of the above weaknesses appear in statements you would be surprised. Especially is this true of insurance. If you cannot afford to charge your expense account each year with an amount adequate to pay for proper protection against loss by fire you cannot afford to continue in the business.

I would also call attention to the fact that we find many customers who do not take a yearly inventory of their stock. This indicates very lax methods or disinterest in your business. There are two very important reasons why you should take an inventory each year: First, to know the price of your labor and energy for the twelve months through which you have operated, and, secondly, to have a proper basis for the adjustment of your insurance in case you are unfortunate enough to be visited by fire.

If for any reason you object to giving personal statements to your jobber, I would urge upon you the filing each year with Dun and Bradstreet of such a showing. It has become an up-to-date business custom. It gives you the commercial rating to which you are entitled and, unless your business is in a very poor condition, will work to your good, if only to relieve you of unnecessary correspondence. Before dropping this subject I wish to say that while we discount every purchase made, we are not too good or too large to each year give both the agencies our financial statements.

Another weakness we sometimes note, especially with merchants of limited capital, is the

TENDENCY TO SCATTER THEIR PURCHASES.

This, in my opinion, is not to your advantage, for the reason that no house places great value on a trade where it is receiving only a small part of it and possibly obliged to carry some of that. You can, in my opinion, obtain as good price results from two houses in a line as more, and if with your trade thus distributed at any time you need accommodation, your business being a liberal one and only a few interested, you will find no difficulty in obtaining what you require.

I believe that the gentlemen composing this organization are disposed to be broad gauged, fair minded and to concede the jobber his own; that it would be gratifying to you to relieve the wholesaler and manufacturer of any unnecessary burden, and that there is not one of you but would scorn to pay his just debts at less than 100 cents on the dollar, and in this connection I cannot resume my seat without calling attention to an expense item on our books, representing last year about $2,000, that is unbusinesslike and unjust. It is the exchange we are obliged to pay your bank for the pleasure of obtaining your money on your personal checks. It is the hold-up of the country bank on the city jobber and manufacturer, and I believe each year this practice costs these interests of the Twin Cities $100,000, if not much more, and we seem powerless to remedy it without your help; but if you desire to aid us you can very materially reduce this expense item, and I would suggest the remedy as follows: In paying for your purchases either obtain from your bank a draft covering the amount required, which, in my opinion, can be procured by you without one cent of cost, as your banker will treat you differently from what he will us, in whom he has no interest; or, if this cannot be done, you can open an account with any of our city banks and make your payments, drawing your personal checks on an account where the funds are passed at par; or you can draw your own personal check on your home bank, learning from your banker where he keeps his Twin City or Chicago account, and using a rubber stamp stating that this check will be paid without exchange through such and such a bank. This cannot but appeal to you as fair and right, and we believe that there are many gentlemen in this association that do not know that on every check they send in there is a slight discount deducted therefrom before we can obtain your money.

G. L. Nye, of Shakopee, Minn., delivered an address on the subject,

Evolution of the Stove Business.

BY G. L. NYE.

Evolution of the Stove business may include a history of the industry, its growth, and its constant westward trend since Stove making began in the United States. It is not my intention to go into that feature of the business to any extent. Evolution of selling methods and methods of distribution interest the retail Hardwareman more. In the memory of all of us we have seen many changes in this particular. Right now we are confronted with two important problems. What will be the effect of catalogue house competition on the retail Hardwareman's Stove business in the near future? Where is the jobber, with his peculiar methods of Stove selling, taking us?

I once thought the mail order business in Stoves would grow to menacing proportions. I have changed my mind on that score to a certain extent. I still think there will be some growth in that direction, but I believe it has its limitations.

TREMENDOUS EFFORTS ARE BEING MADE BY ADVERTISING AGENCIES

to get Stove manufacturers to embark in the mail order trade, and I assure you that it is not without some attractions. One of the advertisements from one of these agencies came to me a few days since, and while it was intended to stimulate the thought of mail order business, it had the contrary effect. It read:

"Tell your story where it will be heard. Don't try to sell mail order goods to people who get into a big city department store every day. Get out into the country; country people have plenty of time to read papers. Counrty folks have just as many wants as city folks. Everything they buy, except the bare necessities of life, must come by mail from some mail order house.

As I said, this advertisement had the opposite effect on me than the one intended. In the first place the country folks are not the large consumers of Stoves. I think you will all agree with me that your sales are larger in your towns than in the country; I mean in proportion to the population. So there is still a field for profitable Stove business.

The fact that the farmer is reading will add very materially to the downfall of the mail order Stove man. Neither does he buy all but the necessities of life by mail. You will continue to see him in your towns, as his social side must be develoepd, and when you see him talk to him, asking him if he liked his mail order Stove. He will eventually tell you the truth and come to see you the next time he wants a Stove.

Another fact we must keep in mind is that although the mail order man has been making a lot of noise he has not distributed anywhere near the percentage of the total output of Stoves that many people think he has. In fact, up to the present time but

A VERY SMALL PERCENTAGE HAS BEEN DISTRIBUTED BY THE MAIL ORDER METHOD.

This is the result after years of pounding by numerous mail order concerns, some of them ranking among the largest retail institutions of the country. It seems to me that the mail order Stove business has about reached its limit.

There is, however, what I consider a more dangerous factor recently come into the distribution of Stoves, and that is the Hardware jobber. This jobber reaches further than the mail order man. He goes to all the country stores, or so-called general stores, not only in small vilages, but to the crossroads, where there is nothing but one small store. So far as the Stove trade is concerned, I think

THIS COMPETITION FAR MORE DEMORALIZING

and a much greater profit destroyer than the mail order man.

If a customer comes to you and says he can buy a Stove for a certain price from a mail order house, you know just what argument to use with him, and just what you have to contend with; while, on the other hand, if he says that Jones at the crossroads 3 miles out will sell him a Stove for so much you do not know where you are at. You do know, however, that Jones will sell this Stove at a much less profit than you will or can, so you have to let him sell it and fatten the jobber. Jones doesn't need any fat, and wouldn't know what to do with it if he had it. This jobber is bending every effort to get an outlet for his goods by the above methods, and by doing all he can to encourage new stocks in the already overstocked towns. I have an advertisement, cut from one of the leading trade papers last summer, which will bear me out in this. In it a leading Hardware jobbing house gives a list of towns where it believes Hardware retailers can profitably locate. Of this list of about 30 towns 6 have 15 to 80 population, 15 have 100 to 300 population. All of these towns have from one to two Hardware stocks now. The balance of the list ranges from 300 to about 3000 population. From the testimony of mercantile reports these are already overstocked from a retail Hardware standpoint.

I think you can all see plainly that the jobber in the Stove business is more to be feared as a demoralizer than the mail order men. The jobber will continue to grow as the wants of the country grow, but your Stove business will not continue to grow in proportion, although the aggregate of the Stove business is larger every year. The evolution of the business is in the methods of distribution.

I do not see any reason why the West should not be producing a

Digitized by Google

large percentage of its own consumption of Stoves within comparatively few years. I believe the industry has a big future in the West. I believe that Western retailers and Western users of Stoves will have a preference for Western made Stoves. I hope that this big increase in output will be marketed through the Hardware stores and that influences which tend to cut up the stove business until it means very little to the Hardware retailer can be counteracted.

THURSDAY AFTERNOON SESSION

was opened with an address on the Twentieth Century Merchant, which was delivered by Platt W. Lyon. This was followed by remarks from several of the delegates present, and from R. A. Kirk, president of Farwell, Ozmun, Kirk & Co., St. Paul.

FRIDAY MORNING SESSION.

The first thing on the programme was an address by E. L. Garden, Souris, on

The Modern Tin Shop,

as follows:

The subject, "The Modern Tinshop," was chosen because having spent some years at the branch before going into the business myself, this is of all the branches of modern Hardware trade the one I felt I came the nearest knowing a little about.

My remarks will be directed to the dealers in our smaller towns, such as we have in the newer parts of our State. The larger cities, like Grand Fork, Fargo, etc., have a trade so wholly different from ours that a tinshop and a tinner that would be just right for these places would be a failure with us. Neither do I think for a moment that I could offer any suggestions to these men that would help them run their tinshop. I'm speaking to the merchants of the smaller towns, whose position is something like my own.

During the last decade or two every line of business has undergone great changes. Few, if any, line of industry has seen more radical changes than that of the sheet metal. I can remember as a boy watching the tinner forming with what seemed akin to magic the sheets of tin into the shining tinware. Now all that is changed.

MODERN MACHINERY DOES THESE THINGS SO MUCH BETTER AND CHEAPER

that we would not go to the old method if we could.

What then are we to do? Shall we close the tinshop entirely? or shall we adjust ourselves to changed conditions? I am aware of the *fact that many successful* Hardware dealers have no tinshop. Yet most of us have some kind of a shop, so that the question is not so much shall we have it as how shall we make it pay.

First of all, the tinner must be different from the one of twenty years ago. The old saying "that it is hard to teach an old dog new tricks" applies quite forcibly to the tinsmith of the old school. They sigh for the "good old days" when the tinner never dreamed of doing a piece of work other than that strictly in his line.

Those of us who read one of our trade journals a few years ago will remember what bitter discussion there arose in the tinshop department of that journal over a workman asking his brother tinners for information regarding the erection of windmills. Here was a man who found that his particular locality demanded that he know how to erect a *windmill and went to work to find out.*

The old school tinner hurled his abuse on the fellow who was simply following as closely as possible the demands of his particular trade.

IT IS A LONG WAY FROM THE BENCH TO THE WINDMILL,

it is true, yet most of us sell pumps, and it is only a short step from it to windmills. The ideal tinner for the shop of which I speak must then be a mechanic of broad experience. He need not necessarily be an adept in the use of the raising hammer and some other tools of obsolete sheet metallurgy, but there are numberless other lines that he can take up with profit to his employer which require no less skill. He must be able and willing to turn his hand to such work as bicycle repairing, pumps, the simple forms of plumbing and even windmills, if his trade demands it. The tinner who is not willing to adjust himself to these changed conditions will have to move or be a back number. Personally I find the pump and windmill line one of the most profitable I handle. However, up to the present time, I have had work enough for my tinner without his doing this.

Then there are many phases of the tinshop trade that wo do not push as we should. There is, for instance, that of hot air heating. This is

A LINE THAT SHOULD NET US A SUBSTANTIAL PROFIT.

It is one in which catalogue house competition does not cut a permanent figure. Therefore, if we do not make a profit it is because we cut each other's throats. So much depends on having this work properly done that the customer is willing to pay for that knowledge. In order to make a success of hot air heating it is absolutely necessary that you know how. Properly managed, I find it is a line that grows very nicely after being well started. One thoroughly satisfied customer sells several, while one dissatisfied can kill the business completely in that locality.

If you do furnace work be sure it is done right. I have seen plants installed by men

WHO DID NOT KNOW THE FIRST PRINCIPLE OF AIR CIRCULATION

and their work showed it. What is the result? Owner says, It does not heat, burns lots of coal but little or no heat to speak of except in some parts of the house. I once lived in a locality where several plants like this had been installed, and I found it was almost impossible to get a chance to talk hot air to the prospective builder. The moment you mentioned the subject he would say, "No; I will burn stoves rather than invest $175 or $200 for a rig like Neighbor Jones, and then not get any benefit." It was almost impossible to persuade those men that it was the fault of the installation and not the furnace itself.

In the tinshop as well as the rest of the store talk quality first, last and all the time. If you have to figure so low that you must sacrifice quality better let the other fellow get it; keep the standard of goods and workmanship so high that your firm name will be with the public a synonym of quality.

This was followed by an address by R. L. Scott, of Jamestown, on

Catalogue House Competition.

BY R. L. SCOTT.

In my judgment the catalogue houses have declared war on the legitimate retail dealers and are pouring shot and shell into us from every side. They have already sentinels stationed at every point where there is business. These sentinels and carriers are paid by Uncle Sam. The catalogues are their munitions of war and are at work seven days in the week, beginning Sunday morning and working continuously until the following Saturday night, every day and every night, 365 days in the year, year in and year out, while the retail merchant goes to his store at 8 o'clock, looks over his mail, and watches around to see how business is going and hears his clerks tell of a few sales they have lost from catalogue house competition. He goes to dinner at 12 o'clock, back at 1.30, goes to the bank and looks up a few delinquents, tells his clerks to keep their eyes on the gun and goes home at 5 or 6 o'clock, having worked about 8 hours, while our competitors, the catalogue houses, put in 16 or more, every minute of which is used in one direction, advertising good goods and cheap goods,

THE VERY THING TO INDUCE PEOPLE TO TRADE WITH THEM,

while the retail merchant gives about one-sixteenth of his time to trade getting.

I think we retail merchants should march out and line up as in battle. We should stand together as a unit. We should say to the jobber: "If you want our business stop furnishing ammunition to our enemies and supply us with such goods as we need to fight competition," pledging ourselves at the same time individually to the jobber that we will use such goods for that purpose only, and then advertise these goods along with other things, the same as the catalogue houses do. They offer a few items at cost and catch the trade. We should do the same, and as the catalogue competition gets stronger the closer we must deal. Stop saying yes to those that want credit and tell them why—that you can's meet catalogue house competition and sell on credit.

FIND OUT WHO AMONG YOUR CUSTOMERS BUY FROM CATALOGUE HOUSES, make a list of them, and you will be ready for them when they want credit.

Some of these people are buying from their home merchants on time and sending their money away. You can stop your part of that if you know who they are. Let them know that the fight is on and that you are in the battle to win. Meet any catalogue price (quality considered). I regard home competition one of the greatest drawbacks in contending with the catalogue competition. I am afraid to make a fight on catalogue houses for fear my home competitor will reduce the prices on Nails, an item we do not need to cut the prices on. If I say to a man, "I can't credit you, because you send your money away to catalogue houses," that man will go to my competitor and get credit. If my customer sends to a catalogue house and buys all his Builders' Hardware for a building and then comes to me for Nails I would like to charge him a profit, but my competitor sells him Nails at cost in order to get him for a customer. If every retailer would join his retail dealers' association and attend the annual meetings and get in line, read the Hardware journals, get in step and fire at every command, it would not take long to control the situation.

DO NOT TRY TO STOP THE CATALOGUE HOUSES.

If you are behind, catch up and get in the lead. If you are in the lead, work to stay there and keep there.

I sum it up like this: If the manufacturers think more of the catalogue houses than they do of the jobbers, let them sell the catalogue houses exclusively; the jobbers can attend to that. If the jobber thinks more of the catalogue house trade than he does of the retailer's, let him

SELL TO THE CATALOGUE HOUSE EXCLUSIVELY,

and let the retailer see to that. If the manufacturer wants to sell to us and sells cheaper than the jobber, then it is the duty of the jobber to cut prices to meet the manufacturer's prices, the same as we retailers have to cut prices to meet catalogue house competition. Make every jobber and manufacturer declare himself. Start at the head. Let the jobber see that the manufacturers confine their sales to the jobbing trade and let the retailers see that the jobbers confine their sales to legitimate Hardware dealers, and when this is done we retail dealers will understand better how to dodge the bullets. But when they are pouring hot lead into us from every side we do not know whether to stand or run; but when we know the source of the firing I think we can fortify ourselves and make a winning.

Every one knows that the fight is to be made by the retail dealers, and if the jobbers will furnish us the right kind of ammunition and we do not waste it for profit makers we will certainly win the battle. It takes united action to accomplish anything. The retail dealers, jobbers and manufacturers should handle this catalogue proposition through their respective associations, and in order to do that successfully every one in sympathy with us must enlist.

The address of Mr. Scott's was followed by M. G. Evenson, Cooperstown, who addressed the convention on

Wealth in Many.

BY M. G. EVENSON.

That which represents the mercantile or commercial system of our land was for years divided into three classes—first, the manufacturer; second, the jobber, and last, the retailer. That this system may still be maintained is our wish, as it represents the sole source of revenue and wealth of most of us. It surely would not be worth

Digitized by Google

our while to examine at great length the errors of this system, which has stood so long, and must continue in order to support the outlying country, that it may not cease to prosper as it has in the past. The industry and commerce of a great country have always been regulated by the departments of the Government.

THE HARDWARE BUSINESS OF TO-DAY MUST BE REGULATED

by a State Association, which is affiliated with a national association, whose duty it shall be to ask a liberal plan of justice upon our branch of mercantile life, and see that no extraordinary privileges are given that will be detrimental to the outlying country.

Experience teaches us that the new system of mercantile life, or, as now called, the catalogue house, is causing the means of support of the Hardware merchant to be cut down too much. The capital error of this new system lies in the special privileges given. The following observations may serve to show the impropriety of this new system as it is now carried on:

This new system is acknowledged to be the distributor of only a small portion of the goods used in the country, and that part so distributed is for cash in advance, and by means of a catalogue in which are quoted prices on standard goods, which the merchant in the country cannot duplicate with any profit to himself on a credit and cash basis. No doubt

THE MANUFACTURER APPRECIATES THE CASH BUSINESS

of the catalogue house, and, I believe without a thorough study of future results, has given special privileges which he should not have given.

Surely, if all cash goes to the city and all credit to the country, the country being the larger, the credit will soon become too great for them to bear, and the new system having no credit to offer, what can our country do, as credit we must have as well as cash, in order to enable the country to grow and prosper and increase the demand for the manufacturer's goods?

The country contributes to the annual profit of the manufacturer by the credit and cash system, which is much the larger and has the maintenance of the country at large during the greater part of the year. Unless the country merchant is given some hearing, so that the credit part of his mercantile life is regularly

CARED FOR BY A REASONABLE PROFIT, THE MERCHANT CANNOT PROSPER,

and unless he does prosper he must look to other sources to make a living. When he does, what will the manufacturer do with his goods that have always found an outlet through the cash and credit system of the jobber and merchant? Let our army of merchants desert the country, and that which has enabled our country to prosper is taken away, as the catalogue house cannot get in close enough touch to enable it to do a credit business.

The purchasing power of the country being much the larger, the manufacturer ought to look upon that outlet for his goods as a fund upon which he can draw, and if he injures that fund by giving special privileges on standard goods to catalogue houses, which enables them to get out of the place in which they belong—namely, third place—he surely is reducing the outlet for the largest part of his goods.

In the past most manufacturers seem not to have considered that the multitude of merchants, by the natural effort which every man has, are continually making a better outlet for their goods, and the special privilege will soon cause the efforts of the merchant to be put upon some line of goods that the catalogue house cannot print cut prices on and send broadcast. It seems therefore altogether improper to consider the catalogue houses anything other than they are—namely, retail merchants.

I have classed the jobber, merchant and retail catalogue house as a fund upon which the manufacturer draws. Now let me add one of the strongest maintenance fund producers, that branch known as the traveling salesman.

A traveling salesman has a greater value as an outlet than a catalogue sent through the mail. To say he has not would be to say that a deaf and dumb man could get as good results on the road as a live, up-to-date traveling salesman. The drummer, in mingling with his customers and buyers in general, keeps in close touch with them. Therefore it reasons out, to one who stops and considers, that

THROUGH THIS BEING IN MUTUAL TOUCH WITH THE TRADE,

better results can be obtained for a manufacturer's goods than special privileges given as to the catalogue house.

It is upon this reasoning that I say there is "wealth in many." What manufacturer would not rather have this army of salesmen covering the country to help him get his goods before the people than catalogue houses located in some city, with but reduced prices on well-known brands of goods, and their limited circulation of this silent salesman as their only means of securing for them the business of the outside world?

It can never be to the interest of the manufacturer to discourage in any respect the industry of the many. The greater the attention given the channel through which a manufacturer's goods flow, the greater will be his fund to draw upon. The establishment of perfect justice and of perfect equality is the very simple secret which most effectually secures the highest degree of prosperity to all. Therefore it is this building up policy we all want, that the country may grow and prosper. Let us then work intelligently and patiently, singly and jointly, that we may all agree and accomplish much.

FRIDAY AFTERNOON SESSION.

Upon the opening of the session, President H. F. Emery, Fargo, delivered his annual report, as follows:

Annual Report of the President.

By H. F. Emery.

One month of 1905 has passed and already we are familiar with the new year; 1904, with its hopes and fears, its opportunities and its results, has been laid away forever. We are living in a swift and changing age. Our nation is growing very fast in wealth, and the age seems to have been reached where Napoleon and George Washington both saw through their eye of faith the greatest nation on earth. As we note the great progress that is being made we, as Hardware merchants, ask, What has our association accomplished? and we answer, It has accomplished wonders.

Compare the business done by catalogue houses in 1896 with 1904, and we must admit they have not kept pace with the growth of the country. That the merchants are guarding closer every year from buying of those who by their actions are against us is evident from the way they are getting into line. Some complaints have been made, and justly too, where jobbers have been overanxious to sell goods and have sold general stores a complete stock of Hardware. Such cases are to be deplored, but we are glad to state they are the exception to the rule as but two such transactions were reported in 1904 for North Dakota.

A few cases have been reported where jobbers have stepped over and gone outside, but in most cases there is a good reason or a misguided traveling agent that accounts for the transaction.

The whole year's record points to the belief that the jobbers as a whole are anxious to keep their lines in the regular channel of trade. It is not my purpose to name any particular house, but there are some who have caused more complaint than others, which would lead us to believe that they did not have quite the same interest in us or that their system of doing business was more lax.

The report of the National Convention will be read at this session, and will show what they are doing for us. The past year's work of the National Association has demonstrated that it is through it that the great results are being brought forth, and it behooves us as dealers to be loyal to our association and to try our best to induce those who are not already members to become such.

In conclusion I would call your attention to Hardware mutual insurance companies. Through them has the door been opened whereby an entering wedge has been driven that will eventually reduce our rates in the West as they have been in the East, and I recommend to you the Minnesota company, which has reached that point in magnitude where there is no doubt of its ability to withstand the storms.

The address of the President was followed by the

Secretary's Report,

from C. N. Barnes, Grand Forks, substantially as follows:

In preparing my report to read to you each year I find that the matter available for me to make such a report from is so similar to that of the preceding years that it makes me feel that the essential feature to make it interesting is lacking. This report, which is the eighth that I have been privileged to submit to you, will be made as brief as possible, and will contain merely a rough sketch of the work taken up by me during the past year, with possibly a few suggestions of matters that it may be advisable to consider while we are together.

From my point of view the past year has been a particularly

SATISFACTORY ONE IN THE ADJUSTMENT OF GRIEVANCES,

Our membership having increased each year has necessarily brought us in touch with more people, and the result has been that we have had more grievances reported by members during the past year than in any preceding one, and in the large majority of cases they have been satisfactorily adjusted, and in most instances without any difficulty; but several cases have required various trips of your officers for consultation.

One of the essentials necessary for making any organization of business men a success is to have

ITS MEMBERSHIP AS LARGE AS POSSIBLE

and of good loyal dealers. This is the principle on which we have been working ever since our organization was perfected in September, 1897. Thinking that it might be of interest to you to know the character of our growth since that time, I submit the following comparative table, which will give you our membership, also the number of Hardware dealers engaged in business in the State on the different dates of our annual meetings:

Date.	Dealers in State.	Members in Association.
1898	184	86
1899	190	106
1900	194	112
1901	211	122
1902	228	135
1903	246	138
1904	262	151
1905	297	182

Mr. Barnes then presented another comparative list showing North Dakota divided into counties and the Hardware dealers located in these counties, with the membership in the association.

Continuing, he said: You will notice from this table that there are seven counties in the State without Hardware dealers, and that we have members in every county in the State where there are dealers with the exception of two. In these two counties there are but two dealers and in the other one. While our membership is small in numbers as compared with other Hardware associations in the more populated States, I believe we have much to be thankful for when we are able to show the membership we have in good standing out of the available dealers we have to draw from.

The correspondence feature of association work has generally been alluded to when submitting reports and in making mention of it in this one will say that the past year shows that particular feature of our work the largest of any in the history of our association. I will not attempt to submit any figures to you in connection with the mail matter handled, but to give you

Digitized by Google

A ROUGH IDEA OF ITS MAGNITUDE

will say that the money we have spent in postage considerably exceeds the $100 mark. I have felt that the free use of the mails was the best means available for us to keep in touch with our members and also for securing new members, so I have never hesitated in any instance to make all the use I could of this avenue.

It is quite probable there are some dealers in attendance at this meeting who can easily comprehend the volume of correspondence taken up through this office from the number of letters that have been addressed to them.

In all probability there is no one in attendance at this meeting who is not familiar with the good work that has been accomplished the past year by committees from the National associations of the jobbers and retailers of Hardware in causing the withdrawal of

MANY STANDARD LINES OF GOODS

from catalogue houses. This accomplishment alone is worth many times more to you than the dues in this association for ten years would amount to; and this would have been impossible if it had not been for the thorough organization of both the retailers and jobbers in their respective associations. While we are in session I believe it is our duty to prepare appropriate resolutions showing our appreciation of the good work done by these committees.

There is another duty we owe, and that is our loyalty to the manufacturers who are making this fight effective. We should familiarize ourselves with their goods and be particular to see that they are specified when buying, as there would be but little incentive on their part in continuing to aid us in the way they are if we did not reciprocate when an opportunity presents itself.

Of late there has been some legislative work suggested to me by our members that it may be well for us to consider while together and have referred to proper committees. One of our members thinks we should be privileged to file liens on Threshing Machinery for supplies furnished and another does not want the present mechanics' lien law changed, as is now being agitated. Another wants a law enacted preventing the sale of stocks of merchandise in bulk. To me

ONE OF THE WORST LAWS WE HAVE TO CONTEND WITH

is the present bankruptcy law and I believe it is not approved by the average merchant, and if such should be the sense of the meeting would it not be desirable to notify our representatives at Washington of our disapproval of this law by fitting resolutions and ask for at least a revision of it?

I am pleased to report that the mutual fire insurance that is being offered to us by our sister associations has been taken to very generally by our members, and a large portion of them are carrying some of the insurance with either the Minnesota or the National company, both of which, I believe, are considered equally reliable and offer the best of protection and at considerable less expense to the policy holder than the established Board rates of the old line companies.

During the past year several of our members have suffered fire losses where portions of their insurance were carried with the Minnesota company, and I believe in each instance the adjustment was made promptly and satisfactorily. I should like to see more of our members carry some of this insurance, and feel that those of you who are not carrying any of it, if you would only investigate, would not hesitate to at least divide up your insurance with the mutual companies.

The Committee of Resolutions then reported as follows:

Resolutions.

The following resolutions were adopted:

Resolved, That we, the members of the North Dakota Retail Hardware Association, do return thanks to the Author of our mercies and the Giver of all good for the privilege of meeting and greeting our friends here and for the prosperity that has attended our labors during the past year.

Resolved, That we extend to the Hardware trade papers and their representatives our appreciation of the very liberal and able manner in which they have always championed our cause and wish them to realize that we appreciate their efforts.

Resolved, That we express our appreciation of the very interesting and instructive address of Prof. H. A. Sheldon and heartily recommend his School of Scientific Salesmanship to all young business men: also of the addresses of the representatives of the jobbers of the Twin Cities and Duluth.

Resolved, That we again reaffirm our appreciation of the able and successful efforts of our respected secretary, who is untiring in his efforts to advance the interests of the association.

Resolved, That we extend to the wholesale and retail Implement and Hardware dealers of Fargo our sincere thanks for the royal entertainment given the Implement and Hardware men at Piries Hall on February 2.

Resolved, That it has given us great pleasure to welcome to our convention the editor of *The Iron Age*, the greatest Hardware journal in the world, R. R. Williams. We are proud of his presence at our meeting and bid him Godspeed in his great and glorious work.

Resolved, That we are, individually and as a State organization, opposed to any Parcels Post bill now before Congress, and particularly H. R. 17,116, introduced by Representative Cowherd, of Missouri. These bills are all detrimental to the interests of the retail merchants in all small towns of the United States. They also mean more expense to the United States Government Postal Service, which at present shows a deficit each year. Such bills mean, in plain words, that the Government is willing to aid the wealthy to gain more wealth, at the expense of the small retailer and the people. It is now becoming more a matter of thought of how best to develop small communities into prosperous towns, not how to concentrate more wealth into large towns. We therefore earnestly request that you use all your best efforts to prevent the passage of any such law. This resolution is to be sent to each Senator and Congressman of our State.

Resolved, That we request jobbers not to ship goods to consumers on our account, except with tags which show for whose account these goods are shipped, so as to prevent dealers believing that jobbers are unfair to our members.

Resolved, That the retail Hardware dealers, in convention assembled, favor the enactment of laws prohibiting the sale or transfer of stocks of goods or merchandise in bulk without first giving due notice to their creditors.

The Banquet.

A banquet was given on Thursday evening to about 500 delegates and visitors in attendance at the convention of the Hardware merchants and Implement dealers. It was tendered by the wholesale and retail Hardware and Implement dealers of Fargo and was an occasion which made an exceedingly pleasant impression as an evidence of hospitality and fraternity and on account of the high quality of the entertainment. After dinner, Hon. Joseph Hare acting as toastmaster, addresses were made by A. F. Sheldon, R. R. Williams, W. W. Collier, H. T. Helgeson and others, after which W. I. Nolan entertained the company most admirably.

The following officers were elected for the ensuing year:

Election of Officers.

PRESIDENT—H. F. Emery, Fargo.
FIRST VICE-PRESIDENT—Martin Jacobson, Minot.
SECOND VICE-PRESIDENT—H. H. Walther, Casselton.
THIRD VICE-PRESIDENT—O. I. Butler.
SECRETARY—C. N. Barnes, Grand Forks.
TREASURER—H. T. Helgesen, Milton.
EXECUTIVE COMMITTEE—W. R. McIntosh, E. E. Elliott and W. H. Pinkerton.

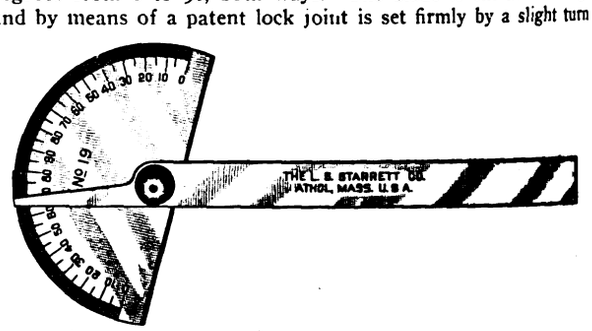
The delegates to the National Convention are as follows: H. F. Emery, C. N. Barnes and G. W. Wolbert.

A memorable courtesy was extended to R. R. Williams, Hardware editor of The Iron Age, in his election as a life member of the association.

National Association.

Mr. Pinkerton, of Lakota, read a communication from M. L. Corey, secretary of the National Association, in which a very concise report of the association's work, accomplished and contemplated, was given.

Tribute to Secretary Barnes.



A very pleasant feature of the gathering was the presentation to C. N. Barnes of an elegant gold watch chain and Masonic charm—the charm is in three sections and contains the emblems of the York and Scottish Rite bodies in Masonry—with the inscription on the inside, "North Dakota Hardware Association to C. N. Barnes, February 3, 1905." The presentation was happily made by a chosen committee, consisting of Messrs. Harrington, Jacobson and McIntosh, the latter acting as spokesman.

By a unanimous vote Grand Forks was chosen as the place for the convention to meet in 1906.

Convention adjourned.

STARRETT'S PROTRACTOR NO. 19.

L. S. Starrett & Co., Athol, Mass., are the manufacturers of the Protractor No. 19 which we illustrate It is graduated in degrees from 0 to 90, both ways. The blade is six inches long. and by means of a patent lock joint is set firmly by a slight turn

STARRETT'S PROTRACTOR NO. 19.

of the nut. The back of the tool is flat. This protractor is accurate, and is convenient for setting bevels, for transferring angles, as a small T square, or for a large number of other uses which will readily occur to a machinist or draughtsman, and will be found reliable, and very satisfactory by any mechanic, especially those who do not care to pay for a more expensive tool.

♣

THE AMBLER SAW MANUFACTURING CO., Natick, Mass., are the authors of an interesting pamphlet of envelope size on the cover of which is the invitation "Step right in." After "stepping in" one is made acquainted with "The Tale a Band Saw Told Me" (a really interesting and instructive little tale), and other matter. The "other matter" consists of descriptive matter, prices, etc., on Band Saws, band saw sets, brazing lamps and forge, etc. The above concern claim to be manufacturers of the finest blades in use, free from imperfections and always giving entire satisfaction if machine is in order. Also, tools and machines for band and circular saws in great variety. Send for their catalogue.

NEBRASKA RETAIL HARDWARE DEALERS' ASSOCIATION

The Fourth Annual Convention of the Nebraska Retail Hardware Dealers' Association took place at Omaha on February 7th and 8th, being held in the Convention Hall of the Millard Hotel.

TUESDAY MORNING SESSION.

Upon the meeting being called to order by President J. C. Cornell, of Ord, the following committees were appointed:

CONVENTION COMMITTEES.

NOMINATIONS—L. Pettengill, Omaha; E. S. Hayhurst, Loup City; C. K. Lawson, Hastings; C. H. Rudge, Lincoln; H. F. Moore, Alma.

FINANCE—Max Uhlig, Holdrege; V. Fried, Oakland; C. A. Newberry, Alliance.

PRESS—M. Hussle, Omaha; J. F. Goehner, Seward; Mr. Harrington, Pawnee City.

RESOLUTIONS—H. Hargierode, Holstein; Frank Haecker, Friend; O. L. Miller, Ravenna; Thomas Nelson, Diller.

INSURANCE—J. F. Goehner, Seward; L. F. Holloway, Fremont; H. J. Hall, Lincoln.

W. C. Kilen, Milford, was appointed sergeant-at-arms.

TUESDAY AFTERNOON SESSION.

The attendance at this session was very large, nearly 300 being present. After prayer by Rev. T. J. Mackay, an address of welcome was delivered by E. J. Vann on behalf of the Commercial Club, which was felicitously responded to by H. J. Hall. President Cornell then delivered his Annual Address.

MAX UHLIG, PRESIDENT.

J. C. CORNELL, EX-PRESIDENT.

President's Address.

BY J. C. CORNELL.

It affords me a great deal of pleasure to have the privilege of meeting again with you at this our fourth annual convention. As I look over this intelligent audience of representative Hardware dealers of Nebraka I see nearly all the familiar faces that met at Hastings about three years ago to start this association work on its upward and forward movement for the betterment of not only those who were present at that time, but for every dealer in the State who has been willing to lend his support to this great movement. Since that meeting we have been constantly growing, perhaps not as rapidly as we ought or as rapidly as some of us had anticipated. However, if we compare our membership at the present time with other States, our increase has been very flattering.

I will not attempt to discuss events of the past. Permit me to say to you that it is my opinion, and I think it is the opinion of every man present that had it not been for the combined efforts of every member of this association and the support that we have received from manufacturers and jobbers alike the Hardware business of Nebraska would not be on as high a basis as it is at the present time. It is true that there is altogether too much jealousy existing among our business men in some sections to make a success of anything. Rubbing up against each other once a year at our convention, however, gets us better acquainted. We find that the other fellow is not half as bad as we had thought him, and he thinks the same about us. Under these conditions and relations it is possible for us to accomplish a great deal from a commercial standpoint.

WHAT BENEFITS HAVE WE AS MEMBERS RECEIVED?

In the past year we have addressed over 1,000 personal letters to dealers, requesting them to join the association or to be present at this meeting. Many merchants who are a little reluctant in affiliating with us have responded by asking this question: "What has been accomplished by your association and what have you done in the past year?" We answer the first question by asking: "How many Hardware dealers in the United States are there who have not been benefited by association work?" Not a single one. It makes no difference if he be a member of the association or not, he has received some benefit, perhaps not as much as a member, but I know and he knows and every member of this association is aware of the fact that the dealer outside has received all his benefits at the expense of the association. What benefits have we as members received? We can refer you to plenty of them. How many years has it been since you received an invoice from your jobber or manufacturer stamped across the face with this motto: "We do not sell catalogue houses?" How long has it been, and who is responsible for the manufacturers and jobbers of the United States coming out on the side of the retail dealers in their fight against the inroads of the catalogue houses upon their trade? This you can charge up to the persevering and never tiring efforts of a few men at the head of our National Association. Among these are the president of our National Association, Mr. Bogardus, and also one whom you are all acquainted with and whom we are always glad to welcome among us, Mr. Corey, our National secretary. These gentlemen, with the assistance of other members of the National Association, are responsible alone for this great change. If you wish to know how successful they have been get a copy of the *National Hardware Bulletin*, turn to page 32, and read under the heading, "How They Stand." There you will discover that nearly every jobber and manufacturer is on record stating that under no consideration will he sell a catalogue house or a department store. This protection alone is worth enough to every Hardware merchant in the State of Nebraska to convince him that our association is what he wants and what he must have to complete the work that has been carried on so vigorously for his benefit.

RELATION OF JOBBER AND THE RETAILER.

I wish to say a word in regard to the relation between the jobber and the retailer. The jobber is the very best friend you have. How many retail dealers would there be doing business to-day in our State were it not for the friendly advice and timely assistance that they have received from this benefactor? We could not dispense with him any more than he could with us. His interests are our interests, and our success means as much to him as it does to ourselves. To bear me out in this statement and to show you the position and interest that the jobbers of Nebraska have taken in our association work, I will read a part of a letter from one of the leading jobbers of the State, to whom we are indebted for a complete list of legitimate Hardware dealers doing business throughout Nebraska, Mr. Glass, of the Lee-Glass-Andreesen Hardware Co. He writes as follows: "We cannot help but feel sure that the efforts put forth by the officers and members of your association will be rewarded in making the coming meeting at Omaha a successful one. I have had our salesmen talking this meeting and association to dealers throughout the State, urging them to be present. I desire to assure you that it gives me great pleasure to give you any assist-

Digitized by Google

ance I possibly can in helping in the upbuilding of your association. Your success is our success, and I look forward with pleasure to your coming meeting in our city."

DON'T OVERLOOK THE TRAVELING SALESMEN.

This is but a sample of the letters we have received from jobbers throughout the State. There is one person next to the jobber that the retailer must not overlook, and that is his representative, the traveling salesman. Meet him at your door as you would a customer; give him a good, warm grip of the hand and a hearty welcome, for he as a rule is the bright ray of light that shines in once a month at our open door. Remember that he always has something for you. If it is not a proposition whereby you can make a nice thing, he always has a good stock of stories to liven you up, helping you to forget for a time your trials and tribulations.

TRADE JOURNAL INFLUENCE.

We cannot say enough in praise of the good work that is constantly carried on by our trade journals. They are fighting every move that is not beneficial. They stand for the interest of the retailer. These journals are full of good reading directly in connection with your line of business, standing up for home industry and the promotion of everything that is a benefit and a help to the retail merchant.

In conclusion, I wish to thank the officers and all the members of the association, especially Mr. Hall, our secretary, for the able assistance during the past year. I assure you of my assistance until we have completely done away with local jealousies and cut-throat competition among the retail Hardware dealers of Nebraska, and until all are working harmoniously together to exterminate evils now existing.

Then followed the secretary's report by H. J. Hall, Lincoln.

Secretary's Report.

BY H. J. HALL.

Your secretary is compelled to cut this annual report short owing to the fire which visited Lincoln on the night of January 24. All the books, papers and desks in the office were destroyed, and from memory only can this report be made.

In numbers we are stronger than last year: in interest shown among members we are sure of the future growth of our State Association. The county organization work proved effective, but lack of funds and a special delegate to look after this work impaired the final success of the plan we had outlined and were following.

Having suggested the advisability of arranging for a secretary who would devote all of his time to the association work, it is necessary for the future success of this work that the matter be decided at this time for the purpose of securing the best results.

MUTUAL INSURANCE.

The plan of effecting a mutual fire insurance company for and by the association at our last annual meeting was carried forward and the preliminary work accomplished. All of the members who signed the petition, however, failed to send in their applications, which caused your Board of Directors to forward all policies offered to other affiliated State associations under the agreement that all policies, with accrued per cent of premiums, be returned to this association, this to act as a reserve fund. It has been suggested that a number of the members of the association advance $200 each to the fire association, same to draw 6 per cent interest from date, and to be used by the treasurer as a reserve fund, from which all losses exceeding premiums may be paid, the loan to be paid when the reserve fund justifies such action. The success of other State associations makes the insurance feature an interesting business proposition, and it should receive careful consideration.

PARCELS POST.

The Parcels Post matter must be recognized by the retail merchant throughout the country as a danger needing constant care and prompt, aggressive action, as it is liable to be thrust upon us when we are not prepared to prevent the measure from becoming a law. Our national officers have been watchful of our interests, and the national secretary will give us his personal statement of results accomplished during the past year.

CATALOGUE HOUSE COMPETITION.

The wholesale and manufacturing establishments are conscious of the danger to their business through the breaking down of the retailers by reason of the octopus in the form of catalogue houses, which are reaching out to strangle the retailers. The jobbers have not only given of their time, talents and means to assist us in the efforts we have made through our State associations, but have also used their influence with many of the manufacturers, with the result of curtailing the encroachments of our common enemy. The consumer, with his eye on the nickel and his mind on the present, does not realize the ultimate ruin of his home estate in the upbuilding of the retail establishments of the larger cities, and it is not to be wondered at when we find so many retail dealers who are skeptical as to the results to be gained through association work. These people must be enlightened, and this is a part of the work of every member.

H. J. Hall then delivered the following report as treasurer:

Treasurer's Report.

Balance on hand Feb. 10th, 1904	$4.78
Receipts for the year 1904	752.15
Total	$756.93
Disbursements	745.67
Balance on hand Feb. 7th, 1905	$11.26

There is also one hundred dollars due us from the programme, with no bills unpaid. This is the best financial showing the association has made since organizing.

J. D. Kenyon, Chicago, representing the Sheldon School of Scientific Salesmanship, delivered an interesting address forwarding the views of the school and its work.

M. A. Hargleroad, of Holstein, then read a paper on

Meeting Catalogue House Competition,

from which we make the following extracts:

THE GREATEST QUESTION BEFORE THE RETAIL TRADE.

In addressing you upon this important question—meeting catalogue house competition—I do so, believing it to be the greatest question before us. This question not only interests the retail Hardware dealers of Nebraska, but interests every dealer in our land. It is a question in which I hope every dealer here present will take a part.

While there has been a great deal said already, I think the largest part is yet untold. As retail dealers we find ourselves hampered by two kinds of catalogue competition.

JOBBER SHOULD CO-OPERATE.

First, is the catalogue house known as retailers, who send their catalogues broadcast just for the asking? This class of competition can be met only by the aid of the jobber, and, I am sorry to say, but few have come to our assistance yet. The retail dealer is willing, and I believe will be glad to do the business for a small compensation if the jobber would but meet the catalogue price on such lines as are fully identified. The only hope in the past, and for the future, as well, to avoid this competition, is the special brands of jobbers and factories who do not permit their brands to be handled by illegitimate competition. This field has not been fully covered yet and we must handle some lines handled by this competition. There are a great many low-grade goods handled by the catalogue house that are not furnished by the regular trade, and a great many dealers know but little of them. These goods had ought to be handled by the regular Hardware jobber; it supplies the retail dealer with unquestionable proof of like quality. There are but few sold, the effect cannot be denied.

* * * *

CASES WHERE DEALERS LOSE MONEY.

We might ask, where did the catalogue house come from? I am not finding fault with the jobber, it is his method of doing business. I believe he wants to be our friend if he only knew how. And if he will make us the price and furnish us the goods, I, for one, will be willing to give him the middle of the road.

We often hear of cases where dealers secure orders by meeting catalogue competition and lose money by so doing. How many such deals will it take to finish a common every-day Hardware man? If there is anything I dislike, it is to have a customer tell me he can buy goods cheaper than I can. I have done a great deal of advertising along this line of meeting catalogue competition in the way of catalogues and circulars.

TAKES NO BACK SEAT.

I have always given the trade to understand that I take no back seat for any competition. I have gone so far as to advertise that I make prices in my line on every market in the United States, in all cases will save the remittance, in some cases part of the freight, in others all the freight, money to accompany the order. Money to accompany the order should never be left out. By this advertising I have secured the business of some of the best catalogue customers; but am sorry to say, that in almost every case I lost money, except where I could coax a jobber to credit me back. A few jobbers will do this now; many will not. And if you make a fuss about it they will tell you this is the retailer's fight.

MIGHT COMPROMISE.

We might compromise with the catalogue house by giving them our business. Some dealers do. But is not this a deplorable condition, playing traitor, going into the enemy's camp? I hope no dealer will be guilty of this again.

* * * *

JOBBER HERE, RETAILER THERE.

Second, we have the catalogue house jobber. I believe under the heading of my address I will be permitted to speak of this class of catalogue competition also. These people parade in our locality as jobbers, that is, if the dealer in that locality buys of them. In other localities where the dealer does not buy of them, they are retailers, that is, they sell goods to the consumer at jobbing prices. This, I consider the most low, degrading competition with which we have to contend. This has been practiced in my territory for years. Where one house is satisfied, another is not, so there always seems to be one left to sell to the consumer.

The matter was also touched upon by a number of delegates. W. S. Wright, of Wright & Wilhelmy, dwelt at length upon the work of the Joint Committee, and his detailed statement of what had been done was listened to attentively, the Omaha jobbers refusing utterly to sell to catalogue houses.

Remarks were also made by F. E. Muzzy, of the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., in which a discussion of the catalogue house business from the standpoint of a manufacturer, explaining the course of his company in marketing its line of goods. His remarks were listened to with more than the usual interest.

An interesting address was delivered by M. L. Corey, the secretary of the National Retail Hardware Dealers' Association, and a member of the Joint Committee, relating how that committee has accomplished their work by which 500 manufacturers had put themselves on record as being opposed to the sale of goods to such houses, while, when unable to do that, they were successful in having the goods quoted at prices which permitted a reasonable profit to the retailer.

WEDNESDAY MORNING SESSION.

President J. C. Cornell, of Ord, called the meeting to order, after which W. S. Wright, of the Wright & Wilhelmy Co., Omaha, addressed the convention on

Digitized by Google

The Relation of Jobbers and Traveling Men to the Retail Dealers' Association.

from which the following extracts are made:

* * * *

The jobber, retailer and traveler are mutually independent and their relations can be likened to ball bearings which work together in the same groove. In mutual organization there is mutual strength. To be felt an organization must be close and effective. A small stick is easily broken, a bundle of twelve is hard to break, and three bundles of twelve take an ax to break. I would like to see this organization welded together so it would take an ax to break it.

In regard to the traveling men, would say, as it is of mutual benefit and advantage to the retail dealer, if he listens to what he has to say regarding the best method of distribution, meeting catalogue house competition, increasing business and making more money. Every traveling man is interested in retail Hardware associations. The jobbers and retailers are all deeply interested in the question of catalogue house competition, as is shown by the meetings of the recent Catalogue House Joint Committee. They were in session for a considerable time and met many manufacturers, nearly all of whom fell in line. All manufacturers appearing before them agreed that they would not sell to a new catalogue house if one started up. Omaha is a pioneer in the elimination of catalogue business. Five or six tried to start here and only one made any kind of a start. If every other market was as firm as Omaha, the catalogue house business would not be what it is to-day. It is absolutely necessary for the retailer and jobber to hang together or hang separately. It is a long, hard road that leads to success, but we are on the way. You gentlemen came here at more or less inconvenience to look after the interests of the trade, but there are some men who will work harder to make a competitor lose a dollar than to make one themselves. You should get the friendly co-operation of your competitors. The interests of jobbers and retailers are identical. The success of one is the success of the other. The failure of one is the failure of the other. If they work together, in less than two years' time the Hardware business will be more profitable and satisfactory than ever before.

The address of Mr. Wright was the cause of considerable discussion, participated in by the delegates.

F. D. Kees, Beatrice, Neb., then read an admirable address on the subject,

How to Graduate from a Retailer to a Manufacturer.

BY F. D. KEES.

The subject assigned to me makes it necessary for me to draw very largely from my own experience. When I was 14 years of age, as is customary in Germany, I was apprenticed to a locksmith. I worked for him for three years without wages, besides paying him a bonus for the privilege of doing so. No one had heard of the eight-hour day then—we worked from 6 in the morning until 8 at night. I engaged very actively in the manufacture of Nails, working the bellows while scrap iron was worked up into nail rods and these into Wrought Nails. All this work was, of course, done by hand and the Nails were worth somewhat more than they are to-day. The tools also were primitive. I remember that we sharpened our tools on a block of stone lying in water. I continued this work after I became a journeyman, but then I received wages amounting to the magnificent sum of 15 cents per week.

In 1869 I emigrated to this country and found work in Newark, N. J., as tool maker and later as steel engraver. I spent the summer of '73 visiting a brother where Filley, Neb., now is, returning to my work in the fall. Then came the historic Black Friday and I was out of work. After a few weeks of idleness I went to Reading, Pa., where I found employment in a small railing shop at $9 per week. As a Christmas present I received my discharge. I soon picked up a little work from carpenters and others making steel stamps for making tools.

While working one day in my room my landlord came in quietly without knocking. I suppose that the old gentleman thought that I was helping Uncle Sam to increase the circulating medium, which was very scarce at that time. He informed me that the Reading Hardware Co. was advertising for a tool maker. We went to the works and I went to work, but a strike of the molders soon tied up the whole plant. Lying around and doing nothing didn't suit me, so I packed my trunk and struck out for myself making stamps. This brought me from $5 to $10 per day. What could be done in Reading could be done elsewhere I reasoned, and the farther West I went the better the field. I had about $150 and felt that the world was mine.

I reached Nebraska City in August, 1874. The first venture as a manufacturer had proved a failure. I stayed with a brother for about two months, making a set of stencil dies for myself and making stencil plates. In the latter part of Octobor I went to Lincoln and secured work in a gun shop. After a very short time I quit, and November 14, 1874, found me in Beatrice intending to spend the winter with my brother on the homestead, but an opportunity came to establish myself in business. I had a chance to invest my capital, consisting of a pair of good arms and willing hands, $6.50 in cash and some credit, in a gun shop, which I, with the help of a brother, bought for $20. You see I was getting fairly started and was about as well fixed as the rest of the old settlers.

Business was pretty dull; the drought and grasshoppers had cleaned out the country. During the winter I changed about one-half dozen old army Guns into Needle Guns. When the spring immigration to the Black Hill gold fields came business boomed. One day I sold my whole stock of Needle Guns to an outfit for $50 or $60. This was more than I had seen for a long time, and it put me on my feet and set me up in business. For the next six years I was strictly in clover, repairing Firearms, Sewing Machines, Mowers, Printing Presses and Wind Mills, charging 50 cents an hour by the clock. An old friend used to say that this clock ran 24 hours while most clocks were going 10.

STARTING THE HARDWARE BUSINESS.

In 1880 I started in the Hardware business, but still carried on the Gun shop. That year I commenced the manufacture of Flower Stands and Window Brackets. Later I bought an interest in a calf weaner patent, which, however, was not a success. I hardly think I got my money out of it. In the fall of 1892 the Lilly Corn Husker was added to the line. You are all familiar with the success of this Husker. It was a hard pull to educate the great American farmer, but it was a steady, determined pull to make it win; and while I was not able to reap the full reward of the invention I have no fault to find and am perfectly willing to go through the same experience again. Four years ago the Cossett Suspension Hinges and the next year the Storm Window Screen Fasteners were perfected and put on the market. This gave me both spring and fall business and kept the little factory busy. The product finds its way to every part of the country. The gunsmith's shop has now grown into a well-known factory—a slow process, but nevertheless quite satisfactory to me. It has kept me busy to look after both my retail Hardware and my manufacturing business, and this has kept me from getting into mischief. I have had my ups and also my downs, but my practical knowledge has pulled me out every time.

F. D. KEES.

From the account of my own experience you will see that I have always been a manufacturer, to a greater or less extent. But I am reminded that my subject is not how I graduated from a retailer to a manufacturer, but how to graduate. What I have already said would indicate that the retailer who wishes to make this change must prepare for it far in advance. He must use great care in selecting his parents and the place of his birth in order to be better fitted by heredity and surroundings to conduct the business in which he later expects to engage. If he then follows his natural inclinations and learns some mechanical trade he is almost certain to become a manufacturer sooner or later.

Speaking seriously, nothing is more natural than that

CERTAIN HARDWARE DEALERS SHOULD BECOME MANUFACTURERS.

Many of them were practical tinners, gunsmiths and blacksmiths before they began to sell Nails and Stoves. The Hardware store is the best place on earth to learn what the people need or think they need. The average customer, moreover, feels free at all times to tell the dealer what is wrong with the goods offered for sale. If the dealer has, with proper foresight, equipped himself for his graduation, he will be called upon from time to time to make articles which cannot be purchased. These suggestions will set him to thinking; the result is an invention which is given a trial by the dealer's customers. If they pronounce it a success a patent is secured, some illustrations printed, and the manufacturer packs his model and testimonial letters and takes a trip to visit the wholesalers.

Being a good customer of the house he is now trying to interest, he is received and listened to with more consideration than the ordinary inventor. Nevertheless he is probably advised to work up a demand for his product. This means a campaign of advertising, letter writing and unprofitable traveling. If the article has merit a demand will gradually grow up. The next time the wholesaler is visited he will place an order. The graduation is complete.

This business is particularly pleasant for two reasons—first, because the territory in which the business is done is so large that it is not affected by local crop conditions; second, because most of the business is done with business men, most of these being Hardware dealers, who are always ready and willing to help a brother Hardware dealer introduce some new article if it is something for which they have been looking or if it supplies a want. Personally I am

Digitized by Google

indebted to you all for the hearty support and courteous treatment I have received as a manufacturer.

WEDNESDAY AFTERNOON SESSION.

The first interesting item of the programme was an address by M. L. Corey, Argus, Ind., who explained in detail the amount of work done combating various trade evils.

The next place of meeting was decided upon as being Lincoln.

The Committee on Resolutions made their report, in which they returned thanks to everybody for the assistance they had given to make the meeting a success.

The Nominating Committee then made their report as follows:

OFFICERS FOR 1905.

PRESIDENT—Max Uhlig, Holdrege.

FIRST VICE-PRESIDENT—Albert Degner, Norfolk.

SECOND VICE-PRESIDENT—Frank Haecker, Friend.

THIRD VICE-PRESIDENT—M. A. Hargelrode, Holstein.

TREASURER—H. J. Hall, Lincoln.

SECRETARY—J. Frank Barr, Lincoln.

EXECUTIVE COMMITTEE—N. Roberts, Omaha; C. A. Newberry, Alliance; Alex. Meyer, Falls City.

DELEGATES TO NATIONAL CONVENTION—J. Cass Cornell, Ord; H. J. Hall, Lincoln. ALTERNATES—Morris Hussie, Omaha; John McGrath, Hastings; Frank Haecker, Friend.

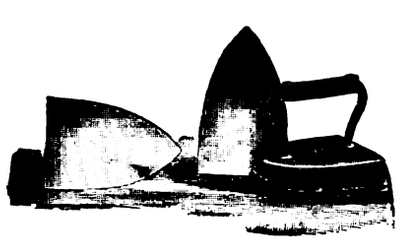
F. E. Muzzy, of the J. Stevens Arms and Tool Co., then made a few remarks, in part as follows:

"You are our distributors, and we prosper as you prosper. The Hardware dealers rank high in the commercial world, and are among the shrewdest of buyers. They were the first to organize and to-day they have the best series of State associations and the best national association of any trade. And the work of the two closely fits together.

"If grievances are presented by associations as strong as yours they naturally receive serious consideration. Every Hardware man in the United States should join the State associations. The Hardware associations are still young, but they have done more to check inroads of catalogue house competition than all other lines of trade put together. The catalogue house is here to stay, and they will have no difficulty in securing Hardware which is marketed by from three to four hundred jobbers."

Mr. Muzzy then went into detail, explaining the experience of his house in fighting the catalogue houses on behalf of the retail trade. One disagreeable feature of this fight which he had had with these houses was that he had found that some jobbers, even some members of the National Hardware Association, were eager to sell these houses.

One day the president of a catalogue house said to him, "You have spent more money in keeping your goods from us than any one else we know of."



Owing to the stubborn fight made by this firm, retailers are now able to meet the price and make a profit. He said: "Our firearms are the most profitable dealers can handle, and we propose to protect you."

At the conclusion of Mr. Muzzy's remarks a vote of thanks was voted to Mr. Muzzy and also to the J. Stevens Arms and Tool Co. for sending him out. Mr. Muzzy was also invited to attend the meeting of the convention in Lincoln in 1906.

The convention adjourned.

BLACKLOCK FOUNDRY SAD IRONS.

The Blacklock Foundry, South Pittsburgh, Tenn., is noted for the production of Stove Hollow Ware, Sugar Kettles, English Pots, Grates, Etc., but especially for the finest assortment of Sad Irons that is known to the trade. Their common sad irons,

BLACKLOCK SAD IRONS.

which they produce to fill all requirements, from one pound in weight to twenty pounds; can be finished in black, bronze, aluminum or full nickel, or in any style demanded by local trade. They make a Sleeve or Flouncing Iron that meets the approval of the trade, the blunt nose being so shaped as to ensure perfection of work, especially on children's garments, that commend it to every household. They are made in two sizes 3 and 4 pounds each, the bodies being coated with heat proof aluminum, with the face, toe and heel highly polished or nickel plated. Then their lines of pressing or Tailors' Irons made in sizes of fourteen to twenty-six pounds, which in these days of pressing clubs, no Hardware merchant can afford not having in stock. Send for one of their latest catalogues and have your stock up-to-date.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C, and St. Paul Building, New York City.

PATENTS EXPIRED FEBRUARY 7, 1905.

377,478. METALLIC MAT OR FLOOR COVERING. W. O. Bement, Worcester, Mass.
377,474. WINDOW GLASS SETTING. J. V. Auth, Pittsburgh, Pa.
377,514. COFFEE POT. H. B. Cornish, Blue Earth City, Minn.
377,522. SASH FASTENER. J. B. Kester, Clarksburg, Va.
377,528. SAW FILE ADJUSTING WEIGHT. W. Moore, Mooney, Ind.
377,545. CLOTHES WRINGER. W. M. Brinkerhoff, Auburn, N. Y.
377,562. LAWN MOWER. E. Kelley, St. Louis, Mo.
377,565. NAIL EXTRACTOR. G. W. Lane, Bristol, Conn.
377,616. STEP LADDER. J. Hill, Wilkes Barre, Pa.
377,637. POCKET SCISSORS. A. Pauls, Brooklyn, N. Y.
377,645. BENCH PLANE. J. H. Shaw, New Haven, Conn.
377,704. SKATE. J. A. Whelpley, Keene, N. H.

PATENTS ISSUED FEBRUARY 7, 1905.

781,655. PAWL FOR SHADE ROLLERS. W. D. Janes, Saginaw, Mich.
781,710. SLIDING DOOR SHEAVE. E. E. Bright, Morris, Ill.
781,743. DOOR FASTENER. M. O. Royce, Somerville, Mass.
781,744. FIRE EXTINGUISHER. E. Schaefer, St. Louis, Mo.
781,771. PLANE. W. H. Gardiner, Jr., Park City, Utah.
781,772. SNOW SHOVEL. J. Clifford, Watertown, N. Y.
781,776. FISHING REEL. A. E. Leaver and W. H. Leaver, Chicago, Ill.
781,794. ARTIFICIAL BAIT. C. H. Smith, Lagrange, Ind.
781,814. DUST BEATER. C. V. D'Ossone, Philadelphia, Pa.
781,917. EGG BEATER OR CREAM WHIPPER. H. A. Smith, Dillsburg, Pa.
781,985. VEGETABLE CUTTER. C. Amon, Cleveland, Ohio.

PATENTS EXPIRED FEBRUARY 14, 1905.

377,733. COMPINED LATCH AND LOCK. J. Adams, Clay Center, Kans.
377,755. WRENCH. F. S. Hazleton and C. Leach, Norton, Kan.
377,759. CUTTING NIPPERS. R. H. Johnson, Chattanooga, Tenn.
377,783. ROTARY TOOL DRIVER. G. F. Shaver, New York, N. Y.
377,790. CORK EXTRACTOR E. Walker, Erie, Pa.
377,815. KNOB LOCK. L. A. Selleck and G. J. Keenan, Brooklyn, Mich.
377,838. WEATHER STRIP. L. M. Pratt, Belleville, Kan.
377,847. CARPET STRETCHER. J. Carter, Emporia, Kan.
377,852. DOOR CHECK. S. H. Giesy, Washington, D. C.
377,910. GATE HINGE. J. B. Pugh, Indianapolis, Ind.
377,926. ATTACHABLE AND DETACHABLE BACK FOR RAZOR BLADES. A. V. Brokhahne, New York, and C. Langbein, Brooklyn, N. Y.
377,955. COMBINED MOP AND BRUSH. A. W. O'Blenus, River Edge, N. J.
377,927. DOOR SECURER. S. R. Campbell, Buffalo, N. Y.

PATENTS ISSUED FEBRUARY 14, 1905.

782,327. SEPARABLE HINGE FOR STORM WINDOWS. J. Diehl, Sheboygan, Wis.
782,374. HINGE BRACKET. E. R. Argenbright, Staunton, Va.
782,396. SAW. J. L. Hiers, Atlanta, Ga.
782,501. SAD IRON. J. M. Harper, Chicago, Ill.
782,491. DOOR HANGER. F. B. Cook, Chicago, Ill.
782,572. WRENCH. W. H. Leister, Kittanning, Pa.
782,625. DECOY DUCK. J. H. Rimpler and S. C. Self, Goshen, Ind.
782,648. FAUCET. F. Gaensslen, Gmund, Germany.

BISSELL CARPET SWEEPER CO.'S LETTERS TO THE TRADE.

During the coming year the many customers of the Bissell Carpet Sweeper Company scattered throughout the world will receive a monthly letter that they claim will be of intense interest to their readers. They have issued thus far two letters this year: one in January and one in February, both containing topics of interest to dealers in carpet sweepers. Should any of these series of letters go astray, the Bissell Carpet Sweeper Company would be very glad to furnish copies of same from either their Grand Rapids or New York offices.

"Women accept the confusion of stalwart manhood as the profoundest tribute to their own power."

RECENT TRADE PUBLICATIONS.

ATLAS BOLT & SCREW CO., Cleveland, Ohio, are distributing a new pamphlet catalogue in which is given list prices of their products. The book is neat and well gotten up, having a marginal index greatly facilitating the finding of any desired line of goods. Their products consist of stove, tire, carriage and machine bolts, machine screws, rivets and pins, special bolts and screws, cold compressed hexagon, square, chamfered, trimmed and plain nuts. They state that all of their output is of the best that workmanship and material can produce; prices always the lowest consistent with this standard of quality. Their packages are secure and neatly labeled, and they state, no goods leave their factory unless in first class condition. The company solicit samples or sketch of any special style desired for quotation. Send for one of their catalogues.

THE NEW DEPARTURE MANUFACTURING CO., Bristol, Conn., John H. Graham & Co., Selling Agents, 113 Chambers Street, New York City, have recently issued a new catalogue of Bicycle Sundries for the season of 1905. The book has an attractive cover, and is excellent in all respects. The above concern claim to be the largest and most completely equipped plant of its kind in the world. They manufacture the New Departure Bicycle bells, door bells, car and fire bells, tea and office bells, cyclometers, coaster brakes for bicycles and tandems and motor cycles, plain front and rear wheel hubs, and a general line of cycle sundries. Electrotypes, as per cuts in their catalogue, and printed matter bearing your name and address will be furnished upon demand. Additional information to that found in the catalogue regarding their coaster brakes, new line of hubs and cycle sundries can be found in special literature, which together with their catalogue, they will be glad to send upon request.

WARREN AXE & TOOL CO., Warren, Pa., are the authors of a very fine pamphlet catalogue of sixty-four pages, exploiting their line of axes and lumberman's tools, etc., the first page of which presents a very good view of the site of their factory. In presenting this catalogue, they call attention to the fact that they are the sole owners of the Sager Patent Chemical process for treating metals, with which the highest grade of silver steel is used exclusively in their highest grade products. They state that this grade is purchased by many of the most particular jobbers in the United States in solid car lots, which should be a sufficient guarantee as to the merit of their product. The capacity of their plant is 1500 axes daily, which insures prompt delivery. Write to-day for catalogue.

THE BALDWIN REFRIGERATOR CO., Burlington, Vt., have issued a four page folder exploiting their new Burlington Refrigerator, which they line with Silvery Nicolene, a bright metal that, they claim, will not tarnish or corrode. They attach a sample of the Nicolene to their folder and it certainly seems to hold up the reputation the manufacturers claim for it that it will not crack or peel off. All the cleaning that is necessary is to rub the surface periodically with a soft damp cloth, then with a dry one which will insure you a refrigerator with an interior as bright as a mirror. Send for above folder and learn more about the new Burlington Refrigerator and its Nicolene lining.

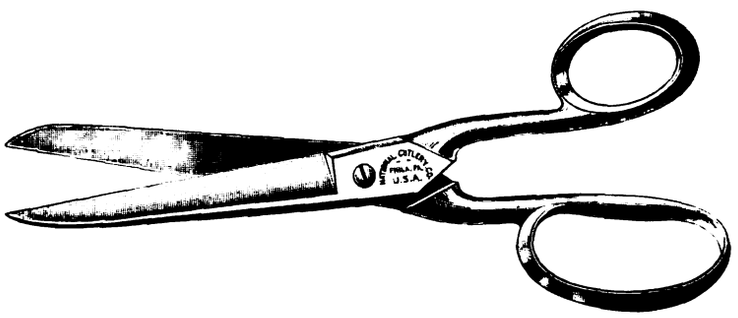
THE CLEVELAND LOCK CO., Cleveland, Ohio, manufacturers of hasp locks, corn huskers, spring hinges, strap and T hinges, square auger bits, miners' candlesticks, lawn sprinklers, wire scoops, safe edge forks, and steel shelf brackets, are presenting to the trade their price list No. 14, and request that all previous lists be destroyed. A specialty made by this company is the Hercules steel shelf bracket which is made of one piece of highest quality steel; strong and stiff, being so constructed as to give greatest strength, and still be very light in weight, thus saving in freight. They are double at shelf end where the most strain comes, and have a positive riveted brace, no clips or nibs. They are finely japanned and packed neatly in telescope boxes. For further information, send for catalogue.

THE BERGER MANUFACTURING CO., Canton, Ohio, are placing in the hands of the trade an attractive catalogue, exploiting their metal furniture and equipment. The book is entitled "Steel, Style and Safety," and is high grade in every particular, being illustrated throughout. By a special process of their own they are able to produce on their goods a very beautiful and artistic finish which carries a high gloss and yet is extremely durable and difficult to deface. The book will be found most interesting to those who appreciate durability, economy of space, fire proof furniture, etc. They state "We always deem it a pleasure to receive suggestions from persons interested in the equipment of their offices with specially made furniture. A contract is neither too large nor too small to receive our most prompt and careful attention." Write to-day for catalogue.

THE AVERY STAMPING CO., Cleveland, Ohio, have sent us, among other printed matter, a four page folder exploiting their patented plain back shovels and spades. This folder is a price list and supercedes all previous lists, effective December 1st. In the construction of the above goods, the blade and socket are forged from one piece of steel. They can be made extra heavy if desired. The Avery people are the sole patentees and manufacturers of these goods. The brands they make are the Never-Break, National, Buckeye and Mohawk. Another attractive circular advertises the Never-Break steel hollow ware, forged steel garden trowels and extra heavy retinned steel covers. One side of this folder presents a picture of the "Beasts of the Wood" playing ping-pong with the Never-Break spiders. Send for the above circulars for further information.

THE HARRINGTON CUTLERY CO., Southbridge, Mass., have recently gotten out an attractive catalogue of the Dexter Knives and Blades this being their catalogue No. 5. It is in large pamphlet form and contains 48 pages. The Harrington Company have offices at 7 and 9 Warren Street, New York; 12 State Street, Chicago, and 109 California Street, San Francisco, Cal. They state that in the making of Knives and Blades they are not limited to the styles shown in their catalogue, but make to order from special designs or patterns anything within the scope of their facilities, and are always pleased to submit samples and prices. Such styles as may be termed regular they carry in stock, special orders are promptly executed. They also state that new and greatly improved facilities are employed, including one of the best equipped hardening rooms in the country. A special envelope size folder included with their catalogue exploits the "Dexter" Butcher Knife which was used in a beef killing and dressing contest by the prize winner. Send for their catalogue. It will be found of unusual interest.

THE HICKOX, MULL & HILL CO., Toledo, Ohio, are presenting to the trade a new and attractive 17-page pamphlet designated as the "Toledo" Text Book. This book is devoted to their garden seeders, plows, cultivators, weeders, mulchers, hillers and wheel hoes. They claim they make "The only complete line of Garden Tools west of the Alleghenies and the only modern line on Earth." They also claim that by improved methods of cultivation made possible by the use of the Toledo garden tools they have peas, lettuce, radishes and corn each season so early that their neighbors are only "dreaming of the good things to come." The soil in which their experiments are made and tons of the finest garden stuff produced, they state, is largely waste land, such as their neighbors pronounced worthless—said they wouldn't get their seed back, etc. Part of it is a bed of yellow sand, the natural product of which was a beautiful crop of sand burrs. Another part, they state, is a clay sink or swale between sand hills, all of which commends the use of the implements used. Their catalogue will be gladly sent to those interested.



THE JOSEPH DIXON CRUCIBLE CO., Jersey City, N. J., have sent us another publication, the title of which is "Graphite for the Motor," which includes some accounts of many great benefits derived from the use of lubricating graphite on motors, together with descriptions of certain graphite lubricants made by the Dixon Company. The book is high grade and up-to-date in appearance and worthy of the firm from whom it comes. The printing is excellent and heavy coated paper is used; the illustrations are very fine half tones. The lubricants described are only those which will be found useful for one special class of machinery—motor cars and motor boats. The Dixon Company publish a great many special circulars and booklets devoted to Graphite Lubrication and Dixon's graphite lubricants. Copies of these will be freely sent to all who desire more detailed or technical information.

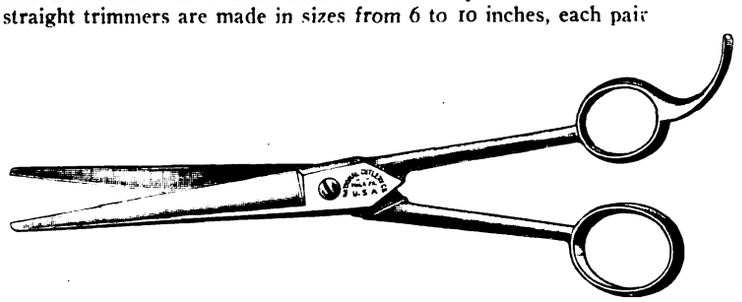
NEW GOODS AND SPECIALTIES.



ALL STEEL SHEARS.

The National Cutlery Co., Philadelphia, Pa., are manufacturing Solid Steel Shears, something entirely new in this important line of goods, and we give an illustration both of the Straight Trimmer and the Barber's Shear. The Solid Steel Shear, among its many advantages over the old style of shear, is lighter in every

ALL STEEL STRAIGHT TRIMMERS.

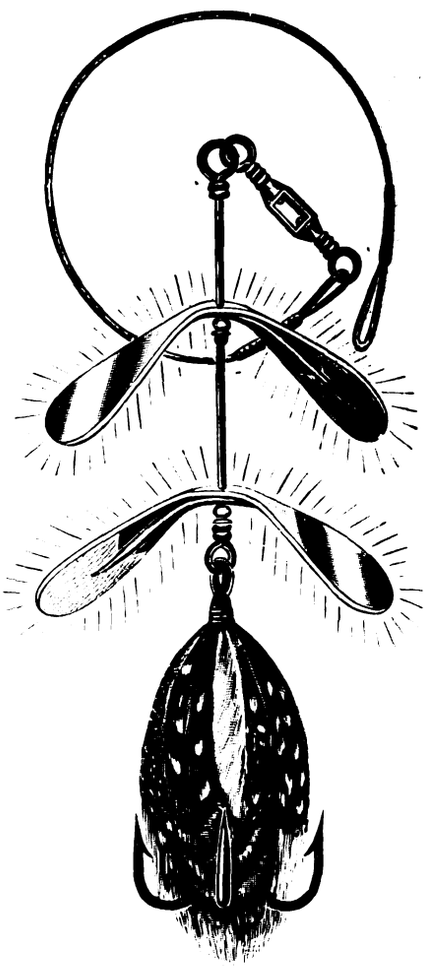
part for its length than usual, the increased strength due to the use of steel permitting this feature. The decrease in weight also makes the shear easier for the operator when he has to handle it in a more or less continuous use. The shape of the bows has been altered so as to conform better to the shape of the hand and the blades have been made considerably narrower. The straight trimmers are made in sizes from 6 to 10 inches, each pair

ALL STEEL BARBER SHEARS.

packed in a separate box. The barber's shears are made in the popular French pattern, with full nickel plated handles and polished blades, in three sizes, 7, 7½ and 8 inch, packed one-half dozen in a box. In the manufacture of these all steel goods, special steel is used and very careful work is put on them, which it is claimed by the manufacturers, makes them of a greatly superior quality.

SAVAGE TARGET MODEL "SINGLE SHOT" RIFLE.

The Savage Arms Company, Utica, N. Y., are the makers of the rifles for target shooting, which we illustrate herewith. No rifle will appeal so strongly to the target shooter who desires to use the inexpensive .22 caliber ammunition as this Savage. It is chambered for the short, long and long rifle cartridges only and

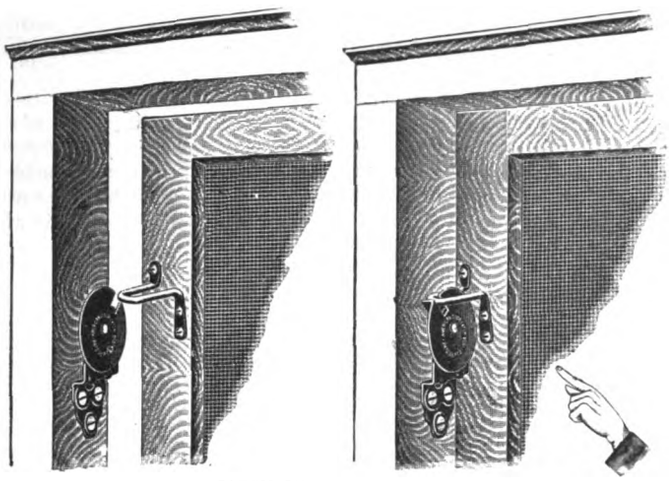


SAVAGE TARGET MODEL "SINGLE SHOT" RIFLE.

a special rifling gives the greatest accuracy with these loads. The arm weighs 4¾ lbs. and is well balanced, especially for off-hand shooting. The Swiss butt plate and heavy barrel 22 inches in length are two of its special features. Longer and heavier barrels cannot be supplied. More important, however, is the adjustable screw, which regulates the pull. No matter what your idea of the trigger pull may be, it may be obtained almost instantly with this new Savage device. The adjusting screw is located on the under side of the trigger and may be instantly reached by simply taking off the stock. Standard Sights are an Ivory Bead front with the famous Savage Micrometer rear. Standard specifications only. 22 Inch Round Barrel, .22 Caliber, Weight 4¾ lbs. Swiss Butt Plate.

PFLUEGER'S LUMINOUS TANDEM SPINNER.

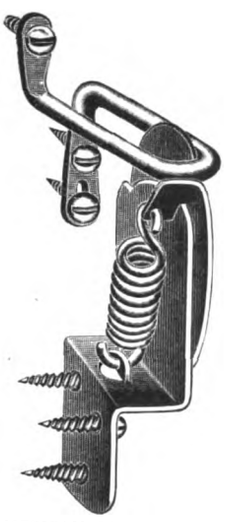
The Enterprise Mfg. Co., Akron, Ohio, are the makers of Pflueger's Luminous Baits, one of the most popular of which is the Luminous Tandem Spinner which we illustrate, which, when in motion so strongly suggests the sure enough wriggles of a live minnow that it is universally successful. They spin with a remarkable freedom. Pflueger's Luminous Baits are artificial lures now made in every conceivable form and shape of insect and small fish life, used in the successful capture of larger fish, which when placed in the waters emit a phosphorescent glow and the luminous properties of this glow, together with the artificial appearance of the bait, attract fish to them from unusual distance. The shine is not a brilliant one, but just enough to represent the unusual glittering scales of a live fish in the water, and when applied to trolling or other baits gives out an extremely alluring effect, especially at night when invariably the best fishing prevails. They are unequalled for day use and are more successful than any other baits for dark, deep or roilly (stirred up) waters.



PFLUEGER'S LUMINOUS TANDEM SPINNER.

AMERICAN DOOR CATCH.

The American Hardware Mfg. Co., Ottawa, Ill., are placing on the market the American Door Catch, which we illustrate herewith. This is the second year that this catch has been offered to the trade. It is made of stamped, wrought steel, corrugated, and possesses a very attractive appearance. The illustration shows the No. 2, or screen door size. The American Screen Door Catch can be used on any kind of doors, from the light cupboard door to the heavy storm door. It is principally adapted for screen doors. The accompanying illustrations give a correct idea of the catch and its method of operation. It is always ready for action. Needs no attention after being placed in position, and keeps the door closed tightly, or permits it to be opened with a gentle shove. Catch is made in three sizes: No. 1, for

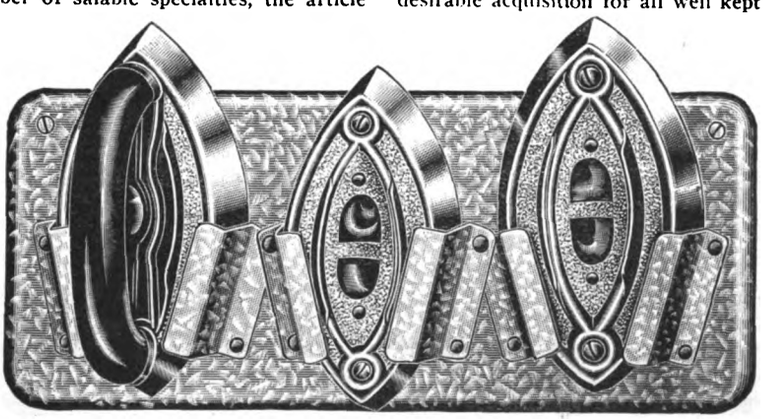


Digitized by Google

heavy storm doors; No. 2, for screen doors; No. 3, for light cupboard and cabinet doors. They are made in any finish desired. For screen doors the usual finishes are old copper and japan on steel. The method of packing this catch is very complete. Catch,

CATCH IN OPERATION.

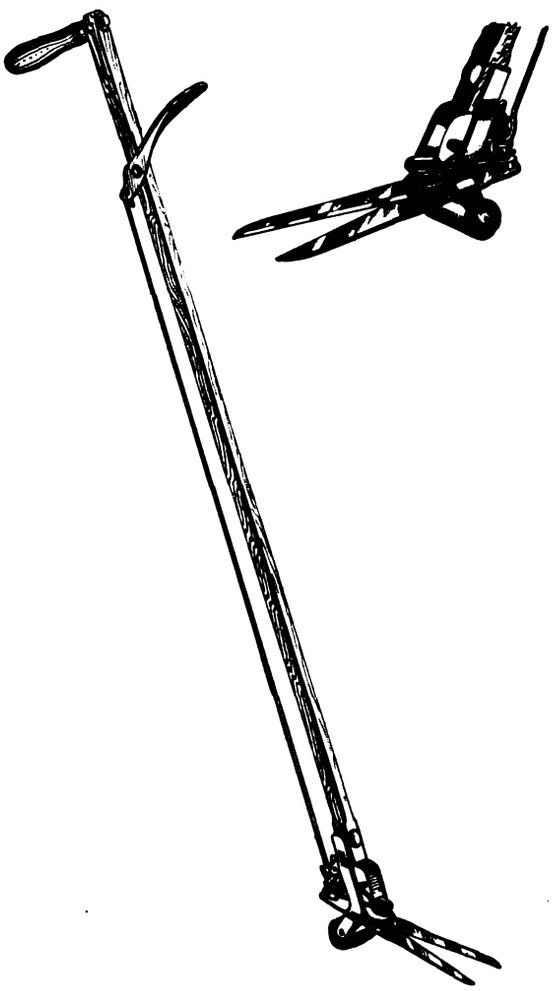
staple, screws, and cardboard templet are packed in a strong envelope; one dozen envelopes in a neat carton, with swing back cover, with colored display cards. The templet is a piece of cardboard with an outline of the catch and staple. It is bent at right



AMERICAN DOOR CATCH.

angles, showing location of the screw holes in door and jamb, with full instructions for attaching. This company will be pleased, upon request, to send a sample catch complete, prepaid and no charge, to any dealer. They may attach the catch to any door in their store, or at their home. They can judge the merit of the circle action. They will find it simple, positive, strong and silent

GLENNY'S NEW SAD IRON RACK.

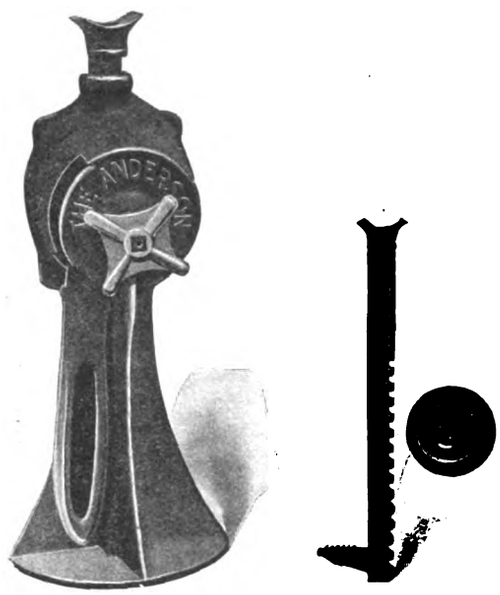


W. H. Glenny & Co., Rochester, N. Y., are placing upon the market, among a large number of salable specialties, the article which we illustrate. This has been something the housekeeper has long wanted, being a new sad iron rack, designed to form the resting place for a set of Potts Sad Irons from one wash day to another. The rack is made from heavy galvanized sheet steel, with three pockets of sizes, in proportion to the three sizes of the standard sad irons. It measures 6 by 14 inches, and while its use is at once apparent, its convenience is a subject of favorable comment. They will be found a valuable addition to a Hardware stock, and a display of Potts irons with the addition of the rack, will facilitate the sale. They are packed as ordered. Weight of a gross is 200 pounds.

GLENNY'S NEW SAD IRON RACK.

THE FISK GRASS TRIMMER.

Eureka Fence Manufacturing Company, Richmond Ind., are placing upon the market the Fisk Grass Trimmer, which is manufactured from a high grade of steel and with a powerful construction, which enables it to cut a rank growth of grass and weeds. While of new and novel construction, it is of great simplicity, and its usefulness and ease of operation makes it a very desirable acquisition for all well kept lawns. It is intended to be used as a shear, around the flower beds, walks, drives, terraces and fences, any place that cannot be reached by the lawn mower.



THE FISK GRASS TRIMMER.

THE ANDERSON AUTOMOBILE JACK.

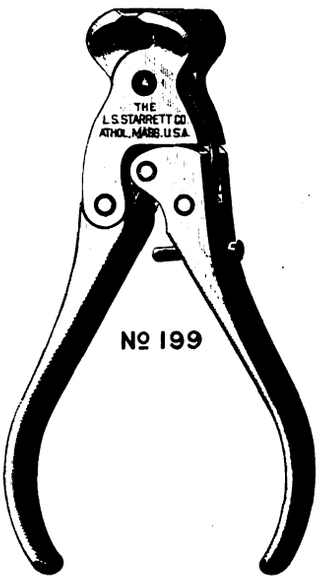
W. H. Anderson & Sons, Inc., Detroit, Mich., are introducing through the Hardware and Cycle Supply trades the Anderson Automobile Jack that we illustrate. It is a quick and positive acting jack, especially designed for automobile use. It is made of malleable iron and weighs eight pounds, and with the top lift will raise the load six inches from the ground. The principle of the Anderson Automobile Jack is clearly shown in the above illustration. The spiral worm engages the teeth in the lifting

THE ANDERSON AUTOMOBILE JACK.

bar. Each revolution of the worm raises the lifting bar one tooth. The lever handle is geared to give increased power, while the small hand wheel is direct connected for quickly raising or lowering the lifting bar to desired position. The small hand-wheel shown on the rear of the Anderson Automobile Jack is used for quickly raising the bar to the desired height, or for lowering the bar to allow Jack to be placed under the axle or piece to be lifted. The lever handle, which when not in use hangs close to the side of the Jack, is used either to raise or lower the load by moving the ratchet pawl either up or down, as desired. The load is always under absolute control and there is no risk of load dropping or of the Jack slipping. No dogs or cams are used to hold the load.

BOYD'S REVOLVING FLOWER STAND.

The Eclipse Novelty Works, Pulaski, Pa., are the manufacturers of Boyd's Revolving Fountain Flower Pot Stand, which is a simple and ornamental flower stand or support for holding potted flowers or plants, and at the same time provides suitable means for watering the same. The stand is a revolving one, and is constructed in its various parts so they can be readily

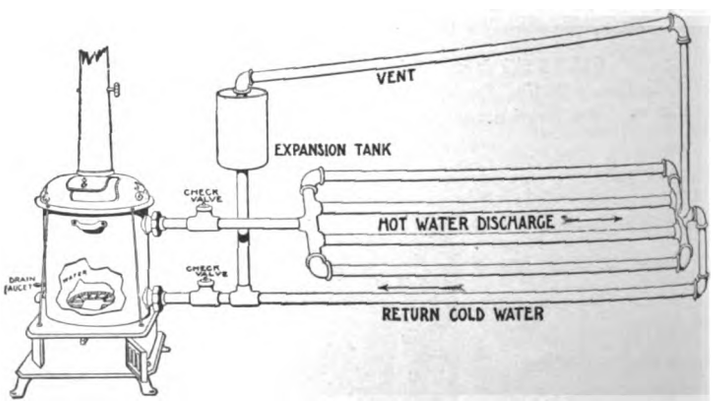


BOYD'S REVOLVING FLOWER STAND.

packed in small space for removal. It is nicely constructed of wrought iron, neatly curved and bent in an artistic manner, and although weighing only forty pounds, will, if necessary, carry a weight of five hundred. The height of stand is five feet, the width at the widest part is thirty-six inches, and will hold twenty-four pots; it is mounted on casters so as to be easy to move about the house or porch, and it is nicely painted in bright colors. In its construction the inventor has provided suitable means for watering the plants, by having a hollow tube run clear through the center to which a hose may be attached, thus forming a fountain. This tube extends about fifteen inches above the topmost plants, and is provided with a suitable sprinkler, which causes the water to fall in a gentle shower over the plants. They are made to be sold at a moderate price. Send for further particulars to the manufacturers.

STARRETT'S CUT-NIPPER NO. 199.

L. S. Starrett Co., Athol, Mass., are the manufacturers of the Cut-Nipper No. 199, suitable for bicycle spokes, etc., or for any purpose where it requires a superior tool. This nipper combines great power with rigidity. Wire can be cut from either extreme end or the jaws. The cutting jaws conform to the inside of a



STARRETT'S CUT-NIPPER NO. 199.

bicycle rim, and will cut off the spokes just as close as may be required. They are all tested before leaving the factory; all parts are interchangeable, so that in case a jaw is broken a new one may readily be obtained.

RIPPLEY'S HOT WATER HEATER.

Rippley Hardware Company, Grafton, Ill., are the makers of the Hot Water Heater, of which we give an illustration. The base of the heater is made of cast iron and has a revolving draw grate which permits the removal of ashes and clinkers. It has a large ash pit which allows plenty of room under the grate for ashes, and still leaves ample space for theair to circulate. Will burn either coal, coke or wood. It is designed for heating poultry and brooder houses, work shops, hog houses and it can be used for heating radiators. The water jacket or cylinder is 24 inches high, 20 inches in diameter and has one inch water space; it is constructed of 12 gauge steel. The water space is full of

RIPPLEY'S HOT WATER HEATER.

water at all times and the water jacket never becomes any hotter than the water, therefore there is no danger of burning it out in a short time.

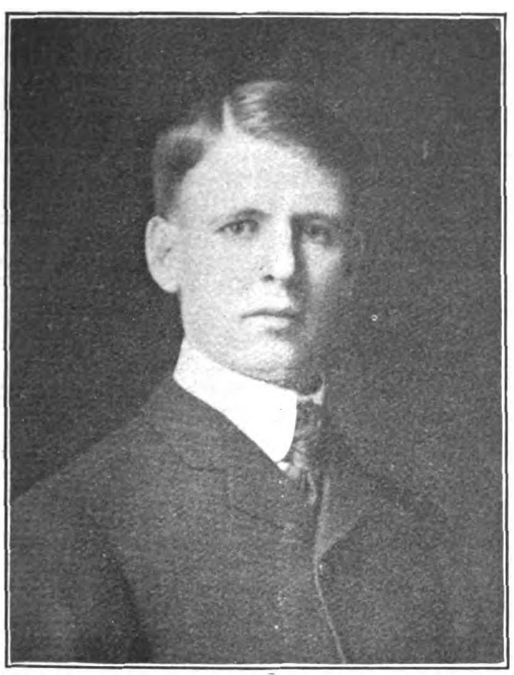
IOWA RETAIL HARDWARE DEALERS ASS'N

The Seventh Annual Convention of the Iowa Retail Hardware Dealers' Association was held at Des Moines February 8th, 9th and 10th, the sessions being held at Commercial Exchange Hall.

The meeting was called to order in informal session on Wednesday morning, February 8th. The president announced the following committees:

RESOLUTIONS—W. B. Kingsberry, Osage; F. B. Bollinger, Afton; J. F. Carstens, Ackley.

PRESS—L. Lindenberg, Dubuque; J. F. Doty, West Liberty; A. R. Sale, Mason City.



NOMINATIONS—W. H. Millard, Cherokee; D. S. Stouffer, Iowa City; James J. Sobolik, Cresco.

QUESTION BOX—T. A. Nichols, Burlington; C. R. Keating, Mt. Ayr; F. W. Woodruff, Correctionville.

AUDITING—M. W. Keating, Afton; Mr. Rogers, Britt; A. C. Vietn, Oakland.

ENTERTAINMENT—C. T. Gadd, Des Moines; H. S. Vincent, Ft. Dodge; J. A. Garver, Jr., Des Moines; H. S. Rayburn, Newton; Mr. Moore, Waverly.

SERGEANT-AT-ARMS—D. H. Huston, Jefferson.

H. S. VINCENT, PRESIDENT.

WEDNESDAY AFTERNOON SESSION.

The convention was called to order by President S. R. Miles, Mason City, after which a prayer was presented by Rev. A. M. Haggard, of Drake University. President S. R. Miles delivered the following:

President's Address.

It is with sincere pleasure that I meet and greet you at this, our seventh annual convention. The year we have just left behind was in many ways one of the most notable in the history of Hardware association work.

For years a campaign of education has been waged by the National and the various State associations with the Hardware jobbers and manufacturers of the country to convince them of the injustice that their methods of marketing a comparatively small portion of their various lines, was working to the retail Hardware dealer, on whom they depend to market the larger per cent. A number of jobbers and manufacturers

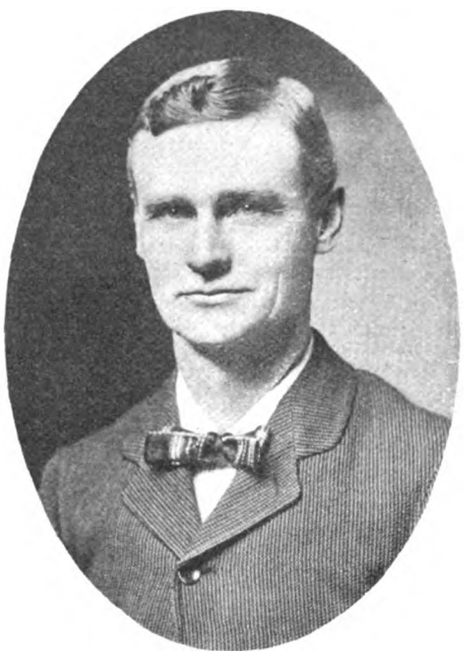
HAVE FOR YEARS RECOGNIZED THE JUSTICE

of our claims, and having foreseen what a continuation of the marketing of Hardware through some channels that had come into existence in recent years would lead to, were confining their business to what may be properly termed legitimate trade channels; but it was left to 1904 to bring to our way of thinking a number of prominent jobbers, as well as manufacturers.

I am glad to be able to say to you to-day that nearly, if not quite every Hardware jobber in the United States has gone on record as against selling any concern that sells direct to consumers by the means of catalogues only; and, gentlemen, I believe these jobbers mean what they say, and if the retail Hardware dealer will take the same stand one of the most serious problems that confronts us will be much nearer a solution than ever before.

Largely as a result of this general awakening on the part of prominent jobbers, on June 27, 1904, there gathered at St. Louis three committees, appointed by their respective associations, five members of the National Retail Hardware Dealers' Association, five members of the National Hardware Association and one member of the Southern Hardware Jobbers' Association.

The purpose of this gathering was to discuss the advisability of forming a permanent committee to take up one question—that of catalogue house competition as



After a thorough discussion of the subject that called the committee

IT AFFECTS THE LEGITIMATE DISTRIBUTION OF HARDWARE.

together, a committee of the whole was organized under the name of the "Wholesale and Retail Joint Committee." A platform was adopted and active work begun by correspondence and personal interviews, and with highly satisfactory results.

November 10th to 12th another session of the Joint Committee was held in New York City. At this time personal interviews were had with a large number of prominent manufacturers, and the question of how the output of the manufacturer should be marketed was thoroughly discussed. Good results have already followed this meeting and will continue indefinitely.

As there will be a full discussion of the work of this committee during this session I will not take up your time further than to say that I feel that the Iowa Association was paid a high compliment

S. R. MILES, EX-PRESIDENT.

in having your president named as a member of this, one of the most important committees ever appointed in the history of Hardware association work, and I count myself fortunate indeed to have been president of the Iowa Retail Hardware Dealers' Association at this time.

As one of the delegates, I attended the meeting of the National Association at Indianapolis in March. There were delegates in attendance from every State affiliated with the National Association. The National might be called a clearing house for the various State Associations. All of the principal subjects discussed at the various State meetings are taken up and thoroughly sifted and boiled down in shape for action, and results obtained during the past year clearly indicate the activity of the National officers and directors, and the wisdom of the various State organizations in combining their efforts under one head. This National body, by its wisdom in the selection of its officers, has come to be recognized as one of the leading factors to-day in the work of correcting some of the many evils that have crept into legitimate distribution of Hardware. Those in charge of the executive work of the association early realizing that only by sane, conservative methods could anything be accomplished, laid their foundations wisely and well. Having laid down a line of action they have hewn strictly and persistently to the line, letting the chips fall where they would.

The National Association.

WILL CONTINUE TO GROW IN STRENGTH AND INFLUENCE

and the large increase in the membership of all State associations during the past year, and the ever increasing interest on the part of the membership in association work certainly makes the future outlook bright.

One of the important questions with which the National Association has had to deal is the "parcels post." Early recognizing the dire results that would follow to, not only retail Hardware dealers, but the entire legitimate retail interests of the country, the enactment of a law by Congress that would enable any one to send by mail to

Digitized by Google

any part of the United States eleven pounds of merchandise for 25 cents. National President Bogardus and Secretary Corey have been untiring in their efforts to prevent the passage by Congress of any such measure, and to them belongs a very large measure of credit, but gentlemen, I can assure you that the enemy, while disconcerted for a time, has not given up the fight. They are now working to get through Congress various measures, seemingly innocent in themselves, but if passed by Congress, will prove an entering wedge for further legislation, and I trust that every Hardware dealer in Iowa, as he may be called on from time to time to assist as he can in the

PREVENTION OF THE PASSAGE OF A "PARCELS POST" LAW

in any form, will respond promptly to the call.

A year ago I took occasion to congratulate this association on the wisdom displayed in the organization of the insurance department. The passing of another year only confirms the wisdom of this action—the volume of business being to-day nearly two and one-half times that of last year. While this is a satisfactory showing, your officers and directors

ARE NOT CONTENT TO REST ON THEIR LAURELS,

but have outlined a campaign for 1905 that should place at least $1,000,000 of business on the company's books before the close of another year. A refund of 25 per cent has been declared on all policies expiring after February 15th, 1905, and prior to March 1st, 1906, this being an increase of 25 per cent over refund of 1904. The amount that can be written in one policy was increased from $2,000 to $3,000—this will enable you to carry at least $1,000 additional insurance in your own company. There are, in round numbers, 1,700 Hardware dealers in Iowa. Should each dealer take a policy for $2,000, we should have the handsome sum of $3,400,000. The benefits to be derived by carrying a part of your insurance in this company must not be based entirely on the size of your refund. In a number of instances a suggestion on the part of a member that he had about concluded to place a part of his insurance with the Hardware Company has been the means of securing for him a lower rate on the entire amount of his insurance. Just in proportion as the business of the company grows, just in that proportion will its ability to serve its policy holders be increased. If you are not a policy holder already in the Iowa Hardware Dealers' Mutual Insurance Company consult your own best interests and make application to-day.

Only in recent years has organization been considered necessary or in any way beneficial. That it is now both leads to but one conclusion, and that is that business conditions have changed. The business of the retail Hardware dealer has been subject to

MORE INROADS BY MERCHANTS IN OTHER LINES

than any other branch of mercantile business. To-day you will find in the grocery store Tin and Galvanized and Enameled Ware; at the house furnisher's, Stoves, Kitchen Utensils and various Hardware specialties; in the drug store, Cutlery, Fishing Tackle and a general line of Sporting Goods; at the lumber yard, Field Fencing and oftentimes Nails and Builders' Hardware; at the tea and coffee store, a full line of Enameled Ware to be given away as prizes, and at the racket store, or more generally called the 5 and 10 cent store, a full line of the little items which at one time were a profitable part of our business.

Are we as Hardware merchants not somewhat at fault? Have we not been too slow in taking up and pushing new lines of goods that properly belong in a Hardware store? Have we paid sufficient attention to the little things in our stores? If merchants have grown rich selling 5 and 10 cent goods, mostly Hardware and Tinware items, surely a 5 or 10 cent department in our stores is at least worthy of consideration. As the trade in one department of our business after another has fallen off the expense has gone merrily on, increasing to an almost alarming extent each year, despite our efforts to keep it down. Surely business conditions have changed. Is there a remedy?

It is an encouraging fact to note that many Hardware dealers, realizing the necessity of protecting their interests, have added a first-class 5 and 10 cent department, have secured the agency for some first-class Field Fence, are selling Stoves on the instalment plan at a handsome increase in their profits, and are finding that paints and painters' sundries, garden seeds, harness and various other lines can be carried with profit. More complete stocks are being carried, more attention being paid to the arrangement and display of their goods. Show windows are kept clean and the goods in them arranged to attract attention. Advertising methods are receiving more attention, with highly satisfactory results.

Given time, there is no question but the retail Hardware business will be put on a more satisfactory price bearing basis.

Has it ever occurred to you to give the annual meetings of this association credit for bringing you to a realizing sense of the changed conditions that exist? And is it not true that these various meetings have been to many of us valuable schools of instruction? Though actively engaged in association work have long recognized the necessity of employing a secretary who could devote his entire time to association work; the organization of the insurance department made it possible for the first time for the association to do this. Mr. Sale was at the close of the meeting last February elected secretary and treasurer of this association, having already been elected secretary of the Insurance Association. The wisdom of combining the office of secretary in the two associations will be fully proven when you know there has been an increase of more than 175 members since the last meeting and the convening of this one. The report of the secretary-treasurer will show the affairs of the association to be in highly satisfactory condition.

I wish to assure you of my appreciation of the many kindnesses shown me during the past year by dealers both in the association and out, and to thank the officers and directors for their loyalty to me and to the association. It has assuredly been an honor of which any man might feel proud to have been the presiding officer of this, one of

THE STRONGEST AND BEST OF ALL THE STATE ASSOCIATIONS

and an association that I predict will in the future be looked to more and more to furnish a solution of some of the many evils that have crept into the Hardware business, but which must succumb to the enthusiastic and persistent efforts as put forth by the various retail Hardware dealers' associations.

In conclusion I wish to assure you of my appreciation of the many kindnesses shown me during the past year by dealers, both in the association and out, and to thank the officers and directors for their loyalty to me and to the association. It has assuredly been an honor of which any man might feel proud to have been the presiding officer of this, one of the strongest and best of all the State associations, and an association that I predict will in the future be looked to more and more to furnish a solution of some of the many evils that have crept into the Hardware business, but which must succumb to the enthusiastic and persistent efforts as put forth by the various retail Hardware dealers' associations.

A. R. Sale, Mason City, next delivered the following:

Secretary-Treasurer's Report.

It is with a feeling of more confidence that this report is submitted than possessed the writer when asked last February to assist the association in the capacity of secretary-treasurer, and it is our sincere desire that the association may feel that the experiment of a clerical rather than a trade secretary has not been altogether a mistake. With an office equipment and a stenographer at your side it is certainly a more convenient plan than for a busy dealer to drop his business and give up the time necessary to conduct and advance the affairs of our association.

It is, of course, unnecessary and unimportant to relate here the many duties that come to the office. Suffice it to say that while at times the work has been exacting and burdensome it has always been pleasant and gratifying. Not as much time has been given to calling on you at your places of business as perhaps should have been done, yet we have nearly always found a genial welcome and a glad hand whenever the latch string has been pulled.

About thirty towns have been visited, and the association idea presented, and in these places many good dealers have become interested in our work. But with only one assistant in the office the exacting detail work of the insurance department has required the presence of the secretary at his desk for a very large share of the time.

The growth in our membership and the communications from members and dealers would certainly indicate a very marked interest and enthusiasm in the work we are attempting to do.

INCREASE IN MEMBERSHIP 80 PER CENT.

Since the closing of the last annual gathering 191 memberships have been received in the office, taking out renewals. This means an increase of 80 per cent in our membership between meetings. This brings the Iowa Association up to its high water mark and nearly abreast of all the State associations, excepting Minnesota, with 600 members, the other States numbering, so far as we were able to get the figures, as follows: Indiana, 425; Ohio, 325; New York, 175; Wisconsin, 400; Pennsylvania, 200; Missouri, 160; Illinois, 300; Nebraska, 200.

It is however, highly probable that the conventions now being held will show large accessions, and the whole line of Hardware associations show a united front that augurs well for the great conflict before them. President Miles, Secretary Corey and others will give you the facts and details of the battle royal that is on, and the various phases of the struggle for supremacy that the retail dealer is called upon to make. If victories are won it will be by the supreme force and momentum of our organizations, coupled with the superior fighting force of the individual who knows that he is not alone, but has good backing.

Mr. Sale's report as treasurer showed that receipts had been $1,991.93, with disbursements amounting to $1,414.16, leaving a balance on hand of $577.77.

B. A. Hand, Ottumwa, read a paper on the following:

Why I Am a Member of the Iowa Retail Hardware Dealers' Association.

By B. A. Hand.

The tendency of modern business is along the lines of consolidation and co-operation. A few years ago I began to observe the methods of the manufacturing and large commercial concerns of this country in their business relations with the retail dealers. As a result of my observation I soon noted that a very marked and significant change had come about in that competition was gradually giving way to steadfast and uniform prices on all commodities. In the beginning it was thought that the trusts would not endure very long; that they were of ephemeral growth; that they would fall to pieces of their own weight, and that the days of former competition would return with redoubled force and effect. But not so; the results were satisfactory to the trusts and they have been and I believe will be perpetuated, however injurious and offensive they may be to the public. If unrestricted, centralization of wealth is inevitable. I believe the trusts as organized and managed to-day are vicious in their tendencies and detrimental to the best interests of the general public.

I call your attention to the results of these gigantic organizations to illustrate the power and effect of organization, for good or bad, depending on the sentiment prevailing in the body of the organization. There may be two motives for organization—one for self aggrandizement, as is apparent in many of the trust organizations,

Digitized by Google

and the other for self preservation. We belong to the latter class. We have

PURSUED A CUTTHROAT POLICY TOO MUCH IN OUR BUSINESS

relations with our brother dealer. Many of us have not followed the live and let live policy, but have exhibited our selfishness in our business relations every week in the year, all the time treasuring the thought that our competitor is after our scalp and that we will sell this particular bill of goods and get revenge, although we shall make no money in the transaction.

Brother dealers, did any of you ever make a sale in the spirit of competition? If you did and follow up this line of action you will never be a millionaire. This is nonsense. Your brother dealer is just as good a fellow as you are, is in business for the same purpose, has a family to support, taxes and rent to pay, and wants to lay something by for a rainy day and old age. You don't know him, although he be in the same block, unless you have a local organization, at which you meet and talk over affairs with a view to being mutually benefited. When you invoiced you had to run to profit and loss $200 or $300. Open up and tell your brother competitor the names of the deadbeats, and he, in turn, will do the same. Get nearer together, get together, not to rob the customer, but to get legitimate prices and banish ill feeling. The progressive, up-to-date, successful merchant of to-day

IS THE ONE WHO MINGLES WITH OTHERS,

is the one who knows what the rest of the world is doing and takes part with them.

In many localities I think the cart has been placed before the horse. The dealer belongs to the State Association, with no local organization at home. The progressive and profitable course to pursue is to organize locally, where it is convenient to meet once a month and spend an hour or two socially combined with business and then round up the year with a big annual State meeting. If the State was organized locally you could depend on a largely increased attendance at the annual meeting. These

STATE ASSOCIATIONS ARE WHAT WE NEED,

finding their complement in a strong and vigorous national body. Bound together in such a manner the National Association can show the doubtful manufacturer or jobber that there is a strong body of intelligent retailers ready to act if necessary to protect their own interests.

OUR INTEREST AND THAT OF THE JOBBER AND MANUFACTURER

is a common one, although some of the manufacturers do not seem to see it that way, and it is our duty and privilege to show them the light. I want to ask where the sales of some of the standard lines of Hardware would be in a few years if left to the catalogue houses? Notice in any of their catalogues the conspicuous place given inferior goods and the effort made to convince people that they are just as good as some well-known brand.

A very large list of manufacturers, in sympathy with our efforts and disgusted with catalogue house methods, has been compiled by the National Association, and it is well for us to look it over. The number has been increasing each year, for they see the earnest effort we have been making and realize that it is for their good as well as ours.

To a young man like myself it means much to meet in council with such men as gather here from year to year—men eminently successful in Hardware and other lines; men who are big enough and

BROAD ENOUGH TO GIVE US THE BENEFIT OF THEIR KNOWLEDGE

and experience freely and willingly; men who are fully capable of handling their own affairs, however complicated, and yet have time to be highly interested in the welfare of the community in which they live, giving their time and money when necessary for the public good. I have never failed to go home from one of these meetings without being full of enthusiasm for the possibilities of the Hardware business, and have utilized things that I have heard here in our own business to great advantage. I have gained in dollars and cents as well as knowledge from my yearly attendance. It has placed me in closer touch with Hardwaremen and the Hardware business, causing me to realize how little I knew, and made me eager to learn more.

Perhaps it might be well for me to state here how I have obtained results from what I have heard or learned at these meetings. Last year some one told of the possibilities of the Washing Machine business. Following the suggestions made, we sold more than four times the number of machines we had sold in any previous year. The same policy was followed in our Wire Fencing, and sales were much larger for the year. I got the idea from an article read here on how many miles of fencing would have to be used before Iowa was properly fenced. Two years ago we followed the suggestions offered on Sewing Machines and have never had reasons to regret it. These

RESULTS WERE OBTAINED BY LARGER STOCKS

and a more varied assortment and not by any price cutting. In fact, the price was advanced on many of these lines. Many such ideas, too numerous to mention, have been acted on, always with good results.

The fire insurance feature of this organization commends itself to any thinking person and can be used by any member. This means that this association will pay any Hardware dealer enough money for a three days' attendance here each year if he will become a member. I know of no stronger argument than this insurance plan.

The opportunity to meet new people and renew acquaintances is too good to be lost and is really one of the things that make life worth the living.

The reading of Mr. Hand's paper led to considerable discussion by the members.

On the programme there appeared a subject of discussion worded as follows:

Can the Services of the Traveling Salesman Be Dispensed With to the Mutual Advantage of the Buyer and Seller?

and A. J. Collins, representing the Majestic Stove and Range Co., St. Louis; C. F. Schmidt, a member from Marshalltown, and E. H. Norris, president of Norris & Loring Hardware Co., Cedar Rapids, were down as leaders of the discussion. All the speakers took the same side of the argument. Mr. Collins said in part:

A SALESMAN'S VIEW.

The history of all of our mercantile business methods is evolutionary, and our present methods are a fair illustration of the survival of the fittest. In times past our jobbers in many cases have been induced here and there to try this or that experiment or innovation, but invariably they have eventually sifted out the wheat from the chaff, the prime consideration always being results accomplished. And, after all, results are always the end in view—results not only for the seller, but for the buyer as well.
